### Subject: Rule 13 Air Permit Modification Application Natrium Extraction and Fractionation Processing Plant Blue Racer Midstream, LLC Permit No. R13-2896E, Plant ID No. 051-00142 Proctor, Marshall County

Dear Mr. Durham:

As requested by Mr. Joseph Kessler of West Virginia Department of Environmental Protection (WVDEP), Apex TITAN, Inc., a subsidiary of Apex Companies, LLC (Apex) is submitting on behalf of Blue Racer Midstream, LLC (BRM) this updated Rule 13 Air Permit application, originally submitted on August 3, 2018, incorporating all revisions to date. This application will update emission representations from existing equipment and equipment under construction, and authorize the construction of four (4) additional cryogenic plants (the Project) at the Natrium Extraction and Fractionation Processing Plant (the Plant), located in Proctor, Marshall County. The Plant is currently authorized by WV DEP Rule 13 Air Permit Number R13-2896E. The Project is a minor modification to the Rule 13 Air Permit, and will not trigger major source permitting for any criteria pollutants.

During review of the original application submittal, additional changes to the representations were submitted through revision pages on October 22, 2018 to include additional natural gasoline storage tanks. Furthermore, additional revisions are being submitted to authorize construction of a refrigerated propane storage tank and revisions requested by Mr. Kessler to ease the review process of the application, including addition of a thorough explanation of the applicability of federal requirements to all heaters and clarification on nested source applicability. As discussed with Mr. Kessler, resubmittal of this application will not affect the timing for permit issuance and will not require repayment of the application fee.

Enclosed please find one (1) hard copy and two (2) electronic copies of the Rule 13 air permit application.

Page 2 of 2

BRM and Apex truly appreciate the WV DEP's review and approval of the enclosed application. If you have any questions or require additional information, please do not hesitate to contact Ms. Jill Thornberry of BRM at (740) 421-9255 ext. 119 or at <u>jthornberry@blueracermidstream.com</u> or myself at (469) 365-1121 or at <u>odeleon@apexcos.com</u>.

Sincerely,

Apex TITAN, Inc. ea 2

Osman De Leon, P.E. Project Manager

#### INTRODUCTION

Blue Racer Midstream, LLC (BRM) is submitting this Rule 13 air permit modification application to the West Virginia Department of Environmental Protection (WV DEP) Air Permits Division (APD) to update emission representations based on as-built configuration of existing equipment and equipment under construction, and to authorize the construction of four (4) additional cryogenic plants (the Project) at the Natrium Extraction and Fractionation Processing Plant (Natrium Plant, or Plant) located in Proctor, Marshall County, West Virginia. The Plant emits carbon monoxide (CO), oxides of nitrogen (NO<sub>X</sub>), particulate matter (PM), including PM with aerodynamic diameters of 10 and 2.5 microns or less (PM<sub>10</sub> and PM<sub>2.5</sub>, respectively), sulfur dioxide (SO<sub>2</sub>), volatile organic compounds (VOC), hazardous air pollutants (HAPs), and Greenhouse Gases (GHG).

#### **Plant Permitting History**

In an effort to facilitate the WV DEP's review of air permitting applicability to the Project and retrospectively to the Plant, the following paragraphs present a summary of the Plant's air permitting and ownership history.

Original Plant Construction under Dominion Natrium LLC Ownership

- August 2011: Original air permit application submittal
  - 400 Million standard cubic feet per day (MMscfd) Natural Gas Processing Facility, including two 200 MMscfd cryogenic units and associated natural gas liquid (NGL) fractionation
  - February 1, 2012: Anticipated Start of Construction (SOC)
  - December 1, 2012: Anticipated Start of Operation (SOO)
  - Site-wide Potential to Emit (PTE), excluding fugitives:

		•••
CO:		37.97 T/yr
NO <sub>X</sub> :		23.94 T/yr
PM/PM <sub>10</sub> /PM <sub>2.5</sub> :		4.76 T/yr
SO <sub>2</sub> :		0.37 T/yr
VOC:		6.03 T/yr
CO <sub>2</sub> e:		85,062 T/yr
	NO <sub>X</sub> : PM/PM <sub>10</sub> /PM <sub>2.5</sub> : SO <sub>2</sub> : VOC:	NO <sub>X</sub> : PM/PM <sub>10</sub> /PM <sub>2.5</sub> : SO <sub>2</sub> : VOC:

- Synthetic minor source, due to federally enforceable operating limitations on the annual fuel firing rate of the hot oil heater Emissions Unit Number (EU#) S001.
- December 19, 2011: Permit R13-2896 issued
- May 15, 2013: Actual Start of Operation (SOO, construction exceeded anticipated project timeline)
- Upon SOO, flare operational issues resulted in visible emissions in excess of those allowed under 40 Code of Federal Regulations (CFR) §60.18 (adopted by reference in WV regulation §45-16-4) and insufficient destruction efficiency.
- July 31, 2013: Consent Order issued by WV DEP

### August 14, 2013: Change of Ownership to Blue Racer Natrium, LLC

- August 20, 2013: Rule 13 permit modification application submittal
  - Change of ownership from Dominion Natrium LLC to Blue Racer Natrium, LLC
  - o Replacement of the flare tip (modification to EU# S004) to resolve operational issues
  - Installation of a vapor recovery unit (VRU) on natural gasoline tank EU# S005, to capture and route the tank emissions (primarily natural gas blanket emissions) to hot oil heater EU# S001 fuel system instead of the flare
  - Installation of a VRU on slop tank EU# S007, to capture and route the tank emissions (primarily natural gas blanket emissions) to Flare EU# S004
  - Installation of two (2) new natural gas-fired heaters, EU#s S012 and S013 to provide heat to the second cryogenic unit
  - Update to site-wide PTE, excluding fugitives:

•	CO:	24.09 T/yr
•	NO <sub>X</sub> :	34.35 T/yr
•	PM/PM <sub>10</sub> /PM <sub>2.5</sub> :	5.93 T/yr
•	$SO_2$ :	0.46 T/yr
•	VOC:	2.22 T/yr
•	CO <sub>2</sub> e:	94,877 T/yr

- Retention of synthetic minor source status due to federally enforceable operating limitations on the annual fuel firing rate of the hot oil heater EU# S001.
- December 26, 2013: Permit R13-2896B issued by WV DEP
- During this review, WV DEP agreed that the installation of the two (2) heaters were a separate, distinct project from the original construction of the Plant, as these heaters were not anticipated to be needed during the original design and permitting of the Plant.

#### August 1, 2014: Fractionation Plant Expansion

- August 1, 2014: Rule 13 permit modification application submittal
- Change of owner/operator name to Blue Racer Midstream, LLC (Blue Racer Natrium, LLC was absorbed into its parent company)
- Increase in NGL fractionation capacity of the Plant by:
  - Tying a new NGL pipeline into the Plant's receiving area, and increasing the potential truck, railcar, and barge unloading of NGL;
  - Installation of two (2) deethanizer towers and associated equipment;
  - Installation of an ethane amine treating unit and associated equipment;
  - Installation of a depropanizer tower and associated equipment;
  - Installation of a debutanizer tower and associated equipment;
  - Installation of four (4) natural gas-fired hot oil heaters, EU#s S016, S017, S018, and S019;
  - Installation of glycol reboiler EU# S020 and regen gas heater EU# S022;
  - Installation of 30,000 bbl gasoline storage tank EU# S023 equipped with a natural gas blanket to reduce VOC emissions;
  - Installation of four (4) pressurized isobutane bullet tanks;
  - Increased utilization of existing Plant hot oil heater EU# S001;

- Revised plant natural gas processing rate from 400 MMscfd to 460 MMscfd;
- Increased throughput of the existing Plant product storage tanks, which are pressurized to prevent emissions during normal operations;
- Update to site-wide PTE, excluding fugitives:

•	CO:	99.23 T/yr
•	NO <sub>X</sub> :	72.55 T/yr
•	PM/PM <sub>10</sub> /PM <sub>2.5</sub> :	16.78 T/yr
•	$SO_2$ :	1.63 T/yr
•	VOC:	10.20 T/yr
•	CO <sub>2</sub> e:	288,861 T/yr

- Due to Supreme Court ruling, GHG emissions alone may not trigger Prevention of Significant Deterioration (PSD) permitting on sources with total criteria pollutant potentials to emit less than the PSD major source thresholds.
- November 6, 2014: Permit R13-2896C issued by WV DEP

## April 15, 2015: Plant Flare Replacement

- April 15, 2015: Rule 13 permit modification application submittal
  - Replacement of existing plant flare EU# S004 with a ground flare EU# S004A.
    - Removal of emergency flare EU# S021.
    - Update to site-wide PTE, excluding fugitives:

•	CO:	97.62 T/yr
•	NO <sub>X</sub> :	72.91 T/yr
•	PM/PM <sub>10</sub> /PM <sub>2.5</sub> :	16.77 T/yr
•	SO <sub>2</sub> :	1.63 T/yr
•	VOC:	9.48 T/yr
•	CO <sub>2</sub> e:	288,749 T/yr

- The flare replacement did not result in an increase in potential emissions of criteria pollutants above major source permitting thresholds.
- October 30, 2015: Permit R13-2896D issued by WV DEP.

July 7, 2015: Installation of Cryogenic Train No. 3

- July 7, 2015: Rule 13 permit modification application submittal
  - Installation of one (1) 230 MMscfd natural gas cryogenic processing train;
  - Installation of two (2) 230 MMscfd glycol dehydration units EUs# S031 and S032 and associated 3.0 million British thermal units per hour (MMBtu/hr) glycol reboilers EUs# S028 and S029;
  - Installation of one (1) 9.7 MMBtu/hr regen gas heater EU# S024;
  - Installation of one (1) 26.3 MMBtu/hr cryo HMO heater EU# S026;
  - Update to emission controls for previously installed glycol dehydration unit EU# S006;
  - Installation of three (3) vapor combustor units, EU#s V001, V002 and V003 to control emissions from all dehydration units during times when emissions are not routed to S001 fuel system; and
  - Addition of piping and fugitive components EU# FUG AREA 3.
  - Update to site-wide PTE, excluding fugitives:

•	CO:	132.35 T/yr
•	NO <sub>X</sub> :	100.75 T/yr
•	PM/PM <sub>10</sub> /PM <sub>2.5</sub> :	18.48 T/yr
•	SO <sub>2</sub> :	1.80 T/yr
•	VOC:	37.15 T/yr
•	CO <sub>2</sub> e:	319,069 T/yr

- The addition of new equipment resulted in an increase in the site-wide potential emissions of NO<sub>x</sub> and CO criteria pollutants above Title V major source permitting thresholds. As a result, BRM will submit a Title V application within 12 months after start of operation of cryogenic Plant No. 3.
- January 15, 2016: Permit R13-2896E issued by WV DEP.

## **Project Description**

With this filing, BRM is requesting that the WV DEP authorize the following updates to the Plant operations, based on as-built conditions:

- Clarify hot oil heater EU# S001 NO<sub>X</sub> emission factor, based on updated vendor commitments and reduce fuel monitoring sampling frequency;
- Eliminate permit terms for regen gas heater EU# S022 since it was not constructed;
- Eliminate permit terms for glycol dehydration unit EU# S031 since it was not constructed;
- Clarify glycol dehydration unit EU# S006 natural gas throughput, glycol sump emissions, and emission controls;
- Eliminate permit terms for glycol reboiler EU#s S020 and S028, since they were not constructed (the glycol reboiler associated with dehydration unit EU# S006 uses hot oil as a heat source for the regeneration process);
- Eliminate permit terms for vapor combustor EU#s V001 and V002 since they were not constructed;
- Clarify the EU# designation for the slop storage tank from S007 to TK-906, and emission point ID from P007 to TK-906;
- Clarify the EU# designation for the natural gasoline storage tanks from S005 to TK-802, and S023 to TK-2802;
- Clarify control configuration on slop storage tank EU# TK-906 (previously known as S007);
- Incorporate uncontrolled produced water and slop water loading emissions EU# S015;
- Clarify emission representations for ethane amine treater EU# S011;
- Eliminate permit terms for ethane amine treater EU# S014 since it was not constructed;
- Clarify control configuration on barge loading emissions EU# S033;
- Clarify emission factors on fire pump engine EU#s S002 and S003 to reflect current regulatory requirements;
- Clarify ground flare EU# S004A waste gas streams and emission representations;
- Clarify fugitive component counts for EU#s FUG AREA 1 and FUG AREA 2 based on leak detection and repair (LDAR) component counts and monitoring program control efficiencies;

- Clarify fugitive component counts for EU# FUG AREA 3 based on component counts from a facility of similar design and monitoring program control efficiencies;
- Clarify pigging operation EU# S035 emission representations;
- Incorporate pigging flare EU# S034 for control of propane pig trap;
- Incorporate emissions from gasoline dispensing tank EU# TK-L-1 and associated loading operations EU# L-1;
- Incorporate pressurized truck loading operations for propane, butane, isobutane, and natural gasoline; and
- Claim permit exemptions for de-minimis sources.
- Although the vapor combustor is authorized as the primary emission control mechanism for glycol dehydration unit EU# S032, BRM would like to have the flexibility to route the dehydration unit emissions to the hot oil heater EU# S001 as fuel. For permitting purposes, BRM is representing continuous combustion of the dehydration unit emissions by the vapor combustor as the most conservative scenario.

In addition, BRM requests authorization of the following equipment associated with the installation of four (4) additional Cryogenic Plants:

- Installation of three (3) 230 MMscfd natural gas cryogenic processing plants;
- Installation of one (1) 345 MMscfd natural gas cryogenic processing plant;
- Installation of three (3) 9.7 MMBtu/hr regen gas heater EU#s S036, S044 and S048;
- Installation of one (1) 19.28 MMBtu/hr regen gas heater EU# S040;
- Installation of three (3) 26.3 MMBtu/hr cryo HMO heater EU#s S037, S045 and S049;
- Installation of one (1) 54.67 MMBtu/hr cryo HMO heater EU# S041;
- Installation of two (2) 61.6 MMBtu/hr hot oil heater EU#s S052 and S053;
- Installation of one (1) ethane amine treater EU# S054 and associated vapor recovery unit to control emissions from regenerator vent;
- Installation of deethanizer towers;
- Installation of one (1) slop storage tank EU# TK-2906 and one (1) produced water storage tank EU# TK-2907, and associated loading operations;
- Installation of one (1) 10.09 MMBtu/hr stabilizer heater EU# S056;
- Installation of four (4) natural gasoline storage tanks EU#s TK-3802, TK-4802, TK-5802, and TK-6802;
- Installation of one (1) refrigerated propane storage tank EU# TK-7802;
- Installation of back-up electric generator engine(s) (EU# S057) with a capacity not to exceed 16,000 horsepower (hp);
- Installation of four (4) spherical storage tanks;
- Installation of four (4) pressurized bullet tanks;
- Installation of additional pig traps for inlet and residue gas lines;
- Expansion of stabilizer system to increase liquid handling capacity, subsequently increasing fugitive component counts on EU# FUG AREA 2;
- Addition of piping and fugitive components EU#s FUG AREA 4, FUG AREA 5, FUG AREA 6 and FUG AREA 7;

- Authorization of additional barge loading operations for larger capacity barges; and
- Authorization of pressurized NGL/condensate unloading operations EU# S055.
- The following table demonstrates the site-wide PTE and existing source PTE after revisions to representations have been performed:

Regulated Air Pollutant Oxides of Nitrogen (NO <sub>X</sub> ):	Site-wide Total PTE (T/yr) 210.46	Site-wide Total PTE (Excluding Fugitives) (T/yr) 210.46
Carbon Monoxide (CO):	233.75	233.75
Volatile Organic Compounds (VOC):	388.98	212.69
Particulate Matter (PM):	72.16	28.30
PM with an aerodynamic diameter of less than or equal to 10 microns (PM <sub>10</sub> )	39.99	28.30
PM with an aerodynamic diameter of less than or equal to 2.5 microns (PM <sub>2.5</sub> )	29.47	28.30
Sulfur Dioxide (SO <sub>2</sub> ):	2.66	2.66
Greenhouse Gases (CO <sub>2</sub> e):	466,864	463,720

- The Plant is an existing PSD minor source of regulated air contaminants. This modification project is not a PSD major source by itself. As a result, PSD permitting has not been triggered by the project for any regulated air contaminant.
- Currently, construction of cryogenic plant No. 3 is in progress and operations have not commenced. The revisions to the existing equipment emission representations result in an increase in VOC emissions above Title V major source permitting thresholds, and the addition of new equipment results in an increase in the site-wide potential emissions of NO<sub>x</sub> and CO. As a result, BRM will submit a Title V permit application after submittal of this application.
- Although GHG emissions are above the PSD major source threshold of 100,000 tons per year (T/yr) CO<sub>2</sub>e, GHG emissions cannot trigger PSD permitting unless at least one criteria pollutant triggers PSD permitting.

35A. Certification of Information. To certify this permit application, a Responsible Official (per 45CSR§13-2.22 and 45CSR§30-2.28) or Authorized Representative shall check the appropriate box and sign below.

#### Certification of Truth, Accuracy, and Completeness

I, the undersigned Responsible Official / Authorized Representative, hereby certify that all information contained in this application and any supporting documents appended hereto, is true, accurate, and complete based on information and belief after reasonable inquiry I further agree to assume responsibility for the construction, modification and/or relocation and operation of the stationary source described herein in accordance with this application and any amendments thereto, as well as the Department of Environmental Protection, Division of Air Quality permit issued in accordance with this application, along with all applicable rules and regulations of the West Virginia Division of Air Quality and W.Va. Code § 22-5-1 et seq. (State Air Pollution Control Act). If the business or agency changes its Responsible Official or Authorized Representative, the Director of the Division of Air Quality will be notified in writing within 30 days of the official change.

#### **Compliance Certification**

Except for requirements identified in the Title V Application for which compliance is not achieved, I, the undersigned hereby certify that, based on information and belief formed after reasonable inquiry, all air contaminant sources identified in this application are in compliance with all applicable requirements.

	permit application with the signature(s) to the DAQ, Permitting Section, at the sapplication. Please DO NOT fax permit applications.
FOR AGENCY USE ONLY - IF THIS IS A TITLE V SOURCE:	
Forward 1 copy of the application to the Title V Permittin	g Group and:

□ For Title V Administrative Amendments:

NSR permit writer should notify Title V permit writer of draft permit.

☐ For Title V Minor Modifications:

Title V permit writer should send appropriate notification to EPA and affected states within 5 days of receipt,

NSR permit writer should notify Title V permit writer of draft permit.

For Title V Significant Modifications processed in parallel with NSR Permit revision:

- □ NSR permit writer should notify a Title V permit writer of draft permit,
- Public notice should reference both 45CSR13 and Title V permits,
- EPA has 45 day review period of a draft permit.

All of the required forms and additional information can be found under the Permitting Section of DAQ's website, or requested by phone.

#### **BLUE RACER MIDSTREAM, LLC**

## I, Natalie E. Tennant, Secretary of State of the State of West Virginia, hereby certify that

## **BLUE RACER MIDSTREAM, LLC**

Control Number: 99Y8J

a limited liability company, organized under the laws of the State of Delaware

has filed its "Application for Certificate of Authority" in my office according to the provisions of West Virginia Code §31B-10-1002. I hereby declare the organization to be registered as a foreign limited liability company from its effective date of December 20, 2012, until a certificate of cancellation is filed with our office.

Therefore, I hereby issue this

## **CERTIFICATE OF AUTHORITY OF A FOREIGN LIMITED LIABILITY COMPANY**

to the limited liability company authorizing it to transact business in West Virginia

Given under my hand and the Great Seal of the State of West Virginia on this day of December 20, 2012

Il E. Your

Secretary of State

DFC 202012

IN THE OFFICE OF Natalie E. Tennant Secretary of State IN THE OFFICE OF SECRETARY OF STATE: (304)558-8000 1900 Kanawha Blvd E. ## ATTACHMENT C: INSTALLATION AND START-UP SCHEDULE RULE 13 AIR PERMIT APPLICATION NATRIUM EXTRACTION AND FRACTIONATION PROCESSING PLANT BLUE RACER MIDSTREAM, LLC

This permit application intends to revise and clarify emission representations on existing equipment, equipment under construction, and authorize new equipment to be constructed at the Plant. As a result, BRM understands that the updated emission limits will not become effective until the permit revision is issued. Construction of new equipment is intended to commence on November 1, 2018 or upon issuance of this permit, whichever comes later. Operation of new equipment is not expected to occur at least until April 1, 2019.

#### ATTACHMENT D: REGULATORY DISCUSSION

This attachment discusses the federal and state regulations that apply to the Project and the existing Plant.

#### D.1. 45 CSR 2 and 2A: PM from Combustion of Fuel in Indirect Heat Exchangers

45 Code of State Rules (CSR) 2-3 limits opacity from fuel burning equipment to ten percent (10%) opacity, based on a six-minute block average, except during periods of startup, shutdown, or malfunction (SSM). At all times, including periods of SSM, BRM will, to the extent practicable, maintain and operate the Plant's fuel burning unit(s) in a manner consistent with good air pollution control practices for minimizing emissions.

45 CSR 2-4 contains weight-based PM emissions standards for fuel burning units. According to 45 CSR 2-2, a fuel burning unit is defined as any furnace, boiler apparatus, device, mechanism, stack or structure used in the process of burning fuel or other combustible material for the primary purpose of producing heat or power by indirect heat transfer. Fuel burning units with a heat input less than ten (10) MMBtu/hr are exempt from this rule. Process heaters, primarily used to heat a material to initiate or promote a chemical reaction in which the material participates as a reactant or catalyst, are not subject to this rule. Therefore, the regen gas heaters (EU#s S012, S024, S036, S044, and S048), glycol reboiler (EU# S029), and regen gas heater (EU# S040) are exempt from 45 CSR 2-4 since they meet the definition of process heaters. The Plant's heaters are all type "b" units, as defined in the rule. For type "b" fuel burning units, the PM emission limit is the product of 0.09 and the total design heat input for such units in MMBtu/hr, not to exceed 600 pounds per hour (lb/hr) PM from all such units. The HMO heaters (EU#s S013, S026, S037, S041, S045, and S049), hot oil heaters (EU#s S001, S016, S017, S018, S019, S052, and S053), and stabilizer heater (EU# S056) at the Plant are subject to this rule. These units have allowable and potential PM emission rates as follows:

	Maximum Heat Input	Allowable PM	Potential PM Emission
Emissions Unit	(MMBtu/hr)	<b>Emission Rate</b>	Rate
ID		(lb/hr)	(lb/hr)
S001	216.7	19.50	1.61
S013	26.3	2.37	0.19
S016	61.6	5.54	0.46
S017	61.6	5.54	0.46
S018	61.6	5.54	0.46
S019	61.6	5.54	0.46
S026	26.3	2.37	0.20
S037	26.3	2.37	0.20
S041	54.67	4.92	0.41
S045	26.3	2.37	0.20
S049	26.3	2.37	0.20
S052	61.6	5.54	0.46
S053	61.6	5.54	0.46
S056	10.09	0.91	0.08
Total		600	5.85

As shown in the above table, these units satisfy the requirements of this rule.

No other requirements of this rule apply to the Plant.

## D.2. 45 CSR 4: Discharge of Air Pollutants that Cause Objectionable Odors

This rule prohibits the discharge of air contaminants that cause or contribute to an objectionable odor. This rule applies to the Plant, and BRM will continue to comply with this rule.

## D.3. 45 CSR 6: Control of Air Pollution from Combustion of Refuse

This rule establishes emission standards for PM and requirements for activities involving incineration of refuse which are not subject to, or are exempted from, regulation under a federal counterpart for specific combustion sources. This rule also prohibits (with limited exception) open burning and sets forth the registration, permitting, reporting, testing, emergency, natural disaster and exemption provisions for activities involving the combustion of refuse and land clearing debris. This rule applies to the Plant. BRM will continue to comply with the open burning provisions of this rule.

This rule limits flare and vapor combustor's visible emissions to 20% opacity, except during periods aggregating to no more than eight (8) minutes in any sixty (60) minute period, during which opacity is limited to 40%. This rule also requires that flares and vapor combustors be permitted and tested upon agency request. BRM will continue to operate the ground flare EU# S004A and vapor combustor EU# V003 in accordance with this rule. The pigging flare EU# S034 only operates during propane pig trap operation, and is operated in accordance with this rule.

## D.4. 45 CSR 7: To Prevent and Control Particulate Matter Air Pollution from Manufacturing Processes and Associated Operations

This rule establishes emission standards for PM and opacity from manufacturing processes. This rule does not apply to emissions regulated by 45 CSR 2, 3, or 5 or to sources that have a PTE less than one (1) lb/hr PM and an aggregate of less than one thousand (1,000) lb/yr for all such sources of PM located at the stationary source. Therefore, this rule does not apply to the Plant's fuel burning units, EU#s S001, S012, S013, S016, S017, S018, S019, S024, S026, S029, S036, S037, S040, S041, S044, S045, S048, S049, S052, S053, and S056 because they are regulated by 45 CSR 2. The remaining emissions sources at the Plant have negligible PM emission rates and/or are not manufacturing processes. Therefore, this rule does not apply.

# D.5. 45 CSR 10: To Prevent and Control Air Pollution from the Emission of Sulfur Oxides

This rule establishes weight-based emission standards for  $SO_2$  from fuel burning units. Marshall County is listed as a Priority I region in Table 45-10A. The Plant's heaters are all type "b" units, as defined in the rule. For type "b" fuel burning units in a Priority I region, the  $SO_2$  emission limit is the product of 3.1 and the total design heat inputs for such units in MMBtu/hr, with each stack not exceeding 25% of the total allowable emission rate for the site. All heaters at the Plant are fired on sweet natural gas, with an emission rate well below this limitation.

No other requirements of this rule apply to the Plant.

## D.6. 45 CSR 13: Permits for Construction, Modification, Relocation and Operation of Stationary Sources, Notification Requirements, Administrative Updates, Temporary Permits, General Permits, Permission to Commence Construction, and Procedures for Evaluation

This rule establishes the permitting requirements for minor sources. The Plant is currently permitted by Rule 13 Permit No. R13-2896E, in accordance with this rule. The Plant is a minor source relative to PSD permitting thresholds, and the Project-related emission increases are below the PSD major source thresholds, thus the Plant is subject to the minor source permitting requirements of this rule. Detailed emission rate calculations are included in Attachment N to this application.

## D.7. 45 CSR 14: Permits for Construction and Major Modification of Major Stationary Sources for the Prevention of Significant Deterioration of Air Quality

The Plant is a minor source relative to PSD. The Project-related emission increases are below the PSD major source thresholds. Therefore, this rule is not applicable. According to 40 CFR §60.41b, a steam generating unit is defined as a device that combusts any fuel or byproduct/waste and produces steam or heats water or heats any heat transfer medium. This term does not include process heaters, which are defined as devices that are primarily used to heat a material to initiate or promote a chemical reaction in which the material participates as a reactant or catalyst. According to 40 CFR §52.21, a major stationary source includes fossil-fuel boilers (or combinations thereof) totaling more than 250 MMBtu/hr heat input. The Plant is not one of the named sources under 40 CFR §52.21. However, the Plant includes several heaters that meet the definition of steam generating units, that when combined, the total heat input exceeds 250 MMBtu/hr. These sources are considered "nested" sources within the Plant, which include hot oil heater EU#s S001, S016, S017, S018, S019, S052, and S053, cryo HMO heater EU#s S013, S026, S037, S041, S045, and S049, and stabilizer heater EU# S056. Process heaters (i.e. direct fire heaters) are not included as part of the nested sources since they do not employ a heat medium for heat transfer. Upon issuance of this permit, the total potential to emit associated with the Plant's boilers (nested sources) will be considered an existing major source, and any subsequent projects will be evaluated against PSD significance thresholds. The following table summarizes the nested source status for all heaters at the Plant.

Emission Unit ID	Description	Maximum Heat Input (MMBtu/hr)	Boiler/Process Heater	Nested Source
S001	Hot Oil Heater	216.7	Boiler	Yes
S012	Regen Gas Heater	9.7	Process Heater	No
S013	Cryo HMO Heater	26.3	Boiler	Yes
S016	Hot Oil Heater	61.6	Boiler	Yes

Emission	Description	Maximum Heat	<b>Boiler/Process</b>	Nested
Unit ID		Input (MMBtu/hr)	Heater	Source
S017	Hot Oil Heater	61.6	Boiler	Yes
S018	Hot Oil Heater	61.6	Boiler	Yes
S019	Hot Oil Heater	61.6	Boiler	Yes
S024	Regen Gas Heater	9.7	Process Heater	No
S026	Cryo HMO Heater	26.3	Boiler	Yes
S029	Glycol Reboiler	3.0	Process Heater	No
S036	Regen Gas Heater	9.7	Process Heater	No
S037	Cryo HMO Heater	26.3	Boiler	Yes
S040	Regen Gas Heater	19.28	Process Heater	No
S041	Cryo HMO Heater	54.67	Boiler	Yes
S044	Regen Gas Heater	9.7	Process Heater	No
S045	Cryo HMO Heater	26.3	Boiler	Yes
S048	Regen Gas Heater	9.7	Process Heater	No
S049	Cryo HMO Heater	26.3	Boiler	Yes
S052	Hot Oil Heater	61.6	Boiler	Yes
S053	Hot Oil Heater	61.6	Boiler	Yes
S056	Stabilizer Heater	10.09	Boiler	Yes

#### D.8. 45 CSR 16: Standards of Performance for New Stationary Sources

This rule incorporates by reference the New Source Performance Standards (NSPS) codified in 40 CFR Part 60. The following sections address the NSPS applicable to the Plant, which include:

- NSPS Subpart A, General Provisions
- NSPS Subpart Db Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units
- NSPS Subpart Dc Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units
- NSPS Subpart Kb Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984
- NSPS KKK Standards of Performance for Equipment Leaks of VOC from Onshore Natural Gas Processing Plants for Which Construction, Reconstruction, or Modification Commenced After January 20, 1984 and on or Before August 23, 2011
- NSPS IIII Standards of Performance for Stationary Compression Ignition Internal Combustion Engines
- NSPS JJJJ Standards of Performance for Stationary Spark Ignition Internal Combustion Engines
- NSPS OOOO Standards of Performance for Crude Oil and Natural Gas Production, Transmission and Distribution for which Construction, Modification, or Reconstruction commenced after August 23, 2011, and on or before September 18, 2015
- NSPS OOOOa Standards of Performance for Crude Oil and Natural Gas Facilities for which Construction, Modification, or Reconstruction commenced after September 18, 2015

## D.8.1. NSPS A

BRM must comply with the general provisions of Title 40, Code of Federal Regulations, Part 60 (40 CFR 60), Subpart A, which establish notification, recordkeeping, testing, monitoring, and reporting requirements for any and all sources subject to a particular NSPS.

## D.8.2. NSPS Db

NSPS Db (40 CFR 60, Subpart Db - Standards of Performance for Industrial-Commercial-Institutional Steam Generating Units) is applicable to steam generating units that commence construction, modification, or reconstruction after June 19, 1984, and that have a heat input capacity greater than 100 MMBtu/hr. According to 40 CFR §60.41b, a steam generating unit is defined as a device that combusts any fuel or byproduct/waste and produces steam or heats water or heats any heat transfer medium. This term does not include process heaters, which are defined as devices that are primarily used to heat a material to initiate or promote a chemical reaction in which the material participates as a reactant or catalyst. Hot oil heater EU# S001 is subject to the NO<sub>X</sub> emission limitation of 0.1 lb/MMBtu because it fires natural gas, as defined in this rule. The heater complies with this requirement as demonstrated by the continuous emissions monitoring system.

The hot oil heater is exempt from the  $SO_2$  limitations of this subpart because it fires natural gas, as defined in this rule, and has a PTE less than 0.32 lb/MMBtu  $SO_2$ .

BRM will demonstrate continuous compliance with NSPS Db by complying with the applicable monitoring, recordkeeping, and reporting requirements of this rule.

BRM complies with the fuel sulfur content requirements of this rule by implementing a fuel analysis plan that was submitted to WV DEP on August 31, 2015. Currently, fuel gas to the hot oil heater is sampled on a weekly basis for sulfur content. Data collected since the implementation of the plan demonstrates that the sulfur content of the natural gas fuel is consistently less than 4 parts per million (ppm) sulfur, with no spikes or any other indications that the sulfur content could increase suddenly. As a result, BRM petitions WV DEP to reduce the fuel sampling frequency to a quarterly frequency, per §60.49b(r)(2)(iv).

In addition, BRM currently complies with the requirement of §60.49b(d)(1) by recording the amount of fuel gas combusted by the hot oil heater on a daily basis. The hot oil heater is not expected to use fuels other than pipeline quality natural gas, and the fuel demand of the heater is not expected to change drastically from day to day. As a result, BRM proposes that, in the event that fuel measurement for any given day is not recorded (i.e. due to circumstances outside BRM's control), the daily fuel measurement shall be based on the average of the measurement recorded on the day immediately before the missing date and the measurement recorded on the day immediately afterwards. Since fuel consumption does not change drastically over short periods of time, this averaging method would provide an accurate representation of the fuel consumed by the heater.

#### D.8.3. NSPS Dc

NSPS Dc (40 CFR Part 60, Subpart Dc - Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units) outlines specific requirements for steam generating units built after June 9, 1989 with a heat duty between 10 MMBtu/hr and 100 MMBtu/hr. According to 40 CFR §60.41c, a steam generating unit is defined as a device that combusts any fuel or byproduct/waste and produces steam or heats water or heats any heat transfer medium. This term does not include process heaters, which are defined as devices that are primarily used to heat a material to initiate or promote a chemical reaction in which the material participates as a reactant or catalyst. Hot oil heaters, EU#s S016, S017, S018, S019, S052, and S053, HMO heaters EU#s S013, S026, S037, S041, S045, and S049, and stabilizer heater S056 at the Plant are subject to this rule. Because the heaters fire natural gas, they have no emissions standards, but they will continue to comply with the monitoring, recordkeeping, and reporting requirements of this subpart, as applicable.

Glycol reboiler EU# S029 and regen gas heaters EU#s S012, S024, S036, S044, and S048 are not subject to this rule since their fuel firing rates are below 10 MMBtu/hr and do not employ a heat transfer medium. Regen gas heater EU# S040 is not subject to this rule since it is a direct fire heater that does not use a heat medium for heat transfer.

#### D.8.4. NSPS Kb

NSPS Kb (40 CFR Part 60 Subpart Kb – Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984) outlines specific requirements for storage vessels containing volatile organic liquids. NSPS Kb is not applicable to pressurized storage vessels, or to storage vessels with a capacity less than 75 cubic meters (472 barrels).

The natural gasoline tanks, EU# S005, S023, TK-3802, TK-4802, TK-5802, and TK-6802, are subject to NSPS Kb. These tanks are equipped with a natural gas blanket to reduce VOC emissions. The tank emissions are vented to a closed vent system through a VRU for compression and then to the hot oil heater EU# S001 fuel supply. BRM will continue to comply with applicable monitoring, recordkeeping, and reporting requirements of NSPS Kb. Furthermore, the proposed refrigerated propane storage tank, EU# TK-7802, is subject to NSPS Kb. The refrigerated propane tank will be equipped with a VRU to recapture propane product that flashes-off from the storage tank, re-condense the product and route it back to the storage tank. Therefore, the propane storage tank will satisfy the requirements of this rule.

Slop oil storage tanks EU#s TK-906 and TK-2906, and produced water storage tank EU#s TK-907 and TK-2907 are not subject to the requirements of this rule since each tank's storage capacity is less than 1,589.874 m<sup>3</sup> (10,000 bbl) and they store liquids prior to custody transfer. The gasoline dispensing tank EU# TK-L-1 has a storage capacity less than 75 m<sup>3</sup> and is therefore not subject to the requirements of this rule.

#### D.8.5. NSPS KKK

NSPS KKK (40 CFR Part 60 Subpart KKK - Standards of Performance for Equipment Leaks of VOC from Onshore Natural Gas Processing Plants for which Construction, Reconstruction, or Modification commenced after January 20, 1984, and on or before August 23, 2011) applies to the fugitive components associated with cryo plant no. 1 (excluding demethanizer) and cryo plant no. 2 (EU# FUG AREA 1). BRM will continue to comply with the applicable requirements of NSPS KKK.

Fugitive components associated with the demethanizer on cryo plant no. 1 and fractionator no. 2 (EU# FUG AREA 2), and cryo train no. 3 (EU# FUG AREA 3) were constructed after the applicability dates of this rule, and thus are not subject to these requirements. The proposed cryo plant nos. 4, 5, 6 and 7 (EU#s FUG AREA 4, FUG AREA 5, FUG AREA 6 and FUG AREA 7) will be constructed after the applicability date of this rule, and thus are not subject to these requirements. Fractionator no. 1 has undergone a modification that triggers the monitoring requirements of NSPS OOOOa as of May 24, 2018, and thus, is no longer subject to this rule.

## D.8.6. NSPS IIII

NSPS IIII (40 CFR Part 60 Subpart IIII - Standards of Performance for Stationary Compression Ignition Internal Combustion Engines) outlines specific requirements for new or modified engines. According to 40 CFR §60.4200(a)(4), compression ignition internal combustion engines commencing construction after July 11, 2005 are subject to these standards. The existing emergency firewater pump engines, EU#s S002 and S003, are manufacturer-certified as compliant with NSPS IIII; therefore, they meet the requirements of NSPS IIII. BRM will continue to comply with the applicable monitoring, recordkeeping, and reporting requirements of NSPS IIII.

## D.8.7. NSPS JJJJ

NSPS JJJJ (40 CFR Subpart JJJJ - Standards of Performance for Stationary Spark Ignition Internal Combustion Engines) affects owners and operators of stationary spark ignition internal combustion engines (SI ICE) that commence construction, reconstruction or modification after June 12, 2006. The proposed emergency generator engine(s) under EU# S057 at the Plant will be constructed after June 12, 2006. The emergency generator engine(s) are expected to provide electricity during periods of unavoidable loss of electric service and are expected to operate for no more than 100 hours per year for non-emergency situations. Therefore, the emergency generator engine(s) will comply with the requirements of NSPS JJJJ for emergency engines.

## D.8.8. NSPS 0000

NSPS OOOO (40 CFR Part 60 Subpart OOOO – Standards of Performance for Crude Oil and Natural Gas Production, Transmission, and Distribution for which Construction, Modification or Reconstruction commenced after August 23, 2011, and on or before September 18, 2015) outlines requirements for well completions, pneumatic controllers, equipment leaks from natural gas processing plants, reciprocating

compressors, centrifugal compressors, sweetening units, and storage vessels which were constructed, modified or reconstructed after August 23, 2011 and on or before September 18, 2015.

Any pneumatic controllers installed at the Plant during the applicability dates of this rule will operate at a natural gas bleed rate of zero scfh.

The existing storage tanks (EU#s TK-906 and TK-907) at the Plant were constructed prior to the applicability dates of this rule, therefore, they are not subject to Subpart OOOO. The proposed storage tanks (EU#s TK-2906, TK-2907, TK-3802, TK-4802, TK-5802, TK-6802, and TK-7802) will be constructed after September 18, 2015 and thus are not subject to this rule.

BRM will comply with applicable requirements for reciprocating compressors subject to Subpart OOOO.

The existing FUG AREA 1 commenced construction prior to August 23, 2011, and, therefore, is not subject to this rule. The NGL fractionation unit 2 and demethanizer 1 (EU# FUG AREA 2) are subject to NSPS OOOO. The cryogenic plant associated with FUG AREA 3 commenced construction prior to September 18, 2015, and therefore, is subject to NSPS OOOO. The proposed cryogenic plants associated with EU#s FUG AREA 4, FUG AREA 5, FUG AREA 6, and FUG AREA 7 will commence construction after September 18, 2015 and are not subject to the requirements of this rule.

FUG AREA 2 and FUG AREA 3 are subject to the equipment leak standards for onshore natural gas processing plants. According to §60.5400 equipment leaks must comply with the requirements of §§60.482-1a(a), (b), and (d), 60.482-2a, and 60.482-4a through 60.482-11a, except as provided in §60.5401.

The ethane amine unit EU# S011 removes  $CO_2$  and trace amounts of  $H_2S$  from the NGL stream. The requirements of NSPS OOOO do not apply to this amine unit since it does not process natural gas from natural gas wells. The proposed ethane amine unit EU# S054 will be constructed after September 18, 2015, and thus, is not subject to the requirements of this rule.

## D.8.9. NSPS OOOOa

NSPS OOOOa (40 CFR Part 60 Subpart OOOOa – Standards of Performance for Crude Oil and Natural Gas Facilities for Which Construction, Modification or Reconstruction Commenced after September 18, 2015) outlines requirements for well completions, pneumatic controllers, equipment leaks from natural gas processing plants, reciprocating compressors, centrifugal compressors, sweetening units, and storage vessels which are constructed, modified or reconstructed after September 18, 2015.

Any pneumatic controllers installed at the Plant will operate at a natural gas bleed rate of zero scfh.

The existing storage tanks at the Plant (EU#s TK-906 and TK-907) were constructed prior to the applicability date of this rule, therefore, they are not subject to Subpart OOOOa. The proposed storage tank EU#s TK-2906 and TK-2907 potential emissions of VOC are less than 6 T/yr, and thus, are not subject to the requirements of this rule. The proposed natural gasoline tanks EU#s TK-3802, TK-4802,

TK-5802 and TK-6802, and the proposed refrigerated propane storage tank EU# TK-7802 are subject to the requirements of NSPS Kb and therefore are not subject to the requirements of this rule.

BRM will comply with applicable requirements for reciprocating compressors subject to Subpart OOOOa.

Equipment from FUG AREA 4, FUG AREA 5, FUG AREA 6 and FUG AREA 7 will be subject to the equipment leak monitoring requirements under this subpart. Additionally, fractionator no. 1 (frac 1) underwent an upgrade project that is considered a modification, in accordance with this rule. As a result, frac 1 became subject to the monitoring requirements of NSPS OOOOa as of May 24, 2018. BRM will comply with the fugitive monitoring requirements of this rule by complying with the requirements of §§60.482-1a(a), (b), and (d), 60.482-2a, and 60.482-4a through 60.482-11a, except as provided in §60.5401a.

The proposed ethane amine unit EU# S054 removes  $CO_2$  and trace amounts of  $H_2S$  from the NGL stream. The requirements of NSPS OOOOa do not apply to this amine unit since it does not process natural gas from natural gas wells.

## D.9. 45 CSR 17: To Prevent and Control PM Air Pollution from Materials Handling, Preparation, Storage, and Other Sources of Fugitive PM

BRM will continue to utilize dust control measures to prevent fugitive PM from being emitted beyond the property line. BRM will also continue to maintain the Plant roads in a manner consistent with this rule.

## D.10. 45 CSR 19: Permits for Construction and Modifications in Nonattainment Areas

The Plant is located in the Franklin Tax District in Marshall County, West Virginia. In 2013, EPA designated this area as nonattainment for the 2010 primary SO<sub>2</sub> National Ambient Air Quality Standards (NAAQS). Therefore, the major source threshold for SO<sub>2</sub> is 100 T/yr. As shown in Attachment N – Emissions Calculations, the Plant's potential to emit SO<sub>2</sub> is well below this threshold. Therefore, this rule does not apply.

## D.11. 45 CSR 20: Good Engineering Practices as Applicable to Stack Heights

The Plant does not include any existing or proposed stacks that exceed the Good Engineering Practice height.

## D.12. 45 CSR 22: Air Quality Management Fee Program

This rule contains fee structure information for permits to construct and operate. In accordance with 45CSR 22-3, BRM is submitting an application fee in accordance with Rule 13 air permit applications as follows:

- NSPS Source: \$ 1,000
- NESHAP Source: \$ 2,500

		 4,500
•	Base Fee:	\$ 1,000

### D.13. 45 CSR 30: Requirements for Operating Permits

As discussed in previous air permit applications, upon completion of construction of cryo plant no. 3, the Plant will be a major source of  $NO_x$  and CO with respect to Title V permitting thresholds. Currently, construction of cryogenic plant no. 3 is in progress and operations have not commenced. Upon review of existing equipment emission representations, BRM has determined that the existing equipment PTE for VOC exceeds the Title V permitting thresholds. BRM will submit a Title V permit application following submittal of this permit application.

#### D.14. 45 CSR 34: Emission Standards for Hazardous Air Pollutants

This rule incorporates by reference the National Emissions Standards for Hazardous Air Pollutants (NESHAP) codified in 40 CFR Part 61 and in 40 CFR Part 63 Maximum Achievable Control Technology (MACTs).

40 CFR Part 61 contains standards for various materials, including radon, beryllium, mercury, vinyl chloride, radionuclides, benzene, asbestos, and inorganic arsenic emissions from various types of sources. The Plant is not subject to any NESHAPs listed in 40 CFR Part 61.

40 CFR Part 63 contains MACT standards for various source categories and/or industries. The Plant is an area source of HAPs. The Project does not include the installation of any equipment subject to a MACT standard listed in 40 CFR Part 63. The following sections address the MACT standards that potentially apply to the existing Plant, including:

- MACT HH National Emissions Standards for Hazardous Air Pollutants from Oil and Natural Gas Production Facilities
- MACT ZZZZ National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines
- MACT DDDDD National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers and Process Heaters
- MACT JJJJJJ National Emissions Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers at Area Sources

## **D.14.1. MACT HH**

MACT HH (40 CFR Part 63 Subpart HH – National Emissions Standards for Hazardous Air Pollutants from Oil and Natural Gas Production Facilities) outlines specific requirements for major or area sources at oil and natural gas production facilities. As previously discussed, the Plant is located at an area source of HAPs. The glycol dehydration units EU#s S006 and S032 are triethylene glycol (TEG) dehydration units. Because each dehydration unit's potential benzene emissions are less than 1 T/yr, the units are only

subject to recordkeeping requirements to demonstrate exemption from the control requirements of the rule.

## D.14.2. MACT ZZZZ

MACT ZZZZ (40 CFR Part 63 Subpart ZZZZ – National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines) outlines specific requirements for new or modified engines at major and area sources of HAPs. The emergency firewater pump engines, EU#s S002 and S003, are new compression ignition reciprocating internal combustion engines located at an area source of HAPs. Accordingly, these units will continue to meet the requirements of MACT ZZZZ by meeting NSPS IIII. The proposed emergency generator engines, EU# S057, are spark ignition reciprocating internal combustion engines located at an area source of HAPs, and will meet the requirements of MACT ZZZZ by meeting NSPS JJJJ.

#### D.14.3. MACT DDDDD

MACT DDDDD (40 CFR Part 63 Subpart DDDDD – National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers and Process Heaters) outlines specific requirements for industrial, commercial, and institutional boilers and process heaters at major sources of HAPs. The Plant is not a major source of HAPs and is thus not subject to the requirements of this rule.

#### D.14.4. MACT JJJJJJJ

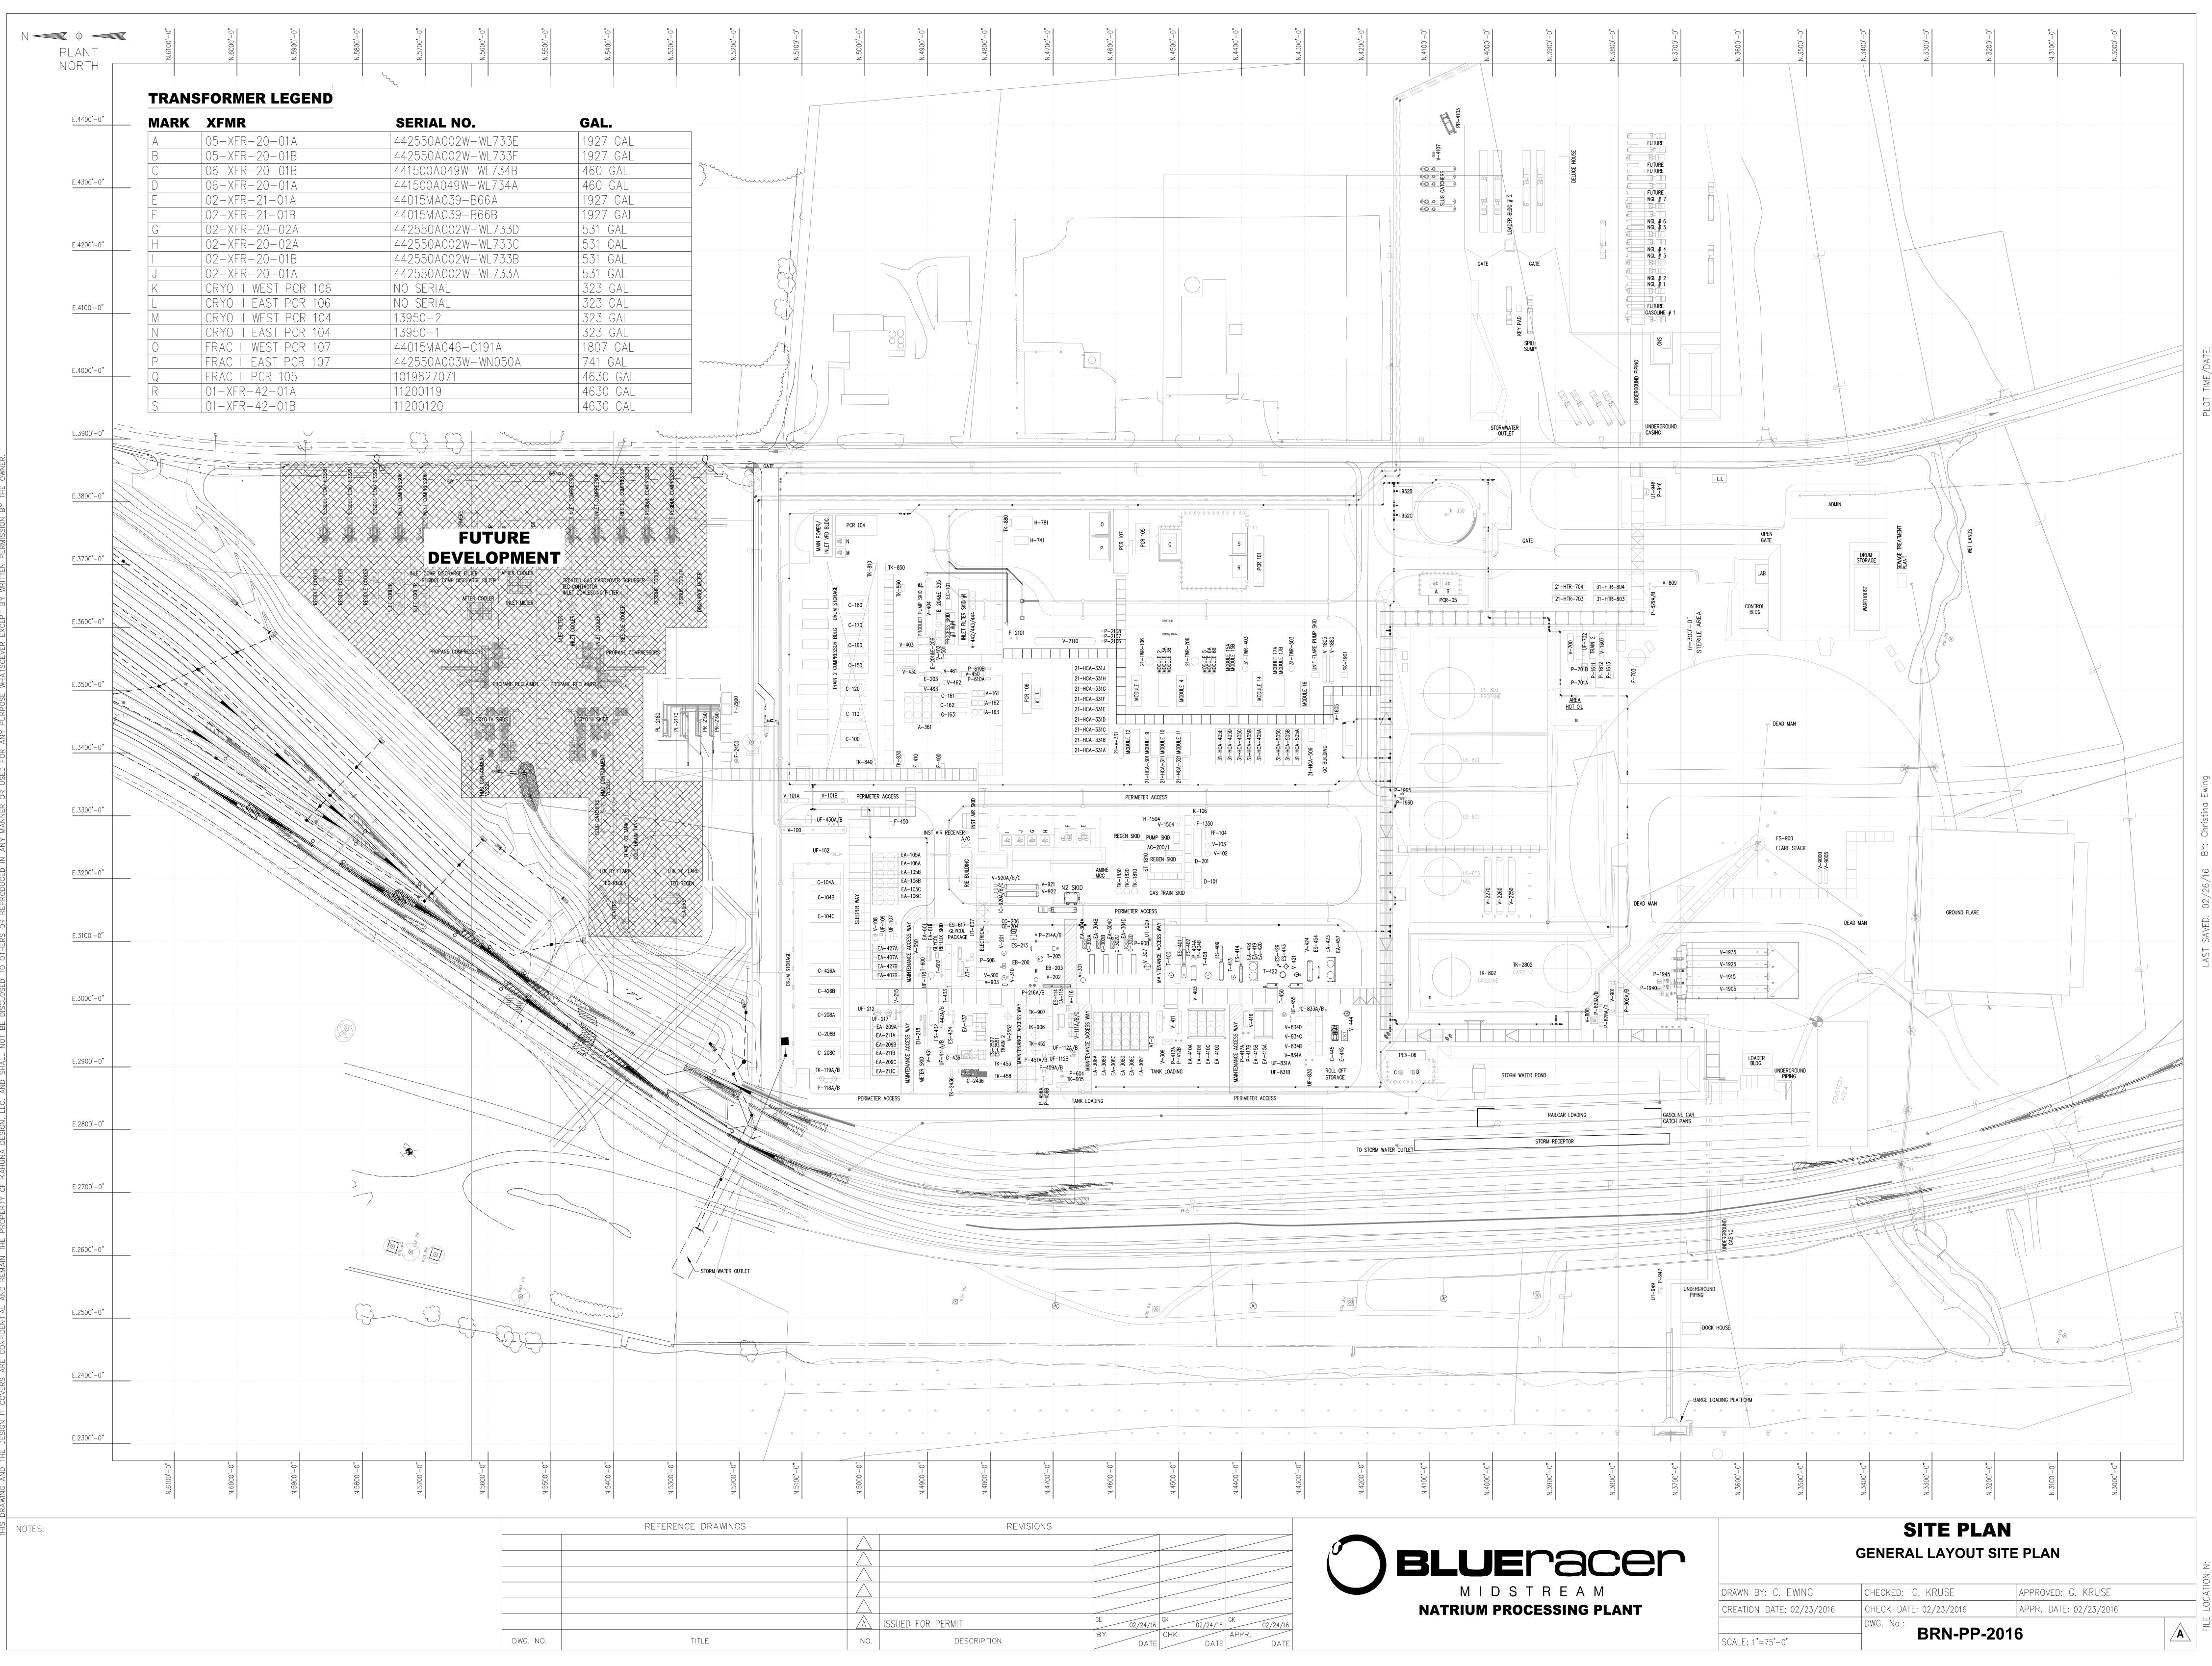

MACT JJJJJJ (40 CFR Part 63 Subpart JJJJJJ – National Emissions Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers at Area Sources) outlines requirements for boilers at area sources of HAPs. Per §63.11195(e), gas-fired boilers as defined by this subpart are not subject to the requirements of this rule. Therefore, the Plant's heaters are not subject to the requirements of this rule.

# ATTACHMENT G: PROCESS DESCRIPTION

The Natrium Extraction and Fractionation Processing Plant is an existing 690 MMscfd natural gas processing plant with NGL processing capability. The Plant will consist of seven (7) cryogenic plants (Cryo 1, Cryo 2, Cryo 3 (under construction), and proposed Cryo 4, Cryo 5, Cryo 6 and Cryo 7), each with a natural gas handling capacity of 230 MMscfd and Cryo 5 with a capacity of 345 MMscfd, and two (2) fractionation plants (Frac 1 and Frac 2). This Project will update emission representations for the two (2) existing cryogenic plants (Cryo 1 and Cryo 2) and the two (2) fractionation units (Frac 1 and Frac 2) based on as-built conditions, and authorize construction of four (4) additional cryogenic plants. Currently, the third cryogenic plant (Cryo 3) is under construction. Upon completion of the Project, the Plant's capacity will increase to a total of 1,725 MMscfd.

# G.1. Inlet Gas/Liquids Separation and Liquids Handling

Gas from the pipeline passes through horizontal separators, or slug catchers, which separate entrained liquids from the inlet gas. In addition, liquids can be received via "pigging" operations. "Pigging" is an industry term to describe a pipeline maintenance activity, in which a solid slug, called a "pig" is inserted into the pipeline at a "pig launcher." As the pig travels through the pipeline with the natural gas, it pushes liquids that have collected in lower areas of the pipeline. The liquids and the pig that is pushing the liquids arrive at a "pig receiver" downstream of the "pig launcher." The liquids are routed into the slug catcher. During pigging operations, the pig trap is depressurized by routing the gas contents to the ground flare, with a minimal amount venting to atmosphere. As shown in Attachment N, pigging equipment operates in inlet gas, residue gas, propane, or condensate service. Pigging emissions in propane service are routed to a flare designated specifically for this operation.

The liquids are treated in the stabilizer (application of heat provided by the hot oil heater), where the lighter components are removed and combined with the separated inlet gas for processing. Heavier liquid components not driven off in the stabilization process are then routed to the fractionation plant for further processing or directly to natural gasoline storage if further processing is not required. Water separated from the NGL in the stabilizer is routed to the produced water tank, and hauled off site via trucks. Since the composition of the produced water is expected to be primarily water with minimal amounts of oil, the produced water tank vents to atmosphere.

NGL can be received at the Plant via pipeline and truck. Received NGL is stored in the pressurized NGL tanks prior to processing. The NGL unloading operations are performed under pressure, in order to prevent emissions to the atmosphere, with a minimal amount of VOCs released during disconnection of the loading line (EU# S055).

# G.2. Natural Gas Processing

After liquids separation at the slug catcher, the inlet gas is compressed to increase pressure. The inlet compressors are electric-driven, such that they do not result in air emissions during normal operations (i.e., other than fugitive equipment piping leaks).

Each compressor is equipped with a blowdown vent through which a small amount of natural gas is emitted during shutdown (i.e., for decompression, which is required for safety purposes). These emissions are routed to the ground flare for combustion.

The ground flare will have one annual emission limit per pollutant, which will include normal operations and scheduled maintenance, startup, and shutdown (MSS) emissions (combustion of blowdown vent emissions).

After compression, the wet gas is transported to the triethylene glycol (TEG) dehydration system, which uses TEG to remove water from the gas. Cryo 1 and Cryo 2 share a single dehydration system with two contactors with a total capacity of 460 MMscfd, where the sweet gas comes into contact with glycol. The rich glycol (water saturated) solution is routed to a flash tank, where light-end VOCs flash-off from the solution. Flash gas generated by the flash tank are routed to the hot oil heater (EU# S001) as fuel, with a destruction efficiency of 98%. The rich glycol is then heated in the glycol regenerator to release water from the solution prior to being routed back into the dehydration process. Heat for the glycol regeneration process is provided by the hot oil heater (EU# S001). Emissions from the glycol regenerator still vent are also routed to the hot oil heater (EU# S001) as fuel, for 98% destruction efficiency. Cryo 3 will operate a 230 MMscfd dehydration unit, where emissions from the BTEX condenser and flash tank can be routed to a vapor combustor (EU# V003) for 98% destruction efficiency or to the hot oil heater (EU# S001) for combustion as fuel. Given the size of the heater, the waste gas contribution to the total fuel gas consumed by the heater is minimal. As a result, when waste gas is routed to the hot oil heater (EU# S001) as fuel, emissions from the dehydration units are considered negligible. BRM is permitting the Cryo 3 dehydration unit emissions assuming that all waste gas is routed to the vapor combustor on a continuous basis, to be conservative, but would like to keep the flexibility to route the waste gas to the hot oil heater (EU# S001) as fuel. The proposed cryo plants 4 through 7 will employ molecular sieve dehydration systems only.

From the TEG units, the gas is routed to the molecular sieve dehydration system, where the water content is reduced further. Heat from hot oil in Cryo 1 and natural gas-fired heaters in Cryo 2, Cryo 3, Cryo 4, Cryo 5, Cryo 6 and Cryo 7 are used to heat a small amount of natural gas that is slip-streamed from the dry gas line as needed to regenerate the beds. The wet gas is then routed back into the inlet process stream. The molecular sieve units do not have vents to atmosphere. Therefore, the only emissions from these units are associated with fugitive piping/equipment leaks and combustion-related emissions from the heaters.

After molecular sieve dehydration, the propane-cooled cryogenic units remove heavier components to produce NGL by cooling the stream and reducing the stream pressure. One cryogenic unit utilizes heat from the hot oil heater, and the remaining units have their own dedicated natural gas-fired heat medium oil (HMO) heaters. The natural gas leaving the cryogenic units is lean and dry (i.e., pipeline quality), and it is compressed via electric-driven residue gas compressors and shipped off site via pipeline.

The NGL can be transferred back to the NGL storage/surge tanks or directly into the deethanizers or depropanizers of the NGL fractionation plants. The only emissions from these cryogenic units are associated with fugitive piping/equipment leaks and the associated HMO heaters.

# G.3. NGL Fractionation

NGL leaving the cryogenic units or received on site as raw material feed is fed to a series of trayed columns for separation into constituent product gases. At the bottom of each column is a reboiler that is heated by the hot oil systems. As the NGL stream enters a column in the middle, the reboiler vaporizes a portion of the feed to produce stripping vapors rising inside the column. This stripping vapor rises up through the column contacting down-flowing liquids, allowing for the fractionation of the liquids. Vapor leaving the top of the column enters a condenser where heat is removed by a cooling medium and the vapor condenses. Liquid is returned to the column as reflux to limit the loss of heavy components overhead. The product leaving the lower part of the column has the highest boiling point, whereas the hydrocarbon leaving the top of the column has the lowest boiling point.

The NGL fractionation plants include three deethanizers, two depropanizers, two debutanizers, and a butane splitter. This project will authorize two additional deethanizers.

Ethane product may be further treated in the ethane amine units before being compressed and shipped off site via pipeline.

In the ethane amine units (EU#s S011 and S054), amine contactors are used to remove  $CO_2$  and trace amounts of H<sub>2</sub>S from the ethane product stream. Small amounts of hydrocarbons may also be absorbed in this process as well. The saturated (rich) amine from the contactors enters a flash tank where gaseous vapors are flashed and routed to the ground flare. After the flash tank, the liquid stream (rich amine) is routed to an amine regenerator, where heat from the hot oil system vaporizes the remaining  $CO_2$ , H<sub>2</sub>S and hydrocarbons from the rich amine stream. The lean amine is returned to the amine contactors for reuse. The waste gas from amine regenerator EU# S011 is vented to the atmosphere, and the waste gas from amine regenerator EU# S054 is captured by a vapor recovery unit (VRU) and routed to the Plant's discharge line. The amine unit vent streams are primarily (~97%)  $CO_2$ , with water and trace amounts (~0.5%) of hydrocarbons.

The remaining separated NGL streams (propane, butanes, and natural gasoline) are stored and shipped off-site via truck, railcar, pipeline, and/or barge. Propane product loads may be odorized during the loading process. All loading into railcars is pressurized with vapor return, in order to prevent emissions to atmosphere. All loading arms are purged with nitrogen prior to disconnection, preventing any emissions to atmosphere. Truck loading emissions, resulting from disconnection of the loading line, are vented to atmosphere, and expected to be minimal. Truck loading operations are performed under pressure to prevent emissions to atmosphere, with minimal VOC emissions resulting from disconnection of the loading line disconnection of the loading line to the tanker trucks.

Vapors displaced during loading of natural gasoline into barges were sampled during several loading events to develop a site-specific emission factor.

The propane and butane tanks are pressurized and have natural gas blanket for vacuum protection. The refrigerated propane storage tank is an atmospheric fixed-roof tank equipped with a refrigeration system that maintains the propane product in liquid phase. Any vapors that flash-off from the propane product are captured by a VRU, condensed and routed back into the storage tank. The natural gasoline storage tanks are equipped with a natural gas blanket for vacuum protection. The emissions from these tanks are captured and compressed via VRU and routed to the hot oil heater fuel system.

# G.4. Hot Oil System

The hot oil systems provide heat to the Plant processes. By using oil, the heat can be transferred to the Plant processes with a minimum loss of heat to the oil, allowing for a quicker recovery to the desired temperature in a closed-loop system. The hot oil system is a network of piping that circulates hot oil through each of the units and provides heat as needed.

The combustion of sweet natural gas in the heaters results in combustion-related emissions.

# G.5. Natural Gas-Fired Engines

The Plant has natural gas-fired engines for back-up electricity generation during the unavoidable loss of electric service at the Plant. These engines are operated in nonemergency situations for less than 100 hr/yr for testing and maintenance to ensure reliability during emergency situations.

# G.6. Diesel-Fired Engines

The Plant has two existing emergency diesel fire water pumps in case of fire. These engines are operated in nonemergency situations for less than 100 hr/yr for testing and maintenance to ensure reliability during emergency situations.

Hazard(s) identification	
Physical hazards	Flammable gas - <u>Category 1</u> Gas under pressure - Liquefied Gas
Health hazards	Aspiration hazard – <u>Category 1</u> Skin frostbite hazard Asphyxiation hazard Reproductive toxicity – <u>Category 2</u> Narcotic effect by inhalation – <u>Category 2</u> Specific target organ systemic toxicity – repeated exposure, <u>Category 2</u> , Nervous System Specific target organ systemic toxicity – single exposure, <u>Category 3</u> , Central nervous system
Label Elements	$\wedge \wedge \wedge$

Hazard symbol

Signal word

Danger

Hazard statement	Extremely flammable liquid and gas May be fatal if swallowed and enters airways Can displace oxygen and lead to asphyxiation Corrosive to skin due to cold burns from liquid contact with skin Suspected of damaging fertility or the unborn child May cause drowsiness or dizziness May cause damage to organs (Nervous System) through prolonged or repeated exposure
Precautionary statement Prevention	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Wear protective gloves/protective clothing/eye protection/face protection. Wash hands and contaminated skin thoroughly after handling. Wear protective gloves. Store locked up.
Response	If exposed or concerned: Get medical advice/attention. If on skin (or hair): Wash with plenty of water. Rinse skin with water/shower. If frostbite occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.
Storage	Store locked up. Sore in a well ventilated place. Keep cool. Keep container tightly closed.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Environmental Hazards	Hazardous to the aquatic environment, chronic toxicity

# 3. Composition / information on ingredients

### 4. First-aid measures

	Inhalation	Move victim to area of fresh air. For respiratory distress give air, oxygen or administer cardiopulmonary resuscitation if needed. Seek medical attention call 911 or emergency medical services.
	Skin contact	Immediately flush skin with water for 15 minutes. Frozen tissue should be gradually warmed using warm water. Clothing frozen to the skin should be thawed before removal. Do not use hot water! Cryogenic burns may occur as evidenced by blistering. Protect affected area with dry gauze and get prompt medical attention.
	Eye contact	Flush eyes gently with water for at least 15 minutes. If illness or adverse symptoms develop, seek medical attention.
	Ingestion	Seek immediate medical attention due to ingestion and aspiration hazard (vapor inhalation due to ingested liquid).
	Most important symptoms/ effects, acute and delayed	Acute: Asphyxiation hazard, headache, drowsiness, dizziness, loss of coordination, frostbite, disorientation and fatigue. Delayed: Dry skin and irritation after repeated or prolonged exposure.
	Indication of immediate medica	al attention and special treatment needed Treat symptomatically.
	General information	First aid personnel must be aware of own risk during rescue.
5.	Firefighting measures	
	Suitable extinguishing media	Dry chemical powder, foam, or CO2
	Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire. Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam.
	Specific hazards arising from the chemical	The product is extremely flammable, and explosive vapor/air mixtures may be formed even at normal room temperatures. Vapors are heavier than air and may travel along the ground to some distant source of ignition and flash back. Liquid petroleum gases will vaporize rapidly at well below ambient temperatures and readily forms flammable mixtures with air. Flames impinging on product storage vessels above the liquid level will cause sudden vessel failure, resulting in a BLEVE (Boiling Liquid Expanding Vapor Explosion), unless the vessel surfaces are kept cooled with water. If this cannot be done, evacuate the area.
	Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in fire-fighting situations.
	Firefighting equipment/instructions	Evacuate area of all unnecessary personnel. Shut off product source and allow fire to burn itself out. Use water fog or spray to cool exposed containers and equipment to prevent overheating, flashbacks or explosions. Firefighters directly addressing the fire must use proper protective equipment include breathing apparatus to protect against hazardous combustion products and/or oxygen deficiencies.
6.	Accidental release measur	es

# 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	All non-essential personnel should be evacuated. Stay upwind. Ventilate enclosed areas to prevent formation of flammable or oxygen-deficient atmospheres. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Liquid spills will vaporize rapidly and produce vapor cloud. Be alert for latent pooling of liquid portion. Because vapors are heavier than air they will not readily disperse. Avoid vapor cloud even with proper respiratory equipment.
	Avoid contact with skin. Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.
	In the event of a large spill, self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.
Methods and materials for containment and	Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Remove sources of ignition. Beware of the explosion danger.
cleaning up	Small Spills: Absorb spillage with non-combustible, absorbent material.
	Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non- combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Wash area with soap and water. If necessary dike the product with dry earth, sand or similar non- combustible materials.

	Environmental precautions	Prevent spreading over a wide area (e.g. by containment or oil barriers). Do not contaminate water. Contact local authorities in case of spillage to drain/aquatic environment.
7.	Handling and storage	
	Precautions for safe handling	Access to work area should be restricted to people handling the product only. Should be handled in closed systems, if possible. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Use self-contained breathing apparatus (SCBA) in release situations where exposure concentration is unknown or cannot be controlled.
		Use explosion-proof equipment and non-sparking tools in areas where explosive vapors may form. Electrostatic charge may accumulate and create a hazardous condition when handling or processing. Electrically ground and bond shipping container, transfer line and receiving container. Refer to NFPA-70 and/or API RP2003 for specific bonding/grounding requirements. Material may be at elevated temperatures and/or pressures. Exercise care when opening tank hatches, sampling ports and/or bleeder valves.
		Extremely flammable. May vaporize easily at ambient temperatures. Vapor is heavier than air and may create an explosive mixture of vapor and air. Beware of accumulation in confined spaces and low lying areas. Open containers slowly to relieve pressure. Do not enter confined spaces such as tanks or pits without following proper entry procedures such as ASTM D-4276 and 29 CFR 1910.146 (OSHA Confined Space Entry Standard). Do not wear contaminated clothing or shoes. Keep contaminated clothing away from ignition sources.
	nditions for safe storage, cluding any incompatibilities	<ul> <li>Keep containers tightly closed. Keep away from heat, open flames, or other sources of ignition.</li> <li>No smoking or open lighting. Outside or detached storage is preferred. Keep away from oxidizers, e.g. chlorine, oxygen, bleaches, fertilizers.</li> <li>Empty containers retain residue and may be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, spars, or other sources of ignition.</li> <li>They may explode and cause injury or death. Empty containers should be completely drained and properly close prior to disposal or sent for reconditioning. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations</li> </ul>

	Ingestion	Not a likely route of exposure. Aspiration hazard. May be fatal if swallowed and enter airways.	⊧rs
	Inhalation	At high concentrations a simple asphyxiant. May produce nausea, diarrhea, loss of	

At high concentrations a simple asphyxiant. May produce nausea, diarrhea, loss of appetite, dizziness, disorientation, headache, excitation, rapid respiration, drowsiness, labored breathing, anesthesia and other central nervous system effects. May cause lung paralysis and asphyxiation. Extreme overexposure may cause unconsciousness and respiratory arrest.

May cause slight irritation. Extreme exposure may produce discoloration, muscle weakness, breathing difficulties and other central nervous system effects. Direct contact may cause frostbite.

Skin contact

#### Eye contact

#### Symptoms related to the physical, chemical and toxicological characteristics

Acute toxicity

May cause irritation including pain, blurred vision, redness, tearing and superficial corneal turbidity. Headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue. Dry skin and possible irritation with repeated or prolonged exposure.

Human evidence indicates that the product has very low acute oral, dermal or inhalation toxicity.

However, it can produce severe injury if taken into the lung as a liquid, and there may be profound central nervous system depression following prolonged exposure to high levels of vapor.

Suffocation (asphyxiant) hazard - if allowed to accumulate to concentrations that reduce oxygen below safe breathing levels. Breathing of high concentrations may cause dizziness,

Light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness. Irritant effect on skin. May irritate and cause stomach pain, vomiting, diarrhea and nausea.

<u>Components</u>	<u>Species</u>	<u>Test Results</u>
Pentane Acute inhalation LC50	Rat	364 mg/l, 4 hours
Propane Acute inhalation LC50	Rat	>1442.847 mg/l, 15 minutes
Butane Acute inhalation LC50	Rat	658 mg/l, 4 hours
n-hexane	Rat	627,000 mg/m <sup>3</sup> , 3 minute
Skin corrosion/irritation	Causes skin irritation. Pre-existing sl be aggravated by exposure to this pr	tin conditions including dermatitis might oduct.
Serious eye damage/eye irritation	May cause eye irritation on direct con	ntact
Respiratory sensitization	Not a respiratory sensitizer	
Skin sensitization	Not a skin sensitizer	
Germ cell mutagenicity	May cause genetic defects	
Carcinogenicity – Not Classified

Chronic effects	Prolonged or repeated contact with s eczema/chapping and oil acne. Perip	kin may cause redness, itching, irritation, heral Neuropathy may occur.
Further Information	Components of the product may be a to elicit health effects in addition to e	bsorbed into the body through the skin xposure through inhalation.

# 12. Ecological information

#### Ecotoxicity

Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Component	Species	Test Results
Ethane 96 hour LC50 <sup>1</sup>	Fish (unknown species)	27.98 – 147.54 mg/L
Propane 96 hour LC50 <sup>1</sup>	Fish (unknown species)	27.98 – 147.54 mg/L
Butane 96 hour LC50 <sup>1</sup>	Fish (unknown species)	27.98 – 147.54 mg/L
Isobutane 96 hour LC50 <sup>1</sup>	Fish (unknown species)	34.05 mg/L
Isopentane 96 hour LC50	Oncorhynchus mykiss	4.26 mg/L
Pentane 96 hour LC50	Oryzias latipes	> 1000 mg/L

<sup>1</sup>The value estimated is greater than the solubility of the substance in water; therefore, the value is only of academic interest. Source: US Environmental Protection Agency's (2008) Office of Pollution Prevention and Toxics and Syracuse Research Corporation (SRC).

Persistence and degradability	Expected to be inherently biodegradable.
Bioaccumulative and persistence potential	The substances in this mixture are biodegradable and unlikely to persist in the environment.
Partition coefficient n-octanol / water (log	Kow)
Propane	2.36
Pentane	3.39
Isobutane	2.76
Hexane	3.90
Mobility in soil	The product has a low potential of being absorbed in the soil.
Mobility in general	The product is insoluble in water. It will spread on the water surface while some of the components will eventually sediment in water systems. The volatile components of the product will spread in the atmosphere.
Other adverse effects	The product contains volatile organic compounds which have a photochemical ozone creation potential. Oil spills are generally hazardous to the environment.
13. Disposal considerations	
Disposal instructions	Dispose in accordance with all applicable regulations. This material and/or its container must be disposed of as hazardous waste.
Local disposal regulations	Dispose of in accordance with local regulations.
Hazardous waste code	D001 (Ignitability characteristics)
Waste from residues / unused products	The transportation, storage, treatment and disposal of RCRA waste material must be conducted in compliance with 40 CFR 262, 263, 264, 268, and 270. Disposal can occur only in properly permitted facilities. Check state regulations. Chemical additions, processing or otherwise altering this material may make the waste management information presented in this SDS incomplete, inaccurate or otherwise inappropriate. Disposal of this material must be conducted in compliance with all federal, state and local regulations.

# SAFETY DATA SHEET

# 1. Identification

Product identifier	NATURAL GAS
Other means of identification	
Product code	8006-14-2
Recommended use	Residential and Commercial applications.
Recommended restrictions	None known.
Manufacturer / Importer / Supplie	r / Distributor information
Company name	Blueracer Midstream, LLC
Address	5949 Sherry Lane, Suite 1300, Dallas, TX 75225
Telephone	214-580-3700
E-mail	www.blueracermidstream.com
Contact person	Safety Department
Emergency phone number	214-580-3700

# 2. Hazard(s) identification

Physical hazards	Flammable gases, Gases under pressure – <u>Category 1</u>
Health hazards	Skin corrosion (cold burns) Specific target organ systemic toxicity (Respiratory and Central Nervous Systems) – single exposure - <u>Category 2</u> Simple asphyxiant
Label elements	
Hazard symbols	
Signal word Hazard statement	Danger Extremely flammable gas May displace oxygen and cause rapid suffocation May cause damage to the central nervous and respiratory systems Gasses rapidly escaping from a cylinder may be very cold and cause frostbite. Severe frostbite can lead to serious permanent skin damage
Precautionary statement	
Prevention	Contains gas under pressure; may explode if heated. Keep away from heat/sparks/open flames/hot surfaces No smoking.
Response	Leaking gas fire: Do not extinguish unless leak can be stopped safely. Eliminate all ignition sources if safe to do so.
Storage	Protect from sunlight. Store in a well-ventilated place.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.

# 3. Composition/information on ingredients

#### Mixture

Hazardous components

Chemical name	Common name and Synonyms	CAS number	%
Methane		74-82-8	70-99
Ethane		74-84-0	1-12
Carbon dioxide		124-38-9	0-6
Helium		7440-59-7	0-6
Nitrogen		7727-37-9	0-6
Propane		74-98-6	0-5

Composition comments	All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.
4. First-aid measures	
Inhalation	Move injured person into fresh air and keep person calm under observation. If breathing is difficult, give oxygen. Get medical attention if any discomfort continues.
Skin contact	Frostbite: Do not remove clothes, but flush with copious amounts of lukewarm water. Call an ambulance and continue to flush during transportation to hospital.
Eye contact	Immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation develops or persists.
Ingestion	This material is a gas under normal atmospheric conditions and ingestion is unlikely.
Most important symptoms/effects, acute and delayed	Suffocation, Narcosis. Behavioral Changes. Decrease in motor functions.
Indication of immediate medical attention and special treatment needed	Treat symptomatically
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.
5. Fire-fighting measures	
Suitable extinguishing media	Extinguish with foam, carbon dioxide, dry powder or water fog.
Unsuitable extinguishing media	None
Specific hazards arising from the chemical	Cylinders can burst violently when heated, due to excess pressure build-up. Gas may travel considerable distance to a source of ignition and flash back. Gases may form explosive mixtures with air. Fire or high temperatures create: Carbon monoxide, Carbon oxides, Sulfur oxides.
Special protective equipment and precautions for firefighters	Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode. Use approved gas detection equipment in confined spaces.
Fire-fighting equipment/instructions	Evacuate area. Remove pressurized gas cylinders from the immediate vicinity. Cool containers exposed to flames with water until well after the fire is out. Close the valve if no risk is involved. Do not extinguish a leaking gas fire unless leak can be stopped. If leak cannot be stopped and there is no danger to surrounding area allow the fire to burn out. Fight fire from a protected location. Prevent buildup of vapors or gases to explosive concentrations.
6. Accidental release meas	sures
Personal precautions, protective equipment and emergency procedures Methods and materials for	Stay upwind. Keep unnecessary personnel away. No action shall be taken involving any personal risk or without suitable training. Ventilate closed spaces before entering. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). For large gas releases, notify persons down wind of the release while isolating the immediate release area and keep unauthorized personnel out. Wear suitable protective clothing, gloves and eye/face protection.
containment and cleaning up	For personal protection, see section 8 of the SDS. Ventilate well, stop flow of gas or liquid if possible. Remove ignition sources. Do not allow
	chemical to enter confined spaces such as sewers due to explosion risk. Sewers designed to preclude formation of explosive concentrations of vapor may be permitted.
Environmental precautions	Stop leak if possible. Sewers must be covered and basements and workpits evacuated.
7. Handling and storage	
Precautions for safe handling	Before entering storage tanks and commencing any operation in a confined area, check the atmosphere for oxygen content, and flammability. Provide adequate ventilation. Avoid contact with eyes, skin, and clothing. Material may deplete oxygen from the air to dangerously low levels. Avoid breathing gas. Wear appropriate personal protective equipment. The product is extremely flammable and may form explosive mixtures with air. Avoid heat, sparks, open flames and other ignition sources. Ground container and transfer equipment to eliminate static electric sparks. Use of explosion proof equipment is recommended and may be required (see appropriate fire codes. Refer to NFPA-70 and/or API RP2003 for specific bonding/grounding requirements). Do not enter confined spaces such as tanks or pits where gas may be stored or may accumulate without following proper entry procedures such as ASTM D-4276,and OSHA 1910.146. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store material in flammable compressed gas storage. Keep away from heat, sparks and open flame. Keep in a cool, well-ventilated place. Store material away from incompatible materials.
	Empty containers retain residue and may be dangerous. Do not pressurize, cut, weld, braze solder, drill, grind or expose such containers to heat, flame, sparks, or other sources of ignition. They may explode and cause injury or death. Gas cylinders should be stored outdoors or in well ventilated storerooms at no lower than ground level and should be quickly removable in an emergency.

# 8. Exposure controls/personal protection

#### Occupational exposure limits

### U.S. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Туре	Value
Propane	PEL	1000 ppm (1800 mg/m <sup>3</sup> )
U.S. ACGIH Threshold Limit Value		
Components	Туре	Value
Butane (CAS 106-97-8)	STEL	1000 ppm (2370 mg/m <sup>3</sup> )
Carbon Dioxide (CAS 124-38-9)	TWA	5000 pm (9000 mg/m <sup>3</sup> )

#### U.S. NIOSH: Pocket Guide to Chemical Hazards

Components	Туре	Value
Butane (CAS 106-97-8)	REL	800 ppm (1900 mg/m <sup>3</sup> )
Carbon Dioxide (CAS 124-38-9) Propane (CAS 74-98-6)	REL REL-STEL REL	5000 ppm (9000 mg/m <sup>3</sup> ) 30000 ppm (54000 mg/m³) 1000 ppm (1800 mg/m³)

Biological limit values	No biological exposure limits noted for the ingredient(s).
Exposure guidelines	No exposure standards allocated.
Appropriate engineering controls	Observe Occupational Exposure Limits and minimize the risk of inhalation. Use explosion-proof equipment.
Individual protection measure	s, such as personal protective
equipment:	
Eye/face protection	Risk of contact: Wear goggles/face shield.
Skin protection	
Hand protection	Risk of contact: Wear cold insulating gloves. Suitable gloves can be recommended by the glove supplier.
Other	Wear suitable protective clothing.
Respiratory protection	In case of inadequate ventilation, use SCBA. Seek advice from local supervisor. A respiratory protection program that meets or is equivalent to OSHA 29 CFR 1910.134 and ANSI Z88.2 should be followed whenever workplace conditions warrant use of respiratory protection.

General hygiene	Handle in accordance with good industrial hygiene and safety practice.
considerations	

# 9. Physical and chemical properties

Appearance	Colorless gas
Physical state	Gas
Form	Gas Color Colorless
Odor	Odorless without odorant
Odor threshold	Not available
рН	Not applicable
Melting point/ freezing point	Not available
Initial boiling point and boiling range	-259 °F (-161.7 °C)
Flash point	Not available
Evaporation rate Flammability (solid, gas)	Not available Extremely flammable gas

#### Upper/lower flammability or explosive limits

Flammability limit – lower(%) Flammability limit – upper(%)	4.5 % 15 %
Vapor Pressure	Not applicable
Vapor Density Relative Density	Not available
Solubility Partition coefficient (in-octganol/water)	Not available Not available
Auto-ignition temperature	1050-1150°F (565.56 – 621.11°C
Decomposition temperature Viscosity	Not applicable Not applicable

# 10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of storage and transport.
Chemical stability	Stable under normal temperature conditions and recommended use.
Possibility of hazardous reactions	Polymerization will not occur.
Conditions to avoid	Heat, sparks, flames, elevated temperatures. Do not pressurize, cut, weld, braze, solder, drill, grind or expose empty containers to heat, flame, sparks, static electricity, or other sources of ignition; they may explode and cause injury or death.
Incompatible materials	Oxidizing agents.
Hazardous decomposition products	Carbon oxides, and nitrogen oxides.

# 11. Toxicological information

# Information on likely routes of exposure

Ingestion	This material is a gas under normal atmospheric cor	nditions and ingestion is unlikely.
Inhalation	High concentrations: Suffocation (asphyxiant) hazare that reduce oxygen below safe breathing levels. In h may cause headache, fatigue, dizziness and nausea	igh concentrations, vapors are narcotic and
Skin contact	Contact with pressurized containers rapidly releasing cause damage (frostbite) due to rapid evaporative co

LC50	Rat	> 1442.847 mg/l, 15 Minutes
Skin corrosion/irritation	Not classified.	

Serious eye damage/eye	Not classified.
Respiratory sensitization	Not classified.
Skin sensitization	Not a skin sensitizer.
Germ cell mutagenicity	Not classified.
Carcinogenicity	Not classified.
Reproductive toxicity	Not classified.
Specific target organ toxicity - single exposure	Central Nervous and Respiratory System - May cause drowsiness or dizziness.
Specific target organ toxicity - repeated exposure	Not classified.
Aspiration hazard	Not classified.
Chronic effects	Not classified.

# 12. Ecological information

Ecotoxicity	Not expected to be harmful to aquatic organisms.	
Persistence and degradability	Not available.	
Bioaccumulative potential		
Partition coefficient n-octanol / water (log Kow)		

Nitrogen	0.67
Methane	1.09
Ethane	1.81
Propane	2.36
Butane	2.89
Mobility in soil	Not relevant, due to the form of the product.
Mobility in general	The product is a volatile substance, which may spread in the atmosphere.
Other adverse effects	The product is a volatile organic compound which has a photochemical ozone creation potential.

### 13. Disposal considerations

Disposal instructions	Dispose in accordance with all applicable regulations. Return the empty cylinder to the supplier.
Local disposal regulations	Dispose of in accordance with local regulations.
Hazardous waste code	Not regulated.
Waste from residues / unused products	Dispose of in accordance with local regulations.
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied.

### 14. Transport information

	DOT (US Department of Transpiration) UN number UN proper shipping name Transportation hazard class Subsidiary class(es) Packaging group Special precautions for user Labels required Special provisions Packaging exceptions Packaging non-bulk Packaging bulk Quantity limitations – passenger aircraft Quantity limitations – cargo aircraft only Vessel storage - Location Vessel storage - Other	UN1971 Natural gas, compressed Flammable gas, 2.1 - - Flammable gas 2.1 None 306 302 302 Forbidden 150 kg E 40

#### NFPA Ratings:

NFPA health hazard	I – Slightly hazardous
NFPA fire hazard	: 4 - Will rapidly or completely vaporize at normal pressure and temperature, or is readily dispersed in air and will burn readily.
NFPA reactivity	: <b>0</b> - Normally stable, even under fire exposure conditions. and are not reactive with water.

#### HMIS III Rating:

<u>Health : 1</u> - Irritation or minor reversible injury possible.

<u>Flammability : 4</u> - Flammable gases, or very volatile flammable liquids with flash points below 73 °F (23 °C), and boiling points below 100 °F (38 °C). Materials may ignite spontaneously with air

<u>Physical</u> : **0** - Materials that are normally stable, even under fire conditions, and will not react with water, polymerize, decompose, condense, or self-react. Non-explosives.

# SAFETY DATA SHEET

### 1. Identification

	Product identifier	ISOBUTANE
	Other means of identification	Liquefied Petroleum Gas
	Recommended Use	Raw material for fuel production
	Recommended restrictions	None
	Manufacturer / Importer / Supp	lier / Distributor information
	Company Name / Address	Blueracer Midstream, LLC
		5949 Sherry Lane, Suite 1300, Dallas, TX 75225
	Telephone	214-580-3700
	Email	www.blueracermidstream.com
	Contact Person	Safety Department
	Emergency phone number	214-580-3700
2.	Hazard(s) identification	
	Physical hazards	Flammable gas - Category 1
		Gas under pressure - Liquefied Petroleum Gas
	Health hazards	Asphyxiation hazard
	Health hazards	Skin, eye, respiratory tract frostbite hazard
		Specific target organ systemic toxicity (Respiratory and Central Nervous Systems) – single exposure - Category 2
	Label Elements	
	Hazard symbol	
	Signal word	
	Signal word	Danger
	Hazard statement	Extremely flammable liquid and vapor
		May displace oxygen and lead to suffocation Contact with skin and eyes may cause frostbite
		May cause temporary effects to the central nervous and respiratory systems.
	Precautionary statement	
	Prevention	Obtain special instructions before use.
		Contains gas under pressure; may explode if heated
		May form explosive mixtures with air
		Do not handle until all safety precautions have been read and understood. Do not handle until all safety precautions have been read and understood.
		Keep away from heat/sparks/open flames/hot surfaces.
		No smoking.
		Keep container tightly closed.
		Ground/bond container and receiving equipment.
		Use explosion-proof electrical/ventilating/lighting equipment.
		Use only non-sparking tools.
		Take precautionary measures against static discharge. Wear protective gloves/protective clothing/eye protection/face protection. Wash hands and
		Troat protocure giores/protocure clothing/cyc protocuon/lace protocuon. Wash ildius allu

Isobutane Safety Data Sheet - BRM

	contaminated skin thoroughly after handling.
	Wear insulated gloves where liquid contact and frostbite hazard is possible.
Response	Leaking gas fire: do not extinguish unless leak can be stopped safely;
	Eliminate all ignition sources if safe to do so;
	Use foam, carbon dioxide, dry powder or water fog to extinguish fires;
	If exposed or concerned: Get medical advice/attention.
	If on skin (or hair): Wash with plenty of water. Rinse skin with water/shower.
	Remove contaminated clothing and wash before reuse.
	If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting.
Storage	Store in secured, locked areas.
-	Store in well-ventilated place.
	Keep cool.
	Keep containers tightly closed.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Carcinogenicity	No ingredient in this product at levels greater than or equal to 0.1% is identified as a probable, possible, anticipated or confirmed human carcinogen by IARC, NTP, ACGIH or OSHA.

# 3. Composition / information on ingredients

Hazardous components Chemical Name	CAS Number	<u>%</u>
Isobutane (CAS 75-28-5)	75-28-5	95
Butane (CAS 106-97-8)	74-98-6	3
Propane (CAS 74-98-6)	106-97-8)	2

**Composition comments** All concentrations are in percentage by weight.

### 4. First-aid measures

	Inhalation	Move victim to area of fresh air. For respiratory distress give air, oxygen or administer cardiopulmonary resuscitation if needed. Seek medical attention call 911 or emergency medical services.
	Skin contact	Immediately flush skin with water for 15 minutes. Frozen tissue should be gradually warmed using warm water. Clothing frozen to the skin should be thawed before removal. Do not use hot water! Cryogenic burns may occur as evidenced by blistering. Protect affected area with dry gauze and get prompt medical attention.
	Eye contact	Flush eyes gently with water for at least 15 minutes. If illness or adverse symptoms develop, seek medical attention.
	Ingestion	Risk of ingestion is extremely low. However, if oral exposure occurs, seek immediate medical attention.
	Most important symptoms/ effects, acute and delayed	Acute: Contact with liquid (eyes and skin) - Frostbite, Headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue from inhalation, asphyxiation hazard. Delayed: None
	Indication of immediate medica	I attention and special treatment needed Treat symptomatically.
	General information	Rescue and first aid personnel must be aware of own risk during rescue and treatment.
•	Firefighting measures	
	Suitable extinguishing media	Extinguish with dry chemical foam, carbon dioxide, dry powder or water fog.
	Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire. Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam.

5.

Specific hazards arising from the chemical	The product is extremely flammable, and explosive vapor/air mixtures may be formed even at normal room temperatures. Vapors are heavier than air and may travel along the ground to some distant source of ignition and flash back. Liquid petroleum gases will vaporize rapidly at well below ambient temperatures and readily forms flammable mixtures with air. Flames impinging on product storage vessels above the liquid level will cause sudden vessel failure, resulting in a BLEVE (Boiling Liquid Expanding Vapor Explosion), unless the vessel surfaces are kept cooled with water. If this cannot be done, evacuate the area.
Special protective equipment and precautions for firefighters	Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Firefighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode. Use approved gas detectors in confined space.
Firefighting equipment/instructions	Evacuate area of all unnecessary personnel. Shut off product source and allow fire to burn itself out. Use water fog or spray to cool exposed containers and equipment to prevent overheating, flashbacks or explosions. Firefighters directly addressing the fire must use proper protective equipment include breathing apparatus to protect against hazardous combustion products and/or oxygen deficiencies.

### 6. Accidental release measures

0.		
	Personal precautions, protective equipment and emergency procedures	All non-essential personnel should be evacuated. Stay upwind. Ventilate enclosed areas to prevent formation of flammable or oxygen-deficient atmospheres. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Liquid spills will vaporize rapidly and produce vapor cloud. Be alert for latent pooling of liquid portion. Because vapors are heavier than air they will not readily disperse. Avoid vapor cloud even with proper respiratory equipment.
	Methods and materials for containment and cleaning up	Avoid contact with skin. Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.
		In the event of a large spill, self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.
		Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Remove sources of ignition. Beware of the explosion danger.
		Small Spills: Absorb spillage with non-combustible, absorbent material.
		Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non- combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Wash area with soap and water. If necessary dike the product with dry earth, sand or similar non- combustible materials.
	Environmental precautions	Prevent spreading over a wide area (e.g. by containment or oil barriers). Do not contaminate water. Contact local authorities in case of spillage to drain/aquatic environment.
7.	Handling and storage	
	Precautions for safe handling	Access to work area should be restricted to people handling the product only. Should be handled in closed systems, if possible. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Use self-contained breathing apparatus (SCBA) if appropriate. Before entering storage tanks and commencing any operation in a confined area, check the atmosphere for oxygen content, and flammability. Provide adequate ventilation. Avoid contact with eyes, skin, and clothing. Material may deplete oxygen from the air to dangerously low levels. Avoid breathing gas. Wear appropriate personal protective equipment. The product is extremely flammable. May form explosive mixtures with air. Avoid heat, sparks, open flames and other ignition sources. Ground container and transfer equipment to eliminate static electric sparks. Use of explosion proof equipment is recommended and may be required (see appropriate fire codes. Refere to NFPA-70 and/or API RP2003 for specific bonding/grounding requirements). Do not enter confined spaces such as tanks or pits where gas may be stored or may accumulate without following proper entry procedures such as ASTM D-4276,and OSHA 1910.146. Observe good industrial hygiene practices. Avoid aerosol formation.
	Conditions for safe storage, including any incompatibilities	Keep containers tightly closed. Keep away from heat, open flames, or other sources of ignition. No smoking or open lighting. Outside or detached storage is preferred. Keep away from oxidizers, e.g. chlorine, oxygen, bleaches, fertilizers.

### 8. Exposure controls / personal protection

#### **Occupational exposure limits**

#### U.S. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

<u>Components</u>	Туре	Value
Propane (CAS 74-98-6)	PEL-TWA	1000 ppm (2370 mg/m <sup>3</sup> )

#### U.S. OSHA Table Z-2 Limits for Air Contaminants (29 CFR 1910.1000) - None

#### U.S. ACGIH Threshold Limit Values

Butane (CAS 106-97-8)	TLV-STEL	1000 ppm (2370 mg/m <sup>3</sup> )
Isobutane (CAS 75-28-5)	TLV-STEL	1000 ppm (2370 mg/m <sup>3</sup> )

#### U.S. NIOSH: Pocket Guide to Chemical Hazards

<u>Components</u>	Туре	Value
Butane (CAS 106-97-8)	REL-TWA	800 ppm (1900 mg/m <sup>3</sup> )
Isobutane (CAS 75-28-5)	REL-TWA	800 ppm (1900 mg/m <sup>3</sup> )
Propane (CAS 74-98-6)	REL-TWA	1000 ppm (1800 mg/m <sup>3</sup> )

Biological limit values: None

**Exposure guidelines:** No exposure standards allocated.

Appropriate<br/>engineering controlsObserve occupational exposure limits and minimize the risk of inhalation of vapors. Provide<br/>easy access to water supply and eye wash facilities. Use explosion-proof equipment.

#### Individual protection measures, such as personal protective equipment

Eye/face protection	Wear goggles / face shield.
Skin protection / Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. If contact with the liquid is possible, insulated gloves suitable for low temperatures should be worn. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
Respiratory protection	Use a properly fitted, air-purifying or air-supply respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
Thermal hazards	Wear appropriate thermal protective clothing, when liquid contact may occur.

### 9. Physical and Chemical properties

Appearance	
Physical state	Liquefied gas
Form	Liquid
Color	Colorless to straw colored
Odor	Petroleum
Odor threshold	Not available
PH	Not available
Melting point / freezing point	Not available
Initial boiling point and boiling range	Not Available
Flash point	-117 °F (-82.8 °C) estimated
Evaporation rate	Moderately fast
Flammability (solid, gas)	Flammable
Upper / lower flammability or explo	sive limits
Flammability limit – lower	1.8%
Flammability – upper	8.5%
Vapor pressure	50 – 60 psi (100 °F)
Vapor density	1.1 (Air=1)
Relative density	2 (Air = 1)
Solubility (ies)	0.564 (Water = 1)
Partition coefficient	(n-octanol/ water) Not available
Auto-ignition temperature	860 °F (460 °C) estimated
Decomposition temperatur	e Not available
Viscosity	Not available
Other Information	
Bulk density	Not applicable
Explosive properties	Not applicable
Oxidizing properties	Not applicable
10. Stability and reactivity	
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Stable at normal conditions
Possibility of hazardous reaction	B Hazardous polymerization does not occur.
Conditions to avoid	Heat, sparks, flames, elevated temperatures. Contact with incompatible materials.
Incompatible materials	Oxygen. Strong oxidizing agents.
Hazardous decomposition produ	cts Carbon dioxide, carbon monoxide and various hydrocarbons.

# 11. Toxicological information

### Information on likely routes of exposure

```
Ingestion
```

Not a likely route of exposure. Aspiration hazard. May be fatal if swallowed and enters airways.

Isobutane Safety Data Sheet - BRM

Inhalation       At high concentrations a simple asphysiant. May produce nausea, diarrhea, loss of appetite, dizziness, disorientation, headache, excitation, rapid respiratory arreal, and asphysianto. Extreme overexposure may cause unconsciousness and regritatory arreal.         Skin contact       May cause slight iritation. Extreme overexposure may produce discoloration, muscle weakness, breathing difficulties and other central nervous system effects. Direct contact weakness, breathing difficulties and other central nervous system effects. Direct contact nervoires related to the physical.         Eye contact       May cause iritation including pain, blurred vision, redness, tearing and superficial come trade and toxicological characteristics         Acute toxicity       May cause iritation including pain, blurred vision, redness, tearing and superficial come trading and the central nervous system effects contact and trade of prolonged exposure.         Acute toxicity       Human evidence indicates that the product has very low acute rai, dermal or halation toxicity. However, it can produce asever injury if taken in too the lung as a liquid, and there may be prolound central nervous system effects to accumulate to concentrations. Continue of halation toxicity. However, it cause discrepts, light-headedness, headache, nausea, infrant effect on skin. May trate and cause stomach pain, vomiting, daritee and nausea. Chronic effects

# 12. Ecological information

Ecotoxicity	Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
Bioaccumulative and persistence potential	The substances in this mixture are biodegradable and unlikely to persist in the environment.

Prolonged or repeated contact with skin may cause redness, itching, irritation, eczema/chapping and oil acne.

Partition coefficient n-octanol / water (log Kow)	
Butane (CAS 106-97-8)	2.89
Isobutane (CAS 75-28-5)	2.76
Propane (CAS 74-98-6)	2.36
Mobility in soil	The product has a low potential of being absorbed in the soil.
Mobility in general	The product is insoluble in water. It will spread on the water surface while some of the components will eventually sediment in water systems. The volatile components of the product will spread in the atmosphere.
Other adverse effects	The product contains volatile organic compounds which have a photochemical ozone creation potential. Oil spills are generally hazardous to the environment.
13. Disposal considerations	
Disposal instructions	Dispose in accordance with all applicable regulations. This material and/or its container must be disposed of as hazardous waste.
Local disposal regulations	Dispose of in accordance with local regulations.
Hazardous waste code	D001
Waste from residues / unused products	The transportation, storage, treatment and disposal of RCRA waste material must be conducted in compliance with 40 CFR 262, 263, 264, 268, and 270. Disposal can occur only in properly permitted facilities. Check state regulations. Chemical additions, processing or otherwise altering this material may make the waste management information presented in this SDS incomplete, inaccurate or otherwise inappropriate. Disposal of this material must be conducted in compliance with all federal, state and local regulations.
Contaminated packaging	Non-empty contaminated packaging should be disposed of as hazardous waste.
14. Transportation	
DOT

### **15. Regulatory information**

Isobutane Safety Data Sheet - BRM

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard 29 CFR 1910.1200 (OSHA) and 8 CCR § 5194 (Cal/OSHA). All components are on the U.S. EPA TSCA Inventory List.

#### TSCA Section 12(b) Export Notification (40 CFR 707, Subpart D)

Not regulated

### US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050) None

CERCLA Hazardous Substance List (40 CFR 302.4)

Butane (CAS 106-97-8) LISTED Isobutane (CAS 75-28-5) LISTED Propane (CAS 74-98-6) LISTED

#### Superfund Amendments and Reauthorization Act of 1986 (SARA)

Hazard categories	Immediate Hazard – Yes
	Delayed Hazard – No
	Fire Hazard – Yes
	Pressure Hazard – Yes
	Reactivity Hazard - No

#### SARA 302 Extremely hazardous substance No

SARA 311/312 Hazardous chemical Yes (see hazard categories above)

SARA Section 313 This material contains the following chemical subject to the reporting requirements of Section 313 of SARA Title III and 40 CFR 372: n-Hexane

#### **Other federal regulations**

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List No

#### Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)

Butane (CAS 106-97-8) 10,000 lb. Isobutane (CAS 75-28-5) 10,000 lb. Propane (CAS 74-98-6) 10,000 lb.

Safe Drinking Water Act (SDWA) - No constituents on the List of Contaminants

Drug Enforcement Administration (DEA). List 2, Essential Chemicals (21 CFR 1310.02(b) and 1310.04(f)(2) and Chemical Code Number – None

Drug Enforcement Administration (DEA). List 1 & 2 Exempt Chemical Mixtures (21 CFR 1310.12(c)) - None

DEA Exempt Chemical Mixtures Code Number - None Food and Drug Administration. (FDA) Not regulated.

#### **NFPA Ratings:**

NFPA health hazard	÷ 3 – Can cause serious or permanent injury
NFPA fire hazard	: 4 - Will rapidly or completely vaporize at normal pressure and temperature, or is readily dispersed in air and will burn readily.

NFPA reactivity	: 0 - Normally stable, even under fire exposure conditions. and are not reactive with water.	
HMIS III Rating:	Health : <b>3</b> - Major injury likely unless prompt action is taken and medical treatment is given. Flammability : <b>4</b> - Flammable gases, or very volatile flammable liquids with flash points below 73 °F (23 °C), and boiling points below 100 °F (38 °C). Materials may ignite spontaneously with air Physical : <b>0</b> - Materials that are normally stable, even under fire conditions, and will not react with water, polymerize, decompose, condense, or self-react. Non-explosives.

	Previous version date: September 24, 2013	
Disclaimer	This information is provided without warranty. The information is believed to be correct. This information should be used to make an independent determination of the methods to safeguard workers and the environment.	

## 1. Identification

	Product identifier	NORMAL BUTANE
	Other means of identification	N-Butane, Butyl Hydride, C4H10, Normal Butane, Liquefied Petroleum Gas
	CAS No	106-97-8
	Recommended restrictions	None
	Manufacturer / Importer / Supp	lier / Distributor information
	Company Name / Address	Blueracer Midstream, LLC
		5949 Sherry Lane, Suite 1300, Dallas, TX 75225
	Telephone	214-580-3700
	Email	www.blueracermidstream.com
	Contact Person	Safety Department
	Emergency phone number	214-580-3700
2.	Hazard(s) identification	
	Physical hazards	Flammable gases - <u>Category 1</u> Gases under pressure. Liquefied Gas.
	Specific Target Organ Toxicity	Single Exposure - <u>Category 3</u> (central nervous system)
	Health hazards	Asphyxiation hazard Eye irritant – <u>Category 2</u> Skin and eye frostbite hazard Specific target organ systemic toxicity (Respiratory and Central Nervous Systems) – single exposure - <u>Category 2</u>
	GHS Label Elements Hazard symbol	
	Signal word	Danger
	Hazard statement	Extremely flammable liquid under pressure May displace oxygen and lead to suffocation Contact with skin and eyes may cause frostbite Contact with the eyes may cause irritation Gas inhalation may cause drowsiness and disorientation
	Precautionary statement	
	Prevention	Obtain special instructions before use. Contains gas under pressure; may explode if heated May form explosive mixtures with air Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. No smoking.

	Keep container tightly closed.
	Ground/bond container and receiving equipment.
	Use explosion-proof electrical/ventilating/lighting equipment.
	Use only non-sparking tools.
	Take precautionary measures against static discharge.
	Wear protective gloves/protective clothing/eye protection/face protection. Wash hands and contaminated skin thoroughly after handling.
	Wear insulated gloves where liquid contact and frostbite hazard is possible.
Response	Leaking gas fire: do not extinguish unless leak can be stopped safely;
	Eliminate all ignition sources if safe to do so;
	Use foam, carbon dioxide, dry powder or water fog to extinguish fires;
	If exposed or concerned: Get medical advice/attention.
	If on skin (or hair): Wash with plenty of water. Rinse skin with water/shower.
	Remove contaminated clothing and wash before reuse.
	If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting.
	Dispose of contents/container in accordance with local/regional/national/international regulations.
Storage	Store in secured, locked areas.
	Store in well-ventilated place.
	Keep cool.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Hazard(s) not otherwise classified (HNOC)	May cause frostbite upon sudden release of liquefied gas. May cause asphyxia.
Disposal Hazard(s) not otherwise	If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. Dispose of contents/container in accordance with local/regional/national/international regulations. Store in secured, locked areas. Store in well-ventilated place. Keep cool. Dispose of contents/container in accordance with local/regional/national/international regulations.

# 3. Composition / information on ingredients

## Substance

	Hazardous components Chemical Name	Common name and synonyms	CAS Number	<u>%</u>
	Butane n-		106-97-8	100
	Composition comments	All concentrations are in percentage by we	ight.	
4.	First-aid measures			
	Inhalation	Move victim to uncontaminated area wearin warm and rested. Call a doctor. Apply arti	0	
	Skin contact	If frostbite effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. If breathing is difficult, oxygen should be administered by qualified personnel. Get immediate medical attention.		
	Eye contact	Flush eyes gently with water for at least 15 minutes. If illness or adverse symptoms develop, seek medical attention.		
	Ingestion	Ingestion is not considered a potential route	e of exposure.	
	Most important symptoms/	Asphyxiation potential, potential frostbite on skin; CNS effects (narcotic) from inhalation.		
	effects, acute and delayed			
	Indication of immediate medical attention and special treatment needed Treat symptomatically.		tically.	
	General information	First aid personnel must be aware of own	risk during rescue.	
5	. Firefighting measures			
	Fire Hazard	EXTREMELY FLAMMABLE GAS. SEVE explosive. The vapor is heavier than air. back.		

Suitable extinguishing media	Carbon dioxide, Dry Chemical, Water spray or fog.	
Unsuitable extinguishing media	None	
Special protective equipment and precautions for firefighters	Wear full protective firefighting gear including self-contained breathing apparatus (SCBA) for protection against possible exposure.	
Firefighting equipment/instructions	Evacuate area. Remove pressurized cylinders from the immediate vicinity. Cool containers exposed to flames with water until well after the fire is out. Close the valve if no risk is involved. Do not extinguish a leaking gas fire unless leak can be stopped. If leak cannot be stopped and no danger to surrounding area allow the fire to burn out. Fight fire from a protected location. Prevent buildup of vapors or gases to explosive concentrations.	
Fire-fighting equipment/instructions	Evacuate area of all unnecessary personnel. Shut off product source and allow fire to burn itself out. Use water fog or spray to cool exposed containers and equipment to prevent overheating, flashbacks or explosions. Firefighters directly addressing the fire must use proper protective equipment include SCBA to protect against hazardous combustion products and/or oxygen deficiencies. Use approved gas detectors in confined space.	
Firefighting equipment/instructions Fire-fighting	<ul> <li>exposed to flames with water until well after the fire is out. Close the valve if no risk is involved.</li> <li>Do not extinguish a leaking gas fire unless leak can be stopped. # 6. Accidental release measures

	Personal precautions, protective equipment and emergency procedures	All non-essential personnel should be evacuated. Stay upwind. Ventilate enclosed areas to prevent formation of flammable or oxygen-deficient atmospheres. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Liquid spills will vaporize rapidly and produce vapor cloud. Be alert for latent pooling of liquid portion. Because vapors are heavier than air they will not readily disperse. Avoid vapor cloud even with proper respiratory equipment.
	Methods and materials for containment and cleaning up	Avoid contact with skin. Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.
		In the event of a large spill, self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.
		Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Remove sources of ignition. Beware of the explosion danger.
		Small Spills: Absorb spillage with non-combustible, absorbent material.
		Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non- combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Wash area with soap and water. If necessary dike the product with dry earth, sand or similar non- combustible materials.
	Environmental precautions	Prevent spreading over a wide area (e.g. by containment or oil barriers). Do not contaminate water. Contact local authorities in case of spillage to drain/aquatic environment.
7.	Handling and storage	
	Precautions for safe handling	Access to work area should be restricted to people handling the product only. Should be handled in closed systems, if possible. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Use self-contained breathing apparatus (SCBA) if appropriate.
		Keep away from heat, not surfaces, open flames and other ignition sources. No smoking. Use only non-sparking tools. Use only explosion-proof equipment. Store only where temperature will not exceed 125 °F (52 °C).
		Before entering storage tanks and commencing any operation in a confined area, check the atmosphere for oxygen content, and flammability. Provide adequate ventilation. Avoid contact
		with eyes, skin, and clothing. Material may deplete oxygen from the air to dangerously low levels. Avoid breathing gas. Wear appropriate personal protective equipment. The product is extremely flammable. May form explosive mixtures with air. Avoid heat, sparks, open flames and other ignition sources. Ground container and transfer equipment to eliminate static electric sparks. Use of explosion proof equipment is recommended and may be required (see appropriate fire codes. Refere to NFPA-70 and/or API RP2003 for specific bonding/grounding requirements). Do not enter confined spaces such as tanks or pits where gas may be stored or may accumulate without following proper entry procedures such as ASTM D-4276,and OSHA 1910.146. Observe good industrial hygiene practices.

Avoid aerosol formation.

Store and handle in accordance with all current regulations and standards. Store in wellventilated place. Protect from sunlight. Keep container tightly closed. Store locked up. Grounding and bonding required. Subject to storage regulations: U.S. OSHA 29 CFR 1910.110. U.S. OSHA 29 CFR 1910.101. Keep separated from oxidizing chemicals.

## 8. Exposure controls / personal protection

Occupational exposure limits n-Butane (CAS No. 106-97-8)

<u>Components</u>	Туре	<u>Value</u>
ACGIH TLVs (2016 Edition)	TLV-STEL	1000 ppm (2370 mg/m <sup>3</sup> )
U.S. OSHA Table Z-1, (29 CFR 1910.1000)	None assigned	None assigned
NIOSH	REL-TWA	800 ppm (1900 mg/m <sup>3</sup> )
Biological limit values:	None	
Exposure guidelines:	No exposure standards allocated.	
Appropriate engineering controls	Observe occupational exposure limits and minimize the risk of inhalation of vapors. Provide easy access to water supply and eye wash facilities. Use explosion-proof equipment.	

#### Individual protection measures, such as personal protective equipment

Eye/face protection	For the gas: Eye protection not required, but recommended. For the liquid: Wear splash resistant safety goggles. Contact lenses should not be worn. Provide an emergency eye wash fountain and quick drench shower in the immediate work area.
Hand protection	Wear protective gloves. Frequent change is advisable. If contact with the liquid is possible, insulated gloves suitable for low temperatures should be worn. Suitable gloves can be recommended by the glove supplier.
Other	Chemical protective suit should be worn. Anti-static and flame-retardant protective clothing are recommended.
Respiratory protection	In case of inadequate ventilation, or when exposure concentration is not known, use SCBA. Seek advice from local supervisor.
Thermal hazards	Wear cold insulating gloves when trans-filling or breaking transfer connections.
General hygiene considerations	When using, do not eat, drink or smoke. Wash hands after handling. Launder contaminated clothing before reuse. Private clothes and working clothes should be kept separately. Handle in accordance with good industrial hygiene and safety practice.

## 9. Physical and Chemical properties

Appearance	Colorless gas
Physical state	Gas
Molecular Mass	58 g/mol
Form	Compressed liquefied gas
Color	Colorless to straw colored
Odor	Petroleum
Odor threshold	5000 ppm
PH	Not available
Melting point / freezing point	-47 °F
Initial boiling point and boiling range	
Flash point	-60 °C TCC
Evaporation rate	Moderately fast
Flammability (solid,	Extremely Flammable

N-Butane Safety Data Sheet - BRM

#### gas)

#### Upper / lower flammability or explosive limits

Flammability limit – lower	Not available	
Flammability – upper	12.5%	
Vapor pressure	37 psi @ 100 °F	
Relative density	0.6	
Solubility/Water Slightly		
Auto-ignition temperature	400 °C	
Decomposition temperature	Not available	
Viscosity	Not available	
Other Information		
Bulk density	Not applicable	
Explosive properties	1.4 9.4 vol%	
Oxidizing properties	Not applicable	

## 10. Stability and reactivity

Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.	
Chemical stability	Stable at normal conditions	
Possibility of hazardous reactions	Hazardous polymerization does not occur.	
Conditions to avoid	Heat, sparks, flames, elevated temperatures. Contact with incompatible materials.	
Incompatible materials	Oxidizing agents, Nickel carbonyl, Oxygen Mixtures	
Hazardous decomposition product	Thermal decomposition or burning may produce carbon monoxide, carbon dioxide, and hydrogen. Other decomposition products of normal originate from the volatilization, reaction or oxidation of the material being worked.	

# 11. Toxicological information

#### Information on likely routes of exposure

Acute Toxicity	
Butane n- (106-97-8)	
LC50 inhalation rat	658 g/m <sup>3</sup> (exposure time: 4h)
Ingestion	Not a likely route of exposure. Aspiration hazard. May be fatal if swallowed and enters airways.
Inholation	
Inhalation	680000 mg/m3/2 hour Inhalation Mouse LC50
	658000 mg/m3/4 hour Inhalation Rat LC50
	Immediate Effects: Suffocation, frostbite, central nervous system effects
Skin contact	May cause slight irritation. Extreme dermal exposure may produce discoloration, muscle weakness, breathing difficulties and other central nervous system effects. Direct contact may cause freeze burns.

Eye contact

symptoms related to the physical, chemical and toxicological

May cause irritation including pain, blurred vision, redness, tearing and superficial

N-Butane Safety Data Sheet - BRM

characteristics		corneal turbidity. Headache, drowsiness, dizziness, loss of coordination, cardiac arrhythmia
		disorientation and fatigue.
		Dry skin and possible irritation with repeated or prolonged exposure.
Acute toxicity		Human evidence indicates that the product has very low acute oral, dermal or inhalation toxicity.
		However, it can produce severe injury if taken into the lung as a liquid, and there may be profound central nervous system depression following prolonged exposure to high levels of vapor.
		Suffocation (asphyxiant) hazard - if allowed to accumulate to concentrations that reduce oxygen below safe breathing levels. Breathing of high concentrations may cause dizziness,
		Light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness. Irritant effect on skin. May irritate and cause stomach pain, vomiting, diarrhea and nausea.
Skin corrosion/irritation		May cause slight skin irritation. Pre-existing skin conditions including dermatitis might be aggravated by exposure to this product.
Serious eye damage/eye i	rritation	May cause eye irritation on direct contact.
<b>Respiratory sensitization</b>		Not classified.
Skin sensitization		Not a skin sensitizer
IARC Monographs. Overal	I Evaluatio	n of Carcinogenicity – No ingredients listed
NTP Report on Carcinoge	ns	No ingredients listed
US. OSHA Specifically Regulated Sub Specific target organ toxicity - single exposure		stances (29 CFR 1910.1001-1050) - None
		May cause drowsiness or dizziness. Aspiration hazard. Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious respiratory exposure affecting the central nervous system.
Specific target organ toxicity - repeated exposure		Central nervous system
12. Ecological information		
Ecology General		No ecological damage caused by this product.
<b>Bioaccumulative Potential</b>		
Partition coefficient n-octanol	/ water (log	J Kow)
Butane n- (106-97-8)		
Log Pow	2.89	
Log Kow	Not applic	cable
Bioaccumulative Potential	Bioconcer	ntration potential in aquatic organisms is moderate based on BCF value of 33.
Persistence and degradab	ility	Expected to be inherently biodegradable.
Mobility in soil		No data available
Other adverse effects		Effect on ozone layer - None
13. Disposal considerations		
Disposal instructions		Dispose in accordance with all applicable regulations. This material and/or its container must be disposed of as hazardous waste.
Local disposal regulations	5	Dispose of in accordance with local regulations.
Hazardous waste code		D001
Waste from residues / unu products	sed	Dispose of contents/container in accordance with local/regional/national/international regulations. Contact supplier for any special requirements.

N-Butane Safety Data Sheet - BRM

#### 14. Transportation

## DOT

UN number	UN1075
UN proper shipping name	Liquidfied Petroleum Gases
Commodity Description /	
Technical Name	Normal Butane, Non Odorized
Hazard class	2.1
Subsidiary class	
Packing group	None
Special precautions for user	Not available
Labels required	Flammable gas (2.1)
Special provision	19 <i>,</i> T50
Packaging exceptions	306
Packaging non bulk	304
Packaging bulk	314
ERG number	115

#### 15. Regulatory information

US federal regulations	None of these products components are listed under SARA Sections 302/304, SARA
	Section 313, CERCLA, TSCA or require an OSHA process safety plan.

#### Superfund Amendments and Reauthorization Act of 1986 (SARA)

Hazard categories	Immediate Hazard – Yes
	Delayed Hazard – No
	Fire Hazard – Yes
	Pressure Hazard – Yes
	Reactivity Hazard - No
SARA 311 Hazardous categories substance	See above

#### SARA 311/312 Hazardous chemical Yes

#### Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List - Not regulated

#### Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) – Butane (CAS 106-97-8)

California Proposition 65

This material does not contain any chemicals which are known to the State of California to cause cancer, birth defects or other reproductive harm at concentrations that trigger the warning requirements of California Proposition 65.

#### State regulations

Massachusetts	: This material is listed.
New York	: This material is not listed.
New Jersey	: This material is listed.
Pennsvlvania	: This material is listed.

# 16. Other information, including date of preparation or last version

#### NFPA Ratings:

NFPA health hazard

: 3 – Can cause serious or permanent injury (frostbite; asphyxiation hazard)

NFPA fire hazard	: 4 - Will rapidly or completely vaporize at normal pressure and temperature, or is readily dispersed in
NFPA reactivity	<ul><li>air and will burn readily.</li><li>0 - Normally stable, even under fire exposure conditions. and are not reactive with water.</li></ul>

#### HMIS III Rating:

Health : 3 - Major injury likely unless prompt action is taken and medical treatment is given (frostbite; asphyxiation hazard).

Flammability : 4 - Flammable gases, or very volatile flammable liquids with flash points below 73 °F (23 °C), and boiling points below 100 °F (38 °C). Materials may ignite spontaneously with air

Physical : **0** - Materials that are normally stable, even under fire conditions, and will not react with water, polymerize, decompose, condense, or self-react. Non-explosives.

	Previous version date: <u>September 24, 2013</u>
Disclaimer	This information is provided without warranty. The information is believed to be correct. This information should be used to make an independent determination of the methods to safeguard workers and the environment.

#### 1. Identification

	Product identifier	MIXED BUTANE
	Other means of identification	N-Butane, Butyl Hydride, C4H10, Normal Butane, Liquefied Petroleum Gas
	CAS No	
	Recommended restrictions	Raw material for fuel production
	Manufacturer / Importer / Supp	blier / Distributor information
	Company Name / Address	Blueracer Midstream, LLC
		5949 Sherry Lane, Suite 1300, Dallas, TX 75225
	Telephone	214-580-3700
	Email	www.blueracermidstream.com
	Contact Person	Safety Department
	Emergency phone number	214-580-3700
2.	Hazard(s) Identification	
	Physical hazards	Flammable Gas - Category 1
		Gases under pressure – Liquified gas
	Specific Target Organ Toxicity	Single Exposure, Category 3 (central nervous system)
	Health hazards	Asphyxiation hazard
		Skin and eye frostbite hazard
		Specific target organ systemic toxicity (Respiratory and Central Nervous Systems) – single exposure - <u>Category 2</u>
	GHS Label Elements	$\wedge \wedge \wedge$
	Hazard symbol	
	Signal word	Danger
	Hazard statement	Extremely flammable gas. Contains gas under pressure; may explode if heated.
		May displace oxygen and cause rapid suffocation.
		May cause frostbite, and freeze burns to skin and eyes May cause damage to the central nervous and respiratory systems.
	Precautionary statement	
	Prevention	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood.
		Keep away from heat, sparks, open flame, and hot surfaces – No Smoking.
		Keep container tightly closed. Avoid breathing gas.
		Use only outdoors or in a well-ventilated area. Ground/bond container and receiving equipment.
		Use explosion-proof electrical/ventilating/lighting equipment.
		Use only non-sparking tools.
		Take precautionary measures against static discharge.
		Wear protective gloves/protective clothing/eye protection/face protection.

	Wash hands and contaminated skin thoroughly after handling.
Response	Leaking gas fire: Do not extinguish, unless leak can be stopped safely with foam, carbon dioxide, dry powder, or water fog.
	Eliminate all ignition sources if safe to do so.
	If INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
	If exposed or concerned: Get medical advice/attention.
	If on skin (or hair): Wash with plenty of water. R
	inse skin with water/shower.
	If skin irritation occurs: Get medical advice/attention.
	Take off contaminated clothing and wash before reuse.
	If swallowed: Immediately call a poison center/doctor.
	Do NOT induce vomiting.
Storage	Store locked up. Store in well-ventilated place. Keep cool. Keep container tightly closed.
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.
Hazard(s) not otherwise classified (HNOC)	May cause frostbite upon sudden release of liquefied gas. Gas accumulation in confined or low areas can displace oxygen and lead to asphyxiation.

# 3. Composition / Information on Ingredients

#### Substance

Hazardous Components Chemical Name	Common name and synonyms	CAS Number	<u>%</u>
n-Butane		106-97-8	54-100
Propane		74-98-6	0-28
n-Pentane		109-66-0	0-10
Isobutane		75-28-5	0-43.5

**Composition comments** All concentrations are in percentage by weight.

# 4. First-Aid Measures

Inhalation	Move victim to uncontaminated fresh air. Keep victim warm and rested. For respiratory distress give air, oxygen, or administer cardiopulmonary resuscitation if needed. Seek medical attention – call 911 or Emergency Medical Services.	
Skin contact	If frostbite effects occur, remove to uncontaminated area. Immediately flush skin with water for 15 minutes. Clothing frozen to the skin should be thawed before removal. Do not use hot water! Cryogenic burns may occur as evidenced by blistering. Protect affected area with dry gauze and get prompt medical attention. Give artificial respiration if not breathing. If breathing is difficult, oxygen should be administered by qualified personnel.	
Eye contact	Flush eyes gently with water for at least 15 minutes. If illness or adverse symptoms develop, seek medical attention.	
Ingestion	Seek immediate medical attention.	
Most important symptoms/ effects, acute and delayed	Acute: Headache, drowsiness, dizziness, loss of coordination, disorientation, and fatigue. Delayed: Dry skin and irritation after repeated or prolonged exposure.	
Indication of immediate medical attention and special treatment needed Treat symptomatically.		
General information	First aid personnel must be aware of own risk during rescue.	
Firefighting Measures		
Fire Hazard	EXTREMELY FLAMMABLE GAS. SEVERE EXPLOSION HAZARD. Vapor/air mixtures are explosive. The vapor is heavier than air. Vapor or gases may ignite at distant ignition and flash back.	
Suitable extinguishing media	Extinguish with dry chemical foam, carbon dioxide dry powder, or water fog.	

5.

Unsuitable extinguishing media	Do not use water jet as an extinguisher as this will spread the fire. Simultaneous use of foam and water on the same surface is to be avoided as water destroys the foam.		
Specific hazards arising from the chemical	The product is extremely flammable, and explosive vapor/air mixtures may be formed even at normal room temperatures. Vapors are heavier than air and may travel along the ground to some distant source of ignition and flash back. Liquid propane will vaporize rapidly at well below ambient temperatures and readily forms flammable mixtures with air. Flames impinging on product storage vessels above the liquid level will cause sudden vessel failure, resulting in a BLEVE (Boiling Liquid Expanding Vapor Explosion), unless the vessel surfaces are kept cooled with water. If this cannot be done, evacuate the area. Gasoline portion may continue to pool after propane and butane vaporize.		
Special protective equipment and precautions for firefighters	Wear full protective firefighting gear including self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode for protection against possible exposure. Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Firefighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) Use approved gas detectors in confined space.		
Firefighting equipment/instructions	Evacuate area of all unnecessary personnel. Remove pressurized cylinders from the immediate vicinity. Cool containers exposed to flames with water until well after the fire is out. Close the valve if no risk is involved. Do not extinguish a leaking gas fire unless leak can be stopped. If leak cannot be stopped and no danger to surrounding area allow the fire to burn out. Fight fire from a protected location. Prevent buildup of vapors or gases to explosive concentrations.		
. Accidental Release Measu	Accidental Release Measures		
Personal precautions, protective equipment and emergency procedures	All non-essential personnel should be evacuated. Stay upwind. Ventilate enclosed areas to prevent formation of flammable or oxygen-deficient atmospheres. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Liquid spills will vaporize rapidly and produce vapor cloud. Be alert for latent pooling of gasoline		

Cloud even with proper respiratory equipment. Wear personal protective clothing and equipment.
 Methods and materials for containment and cleaning up
 Keep unnecessary people away, isolate hazard area and deny entry. Remove sources of ignition. Ventilate closed space before entering. Avoid contact with skin. Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see

suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.

portion. Because vapors are heavier than air they will not readily disperse. Avoid vapor

In the event of a large spill, self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.

Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Remove sources of ignition. Beware of the explosion danger.

Small Spills: Absorb spillage with non-combustible, absorbent material.

Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non- combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Wash area with soap and water. If necessary dike the product with dry earth, sand or similar non- combustible materials.

handling or processing. Electrically ground and bond shipping container, transfer line

Environmental<br/>precautionsAvoid release to the environment. Prevent spreading over a wide area (e.g. by<br/>containment or oil barriers). Do not contaminate water. Contact local authorities in case<br/>of spillage to drain/aquatic environment.

#### 7. Handling and Storage

6.

Precautions for safe handling	Keep away from heat, hot surfaces, open flames and other ignition sources. No smoking. Use only non-sparking tools. Use only explosion-proof equipment. Store only where temperature will not exceed 125 °F (52 °C).
	Access to work area should be restricted to people handling the product only. Should be handled in closed systems, if possible. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Use self-contained breathing apparatus (SCBA) in situations where exposure potential is unknown or when exposure is known to exceed applicable occupational exposure limits.
	Use explosion-proof equipment and non-sparking tools in areas where explosive vapors may form. Electrostatic charge may accumulate and create a hazardous condition when

	and receiving container. Refer to NFPA-70 and/or API RP2003 for specific bonding/grounding requirements. Material may be at elevated temperatures and/or pressures. Exercise care when opening tank hatches, sampling ports and/or bleeder valves.	
	Extremely flammable. May vaporize easily at ambient temperatures. Vapor is heavier than air and may create an explosive mixture of vapor and air. Beware of accumulation in confined spaces and low lying areas. Open containers slowly to relieve pressure. Do not enter confined spaces such as tanks or pits without following proper entry procedures such as ASTM D-4276 and 29 CFR 1910.146 (OSHA Confined Space Entry Standard). Do not wear contaminated clothing or shoes. Keep contaminated clothing away from ignition sources.	
Conditions for safe storage, including any incompatibilities	Store and handle in accordance with all current regulations and standards. Store in well- ventilated place. Protect from sunlight. Keep container tightly closed. Store locked up. Grounding and bonding required. Subject to storage regulations: U.S. OSHA 29 CFR 1910.110. U.S. OSHA 29 CFR 1910.101. Keep separated from incompatible substances. No Smoking. Keep away from oxidizers, e.g. chlorine, bleaches, fertilizers.	

# 8. Exposure Controls / Personal Protection

## **Occupational Exposure Limits**

<u>Components</u> Butane n- (106-97-8); & Isobutane (75-28-5)	ACGIH: (2016 Edition) TWA: 1000 ppm (2370 mg/m <sup>3</sup> )	OSHA 
Propane (74-98-6)	Asphyxiation hazard (Re: Appendix F)	TWA: 1000 ppm (1800 mg/m <sup>3</sup> )
n-Pentane (109-66-0)	TWA: 1000 ppm (2950 mg/m <sup>3</sup> )	TWA: 1000 ppm (2950 mg/m <sup>3</sup> )

Biological limit values:	None
Exposure guidelines:	No exposure standards allocated.
Appropriate engineering controls	Observe occupational exposure limits and minimize the risk of inhalation of vapors. Provide easy access to water supply and eye wash facilities. Use explosion-proof equipment.

# Individual protection measures, such as personal protective equipment

Eye/face protection	For the gas: Wear goggles/face shield. Contact lenses should not be worn. Provide an emergency eye wash fountain and quick drench shower in the immediate work area.
Skin protection/ Hand protection	Wear protective gloves. Nitrile gloves are recommended but be aware that the liquid may penetrate the gloves. Frequent change is advisable. If contact with the liquid is possible, insulated gloves suitable for low temperatures should be worn. Suitable gloves can be recommended by the glove supplier.
Other	Protective suit should be worn. Anti-static and flame-retardant protective clothing is recommended.
Respiratory protection	In case of inadequate ventilation where exposure concentrations are known, use air-supplied full-mask. In situations where concentrations are unknown, use SCBA. Seek advice from local supervisor.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary. Wear cold insulating gloves when transfilling or breaking transfer connections.
General hygiene considerations	When using, do not eat, drink or smoke. Wash hands after handling. Launder contaminated clothing before reuse. Private clothes and working clothes should be kept separately. Handle in accordance with good industrial hygiene and safety practice.

# 9. Physical and Chemical Properties

#### Appearance Colorless gas

Physical state	Liquefied Gas
Odor	Petroleum
Odor threshold	No data
рН	Not applicable
Vapor Pressure	2600 mm Hg @ 77°F / 25°C
Vapor Density (air=1)	2
Initial Boiling Point/	11°F / -12°C
Range	-47 °F
Melting/Freezing Point	No data
Solubility in Water	Negligible
Partition Coefficient (n-octanol/water) (Kow):	No Data
Specific Gravity (water=1)	0.55-0.60 @ 77°F / 25°C (estimated)
Evaporation Rate (nBuAc=1)	>1
Flash Point	< -60°F / < -51°C
Test Method	(estimate)
Lower Exposure Limits (vol % in air)	1.9
Upper Exposure Limits (vol % in air)	8.5
Auto-ignition Temperature	752 °F / 400 °C

#### **10: Stability and Reactivity**

Stability: Stable under normal ambient and anticipated conditions of use.

Conditions to Avoid: Avoid all possible sources of ignition. Heat will increase pressure in the storage tank.

Materials to Avoid (Incompatible Materials): Avoid contact with acids, aluminum chloride, chlorine, chlorine dioxide, halogens and other oxidizing agents.

Hazardous Decomposition Products: Not anticipated under normal conditions of use.

Hazardous Polymerization: Not known to occur.

#### **11: Toxicological Information**

#### Information on Toxicological Effects of Substance/Mixture

#### Acute Toxicity

Butane n- (106-97-8) LC<sub>50</sub> inhalation

Rat

658 g/m<sup>3</sup> (exposure time: 4h)

LC<sub>50</sub> Inhalation

#### Aspiration Hazard: Not applicable

Skin Corrosion/Irritation: Not expected to be irritating. Contact with the liquefied or pressurized gas may cause frostbite ("cold" burn). Repeated exposure may cause skin dryness or cracking.

Serious Eye Damage/Irritation: Not expected to be irritating. Contact with the liquefied or pressurized gas may cause momentary freezing followed by swelling and eye damage.

**Signs and Symptoms:** Light hydrocarbon gases are simple asphyxiants and can cause anesthetic effects at high concentrations. Symptoms of overexposure, which are reversible if exposure is stopped, can include shortness of breath, drowsiness, headaches, confusion, decreased coordination, visual disturbances and vomiting. Continued exposure can lead to hypoxia (inadequate oxygen), rapid breathing, cyanosis (bluish discoloration of the skin), numbness of the extremities, unconsciousness and death.

Skin Sensitization: Not expected to be a skin sensitizer.

Respiratory Sensitization: Not expected to be a respiratory sensitizer.

Specific Target Organ Toxicity (Single Exposure): Central Nervous System

Toxicity (Repeated Exposure): Not expected to cause organ effects from repeated exposure.

Carcinogenicity: Not expected to cause cancer. This substance is not listed as a carcinogen by IARC, NTP or OSHA.

Germ Cell Mutagenicity: Not expected to cause genetic effects.

Reproductive Toxicity: Not expected to cause reproductive effects.

**Other Comments:** High concentrations may reduce the amount of oxygen available for breathing, especially in confined spaces. Hypoxia (inadequate oxygen) during pregnancy may have adverse effects on the developing fetus.

#### Information on Toxicological Effects of Components

#### <u>n-Butane</u>

*Target Organs:* No systemic or neurotoxic effects were noted in rats exposed to concentrations of butane as high as 9,000 ppm for 28 days.

*Reproductive Toxicity:* No adverse reproductive or developmental effects were observed in rats exposed to butane; no observed adverse effect level = 12,000 ppm.

#### Propane

*Target Organs:* No systemic or neurotoxic effects were noted in rats exposed to concentrations of propane as high as 12,000 ppm for 28 days.

**Reproductive Toxicity:** No adverse reproductive or developmental effects were observed in rats exposed to propane; no observed adverse effect level = 12,000 ppm.

#### <u>Isobutane</u>

*Target Organs:* No systemic or neurotoxic effects were noted in rats exposed to concentrations of isobutane as high as 9,000 ppm for 28 days.

**Reproductive Toxicity:** No adverse developmental effects were observed in rats exposed to concentrations of isobutane as high as 9000 ppm. Fertility and mating indices may have been affected at 9000 ppm but no effects were observed at 3000 ppm (NOAEL).

#### **12:** Ecological Information

**Toxicity:** Petroleum gases will readily evaporate from the surface and would not be expected to have significant adverse effects in the aquatic environment. Classification: No classified hazards.

**Persistence and Degradability:** The hydrocarbons in this material are expected to be inherently biodegradable. In practice, hydrocarbon gases are not likely to remain in solution long enough for biodegradation to be a significant loss process. Hydrogen sulfide, if present in refinery gas streams, will be rapidly oxidized in water and insoluble sulfides precipitated from water when metallic radicals are present.

**Bioaccumulative Potential:** Since the log Kow values measured for refinery gas constituents are below 3, they are not regarded as having the potential to bioaccumulate.

Mixed Butane SDS Revision 1-2017

**Mobility in Soil:** Due to the extreme volatility of petroleum gases, air is the only environmental compartment in which they will be found. In air, these hydrocarbons undergo photodegradation by reaction with hydroxyl radicals with half-lives ranging from 3.2 days for n-butane to 7 days for propane.

Other Adverse Effects: None anticipated.

## **13:** Disposal Considerations

This material is a gas and would not typically be managed as a waste.

## 14: Transport Information

U.S. Department of Transportation (DOT)	
UN number	UN1075
UN proper shipping name	Liquified Petroleum Gases

	Contact Person	Safety Department	
	Emergency phone number	214-580-3700	
2.	Hazard(s) identification		
	Physical hazards	Flammable liquid - <u>Category 1</u>	
	Health hazards	Skin corrosion / irritation - Category 2	
		Germ cell mutagenicity – <u>Category 1B</u>	
		Carcinogenicity – <u>Category 1B</u>	
		Specific target organ toxicity, single exposure – <u>Category 2 (</u> vascular system)	
		Specific target organ toxicity, single exposure – Category 3 (narcotic effects)	
		Aspiration hazard – <u>Category 1</u>	
	Label Elements Hazard symbol		
	Signal word	Danger	
	Hazard statement	Extremely flammable liquid and vapor. May be fatal if swallowed and enters airways. Causes skin irritation. Suspected of damaging fertility or the unborn child. May cause cancer. Vapor buildup in enclosed areas can displace oxygen and create an asphyxiation hazard.	
	Precautionary statement	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not handle until all safety precautions have been read and understood.	
	Prevention	Keep away from heat/sparks/open flames/hot surfaces. No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Wear protective gloves/protective clothing/eye protection/face protection. Wash hands and contaminated skin thoroughly after handling.	
	Storage	Store locked up. Store in a well-ventilated place. Keep cool. Keep container tightly closed.	

If exposed or concerned: Get medical advice/attention. If on skin (or hair): Wash with plenty of water. Rinse skin with water/shower. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.

Disposal

Dispose of contents/container in accordance with local/regional/national/international regulations.

#### 3. Composition / information on ingredients

Hazardous components Chemical Name	<u>Common name and synonyms</u>	CAS Number	<u>%</u>
C4 – C12			100
Cyclohexane		110-82-7	3.4
Toluene		108-88-3	0.75
Benzene		71-43-2	0.45
Xylene		1330-20-7	0.29

**Composition comments** 

All concentrations are in percentage by weight.

#### 4. First-aid measures

5.

Move victim to area of fresh air. For respiratory distress give air, oxygen or administer cardiopulmonary resuscitation if needed. Seek medical attention call 911 or emergency medical services.		
Remove contaminated shoes and clothing, and flush affected area(s) with large amounts of water. If skin surface is damaged, apply a clean dressing and seek medical attention. If skin surface is not damaged, cleanse affected area(s) thoroughly by washing with mild soap and water or a waterless hand cleaner. If irritation or redness develops, seek medical attention. Wash contaminated clothing before reuse.		
Flush eyes gently with water for at least 15 minutes. If illness or adverse symptoms develop, seek medical attention.		
Seek immediate medical attention.		
Acute: Headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue. Delayed:		
Dry skin and irritation after repeated or prolonged exposure.		
dical attention and special treatment needed Treat symptomatically.		
First aid personnel must be aware of own risk duringrescue.		
dia Extinguish with foam, carbon dioxide, dry powder or water fog.		
None		
OM Cylinders can burst violently when heated, due to excess pressure build-up. Gas may travel considerable distance to a source of ignition and flash back. Gases may form explosive mixtures with air. Fire or high temperatures create carbon monoxide. Carbon oxides.		
Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Firefighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode. Use approved gas detectors in confined space.		
Evacuate area. Remove pressurized cylinders from the immediate vicinity. Cool containers exposed to flames with water until well after the fire is out. Close the valve if no risk is involved. Do not extinguish a leaking gas fire unless leak can be stopped. If leak cannot be stopped and no danger to surrounding area allow the fire to burn out. Fight fire from a protected location. Prevent buildup of vapors or gases to explosive concentrations.		

	Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
	Fire-fighting equipment/instructions	Evacuate area of all unnecessary personnel. Shut off product source and allow fire to burn itself out. Use water fog or spray to cool exposed containers and equipment to prevent overheating, flashbacks or explosions. Firefighters directly addressing the fire must use proper protective equipment include breathing apparatus to protect against hazardous combustion products and/or oxygen deficiencies.
6.	Accidental release measures	
	Personal precautions, protective equipment and emergency procedures	All non-essential personnel should be evacuated. Stay upwind. Ventilate enclosed areas to prevent formation of flammable or oxygen-deficient atmospheres. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Liquid spills will vaporize rapidly and produce vapor cloud. Be alert for latent pooling of gasoline portion. Because vapors are heavier than air they will not readily disperse. Avoid vapor cloud even with proper respiratory equipment.
	Methods and materials for containment and cleaning up	Avoid contact with skin. Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.
		In the event of a large spill, self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.
		Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Remove sources of ignition. Beware of the explosion danger.
		Small Spills: Absorb spillage with non-combustible, absorbent material.
		Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non- combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Wash area with soap and water. If necessary dike the product with dry earth, sand or similar non- combustible materials.
	Environmental precautions	Prevent spreading over a wide area (e.g. by containment or oil barriers). Do not contaminate water. Contact local authorities in case of spillage to drain/aquatic environment.
7.	Handling and storage	
	Precautions for safe handling	Access to work area should be restricted to people handling the product only. Should be handled in closed systems, if possible. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Use self-contained breathing apparatus (SCBA) if appropriate.
		Use explosion-proof equipment and non-sparking tools in areas where explosive vapors may form. Electrically ground and bond shipping container, transfer line and receiving container. Material may be at elevated temperatures and/or pressures. Exercise care when opening tank hatches, sampling ports and/or bleeder valves.
	Conditions for safe storage, including any	Keep containers tightly closed. Keep away from heat, open flames, or other sources of ignition.
	incompatibilities	No smoking or open lighting. Outside or detached storage is preferred. Keep away from oxidizers, e.g. chlorine, oxygen, bleaches, fertilizers.
8.	Exposure controls / personal	protection

# Exposure guidelines:

Appropriateengineering	Observe occupational exposure limits and minimize the risk of inhalation of vapors.
controls	Provide easy access to water supply and eye wash facilities. Use explosion-proof
	equipment.

# Individual protection measures, such as personal protective equipment

Eye/face protection	Wear goggles / face shield.		
Skin protection / Hand Protection	Wear protective gloves. Nitrile gloves are recommended, but be aware that the liquid may penetrate the gloves. Frequent change is advisable. If contact with the liquid is possible, insulated gloves suitable for low temperatures should be worn. Suitable gloves can be recommended by the glove supplier.		
Other	Protection suit must be worn. Anti-static and flame-retardant protective clothing is recommended.		
Respiratory protection	In case of inadequate ventilation, use air-supplied full-mask. Seek advice from local supervisor.		
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.		
General hygiene considerations	When using, do not eat, drink or smoke. Wash hands after handling. Launder contaminated clothing before reuse. Private clothes and working clothes should be kept separately. Handle in accordance with good industrial hygiene and safety practice.

Explosive properties Oxidizing properties	Not applicable Not explosive
10. Stability and reactivity	
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Stable at normal conditions
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Heat, sparks, flames, elevated temperatures. Contact with incompatible materials.
Incompatible materials	Oxvaen. Strona oxidizina agents.
Hazardous decomposition products	Carbon oxides and various hydrocarbons.
11. Toxicological information	
Information on likely routes of exposure	
Ingestion	Not a likely route of exposure. Aspiration hazard. May be fatal if swallowed and enters airways.
Inhalation	At high concentrations a simple asphyxiant. May produce nausea, diarrhea, loss of appetite, dizziness, disorientation, headache, excitation, rapid respiration, drowsiness, labored breathing, anesthesia and other central nervous system effects. May cause lung paralysis and asphyxiation. Extreme overexposure may cause unconsciousness and respiratory arrest.
Skin contact	May cause slight irritation. Extreme exposure may produce discoloration, muscle weakness, breathing difficulties and other central nervous system effects. Direct contact may cause freeze burns.

## Eye contact

Symptoms related to the physical, chemical and toxicological	May cause irritation including pain, blurred vision, redness, tearing and superficial corneal turbidity.
characteristics	Headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue.
	Dry skin and possible irritation with repeated or prolonged exposure.
Acute Toxicity	Human evidence indicates that the product has very low acute oral, dermal or inhalation toxicity.
	However, it can produce severe injury if taken into the lung as a liquid, and there may be profound central nervous system depression following prolonged exposure to high levels of vapor.
	Suffocation (asphyxiant) hazard - if allowed to accumulate to concentrations that reduce oxygen below safe breathing levels. Breathing of high concentrations may cause dizziness,
	Light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness. Irritant effect on skin. May irritate and cause stomach pain, vomiting, diarrhea and nausea.

Cyclohexane (CAS 110-82-7)	3.44	
Persistence and degradability	Expected to be inherently biodegradable. The absorbed in the soil.	he product has a low potential of being
Mobility in soil	The product is insoluble in water. It will spread on the water surface while some of the components will eventually sediment in water systems. The volatile components of the product will spread in the atmosphere.	

Natural Gasoline Safety Data Sheet - BRM

Mobility in general	The product contains volatile organic compounds which have a photochemical ozone creation potential. Oil spills are generally hazardous to the environment.
13. Other adverse effects	
Disposal considerations	Dispose in accordance with all applicable regulations. This material and/or its container must be disposed of as hazardous waste.
<b>Disposal instructions</b>	Dispose of in accordance with local regulations.
Local disposal regulations	D001
Hazardous waste code	The transportation, storage, treatment and disposal of RCRA waste material must be conducted in compliance with 40 CFR 262, 263, 264, 268, and 270. Disposal can occur only in properly permitted facilities. Check state regulations. Chemical additions, processing or otherwise altering this material may make the waste management information presented in this SDS incomplete, inaccurate or otherwise inappropriate. Disposal of this material must be conducted in compliance with all federal, state and local regulations.
Waste from residues / unused products	Non-empty contaminated packaging should be disposed of as hazardous waste.

6.	Accidental release measure Personal precautions	S All non-essential personnel should be	evenueted Stavuswind	(antilate analoged

Personal precautions,

	protective equipment and emergency procedures	areas to prevent formation of flammable or oxygen-deficient atmospheres. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Liquid spills will vaporize rapidly and produce vapor cloud. Be alert for latent pooling of gasoline portion. Because vapors are heavier than air they will not readily disperse. Avoid vapor cloud even with proper respiratory equipment.
	Methods and materials for containment and cleaning up	Avoid contact with skin. Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.
		In the event of a large spill, self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.
		Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Remove sources of ignition. Beware of the explosion danger.
		Small Spills: Absorb spillage with non-combustible, absorbent material.
		Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non- combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Wash area with soap and water. If necessary dike the product with dry earth, sand or similar non- combustible materials.
	Environmental precautions	Stop leak if possible if possible to do so safely. Sewers must be covered and basements and work pits evacuated.
7.	Handling and storage	
	Precautions for safe handling	Access to work area should be restricted to people handling the product only. Should be handled in closed systems, if possible. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Use self-contained breathing apparatus (SCBA) in release situations where exposure concentration is unknown or cannot be controlled.
		Use explosion-proof equipment and non-sparking tools in areas where explosive vapors may form. Electrostatic charge may accumulate and create a hazardous condition when handling or processing. Electrically ground and bond shipping container, transfer line and receiving container. Refer to NFPA-70 and/or API RP2003 for specific bonding/grounding requirements. Material may be at elevated temperatures and/or pressures. Exercise care when opening tank hatches, sampling ports and/or bleeder valves.
		Extremely flammable. May vaporize easily at ambient temperatures. Vapor is heavier than air and may create an explosive mixture of vapor and air. Beware of accumulation in confined spaces and low lying areas. Open containers slowly to relieve pressure. Do not enter confined spaces such as tanks or pits without following proper entry procedures such as ASTM D-4276 and 29 CFR 1910.146 (OSHA Confined Space Entry Standard). Do not wear contaminated clothing or shoes. Keep contaminated clothing away from ignition sources.
	Conditions for safe storage, including any incompatibilities	Keep containers tightly closed. Keep away from heat, open flames, or other sources of ignition. Flammable compressed gas storage. Keep in a cool well-ventilated place. No smoking or open lighting. Outside or detached storage is preferred. Keep away from oxidizers, e.g. chlorine, oxygen, bleaches, fertilizers and incompatible materials.

8. Exposure controls / personal protection

10. Stability and reactivity				
Reactivity		The product is stable and non-reactive under normal conditions of use, storage and transport.		
Chemical stability		Stable at normal conditions		
Possibility of hazardous rea	actions	Hazardous polymerization does not occur.		
Conditions to avoid		Heat, sparks, flames, elevated temperatures. Contact with incompatible materials.		
Incompatible materials		Oxygen. Strong oxidizing agents.		
Hazardous decomposition	products	Carbon oxides, sulfur oxides and various hydrocarbons.		
11. Toxicological information				
Information on likely routes of e	xposure			
Ingestion	•	Not a likely route of exposure.		
Inhalation		At high concentrations a simple asphyxiant. May produce nausea, diarrhea, loss of appetite, dizziness, disorientation, headache, excitation, rapid respiration, drowsiness, labored breathing, anesthesia and other central nervous system effects. May cause lung paralysis and asphyxiation. Extreme overexposure may cause unconsciousness and respiratory arrest.		
Skin contact		May cause slight irritation. Extreme exposure may produce discoloration, muscle weakness, breathing difficulties and other central nervous system effects. Direct contact may cause frostbite or freeze burns.		
Eye contact		May cause irritation including pain, blurred vision, redness, tearing and superficial corneal turbidity. Direct contact with the liquid can cause freeze burns and possibly permanent vision loss.		
Symptoms related to the pl chemical and toxicological characteristics	nysical,	Exposure to rapidly expanding gas or vaporizing liquid may cause frostbite ("cold burn"). Contact with evaporating liquid may cause frostbite or freezing of skin. Narcosis. Behavioral changes. Decrease in motor functions. Eyes. Skin. Central nervous system.		
Acute toxicity		Headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue.		
		Dry skin and possible irritation with repeated or prolonged exposure.		
		Human evidence indicates that the product has very low acute oral, dermal or inhalation toxicity.		
		However, it can produce severe injury if taken into the lung as a liquid, and there may be profound central nervous system depression following prolonged exposure to high levels of vapor.		
		Suffocation (asphyxiant) hazard - if allowed to accumulate to concentrations that reduce oxygen below safe breathing levels. Breathing of high concentrations may cause dizziness,		
		Light-headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness. Irritant effect on skin. May irritate and cause stomach pain, vomiting, diarrhea and nausea.		

Components Ethane (74-84-0) Acute Inhalation Test Results

Species

LC50	Rat	658 mg/l, 4 hours
Propane (CAS 74-98-6) Acute		
Inhalation		
LC50	Rat	>1442.847 mg/l, 15 minutes
Ethyl Mercaptan (CAS 75-08-1) Acute		
Dermal LD50	Rat	>2000 mg/kg
<b>Acute</b> Inhalation LC50	Mouse	4420 mg/L, 4 hours
Acute		
Oral LD50	Rat	682 mg/kg
Serious eye damage/eye irritation	Not class	ified.
<b>Respiratory sensitization</b>	Not class	ified.
Skin sensitization	Not a ski	n sensitizer
Germ cell mutagenicity	May caus	e genetic defects.
Chronic effects	Prolonge	d exposure may cause chronic effects.
IARC Monographs. Overall Evaluation	n of Carcinogenicity – No i	ngredients listed
NTP Report on Carcinogens	No ingred	lients listed
US. OSHA Specifically Regulated Sub	ostances (29 CFR 1910.100 <sup>-</sup>	1-1050) - None
Reproductive toxicity	Not class	ified.
Specific target organ toxicity - sing	le exposure Not class	ified.
Specific target organ toxicity - repe exposure	ated Not class	ified.
12. Ecological information		
Exotoxicity		es substances which are toxic to aquatic organisms and ong-term adverse effects in the aquatic environment.
Bioaccumulative potential	Has the potential t	o bioaccumulate.
Partition coefficient n-octanol / water (log	g Kow)	
Ethane 1.81		
Propane 2.36		
C4 Hydrocarbons 2.89		
Persistence and degradability	Not available.	
Mobility in soil		to the form of the product.
Mobility in general	-	olatile substance, which may spread in the atmosphere.
Other adverse effects The product contains volatile organic compounds which have a photochemical ozone creation potential. Oil spills are generally has to the environment.		one creation potential. Oil spills are generally hazardous
13. Disposal considerations		
Disposal instructions		ance with all applicable regulations. This material and/or be disposed of as hazardous waste.
Local disposal regulations	Dispose of in acco	ordance with local regulations.
Hazardous waste code	Not regulated.	
Waste from residues / unused prod	lucts Dispose of in acco	ordance with local regulations.
Contaminated packaging	Since emptied cor even after contain	ntainers may retain product residue, follow label warnings er is emptied.

NFPA Ratings NFPA health hazard					
NFPA nealth hazard	: 3 – Can cause serious or permanent injury				
NFPA fire hazard	<ul> <li>4 - Will rapidly or completely vaporize at normal pressure and temperature, or is readily dispersed in air and will burn readily.</li> </ul>				
NFPA reactivity	: 0 - Normally stable, even under fire exposure conditions. and are not reactive with water.				
HMIS III Rating:	Health : 3 - Major injury likely unless prompt action is taken and medical treatment is given.				
	Flammability : <b>4</b> - Flammable gases, or very volatile flammable liquids with flash points below 73 °F (23 °C), and boiling points below 100 °F (38 °C). Materials may ignite spontaneously with air.				
	Physical : <b>0</b> - Materials that are normally stable, even under fire conditions, and will not react with water, polymerize, decompose, condense, or self-react. Non-explosives.

# SAFETY DATA SHEET

1. Identification					
Product identifier	PROPANE				
Other means of identification	Not Available				
<b>Recommended restrictions</b>	None				
Manufacturer / Importer / Supplier / Distributor information					
Company Name / Address	Blueracer Midstream, LLC				
	5949 Sherry Lane, Suite 1300, Dallas, TX 75225				
Telephone	214-580-3700				
Email	www.blueracermidstream.com				
Contact Person	Safety Department				
Emergency phone number	214-580-3700				
2. Hazard(s) identification					
Physical hazards	Flammable gases: Category 1				
	Gases under pressure. Liquefied Gas.				
Health hazards	Not Classified				
Label Elements					
Hazard symbol					
Signal word	Danger				
Hazard statement	Extremely flammable gas. Contains gas under pressure; may explode if heated. May displace oxygen and cause rapid suffocation.				
Precautionary statement	Keep away from heat, sparks, open flames, hot surfaces. No smoking.				
Prevention Response	Leaking gas fire; Do not extinguish, unless leak can be stopped safely. Eliminate all ignition sources if safe to do so.				
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.				

Disposal Hazard(s) not otherwise classified (HNOC)

#### 3. Composition / Information on Ingredients Substance

None known

Hazardous components Chemical Name		Common name and synonyms	CAS Number	<u>%</u>
Propane			74-98-6	>90
Ethane			74-84-0	>7
C4 Hydrocarbons				<5
Composition comments	All conce	entrations are in percentage by weight.		

gauze and get prompt medical attention.

# 4. First-aid measures

Inhalation Move victim to area of fresh air. For respiratory distress give air, oxygen or administer cardiopulmonary resuscitation if needed. Seek medical attention -- call 911 or emergency medical services. Skin contact Immediately flush skin with water for 15 minutes. Frozen tissue should be gradually warmed using warm water. Clothing frozen to the skin should be thawed before removal. Do not use hot water! Cryogenic burns may occur as evidenced by blistering. Protect affected area with dry

	Eye contact	Flush eyes gently with water for at least 15 minutes. If illness or adverse symptoms develop, seek medical attention.
	Ingestion	Seek immediate medical attention.
	Most important symptoms/	Narcosis. Behavioral changes. Decrease in motor functions.
	effects, acute and delayed	
	Indication of immediate medica	al attention and special treatment needed Treat symptomatically.
	General information	First aid personnel must be aware of own risk during rescue.
5.	Firefighting measures	
	Suitable extinguishing media	Extinguish with foam, carbon dioxide, dry powder or water fog.
	Unsuitable extinguishing	None
	media	
	Specific hazards arising from the chemical	Cylinders can burst violently when heated, due to excess pressure build-up. Gas may travel considerable distance to a source of ignition and flash back. Gases may form explosive mixtures with air. Fire or high temperatures create carbon monoxide. Carbon oxides.
	Special protective equipment and precautions for firefighters	Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Firefighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with full face-piece operated in positive pressure mode. Use approved gas detectors in confined space.
	Firefighting equipment/instructions	Evacuate area. Remove pressurized cylinders from the immediate vicinity. Cool containers exposed to flames with water until well after the fire is out. Close the valve if no risk is involved. Do not extinguish a leaking gas fire unless leak can be stopped. If leak cannot be stopped and no danger to surrounding area allow the fire to burn out. Fight fire from a protected location. Prevent buildup of vapors or gases to explosive concentrations.
	Special protective equipment a precautions for firefighters	<b>nd</b> Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
	Fire-fighting equipment/instructions	Evacuate area of all unnecessary personnel. Shut off product source and allow fire to burn itself out. Use water fog or spray to cool exposed containers and equipment to prevent overheating, flashbacks or explosions. Firefighters directly addressing the fire must use proper protective equipment including breathing apparatus to protect against hazardous combustion products and/or oxygen deficiencies.
6.	Accidental release measure	
	Personal precautions, protective equipment and emergency procedures	All non-essential personnel should be evacuated. Stay upwind. Ventilate enclosed areas to prevent formation of flammable or oxygen-deficient atmospheres. Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Liquid spills will vaporize rapidly and produce vapor cloud. Be alert for latent pooling of gasoline portion. Because vapors are heavier than air they will not readily disperse. Avoid vapor cloud even with proper respiratory equipment.
	Methods and materials for containment and cleaning up	Avoid contact with skin. Wear suitable protective clothing, gloves and eye/face protection. For personal protection, see section 8 of the SDS.
		In the event of a large spill, self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.
		Stop the flow of material, if this is without risk. Dike far ahead of spill for later disposal. Remove sources of ignition. Beware of the explosion danger.
		Small Spills: Absorb spillage with non-combustible, absorbent material.
		Large Spills: Remove with vacuum trucks or pump to storage/salvage vessels. Use a non- combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labeled container. Wash area with soap and water. If necessary dike the product with dry earth, sand or similar non- combustible materials.
	Environmental precautions	Prevent spreading over a wide area (e.g. by containment or oil barriers). Do not contaminate water. Contact local authorities in case of spillage to drain/aquatic environment.

7.	Handling and storage Precautions for safe handling	Access to work area should be restricted to people handling the product only. Should be handled in closed systems, if possible. Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Use self-contained breathing apparatus (SCBA) if appropriate.	
		Use explosion-proof equipment and non-sparking tools in areas where explosive vapors may form. Electrically ground and bond shipping container, transfer line and receiving container. Material may be at elevated temperatures and/or pressures. Exercise care when opening tank hatches, sampling ports and/or bleeder valves.	
	Conditions for safe storage, including any incompatibilities	Keep containers tightly closed. Keep away from heat, open flames, or other sources of ignition. No smoking or open lighting. Outside or detached storage is preferred. Keep away from oxidizers, e.g. chlorine, oxygen, bleaches, fertilizers.	

## 8. Exposure controls / personal protection

### **Occupational exposure limits**

U.S. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000		
<u>Components</u>	<u>Type</u>	Value
Propane 74-98-6	PEL	1800 mg/m3

## U.S. ACGIH Threshold Limit Values

C4 Hydrocarbons	TWA	1000 ppm
Ethane 74-84-0	TWA	1000 ppm
Propane 74-98-6	TWA	1000 ppm

## U.S. NIOSH: Pocket Guide to Chemical Hazards

C4 Hydrocarbons	REL	1900 mg/me
		800 ppm
Propane 74-98-6	REL	1800 mg/me
		1000 ppm

Biological limit values:	None
Exposure guidelines:	No exposure standards allocated.
Appropriate engineering controls	Observe occupational exposure limits and minimize the risk of inhalation of vapors. Provide easy access to water supply and eye wash facilities. Use explosion-proof equipment.
Individual protection measures	s, such as personal protective equipment
Eye/face protection	Wear goggles / face shield.
Skin protection	
Hand protection	Wear protective gloves. Nitrile gloves are recommended, but be aware that the liquid may penetrate the gloves. Frequent change is advisable. If contact with the liquid is possible, insulated gloves suitable for low temperatures should be worn. Suitable gloves can be recommended by the glove supplier.
Other	Protection suit must be worn. Anti-static and flame-retardant protective clothing is recommended.
Respiratory protection	In case of inadequate ventilation, use air-supplied full-mask. Seek advice from local supervisor
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	When using, do not eat, drink or smoke. Wash hands after handling. Launder contaminated clothing before reuse. Private clothes and working clothes should be kept separately. Handle in accordance with good industrial hygiene and safety practice.

## 9. Physical and Chemical properties

Physical and Chemical properties		
Appearance	Colorless gas	
Physical state	Gas	
Form	Compressed liquefied gas	
Color	Colorless to straw colored	
Odor	Petroleum	
Odor threshold	Not available	
PH	Not available	
Melting point / freezing point	Not available	
Initial boiling point and boiling range	-47 °F (-43.9 °C) 1 atm	
Flash Point	-156 °F (-104.4 °C)	
Evaporation rate	Not available	
Flammability (solid, gas)	Flammable	
Upper / lower flammability or explo	osive limits	
Flammability limit – lower	>2%	
Flammability – upper	10%	
Vapor pressure	208 psi	
Vapor density	1.8 (Air=1)	
Relative density	0.5 @-42.2 °F (Water =1)	
Solubility (ies)	Not Available	
Partition coefficient	(n-octanol/ water) Not available	
Auto-ignition	874 °F (467.78 °C) estimated	
temperature		
Decomposition temperature	Not available	
Viscosity	Not available	
Other Information		
Bulk density	Not applicable	
Explosive properties	Not applicable	
Oxidizing properties	Not applicable	
10. Stability and reactivity		
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.	
Chemical stability	Stable at normal conditions	
Possibility of hazardous reaction	Hazardous polymerization does not occur.	
Conditions to avoid	Heat, sparks, flames, elevated temperatures. Contact with incompatible materials.	
Incompatible materials	Oxygen. Strong oxidizing agents.	
Hazardous decomposition produ	Icts         Carbon oxides and various hydrocarbons.	
11. Toxicological information		
Information on likely routes of e	xposure	
Ingestion	Not a likely route of exposure.	
Inhalation	At high concentrations a simple asphyxiant. May produce nausea, diarrhea, loss of appetite, dizziness, disorientation, headache, excitation, rapid respiration, drowsiness, labored breathing, anesthesia and other central nervous system effects. May cause lung paralysis and asphyxiation. Extreme overexposure may cause unconsciousness and respiratory arrest.	

Propane Safety Data Sheet

Sk	in contact	weakn	cause slight irritation. Extreme exposure may produce discoloration, muscle ness, breathing difficulties and other central nervous system effects. Direct contact cause freeze burns.
Eye cont	act	may be	
syı	mptoms related to the ph emical and toxicological	<b>ysical,</b> May ca turbidit	cause irritation including pain, blurred vision, redness, tearing and superficial corne
	aracteristics		ache, drowsiness, dizziness, loss of coordination, disorientation and fatigue.
			kin and possible irritation with repeated or prolonged exposure.
Ac	ute toxicity	•	an evidence indicates that the product has very low acute oral, dermal or inhalatio
710		toxicity	y.
			ever, it can produce severe injury if taken into the lung as a liquid, and there may bund central nervous system depression following prolonged exposure to high leve por.
			cation (asphyxiant) hazard - if allowed to accumulate to concentrations that reduce an below safe breathing levels. Breathing of high concentrations may cause less,
		may re	headedness, headache, nausea and loss of coordination. Continued inhalation esult in unconsciousness. Irritant effect on skin. May irritate and cause stomach vomiting, diarrhea and nausea.

## MATERIAL SAFETY DATA SHEET

## **SECTION 1 – Chemical Product**

Product/Chemical Name: TRIETHYLENE GLYCOL Chemical Formula: (CH20CH2CH2OH)2 CAS Number: 112-27-6 Synonyms; TEG

## SECTION 2 - Hazards Indentification

Acute Effects:

**Inhalation:** Short term harmful health effects are not expected from vapor generated at ambient temperatures. No evidence of short term harmful effects from respirable aresol based on available information.

**Eye:** Splashing in eye causes irritation with transitory disturbances of corneal epithelium. However, these effects diminish and no permanent injury is expected. Vapors are non-irritating. **Skin:** Prolonged exposure may cause skin irritation.

Ingestion: Abdominal discomfort, nausea and vomiting may occur.

Carcinogenicity: Not Classifiable as a Human Carcinogen.

Medical Conditions Aggravated by Long-Term Exposure: A knowledge of the available toxicology information and of the physical and chemical properties of the material suggests that overexposure is unlikely to aggravate existing medical conditions.

Chronic Effects: Exposure to high concentrations of aerosol generated at room temperature may cause lung injury and liver dysfunction.

## SECTION 3 – First Aid Measures

**Inhalation**: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

Skin Contact: Remove any contaminated clothing. Wash skin with soap and water for at least 15 minutes. Get medical attention.

**Ingestion:** If large amounts are swallowed, give water to drink and get medical advice. Never give anything by mouth to an unconscious person. Get medical attention.

## SECTION 4 – Fire Fighting Measures

Flash Point: 350°F (176.6°C) Flash Point Method: CC Burning Rate: Not available AutoIgnition Temperature: 700°F (371°C)

LEL: 0.9% v/v UEL: 9.2% v/v

Flammability Classification: Slight fire hazard when exposed to heat or flame.

**Extinguishing Media:** Dry chemical, foam or carbon dioxide. Water or foam may cause frothing. Water spray may be used to extinguish surrounding fire and cool exposed containers. Water spray will also reduce fume and irritiant gases.

Unusual Fire or Explosion Hazards: Above flash point, vapor-air mixtures are explosive within flammable limits noted above. Containers may explode when involved in a fire. LEAKS INTO POROUS INSULATION MATERIAL MAY IGNITE AT TEMPERATURES FAR BELOW PUBLISHED AUTOIGNITION OR INGNITION TEMPERATURES, POTENTIALLY EVEN BELOW THE NORMAL FLASH POINT.

1 of 3

## SECTION 4 - Fire Fighting Measures - continued

Hazardous Combustion Products: Carbon Dioxide and Carbon Monoxide may form when heated to decomposition. May produce smoke and irritating fumes when heated to decomposition.

**Fire-Fighting Instructions:** Do not release runoff from fire control methods to sewers or waterways. **Fire-Fighting Equipment:** Wear full protective clothing and NIOSH approved self-contained breathing apparatus with full facepiece in the pressure demand or positive pressure mode.

### SECTION 5 - Accidental Release Measures

**Spill/Leak Procedures:** Ventilate area of leak or spill. Remove all sources of ignition. Wear appropriate personal protective equipment. Isolate hazard area. Keep unnecessary and unprotected personnel from entering. Use non-sparking tools and equipment. Do not flush to sewer.

**Small Spills:** Contain and recover liquid when possible. Collect liquid in an appropriate container or absorb with an inert material (e.g., vermiculate, dry sand), and place in a chemical waste container. Do not use combustible materials, such as saw dust.

#### Large Spills:

**Containment:** Wear respirator and protective clothing as appropriate. Shut off source of leak if safe to do so. For large spills, dike far ahead of liquid spill for later disposal. Do not release into sewers or waterways.

**Cleanup:** Contain and recover liquid when possible. Collect liquid in appropriate container. Absorb residue with an inert material. Consult with your environmental department for detailed clean up instructions.

**Regulatory Requirements:** Follow applicable OSHA regulations (29CFR 1910.120). CERCLA requires reporting spills and release to soil, water and air in excess of reportable quantities.

## SECTION 6 - Handling and Storage

Handling Precautions: Potential peroxide former. Store away from heat and light. If peroxide formation is suspected, do not open or move container.

Storage Requirements: Store in a cool, dry ventilated area. Separate from acids and oxidizing materials.

**Regulatory Requirements:** This product contains the following chemical(s) subject to the reporting requirements of SARA Title III Section 311, 312, and 313: None

#### SECTION 7 – Exposure Controls/Personal Protection

Engineering Controls: Controls should be such that adequate ventilation is provided.

Ventilation: Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

**Respiratory Protection:** Seek professional advice prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary wear a MSHA/NIOSH approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or non-routine operations (cleaning spills, reactor vessels, or storage tanks), wear an SCBA. *Warning! Air-purifying respirators do not protect workers in oxygen-deficient atmospheres.* If respirators are used, OSHA requires a written respiratory protection program.

**Protective Clothing/Equipment:** Wear chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact. Wear protective eyeglasses or chemical safety goggles, per OSHA eye and face protection regulations (29CFR 1910.133). Contact lenses are not eye protective devices. Appropriate eye protection must be worn instead of, or in conjunction with contact lenses. **Contaminated Equipment:** Separate contaminated work clothes from street clothes. Launder before

reuse. Remove this material from your shoes and clean personal protective equipment. **Comments:** Never eat, drink or smoke in work areas. Practice good personal hygiene after using this material.

2 Of 3

## **SECTION 7 – Physical and Chemical Properties**

Physical State: Liquid Appearance and Odor: Clear, Colorless, mild odor Odor Threshold: NA Vapor Pressure: <0.01 mm Hg @ 20 C Vapor Density (Air=1): 5.2 Formula Weight: 150.7 Density: 9.3 lbs/gal @ 20<sup>0</sup> C Specific Gravity (H2O=1, @ 4ºC): 1.12 pH: NA

Water Solubility: Soluble Other Solubilities: Alcohols, methyl isosbutyl carbitol Boiling Point: 285<sup>0</sup> C (545<sup>0</sup>F) Freezing/Meiting Point: -5<sup>0</sup> C (23<sup>0</sup> F) Viscosity: 29cP @ 20<sup>0</sup> C Refractive Index: 1.447 @ 20<sup>0</sup>C Surface Tension: 47 dyne/cm @ 200C % Volatile: Negligable @ 25<sup>0</sup> C **Evaporation Rate: NA** 

## SECTION 8 – Stability and Reactivity

Stability: Stable, however forms peroxides of unknown stability. Polymerization: Hazardous polymerization will not occur. Chemical incompatibilities: Strong oxidizing agents, strong bases. Conditions to Avoid: Heat, flames, ignition sources, and incompatibles. Hazardous Decomposition Products: Carbon dioxide and carbon monoxide may form when heated to decomposition.

#### **SECTION 9 – Disposal Considerations**

Disposal: Follow applicable Federal, state, and local regulations. Container Cleaning and Disposal: Dispose of container and unused contents in accordance with Federal state and local requirements.

## **SECTION 10 – Transport Information**

Shipping Name: Triethylene Glycol ID No.: NA Label: NA

Hazard Class: NA Packing Group: NA

### **SECTION 11 – Other Information**

Disclaimer: This product is FOR INDUSTRIAL USE ONLY. Keep out of reach of children. Do not take internally.

Best Chemical Corporation believes that the information and recommendations contained herein are accurate as of the date hereof. ## 2. Hazards identification

Physical state	: Liquid.
Odor	: Amine-like.
OSHA/HCS status	: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Emergency overview	: DANGER ! CAUSES EYE AND SKIN BURNS. CAUSES RESPIRATORY TRACT IRRITATION. MAY BE HARMFUL IF SWALLOWED. ASPIRATION HAZARD IF SWALLOWED - CAN ENTER LUNGS AND CAUSE DAMAGE
	Corrosive to the skin. Causes burns. Harmful if swallowed. Irritating to eyes and respiratory system. Do not breathe vapor or mist. Do not ingest. Do not get in eyes or on skin or clothing. Use only with adequate ventilation. Keep container tightly closed and sealed until ready for use. Wash thoroughly after handling.
GENERAL INFORMATION	: Read the entire MSDS for a more thorough evaluation of the hazards.

MSDS # 00033118

× 2

# 3. Composition/information on ingredients

<u>Name</u> 2-(2-Aminoethoxy)ethanol	<u>CAS number</u> <u>%</u> 929-06-6 60 - 100
4. First aid mea	sures
Eye contact	Get medical attention immediately. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.
Skin contact	Get medical attention immediately. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Inhalation	Get medical attention immediately. Move exposed person to fresh air. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxyger by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attentior immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Ingestion	Get medical attention immediately. Wash out mouth with water. Move exposed person to fresh air. Do not induce vomiting unless directed to do so by medical personnel. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person.
Notes to physician	: Symptomatic and supportive therapy as needed. Following severe exposure medica follow-up should be monitored for at least 48 hours.
5. Fire-fighting	measures
Flash point	: Closed cup: 124°C (255.2°F)
Products of combustion	: Decomposition products may include the following materials: carbon oxides nitrogen oxides
Extinguishing media	
Suitable	: Use an extinguishing agent suitable for the surrounding fire.
Not suitable	: None known.
Special exposure hazards	: In a fire or if heated, a pressure increase will occur and the container may burst.
	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## 6. Accidental release measures

Personal precautions	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is
		inadequate. Put on appropriate personal protective equipment (see section 8).
Environmental precautions	:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for cleaning up	:	Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal.

# 7. Handling and storage

-	
Handling	: Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Keep away from acids. Empty containers retain product residue and can be hazardous. Do not reuse container.
Storage	: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Separate from acids. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

# 8. Exposure controls/personal protection

Consult local authorities for acceptable exposure limits.

Preventive Measures	: Conditions of use, adequacy of engineering or other control measures, and actual exposures will dictate the need for specific protective devices at your workplace.
Engineering Controls	: Use local exhaust ventilation to maintain airborne concentrations below the TLV. Suitable respiratory equipment should be used in cases of insufficient ventilation or where operational procedures demand it. For guidance on engineering control measures refer to publications such as the ACGIH current edition of 'Industrial Ventilation, a manual of Recommended Practice.'
Personal protection	
Eyes	<ul> <li>Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts.</li> </ul>
Skin	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### **Exposure controls/personal protection** 8.

Respiratory	: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
Hands	: Chemical-resistant, impervious gloves complying with an approved standard should be

elected respirator. pervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

#### 9. Physical and chemical properties

## General information

Appearance	
Physical state	: Liquid.
Color	: Clear.
Odor	: Amine-like.
Odor threshold	: Not available.
Important health, safety and	environmental information
pН	: 11.8
Boiling point	: 221°C (429.8°F)
Melting point	: -12.2°C (10°F)
Flash point	: Closed cup: 124°C (255.2°F)
Oxidizing properties	: Not available.
Vapor pressure	: <0.0013 kPa (<0.01 mm Hg)
Relative density	: 1.06 (Specific gravity)
Octanol/water partition coefficient	: -1.2
Viscosity	: Kinematic: 0.075 cm²/s (7.5cSt at 51.7°C)
Vapor density	: 3.6 [Air = 1]
Auto-ignition temperature	: 370°C (698°F)
VOC content	: 99%

# 10. Stability and reactivity

Stability and reactivity	:	The product is stable.
Incompatibility with various substances	:	Extremely reactive or incompatible with the following materials: acids. Reactive or incompatible with the following materials: metals.
Hazardous polymerization	:	Will not occur.
Hazardous decomposition products	:	Decomposition products may include the following materials: carbon oxides nitrogen oxides

# 11. Toxicological information

### Toxicity data

Acute toxicity				
Product/ingredient name	Test	Species	Result	Exposure
2-(2-Aminoethoxy)ethanol	LD50 Dermal	Rabbit	>2000 mg/kg	-
	LD50 Oral	Rat	2560 to 3000 mg/kg	-
	LD50 Oral	Mouse	2825 mg/kg	-

## 11. Toxicological information

#### Potential acute health effects

Ingestion	: Harmful if swallowed. May cause burns to mouth, throat and stomach.
Inhalation	: Irritating to respiratory system.
Eyes	: Corrosive to eyes. Causes burns.
Skin	: Corrosive to the skin. Causes burns.

Potential chronic health effects

Target organs	:	None known.
Carcinogenicity	:	No known significant effects or critical hazards.
Mutagenicity	:	No known significant effects or critical hazards.
Teratogenicity	:	No known significant effects or critical hazards.
<b>Developmental effects</b>	:	No known significant effects or critical hazards.
Fertility effects	:	No known significant effects or critical hazards.

# 12. Ecological information

Aquatic ecotoxicity				
Product/ingredient name	Test	Result	Species	Exposure
2-(2-Aminoethoxy)ethanol	-	Acute EC50 190 mg/L	Daphnia	48 hours
	-	Acute IC50 160 mg/L	Algae	72 hours
	-	Acute LC50 460 mg/L	Fish	96 hours
<b>Bioaccumulative potential</b>				
Product/ingredient name 2-(2-Aminoethoxy)ethanol	<u>Log</u> ₽₀₩ -1.2	BCF -		<u>Potential</u> low
Environmental effects	: This product shows a	a low bioaccumulation po	tential.	

## 13. Disposal considerations

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# 14. Transport information

Transportation Emergency Number 1-800-424-9300 (CHEMTREC).

CL THOMAS Risk Management

THOMAS PETROLEUM PO BOX 1876 VICTORIA, TX 77902 USA

#### Dear Customer:

Enclosed please find a Material Safety Data Sheet (MSDS) for the product(s) identified at the bottom of this page. Please make this MSDS available to employees in your organization, including health and safety personnel, and your customers who could come in contact with this product.

We are in the process of updating our MSDSs. On some of the MSDSs, the actual hazard profile of the product will be different, since the process of conversion included a re-evaluation of each product. Please read over the MSDS carefully to determine if any changes will require a re-evaluation of your handling procedures. The amended sections will be highlighted with a triangle-sign at the beginning of the section ( $\mathcal{F}$ ).

Applicable MSDSs are routinely mailed to our customers with the purchase of our products and, subsequently, with first purchases in every calendar year. Any significant changes in MSDS information also will result in mailing of the revised MSDS with the next order placed. MSDSs also are available upon request for any of our products.

We appreciate your business and we wish to continue serving your business needs. If you have any questions regarding our MSDSs or need copies, please call our MSDS Information Helpline on 1-800-257-5547

## **Material Safety Data Sheet**

The Dow Chemical Company

Product Name: DOWTHERM\* T HEAT TRANSFER FLUID

Issue Date: 11/19/2008 Print Date: 21 Jan 2009

The Dow Chemical Company encourages and expects you to read and understand the entire (M)SDS, as there is important information throughout the document. We expect you to follow the precautions identified in this document unless your use conditions would necessitate other appropriate methods or actions.

## 1. Product and Company Identification

Product Name

DOWTHERM\* T HEAT TRANSFER FLUID

#### COMPANY IDENTIFICATION

The Dow Chemical Company 2030 Willard H. Dow Center Midland, MI 48674 USA

Customer Information Number:

800-258-2436

#### EMERGENCY TELEPHONE NUMBER 24-Hour Emergency Contact: Local Emergency Contact:

989-636-4400 989-636-4400

## 2. Hazards Identification

#### **Emergency Overview**

Color: Yellow Physical State: Liquid Odor: Odorless Hazards of product:

CAUTION! May cause eye irritation. May cause skin irritation. May cause central nervous system effects; may cause respiratory tract irritation. Highly toxic to fish and/or other aquatic organisms. Isolate area. Keep upwind of spill. Avoid temperatures above 310 °C (590 °F).

#### **OSHA Hazard Communication Standard**

This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

#### **Potential Health Effects**

**Eye Contact:** May cause slight eye irritation. May cause slight corneal injury. **Skin Contact:** Prolonged contact may cause moderate skin irritation with local redness. **Skin Absorption:** Prolonged skin contact is unlikely to result in absorption of harmful amounts.

®(TM)\*Trademark of The Dow Chemical Company ("Dow") or an affiliated company of Dow

Page 1 of 7

**Inhalation:** At room temperature, exposure to vapor is minimal due to low volatility. Vapor from heated material may cause respiratory irritation and other effects. May cause respiratory irritation and central nervous system depression. Symptoms may include headache, dizziness and drowsiness, progressing to incoordination and unconsciousness.

**Ingestion:** Very low toxicity if swallowed. Harmful effects not anticipated from swallowing small amounts.

**Effects of Repeated Exposure:** In animals, effects have been reported on the following organs: Blood.

	3.	Composition Informa	tion
--	----	---------------------	------

Component	CAS #	Amount
Benzene, C14-30-alkyl derivatives	68855-24-3	100.0 %

## 4. First-aid measures

**Eye Contact:** Flush eyes thoroughly with water for several minutes. Remove contact lenses after the initial 1-2 minutes and continue flushing for several additional minutes. If effects occur, consult a physician, preferably an ophthalmologist.

**Skin Contact:** Wash skin with plenty of water.

**Inhalation:** Move person to fresh air. If not breathing, give artificial respiration; if by mouth to mouth use rescuer protection (pocket mask, etc). If breathing is difficult, oxygen should be administered by qualified personnel. Call a physician or transport to a medical facility.

Ingestion: No emergency medical treatment necessary.

**Notes to Physician:** Maintain adequate ventilation and oxygenation of the patient. If burn is present, treat as any thermal burn, after decontamination. No specific antidote. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient.

## 5. Fire Fighting Measures

**Extinguishing Media:** Water fog or fine spray. Dry chemical fire extinguishers. Carbon dioxide fire extinguishers. Foam. Do not use direct water stream. May spread fire. Alcohol resistant foams (ATC type) are preferred. General purpose synthetic foams (including AFFF) or protein foams may function, but will be less effective.

**Fire Fighting Procedures:** Keep people away. Isolate fire and deny unnecessary entry. Do not use direct water stream. May spread fire. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage. Avoid accumulation of water. Product may be carried across water surface spreading fire or contacting an ignition source. Contain fire water run-off if possible. Fire water run-off, if not contained, may cause environmental damage. Review the "Accidental Release Measures" and the "Ecological Information" sections of this (M)SDS.

**Special Protective Equipment for Firefighters:** Wear positive-pressure self-contained breathing apparatus (SCBA) and protective fire fighting clothing (includes fire fighting helmet, coat, trousers, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance.

**Unusual Fire and Explosion Hazards:** Violent steam generation or eruption may occur upon application of direct water stream to hot liquids. Liquid mist of this product can burn. Flammable concentrations of vapor can accumulate at temperatures above flash point; see Section 9. **Hazardous Combustion Products:** During a fire, smoke may contain the original material in addition

to combustion products: During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and/or irritating. Combustion products may include and are not limited to: Hydrocarbons. Carbon monoxide. Carbon dioxide.

## 6. Accidental Release Measures

**Steps to be Taken if Material is Released or Spilled:** Small spills: Absorb with materials such as: Non-combustible material. Collect in suitable and properly labeled containers. Large spills: Dike area to contain spill. Pump into suitable and properly labeled containers. See Section 13, Disposal Considerations, for additional information.

**Personal Precautions:** Isolate area. Keep upwind of spill. Ventilate area of leak or spill. Keep unnecessary and unprotected personnel from entering the area. Refer to Section 7, Handling, for additional precautionary measures. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection.

**Environmental Precautions:** Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.

## 7. Handling and Storage

#### Handling

**General Handling:** Avoid contact with eyes, skin, and clothing. Avoid breathing vapor. Wash thoroughly after handling. Keep container closed. Use with adequate ventilation. Spills of these organic materials on hot fibrous insulations may lead to lowering of the autoignition temperatures possibly resulting in spontaneous combustion.

#### Storage

Do not store in: Opened or unlabeled containers. Store away from incompatible materials. See STABILITY AND REACTIVITY section. Store in tightly closed container. See Section 10 for more specific information. Additional storage and handling information on this product may be obtained by calling your Dow sales or customer service contact.

## 8. Exposure Controls / Personal Protection

#### Exposure Limits

None established

#### **Personal Protection**

**Eye/Face Protection:** Use chemical goggles.

Skin Protection: Wear clean, body-covering clothing.

Hand protection: Use gloves chemically resistant to this material when prolonged or frequently repeated contact could occur. Examples of preferred glove barrier materials include: Polyethylene. Ethyl vinyl alcohol laminate ("EVAL"). Polyvinyl alcohol ("PVA"). Polyvinyl chloride ("PVC" or "vinyl"). Styrene/butadiene rubber. Viton. Examples of acceptable glove barrier materials include: Butyl rubber. Chlorinated polyethylene. Natural rubber ("latex"). Neoprene. Nitrile/butadiene rubber ("nitrile" or "NBR"). NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

**Respiratory Protection:** Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, wear respiratory protection when adverse effects, such as respiratory irritation or discomfort have been experienced, or where indicated by your risk assessment process. For emergency conditions, use an approved positive-pressure self-contained breathing apparatus. The following should be effective types of air-purifying respirators: Organic vapor cartridge. **Ingestion:** Use good personal hygiene. Do not consume or store food in the work area. Wash hands before smoking or eating.

#### **Engineering Controls**

**Ventilation:** Use local exhaust ventilation, or other engineering controls to maintain airborne levels below exposure limit requirements or guidelines. If there are no applicable exposure limit requirements or guidelines, general ventilation should be sufficient for most operations. Local exhaust ventilation may be necessary for some operations.

## 9. Physical and Chemical Properties

Physical State Color Odor II Odor Threshold Flash Point - Closed Cup II Flammability (solid, gas) Flammable Limits In Air	Liquid Yellow Odorless Odorless > 170 °C (> 338 °F) <i>ASTM D93</i> Not applicable to liquids <b>Lower</b> : Not determined <b>Upper</b> : Not determined

## 10. Stability and Reactivity

#### Stability/Instability

Thermally stable at typical use temperatures. **Conditions to Avoid:** Avoid temperatures above 310 °C (590 °F). Avoid contact with air (oxygen). Exposure to elevated temperatures can cause product to decompose.

Incompatible Materials: Avoid contact with oxidizing materials.

### **Hazardous Polymerization**

Will not occur.

#### Thermal Decomposition

Decomposition products depend upon temperature, air supply and the presence of other materials.

## 11. Toxicological Information

Acute Toxicity Ingestion LD50, Rat > 5,000 mg/kg Skin Absorption LD50, Rabbit > 2,000 mg/kg **Repeated Dose Toxicity** In animals, effects have been reported on the following organs: Blood. **Genetic Toxicology** In vitro genetic toxicity studies were negative.

## 12. Ecological Information

ENVIRONMENTAL FATE

#### **Movement & Partitioning**

Bioconcentration potential is high (BCF > 3000 or Log Pow between 5 and 7).

#### Persistence and Degradability

Biodegradation may occur under aerobic conditions (in the presence of oxygen).

#### ECOTOXICITY

Material is very highly toxic to aquatic organisms on an acute basis (LC50/EC50 <0.1 mg/L in most sensitive species).

#### Fish Acute & Prolonged Toxicity

LC50, rainbow trout (Oncorhynchus mykiss), 96 h: > 100 mg/l **Aquatic Invertebrate Acute Toxicity** EC50, water flea Daphnia magna, 48 h, immobilization: 0.05 mg/l **Aquatic Plant Toxicity** EC50, green alga Pseudokirchneriella subcapitata (formerly known

EC50, green alga Pseudokirchneriella subcapitata (formerly known as Selenastrum capricornutum), 96 h: > 1,000 mg/l

## 13. Disposal Considerations

DO NOT DUMP INTO ANY SEWERS, ON THE GROUND, OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. Regulations may vary in different locations. Waste characterizations and compliance with applicable laws are the responsibility solely of the waste generator. AS YOUR SUPPLIER, WE HAVE NO CONTROL OVER THE MANAGEMENT PRACTICES OR MANUFACTURING PROCESSES OF PARTIES HANDLING OR USING THIS MATERIAL. THE INFORMATION PRESENTED HERE PERTAINS ONLY TO THE PRODUCT AS SHIPPED IN ITS INTENDED CONDITION AS DESCRIBED IN MSDS SECTION: Composition Information. FOR UNUSED & UNCONTAMINATED PRODUCT, the preferred options include sending to a licensed, permitted: Recycler. Reclaimer. Incinerator or other thermal destruction device. As a service to its customers, Dow can provide names of information resources to help identify waste management companies and other facilities which recycle, reprocess or manage chemicals or plastics, and that manage used drums. Telephone Dow's Customer Information Group at 1-800-258-2436 or 1-989-832-1556 (U.S.), or 1-800-331-6451 (Canada) for further details.

## 14. Transport Information

DOT Non-Bulk NOT REGULATED

DOT Bulk NOT REGULATED IMDG NOT REGULATED

ICAO/IATA NOT REGULATED

This information is not intended to convey all specific regulatory or operational requirements/information relating to this product. Additional transportation system information can be obtained through an authorized sales or customer service representative. It is the responsibility of the transporting organization to follow all applicable laws, regulations and rules relating to the transportation of the material.

## 15. Regulatory Information

#### **OSHA Hazard Communication Standard**

This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

# Superfund Amendments and Reauthorization Act of 1986 Title III (Emergency Planning and Community Right-to-Know Act of 1986) Sections 311 and 312

Immediate (Acute) Health Hazard	Yes
Delayed (Chronic) Health Hazard	No
Fire Hazard	No
Reactive Hazard	No
Sudden Release of Pressure Hazard	No

Superfund Amendments and Reauthorization Act of 1986 Title III (Emergency Planning and Community Right-to-Know Act of 1986) Section 313

To the best of our knowledge, this product does not contain chemicals at levels which require reporting under this statute.

#### Pennsylvania (Worker and Community Right-To-Know Act): Pennsylvania Hazardous Substances List and/or Pennsylvania Environmental Hazardous Substance List:

To the best of our knowledge, this product does not contain chemicals at levels which require reporting under this statute.

# Pennsylvania (Worker and Community Right-To-Know Act): Pennsylvania Special Hazardous Substances List:

To the best of our knowledge, this product does not contain chemicals at levels which require reporting under this statute.

#### California Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986)

This product contains no listed substances known to the State of California to cause cancer, birth defects or other reproductive harm, at levels which would require a warning under the statute.

#### **US. Toxic Substances Control Act**

All components of this product are on the TSCA Inventory or are exempt from TSCA Inventory requirements under 40 CFR 720.30

CEPA - Domestic Substances List (DSL)

All substances contained in this product are listed on the Canadian Domestic Substances List (DSL) or are not required to be listed.

#### Revision

Identification Number: 81478 / 1001 / Issue Date 11/19/2008 / Version: 3.0 Most recent revision(s) are noted by the bold, double bars in left-hand margin throughout this document.

#### Legend

Logona	
N/A	Not available
W/W	Weight/Weight
OEL	Occupational Exposure Limit
STEL	Short Term Exposure Limit
TWA	Time Weighted Average
ACGIH	American Conference of Governmental Industrial Hygienists, Inc.
DOW IHG	Dow Industrial Hygiene Guideline
WEEL	Workplace Environmental Exposure Level
HAZ_DES	Hazard Designation
Action Level	A value set by OSHA that is lower than the PEL which will trigger the need for
	activities such as exposure monitoring and medical surveillance if exceeded.

The Dow Chemical Company urges each customer or recipient of this (M)SDS to study it carefully and consult appropriate expertise, as necessary or appropriate, to become aware of and understand the data contained in this (M)SDS and any hazards associated with the product. The information herein is provided in good faith and believed to be accurate as of the effective date shown above. However, no warranty, express or implied, is given. Regulatory requirements are subject to change and may differ between various locations. It is the buyer's/user's responsibility to ensure that his activities comply with all federal, state, provincial or local laws. The information presented here pertains only to the product as shipped. Since conditions for use of the product are not under the control of the manufacturer, it is the buyer's/user's duty to determine the conditions necessary for the safe use of this product. Due to the proliferation of sources for information such as manufacturer-specific (M)SDS, we are not and cannot be responsible for (M)SDS obtained from any source other than ourselves. If you have obtained an (M)SDS from another source or if you are not sure that the (M)SDS you have is current, please contact us for the most current version.

**COMPOSITION / INFORMATION ON INGREDIENTS** 

No Reportable Hazardous Substance(s) or Complex Substance(s).

SECTION 3

**SECTION 2** 

HAZARDS IDENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

#### POTENTIAL HEALTH EFFECTS

Low order of toxicity. Excessive exposure may result in eye, skin, or respiratory irritation. High-pressure injection under skin may cause serious damage.

NFPA Hazard ID:	Health:	0	Flammability:	1	Reactivity:	0
HMIS Hazard ID:	Health:	0	Flammability:	1	Reactivity:	0

**NOTE:** This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 4	FIRST AID MEASURES

#### INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use

# **E**‰onMobil

Product Name: MOBIL DTE OIL HEAVY MEDIUM Revision Date: 19 Aug 2011 Page 2 of 10

adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

#### SKIN CONTACT

Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

#### EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

#### INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

#### **SECTION 5**

#### FIRE FIGHTING MEASURES

### EXTINGUISHING MEDIA

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

#### FIRE FIGHTING

**Fire Fighting Instructions:** Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Smoke, Fume, Aldehydes, Sulfur oxides, Incomplete combustion products, Oxides of carbon

#### FLAMMABILITY PROPERTIES

Flash Point [Method]: >223C (433F) [ASTM D-92] Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0 Autoignition Temperature: N/D

#### **SECTION 6**

ACCIDENTAL RELEASE MEASURES

#### NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

Product Name: MOBIL DTE OIL HEAVY MEDIUM Revision Date: 19 Aug 2011 Page 3 of 10

#### PROTECTIVE MEASURES

Avoid contact with spilled material. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders. For emergency responders: Respiratory protection: respiratory protection will be necessary only in special cases, e.g., formation of mists. Half-face or full-face respirator with filter(s) for dust/organic vapor or Self Contained Breathing Apparatus (SCBA) can be used depending on the size of spill and potential level of exposure. If the exposure cannot be completely characterized or an oxygen deficient atmosphere is possible or anticipated, SCBA is recommended. Work gloves that are resistant to hydrocarbons are recommended. Gloves made of polyvinyl acetate (PVA) are not water-resistant and are not suitable for emergency use. Chemical goggles are usually adequate. Large spills: full body suit of chemical resistant, antistatic material is recommended.

#### SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

### ENVIRONMENTAL PRECAUTIONS

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

	HANDLING AND STORAGE	1
SECTION 7	HANDUNGAND STURAGE	4

#### HANDLING

Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source). When the material is handled in bulk, an electrical spark could ignite any flammable vapors from liquids or residues that may be present (e.g., during switch-loading operations). Use proper bonding and/or ground procedures. However, bonding and grounds may not eliminate the hazard from static accumulation. Consult local applicable standards for guidance. Additional references include American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practice on Static Electricity) or CENELEC CLC/TR 50404 (Electrostatics - Code of practice for the avoidance of hazards due to static electricity).

Static Accumulator: This material is a static accumulator.

#### STORAGE

The container choice, for example storage vessel, may effect static accumulation and dissipation. Do not store in open or unlabelled containers. Keep away from incompatible materials.

**SECTION 8** 

EXPOSURE CONTROLS / PERSONAL PROTECTION

Product Name: MOBIL DTE OIL HEAVY MEDIUM Revision Date: 19 Aug 2011 Page 4 of 10

Exposure limits/standards for materials that can be formed when handling this product: When mists/aerosols can occur the following are recommended: 5 mg/m<sup>3</sup> - ACGIH TLV (inhalable fraction), 5 mg/m<sup>3</sup> - OSHA PEL.

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

#### ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

#### PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

**Respiratory Protection:** If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No special requirements under ordinary conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

No protection is ordinarily required under normal conditions of use.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.

**Specific Hygiene Measures:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

SECTION 10

#### STABILITY AND REACTIVITY

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

MATERIALS TO AVOID: Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 11	TOXICOLOGICAL INFORMATION	
ACUTE TOXICITY		
Route of Exposure	Conclusion / Remarks	

# **E**‰onMobil

#### Product Name: MOBIL DTE OIL HEAVY MEDIUM Revision Date: 19 Aug 2011 Page 6 of 10

Inhalation	
Toxicity (Rat): LC50 > 5000 mg/m3	Minimally Toxic. Based on test data for structurally similar materials.
Irritation: No end point data.	Negligible hazard at ambient/normal handling temperatures. Based on assessment of the components.
Ingestion	
Toxicity (Rat): LD50 > 5000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials.
Skin	
Toxicity (Rabbit): LD50 > 5000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials.
Irritation (Rabbit): Data available.	Negligible irritation to skin at ambient temperatures. Based on test data for structurally similar materials.
Eye	
Irritation (Rabbit): Data available.	May cause mild, short-lasting discomfort to eyes. Based on test data for structurally similar materials.

#### CHRONIC/OTHER EFFECTS

#### Contains:

Base oil severely refined: Not carcinogenic in animal studies. Representative material passes IP-346, Modified Ames test, and/or other screening tests. Dermal and inhalation studies showed minimal effects; lung non-specific infiltration of immune cells, oil deposition and minimal granuloma formation. Not sensitizing in test animals.

Additional information is available by request.

The following ingredients are cited on the lists below: None.

	REGULATORY LISTS SEA	RCHED

2 = NTP SUS	4 = IARC 2A	6 = OSHA CARC

#### SECTION 12

#### ECOLOGICAL INFORMATION

The information given is based on data available for the material, the components of the material, and similar materials.

#### ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

#### MOBILITY

Base oil component -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

## PERSISTENCE AND DEGRADABILITY

### **Biodegradation:**

Base oil component -- Expected to be inherently biodegradable

# **E**‰onMobil

Product Name: MOBIL DTE OIL HEAVY MEDIUM Revision Date: 19 Aug 2011 Page 7 of 10

#### BIOACCUMULATION POTENTIAL

Base oil component -- Has the potential to bioaccumulate, however metabolism or physical properties may reduce the bioconcentration or limit bioavailability.

#### SECTION 13

#### **DISPOSAL CONSIDERATIONS**

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

#### DISPOSAL RECOMMENDATIONS

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products. Protect the environment. Dispose of used oil at designated sites. Minimize skin contact. Do not mix used oils with solvents, brake fluids or coolants.

#### **REGULATORY DISPOSAL INFORMATION**

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrositivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

## DATA SHEET

#### AIRDYNE INTERNATIONAL, LTD 149 10 Henry Rd., Houston, TX 77060 (281) 820-0000

DATE: 10/23/07

#### REVISED:

SUPERSEDES:

### PRODUCT IDENTIFICATION

 Trade Name:	PNEUTECH XD680
Chief Constituent:	Polyol Ester Blend
Hazardous Ingredients/OSHA:	None
Carcinogenic Ingredients/OSHA/NTP/IARC:	None
Ingredients Regulated by SARA Title 3, Section 313:	None

#### II. WARNING STATEMENTS

This product is non-hazardous as defined in 29 CFR 1910.1200.

III. PHYSICAL AND CHEM	
Appearance and Odor:	Bright and Clear, Mild Odor
Specific Gravity:	< 1.0
Boiling Point:	> 600°F
Vapor Pressure:	< 0.035 mm Hg @ 300°F

IV. FIRE PROTECTION	
Flash Point:	> 450°F <sub>(COC)</sub>
Extinguishing Media:	Water fog, dry chemical, foam or CO <sub>2</sub>
Special Firefighting Procedure:	Burning will produce toxic fumes. Wear self-contained breathing
	apparatus and full turn out gear to fight fire. Avoid spreading liquid and
	fire by water flooding.
Unusual Fire Hazard:	Exposure to heat builds up pressure in closed containers. Cool with water
	spray.

V. REACTIVITY DATA	
Thermal Stability:	Stable
Materials to Avoid:	Strong oxidizers
Hazardous Polymerization:	Will not occur
Hazardous Decomposition Products:	Burning will produce toxic fumes

VI. HEALTH HAZARD D	ΑΤΑ
Exposure Limits:	Not applicable
Effects of Overexposure:	Low oral and dermal toxicity. Prolonged or repeated exposure may cause
	irritation, nausea, and vomiting.

VII. PHYSIOLOGICAL EFFECTS SUMMARY				
ACUTE:				
Eyes:	Irritating and may injure eye tissue if not removed promptly.			
Skin:	Believed to be minimally irritating			
Respiratory System:	Believed to be minimally irritating			
CHRONIC:	Not determined			
OTHER:	None			

DATE: 10/23/07 AIRDYNE: PNEUTECH XD680

SUPERSEDES:

#### VIII. PRECAUTIONS FOR SAFE HANDLING

For general personal hygiene, wash hands thoroughly after handling material. Avoid contact with skin and eyes.

#### IX. PROTECTION AND CONTROL MEASURES

Protective Equipment:Impermeable gloves, splash goggles, eye wash and safety shower.Respiratory Protection:If overheated, use approved respiratory protective equipment.Ventilation:Local exhaust and mechanical recommended.

**REVISED:** 

#### X. EMERGENCY AND FIRST AID PROCEDURES

Eye Contact:Flush eyes with water for 15 minutes. Call a physician if irritation develops.Skin Contact:Wash skin with soap and water.Inhalation:Remove to fresh air. Give artificial respiration or oxygen if necessary.Ingestion:First Aid not normally required. If uncomfortable, call physician.

#### XI. NOTES

HAZAR				
NPCA/HMIS	NFPA	KEY		
1	1	4 = Severe	1 = Slight	
1	1	3 = Serious	0 = Minimal	
0	0	2 = Moderate		
			1 1 4 = Severe 1 1 3 = Serious	NPCA/HMIS         NFPA         KEY           1         1         4 = Severe         1 = Slight           1         1         3 = Serious         0 = Minimal

#### XII. SPILL AND DISPOSAL PROCEDURES

Environmental Impact: Report spills as required to appropriate authorities. U. S. Coast Guard regulations require immediate reporting of spills that could reach any waterway including intermittent dry creeks. Report spill to Coast Guard Toll Free Number (800) 424-8802.

<u>Procedures if Material is Released or Spilled</u>: Absorb on fire retardant treated sawdust, diatomaceous earth, etc. Shovel up and dispose of at an appropriate waste disposal facility in accordance with current applicable laws and regulations, and product characteristics at time of disposal.

Waste Management: Dispose of according to Federal, State and Local regulations.

Toxic Substance Inventory Control Act: All components are included on the TSCA Inventory and are in compliance with the TSCA.

HAZARDS IDENTIFICA ON

> Emergency Overview. This material is not considered hazardous according to OSHA criteria.

Appearance: Clean and brigh Physical Form: Liquid Odor: Petroleum

Potential Health Effects Eye: Contact may cause mild eye irritation including stinging, watering, and redness. Skin: Contact may cause mild skin initiation including retressiand a purning sensation Prolonged or repeated contact can defat the skin, causing drying and cracking of the skin, and possible demants could allergic skin reaction. No harmful effects from skin absorption are expected

Inhalation (Breathing): No information-available on acute toxicity

Ingestion (Swallowing): Low degree of toxicity by ingestion.

Signs and Symptoms: Effects of overexposure may include irritation of the digestive tract, nausea and diarrhea. Inhalation of oil mist or vapors at elevated temperatures may cause respiratory irritation.

Pre-Existing Medical Conditions: Conditions aggravated by exposure may include skin disorders.

See Section 11 for additional Toxicity Information

#### 4. EIRST AID MEASURES

Eye: If irritation or redness develops from exposure, flush eyes with clean water. If symptoms persist, seek medical attention.

Skin: Remove contaminated shoes and clothing and cleanse affected area(s) thoroughly by washing with mild soap and water or a waterless hand cleaner. If irritation or redness develops and persists, seek medical attention.

Inhalation (Breathing): If respiratory symptoms develop, move victim away from source of exposure and into fresh air. If symptoms persist, seek medical attention.

Ingestion (Swallowing): First aid is not normally required; however, if swallowed and symptoms develop, seek medical attention,

Notes to Physician: Acute aspirations of large amounts of oil-laden material may produce a serious aspiration pneumonia. Patients who aspirate these oils should be followed for the development of long-term sequelae. Inhelation exposure to oil mists below current workplace exposure limits is unlikely to cause pulmonary abnormalities.

#### 5. FIRE-FIGHTING MEASURES

#### NFPA 704 Hazard Class

Health: 0 Flammability: 1 Instability: 0 (0-Minimal, 1-Slight, 2-Moderate, 3-Serious, 4-Severe)

Unusual Fire & Explosion Hazards: This material may burn, but will not ignite readily. If container is not properly cooled, it can rupture in the heat of a fire.

Extinguishing Media: Dry chemical, carbon dioxide, foam, or water spray is recommended. Water or foam may cause frothing of materials heated above 212°F. Carbon dioxide can displace oxygen. Use caution when applying carbon dioxide in confined spaces.

Fire Fighting Instructions: For fires beyond the Incipient stage, emergency responders in the immediate hazard area should wear bunker gear. When the potential chemical hazard is unknown, in enclosed or confined spaces, or when explicitly required by DOT, a self contained breathing apparatus should be worn. In addition, wear other appropriate protective equipment as conditions warrant (see Section 8).

Isolate immediate hazard area and keep unauthorized personnel out. Stop spill/release if it can be done with minimal risk. Move undamaged containers from immediate hazard area if it can be done with minimal risk. Water spray may be useful in minimizing or dispersing vapors and to protect personnel. Cool equipment exposed to fire with water, if it can be done with minimal risk. Avoid spreading burning liquid with water used for cooling purposes.

See Section 9 for Flammable Properties including Flash Point and Flammable (Explosive) Limits

Page 3/7 Status: Final

#### 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: This material may burn, but will not ignite readily. Keep all sources of ignition away from spill/release. The use of explosion-proof electrical equipment is recommended. Stay upwind and away from spill/release. Notify persons down wind of the spill/release, isolate immediate hazard area and keep unauthorized personnel out. Wear appropriate protective equipment, including respiratory protection, as conditions warrant (see Section 8). See Sections 2 and 7 for additional information on hazards and precautionary measures.

Environmental Precautions: Stop spill/release if it can be done with minimal risk. Prevent spilled material from entering sewers, storm drains, other unauthorized drainage systems, and natural waterways. Use water sparingly to minimize environmental contamination and reduce disposal requirements.

Spills into or upon navigable waters, the contiguous zone, or adjoining shorelines that cause a sheen or discoloration on the surface of the water, may require notification of the National Response Center (phone number 800-424-8802).

Methods for Containment and Clean-Up: Notify fire authorities and appropriate federal, state, and local agencies. Immediate cleanup of any spill is recommended. Dike far ahead of spill for later recovery or disposal. Absorb spill with inert material such as sand or vermiculite, and place in suitable container for disposal.

#### 7. HANDLING AND STORAGE

Precautions for safe handling: Wash thoroughly after handling. Use good personal hygiene practices and wear appropriate personal protective equipment.

Do Not Use this product in any compressor operating indoors or in closed circulation that produces "breathing air." Do not enter confined spaces such as tanks or pits without following proper entry procedures such as ASTM D-4276 and 29CFR 1910.146. Do not wear contaminated clothing or shoes.

"Empty" containers retain residue and may be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, or other sources of ignition. They may explode and cause injury or death. "Empty" drums should be completely drained, properly bunged, and promptly shipped to the supplier or a drum reconditioner. All containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations. Before working on or in tanks which contain or have contained this material, refer to OSHA regulations, ANSI Z49.1, and other references pertaining to cleaning, repairing, welding, or other contemplated operations.

Conditions for safe storage: Keep container(s) tightly closed. Use and store this material in cool, dry, well-ventilated areas away from heat and all sources of ignition. Store only in approved containers, Keep away from any incompatible material (see Section 10). Protect container(s) against physical damage.

8 EXPOSURE CONTRO	DLS//PERSONAL PROT	ECTION	
Component	ACGIR	OSHA	Other
Lubricant Base Oil (Petroleum)	TWA: 5mg/m <sup>3</sup>	TWA: 5 mg/m <sup>3</sup>	*
	STEL: 10 mg/m <sup>3</sup>	as Oil Mist, if generated	•
	as Oil Mist, if generated		

Note: State, local or other agencies or advisory groups may have established more stringent limits. Consult an industrial hygienist or similar professional, or your local agencies, for further information.

Engineering controls: If current ventilation practices are not adequate to maintain airborne concentrations below the established exposure limits, additional engineering controls may be required.

#### Personal Protective Equipment (PPE):

Eye/Face: The use of eye protection that meets or exceeds ANSI Z.87.1 is recommended to protect against potential eye contact, irritation, or injury. Depending on conditions of use, a face shield may be necessary.

Skin: The use of gloves impervious to the specific material handled is advised to prevent skin contact. Users should check with manufacturers to confirm the performance of their products. Suggested protective materials: Nitrile.

Page 4/7 Status: Final

Respiratory: Where there is potential for airborne exposure above the exposure limit a NIOSH certified air purifying respirator equipped with R or P95 filters may be used.

A respiratory protection program that meets or is equivalent to OSHA 29 CFR 1910.134 and ANSI Z88.2 should be followed whenever workplace conditions warrant a respirator's use. Air purifying respirators provide limited protection and cannot be used in atmospheres that exceed the maximum use concentration (MUC) as directed by regulation or the manufacturer's instructions, in oxygen deficient (less than 19.5 percent oxygen) situations, or other conditions that are immediately dangerous to life and health (IDLH).

Suggestions provided in this section for exposure control and specific types of protective equipment are based on readily available information. Users should consult with the specific manufacturer to confirm the performance of their protective equipment. Specific situations may require consultation with industrial hygiene, safety, or engineering professionals.

#### 9 PHYSICAL AND CHEMICAL PROPERTIES

Note: Unless otherwise stated, values are determined at 20°C (68°F) and 760 mm Hg (1 atm). Data represent typical values and are not intended to be specifications.

Appearance: Physical Form: Odor: Odor Threshold: pH: Vapor Pressure: Vapor Density (air=1): Boiling Point/Range: Melting/Freezing Point: Pour Point: Solubility in Water: Partition Coefficient (n-octanol/water) (Kow): Specific Gravity: Bulk Density: Viscosity: Percent Volatile: Evaporation Rate (nBuAc=1): Flash Point: **Test Method:** LEL (vol % in air): UEL (vol % in air): Autoignition Temperature:

#### 10. STABILITY AND REACTIVITY

Stability: Stable under normal ambient and anticipated conditions of storage and handling.

Conditions to Avoid: Extended exposure to high temperatures can cause decomposition.

Materials to Avoid (Incompatible Materials): Avoid contact with strong oxidizing agents.

Hazardous Decomposition Products: Combustion can yield oxides of carbon, nitrogen and sulfur.

Hazardous Polymerization: Not known to occur.,

Page 5/7 Status: Final

#### 11. TOXICOLOGICAL INFORMATION

#### Chronic Data:

Lubricant Base Oil (Petroleum)

- Carcinogenicity: The petroleum base oils contained in this product have been highly refined by a variety of processes including severe hydrocracking/hydroprocessing to reduce aromatics and improve performance characteristics. All of the oils
- meet the IP-346 criteria of less than 3 percent PAH's and are not considered carcinogens by NTP, IARC, or OSHA.

#### Acute Data:

Component	Service State Stat	Dermal ED50	Section EC50
Lubricant Base Oil (Petroleum)	>5 g/kg	>2 g/kg	No data

#### 12 ECOLOGICAL INFORMATION

Lubricant oil basestocks are complex mixtures of hydrocarbons (primarily branched chain alkanes and cycloalkanes) ranging in carbon number from C15 to C50. The aromatic hydrocarbon content of these mixtures varies with the severity of the refining process. White oils have negligible levels of aromatic hydrocarbons, whereas significant proportions are found in unrefined basestocks. Olefins are found only at very low concentrations. Volatilization is not significant after release of lubricating oil basestocks to the environment due to the very low vapor pressure of the hydrocarbon constituents. In water, lubricating oil basestocks will float and will spread at a rate that is viscosity dependent. Water solubilities are very low and dispersion occurs mainly from water movement with adsorption by sediment being the major fate process. In soil, lubricating oil basestocks show little mobility and adsorption is the predominant physical process.

Both acute and chronic ecotoxicity studies have been conducted on lubricant base oils. Results indicate that the acute aquatic toxicities to fish, Daphnia, Ceriodaphnia and algal species are above 1000 mg/l using either water accommodated fractions or oil in water dispersions. Since lubricant base oils mainly contain hydrocarbons having carbon numbers in the range C15 to C50, it is predicted that acute toxicity would not be observed with these substances due to low water solubility. Results from chronic toxicity tests show that the no observed effect level (NOEL) usually exceeds 1000 mg/l for lubricant base oils with the overall weight of experimental evidence leading to the conclusion that lubricant base oils do not cause chronic toxicity to fish and invertebrates.

Large volumes spills of lubricant base oils into water will produce a layer of undissolved oil on the water surface that will cause direct physical fouling of organisms and may interfere with surface air exchange resulting in lower levels of dissolved oxygen. Petroleum products have also been associated with causing taint in fish even when the latter are caught in lightly contaminated environments. Highly refined base oils sprayed onto the surface of eggs will result in a failure to hatch.

Extensive experience from laboratory and field trials in a wide range of crops has confirmed that little or no damage is produced as a result of either aerosol exposure or direct application of oil emulsion to the leaves of crop plants. Base oils incorporated into soil have resulted in little or no adverse effects on seed germination and plant growth at contamination rates up to 4%.

#### 13 DISPOSAL CONSIDERATIONS

The generator of a waste is always responsible for making proper hazardous waste determinations and needs to consider state and local requirements in addition to federal regulations.

This material, if discarded as produced, would not be a federally regulated RCRA "listed" hazardous waste and is not believed to exhibit characteristics of hazardous waste. See Sections 7 and 8 for information on handling, storage and personal protection and Section 9 for physical/chemical properties. It is possible that the material as produced contains constituents which are not required to be listed in the MSDS but could affect the hazardous waste determination. Additionally, use which results in chemical or physical change of this material could subject it to regulation as a hazardous waste.

This material under most intended uses would become "Used Oil" due to contamination by physical or chemical impurities. Whenever possible, Recycle Used Oil in accordance with applicable federal and state or local regulations. Container contents should be completely used and containers should be emptied prior to discard.

#### 14. TRANSPORTATION INFORMATION

U.S. Department of Transportation (DOT)

Shipping Description: Note: Not regulated If shipped by land in a packaging having a capacity of 3,500 gallons or more, the provisions of 49 CFR, Part 130 apply. (Contains oil)

Page 6/7 Status: Final

## 14. TRANSPORTATION INFORMATION

#### International Maritime Dangerous Goods (IMDG) Shipping Description: Not regulated

## 15 REGULATORY INFORMATION

CERCLA/SARA - Section 302 Extremely Hazardous Substances and TPQs (in pounds): This material does not contain any chemicals subject to the reporting requirements of SARA 302 and 40 CFR 372

CERCLA/SARA - Section 311/312 (Title III Hazard Categories)

Acute Health:	No
Chronic Health:	No
Fire Hazard:	No
Pressure Hazard:	No
Reactive Hazard:	No

CERCLA/SARA - Section 313 and 40 CFR 372:

This material does not contain any chemicals subject to the reporting requirements of SARA 313 and 40 CFR 372.

EPA (CERCLA) Reportable Quantity (in pounds):

This material does not contain any chemicals with CERCLA Reportable Quantities.

#### California Proposition 65:

This material does not contain any chemicals which are known to the State of California to cause cancer, birth defects or other reproductive harm at concentrations that trigger the warning requirements of California Proposition 65.

#### Canadian Regulations:

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the Regulations.

#### WHMIS Hazard Class None

National Chemical Inventories:

All components are either listed on the US TSCA Inventory, or are not regulated under TSCA. All components are either on the DSL, or are exempt from DSL listing requirements.

U.S. Export Control Classification Number: EAR99

#### Other Regulatory Information

Diphenylamine, CASRN 122-39-4, which is present at trace amounts, is subject to the export notification requirements of TSCA Section 12(b).

Material Safety Data Sheet FRICK #12B

1	Chemical Product and Company Identification
	Johnson Controls Inc
	9104 Yellow Brick Road
	Baltimore, MD 21237
	Phone: (410) 574-0400
Product Trade Name	FRICK #12B
CAS Number	Not applicable for mixtures.
Synonyms	None.
Generic Chemical Name	Mixture.
Product Type	Multipurpose.
Preparation/Revision Date	25 March 2010
2	Hazards Identification
Арреагансе	
Appearance Odor	Clear to yellow liquid. Mild
Principal Hazards	Caution.  • May cause eye irritation.
See Section 11 for complete heal	th hazard information.
3	Composition/Information on Ingredients
Hazardous Ingredients	This material contains no ingredients requiring disclosure under regulatory hazard criteria for this jurisdiction. See Section 1 for additional details.
4	First Aid Measures
Eyes	Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention.
ikin	Wash with soap and water. Get medical attention if irritation develops. Launder contaminated clothing before reuse.
phalation	Remove exposed person to fresh air if adverse effects are observed.
Iral	DO NOT INDUCE VOMITING. Get immediate medical attention.
dditional Information	Note to physician: Treat symptomatically.
5	Fire Fighting Measures
lash Point	260 °C, 500 °F COC (Typical)

#### Prepared according to 29CFR 1910.1200.

 5
 Fire Fighting Measures

 Flash Point
 260 °C, 500 °F COC (Typical)

 Extinguishing Media
 CO2, dry chemical, or foam. Water can be used to cool and protect exposed material.

 Firefighting Procedures
 Wear full protective firegear including self-containing breathing apparatus operated in the positive pressure mode with full facepiece, coat, pants, gloves and boots. Water may be ineffective fighting fires.

 Unusual Fire & Explosion Hazards
 None known.

 6
 Accidental Release Measures

## FRICK #12B Spill Procedures

Personal Protective Equipment must be worn, see Personal Protection Section for PPE recommendations. Ventilate area if spilled in confined space or other poorly ventilated areas. Prevent entry into sewers and waterways, dispose of in accordance with all federal, state and local environmental regulation. Pick up free liquid for recycle and/or disposal. Residual liquid can be absorbed on inert material.

7	Handling and Storage
Pumping Temperature	Not determined.
Maximum Handling Temperature	Not determined.
Handling Procedures	Keep containers closed when not in use. Do not discharge into drains or the environment, dispose to an authorized waste collection point. Use appropriate containment to avoid environmental contamination. Avoid breathing dust, fume, gas, mist vapors or spray. Wash thoroughly after handling. Empty container contains product residue which may exhibit hazards of product.
Maximum Storage Temperature	Not determined.
Storage Procedures	No special storage precautions required.
Loading Temperature	Not determined.
8	Exposure Controls/Personal Protection
Exposure Limits	None established
Other Exposure Limits	None known.
Engineering Controls	Use with adequate ventilation.
Gloves Procedures	Use nitrile or neoprene gloves.
Eye Protection	Safety Glasses,
Respiratory Protection	Use NIOSH/MSHA approved respirator with a combination organic vapor and high efficiency filter cartridge if recommended exposure limit is exceeded. Use self-contained breathing apparatus for entry into confined space, for other poorly ventilated areas and for large spill clean-up sites.
Clothing Recommendation	Long sleeve shirt is recommended. Launder contaminated clothing before reuse.
9	Physical and Chemical Properties
Tash Point	260 °C, 500 °F COC (Typical)
Jpper Flammable Limit	Not determined.
ower Flammable Limit	Not determined.
utolgnition Point	Not determined.
xplosion Data	Material does not have explosive properties.
apor Pressure	Not determined.
H	Not determined.
pecífic Gravity	0.99 (15.6 °C)
ulk Density	8.27 Lb/gal, 0.99 Kg/L
Vater Solubility	Soluble
ercent Solid	Not determined.
ercent Volatile	Not determined.
olatile Organic Compound	Not determined.
apor Density	Not determined.
waporation Rate	Not determined.
klor	Mild
ppearance	Clear to yellow liquid.
iscosity	92.3 Centistokes (40 °C) 18.6 Centistokes (100 °C)
)dor Threshold	Not determined.
oiling Point	Not determined.
our Point Temperature	-40 °C, -40 °F
Ielting / Freezing Point	Not determined.
	The above data are typical values and do not constitute a specification. Vapor pressure data are calculated unless otherwise noted.
10	Stability and Reactivity
itability	Material is normally stable at moderately elevated temperatures and pressures

Stability	Material is normally stable at moderately elevated temperatures and pressures.
Decomposition Temperature	Not determined.
Incompatibility	Strong oxidizing agents.
Polymerization	Will not occur.
Thermal Decomposition	Smoke, carbon monoxide, carbon dioxide, aldehydes and other products of incomplete combustion.

#### FRICK #12B Conditions to Avoid

Conditions to Avoid	Not determined.
11	Toxicological Information
	– ACUFE EXPOSURE –
Eye Irritation	May cause eye irritation. Does not meet Canadian D2B or EU R36 criteria. Based on data from similar materials.
Skin Irritation	Not expected to be a primary skin irritant. Based on data from components or similar materials. Prolonged or repeated contact may cause dermatitis. Contact with heated material may cause thermal burns.
Respiratory Irritation	No data available to indicate product or components may cause respiratory irritation under normal workplace conditions ar good industrial hygiene practices.
Dermal Toxicity	The LD50 in rabbits is > 2000 mg/Kg. Based on data from components or similar materials.
Inhalation Toxicity	No data available to indicate product or components may be a toxic inhalation hazard.
Oral Toxicity	The LD50 in rats is > 10,000 mg/Kg. Based on data from components or similar materials. Swallowing material may cause irritation of the gastrointestinal lining, nausea, vomiting, diarrhea, and abdominal pain.
Dermal Sensitization	No data available to indicate product or components may be a skin sensitizer.
Inhalation Sensitization	No data available to indicate product or components may be respiratory sensitizers.
	- CHRONIC EXPOSURE -
Chronic Toxicity	No data available to indicate product or components present at greater than 1% are chronic health hazards.
Carcinogenicity	No data available to indicate any components present at greater than 0.1% may present a carcinogenic hazard.
Mutagenicity	No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.
Reproductive Toxicity	No data available to indicate either product or components present at greater than 0.1% that may cause reproductive toxicity.
Teratogenicity	No data available to indicate product or any components contained at greater than 0.1% may cause birth defects.
	– ADDITIONAL INFORMATION –
Other	No other health hazards known.
12	Ecological Information
	- ENVIRONMENTAL TOXICITY -
Freshwater Fish Toxicity	The acute LC50 is 10 - 100 mg/L based on component data.
Freshwater Invertebrates Toxicity	The acute EC50 is 10 - 100 mg/L based on component data.
Algal Inhibition	The acute EC50 is 10 - 100 mg/L based on component data.

r resultance i ton romeny	The deate Less is To The high cases on component data.
Freshwater Invertebrates Toxicity	The acute EC50 is 10 - 100 mg/L based on component data.
Algat Inhibition	The acute EC50 is 10 - 100 mg/L based on component data.
Saltwater Fish Toxicity	Not determined.
Saltwater Invertebrates Toxicity	Not determined.
Bacteria Toxicity	Not determined.
Miscellancous Toxicity	Not determined.
	– ENVIRONMENTAL FATE –
Biodegradation	Adequate data is not available to estimate the biodegradation potential of this material.
Bioaccumulation	Less than 1.0% of the components potentially bioconcentrate, based on octanol/water coefficients.
Soil Mobility	Not determined.
13	Disposal Considerations
Waste Disposal	This material, if discarded, is not a hazardous waste under RCRA Regulation 40 CFR 261. Treatment, storage, transportation, and disposal must be in accordance with applicable Federal, State/Provincial, and Local regulations.
14	Transport Information
ІСАОЛАТА І	Not regulated.
ІСЛОЛАТА П	Not regulated.
IMDG	Not regulated.
IMDG EMS Fire	Not applicable.
IMDG EMS Spill	Not applicable.
IMDG MFAG	Not applicable.
MARPOL Annex II	Not determined.
USCG Compatibility	Not determined.

## Lubricant: Mobil DTE Oil BB

**E**xonMobil

Product Name: MOBIL DTE OIL BB Revision Date: 27Sep2007 Page 1 of 8

# MATERIAL SAFETY DATA SHEET

## SECTION 1

## PRODUCT AND COMPANY IDENTIFICATION

#### PRODUCT

Product Name: MOBIL DTE OIL BB Product Description: Base Oil and Additives Product Code: 600221-00, 970905 Intended Use: Circulating/gear oil

COMPANY IDENTIFICATION

USA 609-737-4411 800-424-9300 281-834-3296 713-613-3661 800-662-4525, 800-947-9147 http://www.exxon.com, http://www.mobil.com

#### SECTION 2

**COMPOSITION / INFORMATION ON INGREDIENTS** 

No Reportable Hazardous Substance(s) or Complex Substance(s).

**SECTION 3** 

HAZARDS IDENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

#### POTENTIAL HEALTH EFFECTS

Low order of toxicity. Excessive exposure may result in eye, skin, or respiratory irritation. High-pressure injection under skin may cause serious damage.

NFPA Hazard ID:	Health:	0	Flammability:	1	Reactivity:	0
HMIS Hazard ID:	Health:	0	Flammability:	1	Reactivity:	0

**NOTE:** This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

SECTION 4	FIRST AID MEASURES

#### INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use

Product Name: MOBIL DTE OIL BB Revision Date: 27Sep2007 Page 2 of 8

mouth-to-mouth resuscitation.

#### SKIN CONTACT

Wash contact areas with soap and water. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

#### EYE CONTACT

Flush thoroughly with water. If irritation occurs, get medical assistance.

#### INGESTION

First aid is normally not required. Seek medical attention if discomfort occurs.

#### SECTION 5 FIRE FIGHTING MEASURES

#### **EXTINGUISHING MEDIA**

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

#### **FIRE FIGHTING**

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Unusual Fire Hazards: Pressurized mists may form a flammable mixture.

Hazardous Combustion Products: Aldehydes, Oxides of carbon, Incomplete combustion products, Sulfur oxides, Smoke, Fume

#### **FLAMMABILITY PROPERTIES**

Flash Point [Method]: >234C (453F) [ ASTM D-92] Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0 Autoignition Temperature: N/D

#### **SECTION 6**

#### ACCIDENTAL RELEASE MEASURES

#### NOTIFICATION PROCEDURES

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

Product Name: MOBIL DTE OIL BB Revision Date: 27Sep2007 Page 3 of 8

#### SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

#### **ENVIRONMENTAL PRECAUTIONS**

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

#### SECTION 7 HANDLING AND STORAGE

#### HANDLING

Prevent small spills and leakage to avoid slip hazard.

Static Accumulator: This material is a static accumulator.

#### STORAGE

Do not store in open or unlabelled containers.

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits/standards for materials that can be formed when handling this product: When mists / aerosols can occur, the following are recommended: 5 mg/m<sup>3</sup> - ACGIH TLV, 10 mg/m<sup>3</sup> - ACGIH STEL, 5 mg/m<sup>3</sup> - OSHA PEL.

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

#### ENGINEERING CONTROLS

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

#### PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

Product Name: MOBIL DTE OIL BB Revision Date: 27Sep2007 Page 4 of 8

**Respiratory Protection:** If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No special requirements under ordinary conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

Hand Protection: Any specific glove information provided is based on published literature and glove manufacturer data. Work conditions can greatly affect glove durability; inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

No protection is ordinarily required under normal conditions of use.

Eye Protection: If contact is likely, safety glasses with side shields are recommended.

Skin and Body Protection: Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include: No skin protection is ordinarily required under normal conditions of use. In accordance with good

industrial hygiene practices, precautions should be taken to avoid skin contact.

**Specific Hygiene Measures:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

#### ENVIRONMENTAL CONTROLS

See Sections 6, 7, 12, 13.

#### **SECTION 9**

#### PHYSICAL AND CHEMICAL PROPERTIES

Typical physical and chemical properties are given below. Consult the Supplier in Section 1 for additional data.

#### GENERAL INFORMATION

Physical State: Liquid Color: Brown Odor: Characteristic Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION Relative Density (at 15 C): 0.89 Flash Point [Method]: >234C (453F) [ASTM D-92] Flammable Limits (Approximate volume % in air): LEL: 0.9 UEL: 7.0 Autoignition Temperature: N/D Boiling Point / Range: > 316C (600F) Vapor Density (Air = 1): > 2 at 101 kPa Vapor Pressure: < 0.013 kPa (0.1 mm Hg) at 20 C Evaporation Rate (n-butyl acetate = 1): N/D pH: N/A

Product Name: MOBIL DTE OIL BB Revision Date: 27Sep2007 Page 5 of 8

> Log Pow (n-Octanol/Water Partition Coefficient): > 3.5 Solubility in Water: Negligible Viscosity: 220 cSt (220 mm2/sec) at 40 C Oxidizing Properties: See Sections 3, 15, 16.

OTHER INFORMATION Freezing Point: N/D Melting Point: N/A Pour Point: -12°C (10°F) DMSO Extract (mineral oil only), IP-346: < 3 %wt

#### SECTION 10 STABILITY AND REACTIVITY

STABILITY: Material is stable under normal conditions.

CONDITIONS TO AVOID: Excessive heat. High energy sources of ignition.

MATERIALS TO AVOID: Strong oxidizers

HAZARDOUS DECOMPOSITION PRODUCTS: Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

SECTION 11

TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Route of Exposure	Conclusion / Remarks
Inhalation	
Toxicity (Rat): LC50 > 5000 mg/m3	Minimally Toxic. Based on assessment of the components.
Irritation: No end point data.	Negligible hazard at ambient/normal handling temperatures. Based on assessment of the components.
Ingestion	
Toxicity (Rat): LD50 > 2000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials.
Skin	
Toxicity (Rabbit): LD50 > 2000 mg/kg	Minimally Toxic. Based on test data for structurally similar materials.
Irritation (Rabbit): Data available.	Negligible irritation to skin at ambient temperatures. Based on assessment of the components.
Eye	
Irritation (Rabbit): Data available.	May cause mild, short-lasting discomfort to eyes. Based on assessment of the components.

#### **CHRONIC/OTHER EFFECTS**

Contains:

Base oil severely refined: Not carcinogenic in animal studies. Representative material passes IP-346, Modified Ames test, and/or other screening tests. Dermal and inhalation studies showed minimal effects; lung non-specific infiltration of immune cells, oil deposition and minimal granuloma formation. Not sensitizing in test animals.

Product Name: MOBIL DTE OIL BB Revision Date: 27Sep2007 Page 6 of 8

Additional information is available by request.

The following ingredients are cited on the lists below: None.

	REGULATORY LISTS SEAI	RCHED
1 = NTP CARC	3 = IARC 1	5 = IARC 2B
2 = NTP SUS	4 = IARC 2A	6 = OSHA CARC

SECTION 12

#### ECOLOGICAL INFORMATION

The information given is based on data available for the material, the components of the material, and similar materials.

#### ECOTOXICITY

Material -- Not expected to be harmful to aquatic organisms.

#### MOBILITY

Base oil component -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

#### PERSISTENCE AND DEGRADABILITY

#### **Biodegradation:**

Base oil component -- Expected to be inherently biodegradable

#### **BIOACCUMULATION POTENTIAL**

Base oil component -- Has the potential to bioaccumulate, however metabolism or physical properties may reduce the bioconcentration or limit bioavailability.

	DISPOSAL CONSIDERATIONS	
SECTION 13		

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

#### DISPOSAL RECOMMENDATIONS

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products.

#### **REGULATORY DISPOSAL INFORMATION**

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrositivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

Empty Container Warning Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken

Product Name: MOBIL DTE OIL BB Revision Date: 27Sep2007 Page 7 of 8

for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

		TRANSPORT INFORMATION	1
-	RECTION 44		1
-	SECTION 14		1

- LAND (DOT): Not Regulated for Land Transport
- LAND (TDG): Not Regulated for Land Transport
- SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code
- AIR (IATA): Not Regulated for Air Transport

SECTION 15

#### REGULATORY INFORMATION

OSHA HAZARD COMMUNICATION STANDARD: When used for its intended purposes, this material is not classified as hazardous in accordance with OSHA 29 CFR 1910.1200.

NATIONAL CHEMICAL INVENTORY LISTING: TSCA, AICS, PICCS, ENCS, DSL, EINECS, IECSC, KECI

**EPCRA:** This material contains no extremely hazardous substances.

#### SARA (311/312) REPORTABLE HAZARD CATEGORIES: None.

SARA (313) TOXIC RELEASE INVENTORY: This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

The Following Ingredients are Cited on the Lists Below: None.

CHEMTREC: (800) 424-9300 (24 hrs., 7 days a week)

## 2. HAZARDS IDENTIFICATION

Emergency Overview	
Color:	Clear - colourless
Physical state:	liquid
Odor:	mercaptans

## \*Classification of the substance or mixture:

Flammable liquid., Category 1, H224 Oral: Acute toxicity, Category 4, H302 Inhalation: Acute toxicity, Category 4, H332 Acute aquatic toxicity, Category 1, H400 Chronic aquatic toxicity, Category 1, H410

\*For the full text of the H-Statements mentioned in this Section, see Section 16.

Product code: 000902

Version 2.0

Issued on: 05/15/2015

Page: 1 / 13

## ETHYL MERCAPTAN

#### **GHS-Labelling**

#### Hazard statements:

H224 : Extremely flammable liquid and vapour. H302 + H332 : Harmful if swallowed or if inhaled H410 : Very toxic to aquatic life with long lasting effects.

## Supplemental Hazard Statements:

The gas deadens the sense of smell. Do not depend on odor to detect presence of gas. May displace oxygen and cause rapid suffocation.

Product code: 000902

Version 2.0

Issued on: 05/15/2015

Page: 2 / 13

## ETHYL MERCAPTAN

#### **Precautionary statements:**

#### Prevention:

- P210 : Keep away from heat/sparks/open flames/hot surfaces. No smoking.
- P233 : Keep container tightly closed.
- P240 : Ground/bond container and receiving equipment.
- P241 : Use explosion-proof electrical/ ventilating/ lighting/ equipment.
- P242 : Use only non-sparking tools.
- P243 : Take precautionary measures against static discharge.
- P261 : Avoid breathing gas/mist/vapours/spray.
- P264 : Wash skin thoroughly after handling.
- P270 : Do not eat, drink or smoke when using this product.
- P271 : Use only outdoors or in a well-ventilated area.
- P273 : Avoid release to the environment.

P280 : Wear protective gloves/ eye protection/ face protection.

#### **Response:**

P301 + P312 : IF SWALLOWED: Call a POISON CENTER or doctor/ physician if you feel unwell.

P303 + P361 + P353 : IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower.

P304 + P340 : IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. P312 : Call a POISON CENTER or doctor/ physician if you feel unwell.

P330 : Rinse mouth.

P370 + P378 : In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction.

P391 : Collect spillage.

#### Storage:

P403 + P235 : Store in a well-ventilated place. Keep cool.

#### Disposal:

P501 : Dispose of contents/ container to an approved waste disposal plant.

#### Supplemental information:

#### Potential Health Effects:

Objectionable odor may cause nausea, headache or dizziness. The gas deadens the sense of smell. Do not depend on odor to detect presence of gas. Vapor is heavier than air and can cause suffocation by reducing oxygen available for breathing.

May also cause: central nervous system depression, respiratory arrest, chest discomfort, accumulation of fluid in the lungs which may be delayed for several hours, (severity of effects depends on extent of exposure).

## 3. COMPOSITION/INFORMATION ON INGREDIENTS

Product code: 000902

Version 2.0

Issued on: 05/15/2015

Page: 3 / 13

## ETHYL MERCAPTAN

Chemical Name	CAS-No.	Wt/Wt	GHS Classification**
Ethanethiol	75-08-1	100 %	H224, H302, H332, H400, H410

\*\*For the full text of the H-Statements mentioned in this Section, see Section 16.

#### **4. FIRST AID MEASURES**

#### Inhalation:

If inhaled, remove to fresh air and keep at rest in a position comfortable for breathing. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

#### Skin:

In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse.

#### Eyes:

Immediately flush eye(s) with plenty of water.

#### Ingestion:

If swallowed, DO NOT induce vomiting unless directed to do so by medical personnel. Get medical attention. Never give anything by mouth to an unconscious person. Rinse mouth.

#### Notes to physician:

Exposure to material may cause delayed lung injury resulting in pulmonary edema and pneumonitis. Exposed individuals should be monitored for 72 hours after exposure for the onset of delayed respiratory symptoms.

## **5. FIREFIGHTING MEASURES**

#### Extinguishing media (suitable):

water spray, carbon dioxide, foam, Dry chemical

#### **Protective equipment:**

Fire fighters and others who may be exposed to products of combustion should wear full fire fighting turn out gear (full Bunker Gear) and self-contained breathing apparatus (pressure demand / NIOSH approved or equivalent).

#### Further firefighting advice:

Cool closed containers exposed to fire with water spray.

Closed containers of this material may explode when subjected to heat from surrounding fire. After a fire, wait until the material has cooled to room temperature before initiating clean-up activities. Do not allow run-off from fire fighting to enter drains or water courses. Fire fighting equipment should be thoroughly decontaminated after use.

#### Fire and explosion hazards:

Product code: 000902

Version 2.0

Issued on: 05/15/2015

Page: 4 / 13

## ETHYL MERCAPTAN

When burned, the following hazardous products of combustion can occur: Carbon oxides sulfur oxides hydrogen sulfide Hazardous organic compounds

## 6. ACCIDENTAL RELEASE MEASURES

## In case of spill or leak:

Prevent further leakage or spillage if you can do so without risk. Evacuate area of all unnecessary personnel. Ventilate the area. Eliminate all ignition sources. Avoid generation of vapors. Contain and collect spillage with noncombustible absorbent material such as sodium bicarbonate, sodium carbonate, calcium carbonate, clean sand or non-acidic clay and then wet down (dampen) the mixture with water. Sweep or scoop up using non-sparking tools and place into suitable properly labeled containers for prompt disposal. The sweepings should be wetted down further with water. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits.

## 7. HANDLING AND STORAGE

#### Handling

#### General information on handling:

Do not taste or swallow. Avoid breathing vapor or mist. Keep away from heat, sparks and flames. No smoking. Keep container closed. Do not enter confined spaces unless adequately ventilated. Use only with adequate ventilation. Wash thoroughly after handling. Check that all equipment is properly grounded and installed to satisfy electrical classification requirements. Container hazardous when empty. Follow label warnings even after container is emptied. RESIDUAL VAPORS MAY EXPLODE ON IGNITION. DO NOT CUT, DRILL, GRIND, OR WELD ON OR NEAR THIS CONTAINER. Improper disposal or reuse of this container may be dangerous and/or illegal. Emptied container retains vapor and product residue.

#### Storage

## General information on storage conditions:

Keep in a dry, cool place. Keep away from direct sunlight. Keep container closed when not in use. Store in closed containers, in a secure area to prevent container damage and subsequent spillage. Store in well ventilated area away from heat and sources of ignition such as flame, sparks and static electricity. Ensure that all storage and handling equipment is properly grounded and installed to satisfy electrical classification requirements. Static electricity may accumulate when transferring material. All metal and groundable storage containers, including but not limited to drums, cylinders, Returnable Intermodal Bulk Containers (RIBCs) and Class C Flexible Intermodal Bulk Containers (FIBCs) must be bonded and grounded during filling and emptying operations. Observe all federal, state and local regulations and National Fire Protection Association (NFPA) Codes which pertain to the specific local

Product code: 000902

Version 2.0

Issued on: 05/15/2015

Page: 5 / 13

## **ETHYL MERCAPTAN**

conditions of storage and use, including OSHA 29 CFR 1910.106 and NFPA 30, 70, 77, and 497.

## Storage incompatibility - General:

Store away from oxidizers and reactive materials.

Store separate from: hydrogen peroxide

hypochlorites

nitric acid

Avoid exposure to water in process equipment at temperatures below approx 20°C (68°F)/1 atm to avoid formation of solid hydrates.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

#### Airborne Exposure Guidelines:

#### Ethanethiol (75-08-1)

US. ACGIH Threshold Limit Values

0.5 ppm Time weighted average

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Ceiling Limit Value

10 ppm (25 mg/m3)

Only those components with exposure limits are printed in this section. Limits with skin contact designation above have skin contact effect. Air sampling alone is insufficient to accurately quantitate exposure. Measures to prevent significant cutaneous absorption may be required. Limits with a sensitizer designation above mean that exposure to this material may cause allergic reactions.

#### Engineering controls:

Investigate engineering techniques to reduce exposures below airborne exposure limits or to otherwise reduce exposures. Provide ventilation if necessary to minimize exposures or to control exposure levels to below airborne exposure limits (if applicable see above). If practical, use local mechanical exhaust ventilation at sources of air contamination such as open process equipment.

Consult ACGIH ventilation manual or NFPA Standard 91 for design of exhaust systems.

#### **Respiratory protection:**

Avoid breathing vapor or mist. Where airborne exposure is likely or airborne exposure limits are exceeded (if applicable, see above), use NIOSH approved respiratory protection equipment appropriate to the material and/or its components. Full facepiece equipment is recommended and, if used, replaces need for face shield and/or chemical goggles. Consult respirator manufacturer to determine appropriate type equipment for a given application. Observe respirator use limitations specified by NIOSH or the manufacturer. For emergency and other conditions where there may be a potential for significant exposure or where exposure limit may be significantly exceeded, use an approved full face positive-pressure, self-contained breathing apparatus or positive-pressure airline with auxiliary self-contained air supply. Respiratory protection programs must comply

Product code: 000902

Version 2.0

Issued on: 05/15/2015

Page: 6 / 13

## ETHYL MERCAPTAN

with 29 CFR § 1910.134.

#### Skin protection:

Minimize skin contamination by following good industrial hygiene practice. Wearing protective gloves is recommended. Wash hands and contaminated skin thoroughly after handling.

#### Eye protection:

Use good industrial practice to avoid eye contact.

#### 9. PHYSICAL AND CHEMICAL PROPERTIES Color: Clear - colourless **Physical state:** liquid Odor: mercaptans Odor threshold: 0.4 ppb **Flash** point -49 °F (-45 °C) (Method: Standard ASTM D 3278) Auto-ignition 572 °F (300 °C) temperature: Lower flammable limit 2.8 %(V) (LFL): **Upper flammable limit** 18 %(V) (UFL): pH: not determined Density: 0.839 g/cm3 **Specific Gravity (Relative** 0.839 (68 °F( 20 °C))Water=1 (liquid) density): Vapor pressure: 401 mmHg (68 °F (20 °C))calculated Relative vapor density: 2.1 Vapor density: 2.1 kg/m3 **Boiling point/boiling** 95 °F (35 °C) range: Freezing point: -234 °F (-148 °C) Melting point/range: -234 °F (-148 °C) **Evaporation rate:** not determined Solubility in water: 6.8 g/l 68 °F (20 °C)

## ETHYL MERCAPTAN

## **11. TOXICOLOGICAL INFORMATION**

#### Data for ETHYL MERCAPTAN

#### Acute toxicity

Oral:

Harmful if swallowed. (rat) LD50 = 682 mg/kg.

Dermal:

No deaths occurred. (rabbit) LD50 > 2,000 mg/kg.

#### Inhalation:

Harmful if inhaled. (rat) 4 h LC50 = 11.2 mg/l = 4420 ppm. signs: Central nervous system effects (vapor)

#### Skin Irritation:

Causes mild skin irritation. (rabbit) (4 h)

#### Eye Irritation:

Causes mild eye irritation. (rabbit) (data for a similar material)

#### Repeated dose toxicity

Subchronic oral administration to rat / affected organ(s): blood, liver / signs: changes in blood cell counts, changes in organ structure or function / (data for a similar material)

Subchronic inhalation administration to rat / affected organ(s): blood, liver, kidney / signs: changes in blood cell counts, changes in organ structure or function / (data for a similar material)

Subchronic inhalation administration to rat / affected organ(s): lung, kidney / signs: inflammation, changes in organ structure or function, changes in organ weights / (data for a similar material)

#### Genotoxicity

#### Assessment in Vitro:

Both positive and equivocal responses have been reported in tests using: animal cells

No genetic changes were observed in laboratory tests using: bacteria

#### Assessment in Vivo:

No genetic changes were observed in laboratory tests using: mice, (data for similar material)

#### **Developmental toxicity**

Exposure during pregnancy. inhalation (mouse) / No birth defects were observed. at doses that produce effects in mothers

#### Human experience

#### Inhalation:

Central nervous system: headache, nausea, respiratory depression.

## ETHYL MERCAPTAN

Nose: The gas deadens the sense of smell. Do not depend on odor to detect presence of gas.

## **12. ECOLOGICAL INFORMATION**

#### **Chemical Fate and Pathway**

Data on this material and/or a similar material are summarized below.

## Data for ETHYL MERCAPTAN

#### **Biodegradation:** Not readily biodegradable. (28 d) biodegradation 27.10 %

#### **Octanol Water Partition Coefficient:** $\log Pow = 1.5$

#### Mobility and Distribution in the Environment: Slight adsorption / Log Koc= 1.53

#### Ecotoxicology

Data on this material and/or a similar material are summarized below.

#### **Data for ETHYL MERCAPTAN**

#### Aquatic toxicity data:

Toxic. Oncorhynchus mykiss (rainbow trout) 96 h LC50 = 2.4 mg/l

#### Aquatic invertebrates:

Very toxic. Daphnia magna (Water flea) 48 h EC50 = 0.1 mg/l

#### Algae:

Toxic. Pseudokirchneriella subcapitata (green algae) 72 h EC50 = 3.0 mg/l

#### **13. DISPOSAL CONSIDERATIONS**

#### Waste disposal:

Disposal via incineration is recommended. Dispose of in accordance with federal, state and local regulations. Consult a regulatory specialist to determine appropriate state or local reporting requirements, for assistance in waste characterization and/or hazardous waste disposal and other requirements listed in pertinent environmental permits. Note: Chemical additions to, processing of, or otherwise altering this material may make this waste management information incomplete, inaccurate, or otherwise inappropriate. Furthermore, state and local waste disposal requirements may be more restrictive or otherwise different from federal laws and regulations.

Take appropriate measures to prevent release to the environment.

## United States – Federal Regulations

## SARA Title III - Section 302 Extremely Hazardous Chemicals:

The components in this product are either not SARA Section 302 regulated or regulated but present in negligible concentrations.

#### SARA Title III - Section 311/312 Hazard Categories: Acute Health Hazard, Fire Hazard

## SARA Title III - Section 313 Toxic Chemicals:

This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

Product code: 000902

Version 2.0

Issued on: 05/15/2015

Page: 11 / 13

## ETHYL MERCAPTAN

Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) - Reportable Quantity (RQ):

The components in this product are either not CERCLA regulated, regulated but present in negligible concentrations, or regulated with no assigned reportable quantity.

#### United States - State Regulations

#### New Jersey Right to Know

Chemical Name	CAS-No.
Ethanethiol	75-08-1

New Jersey Right to Know – Special Health Hazard Substance(s)

Chemical Name	CAS-No.
Ethanethiol	75-08-1
Benneylyania Bight to Know	

Pennsylvania Right to Know

Chemical Name Ethanethiol

#### California Prop. 65

This product does not contain any chemicals known to the State of California to cause cancer, birth defects, or any other reproductive defects.

<b>16. OTHER INF</b>	ORMATION
----------------------	----------

## Full text of H-Statements referred to under sections 2 and 3.

H224 Extremely flammable liquid and vapour.

H302 Harmful if swallowed.

H332 Harmful if inhaled.

H400 Very toxic to aquatic life.

Other information:

H410 Very toxic to aquatic life with long lasting effects.

Miscellaneous:

This MSDS covers the following grades: Odorant Grade

CAS-No.

75-08-1

## Material Name: Fuel Oil No. 2

Synonyms: #2 Heating Oil; 2 Oil; Off-road Diesel Fuel

SDS No. 0088 EU/CLP GHS

## \*\*\* Section 1 - Product and Company Identification \*\*\*

## Manufacturer Information

Hess Corporation 1 Hess Plaza Woodbridge, NJ 07095-0961 Phone: 732-750-6000 Corporate EHS Emergency # 800-424-9300 CHEMTREC www.hess.com (Environment, Health, Safety Internet Website)

## \* \* \* Section 2 - Hazards Identification \* \* \*

## **GHS Classification:**

Flammable Liquids - Category 3 Acute Toxicity, Inhalation - Category 4 Skin Corrosion/Irritation – Category 2 Eye Damage/Irritation – Category 2 Carcinogenicity - Category 2 Specific Target Organ Toxicity (Single Exposure) – Category 3 (respiratory irritation, narcosis) Aspiration Hazard – Category 1 Hazardous to the Aquatic Environment, Acute Hazard – Category 3

## **GHS LABEL ELEMENTS**

## Symbol(s)

# Signal Word

DANGER

## **Hazard Statements**

Flammable liquid and vapor. Harmful if inhaled. Causes skin irritation. Causes eye irritation. Suspected of causing cancer. Suspected of causing genetic defects. May cause respiratory irritation. May cause drowsiness or dizziness. May be fatal if swallowed and enters airways. Harmful to aquatic life.

# Safety Data Sheet

Material Name: Fuel Oil No. 2

## **Precautionary Statements**

## Prevention

Keep away from heat/sparks/open flames/hot surfaces. No smoking

Keep container tightly closed.

Ground/bond container and receiving equipment.

Use explosion-proof electrical/ventilating/lighting/equipment.

Use only non-sparking tools.

Take precautionary measures against static discharge.

Wear protective gloves/protective clothing/eye protection/face protection.

Avoid breathing fume/mist/vapors/spray.

Use only outdoors or in a well-ventilated area.

Wash hands and forearms thoroughly after handling.

Obtain special instructions before use.

Do not handle until all safety precautions have been read and understood.

Avoid release to the environment.

## Response

In case of fire: Use water spray, fog or foam.

If on skin (or hair): Wash with plenty of soap and water. Take off immediately all contaminated clothing and wash it before reuse. If skin irritation occurs, get medical advice/attention.

If inhaled: Remove person to fresh air and keep comfortable for breathing. Call a poison center or doctor if you feel unwell.

If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

If exposed or concerned: Get medical advice/attention.

If swallowed: Immediately all a poison center or doctor/physician if you feel unwell. Do NOT induce vomiting.

## Storage

Store in a well ventilated place. Keep cool. Keep container tightly closed. Store locked up.

## Disposal

Dispose of contents/container in accordance with local/regional/national/international regulations.

# \* \* \* Section 3 - Composition / Information on Ingredients \*

CAS #	Component	Percent
68476-30-2	Fuel oil No. 2	100
91-20-3	Naphthalene	<0.1

A complex combination of hydrocarbons with carbon numbers in the range C9 and higher produced from the distillation of petroleum crude oil.

# Safety Data Sheet

## Material Name: Fuel Oil No. 2

## \* \* \* Section 4 - First Aid Measures \* \* \*

## First Aid: Eyes

In case of contact with eyes, immediately flush with clean, low-pressure water for at least 15 min. Hold eyelids open to ensure adequate flushing. Seek medical attention.

## First Aid: Skin

Remove contaminated clothing. Wash contaminated areas thoroughly with soap and water or with waterless hand cleanser. Obtain medical attention if irritation or redness develops.

## First Aid: Ingestion

DO NOT INDUCE VOMITING. Do not give liquids. Obtain immediate medical attention. If spontaneous vomiting occurs, lean victim forward to reduce the risk of aspiration. Monitor for breathing difficulties. Small amounts of material which enter the mouth should be rinsed out until the taste is dissipated.

## First Aid: Inhalation

Remove person to fresh air. If person is not breathing, provide artificial respiration. If necessary, provide additional oxygen once breathing is restored if trained to do so. Seek medical attention immediately.

## \*\*\* Section 5 - Fire Fighting Measures \*

## **General Fire Hazards**

See Section 9 for Flammability Properties.

Vapors may be ignited rapidly when exposed to heat, spark, open flame or other source of ignition. When mixed with air and exposed to an ignition source, flammable vapors can burn in the open or explode in confined spaces. Being heavier than air, vapors may travel long distances to an ignition source and flash back. Runoff to sewer may cause fire or explosion hazard.

## **Hazardous Combustion Products**

Carbon monoxide, carbon dioxide and non-combusted hydrocarbons (smoke).

## Extinguishing Media

SMALL FIRES: Any extinguisher suitable for Class B fires, dry chemical, CO2, water spray, fire fighting foam, or gaseous extinguishing agent.

LARGE FIRES: Water spray, fog or fire fighting foam. Water may be ineffective for fighting the fire, but may be used to cool fire-exposed containers.

## Unsuitable Extinguishing Media

None

## Fire Fighting Equipment/Instructions

Small fires in the incipient (beginning) stage may typically be extinguished using handheld portable fire extinguishers and other fire fighting equipment. Firefighting activities that may result in potential exposure to high heat, smoke or toxic by-products of combustion should require NIOSH/MSHA- approved pressure-demand self-contained breathing apparatus with full facepiece and full protective clothing. Isolate area around container involved in fire. Cool tanks, shells, and containers exposed to fire and excessive heat with water. For massive fires the use of unmanned hose holders or monitor nozzles may be advantageous to further minimize personnel exposure. Major fires may require withdrawal, allowing the tank to burn. Large storage tank fires typically require specially trained personnel and equipment to extinguish the fire, often including the need for properly applied fire fighting foam.

## \*\*\* Section 6 - Accidental Release Measures \*\*\*

## **Recovery and Neutralization**

Carefully contain and stop the source of the spill, if safe to do so.

Revision Date 8/30/12

### Material Name: Fuel Oil No. 2

## Materials and Methods for Clean-Up

Take up with sand or other oil absorbing materials. Carefully shovel, scoop or sweep up into a waste container for reclamation or disposal.

### **Emergency Measures**

Evacuate nonessential personnel and remove or secure all ignition sources. Consider wind direction; stay upwind and uphill, if possible. Evaluate the direction of product travel, diking, sewers, etc. to confirm spill areas. Spills may infiltrate subsurface soil and groundwater; professional assistance may be necessary to determine the extent of subsurface impact.

### Personal Precautions and Protective Equipment

Response and clean-up crews must be properly trained and must utilize proper protective equipment (see Section 8).

### **Environmental Precautions**

Protect bodies of water by diking, absorbents, or absorbent boom, if possible. Do not flush down sewer or drainage systems, unless system is designed and permitted to handle such material. The use of fire fighting foam may be useful in certain situations to reduce vapors. The proper use of water spray may effectively disperse product vapors or the liquid itself, preventing contact with ignition sources or areas/equipment that require protection.

## **Prevention of Secondary Hazards**

None

# \*\*\* Section 7 - Handling and Storage \*\*\*

### Handling Procedures

Handle as a combustible liquid. Keep away from heat, sparks, excessive temperatures and open flame! No smoking or open flame in storage, use or handling areas. Bond and ground containers during product transfer to reduce the possibility of static-initiated fire or explosion.

Special slow load procedures for "switch loading" must be followed to avoid the static ignition hazard that can exist when this product is loaded into tanks previously containing low flash point products (such as gasoline) - see API Publication 2003, "Protection Against Ignitions Arising Out Of Static, Lightning and Stray Currents."

### Storage Procedures

Keep containers closed and clearly labeled. Use approved vented storage containers. Empty product containers or vessels may contain explosive vapors. Do not pressurize, cut, heat, weld or expose such containers to sources of ignition.

Store in a well-ventilated area. This storage area should comply with NFPA 30 "Flammable and Combustible Liquid Code". Avoid storage near incompatible materials. The cleaning of tanks previously containing this product should follow API Recommended Practice (RP) 2013 "Cleaning Mobile Tanks In Flammable and Combustible Liquid Service" and API RP 2015 "Cleaning Petroleum Storage Tanks."

### Incompatibilities

Keep away from strong oxidizers; Fluorel ®

#### Material Name: Fuel Oil No. 2

#### \* \* \* **Section 8 - Exposure Controls / Personal Protection Component Exposure Limits** Fuel oil No. 2 (270-671-4) ACGIH: 100 mg/m3 TWA (inhalable fraction and vapor, as total hydrocarbons, listed under Diesel fuel) Skin - potential significant contribution to overall exposure by the cutaneous route (listed under Diesel fuel) Belgium: 100 mg/m3 TWA (as total hydrocarbon, aerosol and vapor) Skin (listed under Gas oil) Portugal: 100 mg/m3 TWA [VLE-MP] (aerosol and vapor, as total Hydrocarbons, listed under Fuel diesel) Naphthalene (202-049-5) ACGIH: 15 ppm STEL 10 ppm TWA Skin - potential significant contribution to overall exposure by the cutaneous route 10 ppm TWA [TMW]; 50 mg/m3 TWA [TMW] Austria: skin notation Belgium: 15 ppm STEL; 80 mg/m3 STEL 10 ppm TWA; 53 mg/m3 TWA Skin Denmark: 10 ppm TWA; 50 mg/m3 TWA Finland: 2 ppm STEL; 10 mg/m3 STEL 1 ppm TWA; 5 mg/m3 TWA France: 10 ppm TWA [VME]; 50 mg/m3 TWA [VME] Germany: 0.1 ppm TWA AGW (The risk of damage to the embryo or fetus can be excluded when MAK and BAT values are observed, inhalable fraction, exposure factor 1); 0.5 mg/m3 TWA AGW (The risk of damage to the embryo or fetus can be excluded when MAK and BAT values are observed, inhalable fraction, exposure factor 1) Greece: 10 ppm TWA; 50 mg/m3 TWA Ireland: 15 ppm STEL; 75 mg/m3 STEL 10 ppm TWA; 50 mg/m3 TWA Netherlands: 80 mg/m3 STEL 50 mg/m3 TWA 10 ppm TWA [VLE-MP] Portugal: 15 ppm STEL [VLA-EC]; 80 mg/m3 STEL [VLA-EC] Spain: 10 ppm TWA [VLA-ED]; 53 mg/m3 TWA [VLA-ED] skin - potential for cutaneous exposure 10 ppm LLV; 50 mg/m3 LLV Sweden: 15 ppm STV; 80 mg/m3 STV

## **Engineering Measures**

Use adequate ventilation to keep vapor concentrations of this product below occupational exposure and flammability limits, particularly in confined spaces.

### Personal Protective Equipment: Respiratory

A NIOSH/MSHA-approved air-purifying respirator with organic vapor cartridges or canister may be permissible under certain circumstances where airborne concentrations are or may be expected to exceed exposure limits or for odor or irritation. Protection provided by air-purifying respirators is limited.

### Material Name: Fuel Oil No. 2

Use a positive pressure, air-supplied respirator if there is a potential for uncontrolled release, exposure levels are not known, in oxygen-deficient atmospheres, or any other circumstance where an air-purifying respirator may not provide adequate protection.

### **Personal Protective Equipment: Hands**

Gloves constructed of nitrile, neoprene, or PVC are recommended.

### **Personal Protective Equipment: Eyes**

Safety glasses or goggles are recommended where there is a possibility of splashing or spraying.

### Personal Protective Equipment: Skin and Body

Chemical protective clothing such as of E.I. DuPont TyChem®, Saranex® or equivalent recommended based on degree of exposure. Note: The resistance of specific material may vary from product to product as well as with degree of exposure. Consult manufacturer specifications for further information.

# \*\*\* Section 9 - Physical & Chemical Properties \*\*\*

Appearance:	Red or reddish/orange colored (dyed)	Odor:	Mild, petroleum distillate odor
Physical State:	Liquid	pH:	ND
Vapor Pressure:	0.009 psia @ 70 °F (21 °C)	Vapor Density:	>1.0

# \*\*\* Section 10 - Chemical Stability & Reactivity Information \*\*\*

## **Chemical Stability**

This is a stable material.

### **Hazardous Reaction Potential**

Will not occur.

### **Conditions to Avoid**

Avoid high temperatures, open flames, sparks, welding, smoking and other ignition sources.

### **Incompatible Products**

Keep away from strong oxidizers; Fluorel ®

### **Hazardous Decomposition Products**

Carbon monoxide, carbon dioxide and non-combusted hydrocarbons (smoke).

# \*\*\* Section 11 - Toxicological Information \*\*\*

## **Acute Toxicity**

## **A: General Product Information**

Harmful if swallowed.

### Material Name: Fuel Oil No. 2

### B: Component Analysis - LD50/LC50

#### Fuel oil No. 2 (68476-30-2)

Oral LD50 Rat 12 g/kg; Dermal LD50 Rabbit 4720 μL/kg; Dermal LD50 Rabbit >2000 mg/kg; Inhalation LC50 Rat 4.6 mg/L 4 h

### Naphthalene (91-20-3)

Inhalation LC50 Rat >340 mg/m3 1 h; Oral LD50 Rat 490 mg/kg; Dermal LD50 Rat >2500 mg/kg; Dermal LD50 Rabbit >20 g/kg

### **Product Mixture**

Oral LD50 Rat 14.5 ml/kg; Dermal LD50 Rabbit >5 mL/kg; Guinea Pig Sensitization: negative; Primary dermal irritation: moderately irritating (Draize mean irritation score - 3.98 rabbits); Draize eye irritation: mildly irritating (Draize score, 48 hours, unwashed - 2.0 rabbits)

## Potential Health Effects: Skin Corrosion Property/Stimulativeness

Practically non-toxic if absorbed following acute (single) exposure. May cause skin irritation with prolonged or repeated contact. Liquid may be absorbed through the skin in toxic amounts if large areas of skin are repeatedly exposed.

## Potential Health Effects: Eye Critical Damage/ Stimulativeness

Contact with eyes may cause mild irritation.

### Potential Health Effects: Ingestion

Ingestion may cause gastrointestinal disturbances, including irritation, nausea, vomiting and diarrhea, and central nervous system (brain) effects similar to alcohol intoxication. In severe cases, tremors, convulsions, loss of consciousness, coma, respiratory arrest, and death may occur.

## **Potential Health Effects: Inhalation**

Excessive exposure may cause irritations to the nose, throat, lungs and respiratory tract. Central nervous system (brain) effects may include headache, dizziness, loss of balance and coordination, unconsciousness, coma, respiratory failure, and death.

WARNING: the burning of any hydrocarbon as a fuel in an area without adequate ventilation may result in hazardous levels of combustion products, including carbon monoxide, and inadequate oxygen levels, which may cause unconsciousness, suffocation, and death.

## **Respiratory Organs Sensitization/Skin Sensitization**

This product is not reported to have any skin sensitization effects.

### **Generative Cell Mutagenicity**

This product is not reported to have any mutagenic effects. Material of similar composition has been positive in a mutagenicity study.

## Carcinogenicity

## A: General Product Information

Suspected of causing cancer.

Dermal carcinogenicity: positive - mice

### Material Name: Fuel Oil No. 2

Studies have shown that similar products produce skin tumors in laboratory animals following repeated applications without washing or removal. The significance of this finding to human exposure has not been determined. Other studies with active skin carcinogens have shown that washing the animal's skin with soap and water between applications reduced tumor formation.

This product is similar to Diesel Fuel. IARC classifies whole diesel fuel exhaust particulates as probably carcinogenic to humans (Group 2A) and NIOSH regards it as a potential cause of occupational lung cancer based on animal studies and limited evidence in humans.

## **B: Component Carcinogenicity**

### Fuel oil No. 2 (68476-30-2)

ACGIH: A3 - Confirmed Animal Carcinogen with Unknown Relevance to Humans (listed under Diesel fuel)

### Naphthalene (91-20-3)

ACGIH: A4 - Not Classifiable as a Human Carcinogen

NTP: Reasonably Anticipated To Be A Human Carcinogen (Possible Select Carcinogen)

IARC: Monograph 82 [2002] (Group 2B (possibly carcinogenic to humans))

## **Reproductive Toxicity**

This product is not reported to have any reproductive toxicity effects.

## Specified Target Organ General Toxicity: Single Exposure

This product is not reported to have any specific target organ general toxicity single exposure effects.

## Specified Target Organ General Toxicity: Repeated Exposure

This product is not reported to have any specific target organ general toxicity repeat exposure effects.

### **Aspiration Respiratory Organs Hazard**

The major health threat of ingestion occurs from the danger of aspiration (breathing) of liquid drops into the lungs, particularly from vomiting. Aspiration may result in chemical pneumonia (fluid in the lungs), severe lung damage, respiratory failure and even death.

# \*\*\* Section 12 - Ecological Information \*\*\*

## Ecotoxicity

## A: General Product Information

Very toxic to aquatic life with long lasting effects. Keep out of sewers, drainage areas and waterways. Report spills and releases, as applicable, under Federal and State regulations.

# B: Component Analysis - Ecotoxicity - Aquatic Toxicity

## **BLUE RACER MIDSTREAM, LLC**

## Attachment K

## FUGITIVE EMISSIONS DATA SUMMARY SHEET

The FUGITIVE EMISSIONS SUMMARY SHEET provides a summation of fugitive emissions. Fugitive emissions are those emissions which could not reasonably pass through a stack, chimney, vent or other functionally equivalent opening. Note that uncaptured process emissions are not typically considered to be fugitive, and must be accounted for on the appropriate EMISSIONS UNIT DATA SHEET and on the EMISSION POINTS DATA SUMMARY SHEET.

Please note that total emissions from the source are equal to all vented emissions, all fugitive emissions, plus all other emissions (e.g. uncaptured emissions).

	APPLICATION FORMS CHECKLIST - FUGITIVE EMISSIONS
1.)	Will there be haul road activities?
	🛛 Yes 🗌 No
	If YES, then complete the HAUL ROAD EMISSIONS UNIT DATA SHEET.
2.)	Will there be Storage Piles?
	□ Yes
	If YES, complete Table 1 of the NONMETALLIC MINERALS PROCESSING EMISSIONS UNIT DATA SHEET.
3.)	Will there be Liquid Loading/Unloading Operations?
	⊠ Yes (insignificant source) □ No
	If YES, complete the BULK LIQUID TRANSFER OPERATIONS EMISSIONS UNIT DATA SHEET.
4.)	Will there be emissions of air pollutants from Wastewater Treatment Evaporation?
	□ Yes
	If YES, complete the GENERAL EMISSIONS UNIT DATA SHEET.
5.)	Will there be Equipment Leaks (e.g. leaks from pumps, compressors, in-line process valves, pressure relief devices, open-ended valves, sampling connections, flanges, agitators, cooling towers, etc.)?
	🛛 Yes 🗌 No
	☐ If YES, complete the LEAK SOURCE DATA SHEET section of the CHEMICAL PROCESSES EMISSIONS UNIT DATA SHEET.
6.)	Will there be General Clean-up VOC Operations?
	□ Yes
	If YES, complete the GENERAL EMISSIONS UNIT DATA SHEET.
7.)	Will there be any other activities that generate fugitive emissions?
	□ Yes
	If YES, complete the GENERAL EMISSIONS UNIT DATA SHEET or the most appropriate form.
	ou answered "NO" to all of the items above, it is not necessary to complete the following table, "Fugitive Emissions nmary."

FUGITIVE EMISSIONS SUMMARY	All Regulated Pollutants <sup>-</sup>	Maximum Potential Uncontrolled Emissions <sup>2</sup>	al Uncontrolled ons <sup>2</sup>	Maximum Potential Controlled Emissions <sup>3</sup>	ntial Controlled ons <sup>3</sup>	Est. Method

## Attachment L EMISSIONS UNIT DATA SHEET CHEMICAL PROCESS

	r chemical processes please fill out t pplementary forms that have been o		(see below) that apply. Please check all
	Emergency Vent Summary Sheet Leak Sources Data Sheet Toxicology Data Sheet Reactor Data Sheet Distillation Column Data Sheet		
1.		l equipment ID number (as shown in <i>E</i> G AREA 3, FUG AREA 4, FUG AREA 5	
2.	Standard Industrial Classification	Codes (SICs) for process(es)	
3.	List raw materials and ☐ attach №	/ISDSs	
4.	List Products and Maximum Produ	uction and 🗌 attach MSDSs	
De	scription and CAS Number	Maximum Hourly (lb/hr)	Maximum Annual (ton/year)
5.	Complete the Emergency Vent Su	ummary Sheet for all emergency relief	devices.
6.	maintenance program to minimize planned inspection frequency, a requirement (e.g. 40CFR60, Subp Refer to Attachment N fugitive calcul Fugitive Area 1 is subject to NSPS KI	fugitive emissions. Include detection ins nd record-keeping, and similar pertir part VV), please list those here. lations for control efficiency claimed for Le KK, Area 2 is subject to NSPS OOOO, and omponents will comply with the applicabl	th to application the leak detection or struments, calibration gases or methods, nent information. If subject to a rule eak Detection and Repair (LDAR) program. d Area 3, Area 4, Area 5, Area 6 and Area 7 le requirements regarding monitoring, leak

7. Clearly describe below or attach to application Accident Procedures to be followed in the event of an accidental spill or release.

8A.	Complete the Toxicology Data Sheet or attach to application a toxicology report (an up-to-date material safety data
	sheets (MSDS) may be used) outlining the currently known acute and chronic health effects of each compound or
	chemical entity emitted to the air. If these compounds have already been listed in Item 3, then a duplicate MSDS
	sheet is not required. Include data such as the OSHA time weighted average (TWA) or mutagenicity,
	teratogenicity, irritation, and other known or suspected effects should be addressed. Indicate where these are
	unknown, and provide references.

- 8B. Describe any health effects testing or epidemiological studies on these compounds that are being or may be conducted by the company or required under TSCA, RCRA or other federal regulations. Discuss the persistence in the environment of any emission (e.g. pesticides, etc.).
- 9. Waste Products Waste products status: (If source is subject to RCRA or 45CSR25, please contact the Hazardous Waste Section of WVDEP, OAQ at (304) 926-3647.)

9A. Types and amounts of wastes to be disposed:

9B. Method of disposal and location of waste disposal facilities: Carrier: Phone:

9C. Check here if approved USEPA/State Hazardous Waste Landfill will be used

10. Maximum and Projected Typical Operating Schedule for process or project as a whole (circle appropriate units).

ciro	cle units:	(hrs/day) (hr/batch)	(days), (batches/day), (batches/week)	(days/yr), (weeks/year)
10A.	Maximum	24 hrs/day	7 days/week	365 days/year
10B.	Typical	24 hrs/day	7 days/week	365 days/year

11. Complete a *Reactor Data Sheet* for each reactor in this chemical process.

12. Complete a Distillation Column Data Sheet for each distillation column in this chemical process.

## 13. Proposed Monitoring, Recordkeeping, Reporting, and Testing

Please propose monitoring, recordkeeping, and reporting in order to demonstrate compliance with the proposed operating parameters. Please propose testing in order to demonstrate compliance with the proposed emissions limits.

MONITORING	
See Attachment O	

RECORDKEEPING See Attachment O

REPORTING See Attachment O TESTING See Attachment O

**MONITORING.** Please list and describe the process parameters and ranges that are proposed to be monitored in order to demonstrate compliance with the operation of this process equipment operation or air pollution control device. **RECORDKEEPING.** Please describe the proposed recordkeeping that will accompany the monitoring.

**REPORTING.** Please describe the proposed frequency of reporting of the recordkeeping.

TESTING. Please describe any proposed emissions testing for this process equipment or air pollution control device.

14. Describe all operating ranges and maintenance procedures required by Manufacturer to maintain warranty

## INFORMATION REQUIRED FOR CHEMICAL PROCESSES

The notes listed below for chemical processes are intended to help the applicant submit a complete application to the OAQ; these notes are not intended to be all inclusive. The requirements for a complete application for a permit issued under 45CSR13 are designed to provided enough information for a permit reviewer to begin a technical review. Additional information beyond that identified may be required to complete the technical review of any individual application.

### **Process Description**

Please keep these points in mind when completing your process description as part of this permit application.

- 1. Provide a general process overview. This brief, but complete, process description should include chemical or registered trademark names of chemical products, intermediates, and/or raw materials to be produced or consumed, and the ultimate use(s) of the product(s). A list of the various chemical compounds is helpful.
- 2. Describe <u>each process step</u>. Include the process chemistry and stoichiometrically balanced reaction equation or material mass balance on all components.
- 3. Describe the methods and equipment used to receive, store, handle, and charge raw materials.
- 4. Describe the methods and equipment used to handle, store, or package final products and intermediates.
- 5. Provide process flow diagrams or equipment layout drawings which clearly show the process flow relationships among all pieces of process and control equipment. Identify all air emission discharge points. Discuss instrumentation and controls for the process.
- 6. Discuss the possibilities of process upsets, the duration and frequency of upsets, and consequences (including air emissions) of these upsets. Include a description of rupture discs, pressure relief valves, and secondary containment systems.
- 7. Discuss any fugitive emissions and the methods used to minimize them.
- 8. Include the following plans for the process if available:
  - a. preventative maintenance and malfunction abatement plan (recommended for all control equipment).
  - b. continuous emissions (in-stack) monitoring plan
  - c. ambient monitoring plan
  - d. emergency response plan

### **Regulatory Discussion**

The following state and federal air pollution control regulations may be applicable to your chemical process. You should review these regulations carefully to determine if they apply to your process. Please summarize the results of your review in your permit application along with any other regulations you believe are applicable.

- Title 45 Legislative Rule Division of Environmental Protection, Office of Air Quality contains West Virginia's air pollution control regulations, including the following promulgated rules which may require emissions reductions or control technologies for your chemical process:
  - a. 45CSR27 Best Available Technology (BAT) for Toxic Air Pollutants (TAPs)
  - b. 45CSR21 VOC emissions controls for ozone maintenance in Kanawha, Cabell, Putnam, Wayne, and Wood counties.
  - c. 45CSR13 (Table 45-13A) plantwide emission thresholds for permitting for certain pollutants.
- Federal Guidelines for case-by-case MACT determinations under section 112(g) of the 1990 CAAA for individual and total HAPs greater than 10 and 25 tons per year, respectively.
- There are also subparts of the federal Standards of Performance for New Stationary Sources (NSPS), 40CFR60 60, and the National Emission Standards for Hazardous Air Pollutants (NESHAP) at 40CFR61 and 40CFR63, which apply to various chemical and nonchemical processes. These subparts are too numerous to list here, but these areas of the federal regulations should be consulted carefully to determine applicability to your process.

#### **Emissions Summary and Calculations**

Please keep these points in mind when submitting your emissions calculations as part of this permit application.

- 1. For each pollutant, provide the basis for the emissions estimate and for all emission reduction(s) or control efficiency(ies) claimed.
- 2. For all <u>batch</u> processes provide the following
  - a. Emissions of each pollutant in pound(s) per batch, from each process step
  - b. Annual emissions based on number of batches requested per year
  - c. The total time for each process step and the duration of the emissions during the process step
  - d. Total batch time, total emissions per batch (or per day), and annual emissions based on the number of batches requested per year.

## EMERGENCY VENT SUMMARY SHEET

List below all emergency relief devices, rupture disks, safety relief valves, and similar openings that will vent only under abnormal conditions.

Emission Point ID <sup>1</sup>	Equipment to Relief Vent (type, ID if available) <sup>2</sup>	Relief Vents (type) & Set Pressure (psig)	Name of Chemical(s) or Pollutants Controlled	Worst Case Emission per Release Event (lbs)
P004A	Closed Vent System	Varies	Natural Gas, Natural Gas Liquids	See Attachment N
FUG AREA 1	Pressure Vessels	Varies	Natural Gas, Natural Gas Liquids	See Attachment N
FUG AREA 2	Pressure Vessels	Varies	Natural Gas, Natural Gas Liquids	See Attachment N
FUG AREA 3	Pressure Vessels	Varies	Natural Gas, Natural Gas Liquids	See Attachment N
FUG AREA 4	Pressure Vessels	Varies	Natural Gas, Natural Gas Liquids	See Attachment N
FUG AREA 5	Pressure Vessels	Varies	Natural Gas, Natural Gas Liquids	See Attachment N
FUG AREA 6	Pressure Vessels	Varies	Natural Gas, Natural Gas Liquids	See Attachment N
FUG AREA 7	Pressure Vessels	Varies	Natural Gas, Natural Gas Liquids	See Attachment N

All routine vents (non-emergency) should be listed on the Emission Points Data Summary Sheet.

<sup>1</sup> Indicate the emission point, if any, to which source equipment normally vents. Do <u>not</u> assign emission point ID numbers to each emergency relief vent or device.

<sup>2</sup> List all emergency relief devices next to the piece of equipment from which they control releases.

Source Category	Pollutant	Number of Source Components <sup>1</sup>	Number of Components Monitored by Frequency <sup>2</sup>	Average Time to Repair (days) <sup>3</sup>	Estimated Annual Emission Rate (Ib/yr) <sup>4</sup>

LEAK SOURCE DATA SHEET

<sup>1-13</sup> See notes on the following page.

Page 5 of 13

## Notes for Leak Source Data Sheet

- 1. For VOC sources include components on streams and equipment that contain greater than 10% w/w VOC, including feed streams, reaction/separation facilities, and product/by-product delivery lines. Do not include certain leakless equipment as defined below by category.
- By monitoring frequency, give the number of sources routinely monitored for leaks, using a portable detection device that measures concentration in ppm. Do not include monitoring by visual or soap-bubble leak detection methods. "M/Q(M)/Q/SA/A/O" means the time period between inspections as follows:

Monthly/Quarterly, with Monthly follow-up of repaired leakers/Quarterly/Semi-annual/Annually/Other (specify time period)

If source category is not monitored, a single zero in the space will suffice. For example, if 50 gas-service valves are monitored quarterly, with monthly follow-up of those repaired, 75 are monitored semi-annually, and 50 are checked bimonthly (alternate months), with non checked at any other frequency, you would put in the category "valves, gas service:" 0/50/0/75/0/50 (bimonthly).

- 3. Give the average number of days, after a leak is discovered, that an attempt will be made to repair the leak.
- 4. Note the method used: MB material balance; EE engineering estimate; EPA emission factors established by EPA (cite document used); O other method, such as in-house emission factor (specify).
- 5. Do not include in the equipment count sealless pumps (canned motor or diaphragm) or those with enclosed venting to a control device. (Emissions from vented equipment should be included in the estimates given in the Emission Points Data Sheet.)
- 6. Volatile organic compounds (VOC) means the term as defined in 40 CFR Delta 51.100 (s).
- 7. A light liquid is defined as a fluid with vapor pressure equal to or greater than 0.04 psi (0.3 Kpa) at 20°C. For mixtures, if 20% w/w or more of the stream is composed of fluids with vapor pressures greater than 0.04 psi (0.3 Kpa) at 20 °C, then the fluid is defined as a light liquid.
- 8. A heavy liquid is defined as a fluid with a vapor pressure less than 0.04 psi (0.3 Kpa) at 20°C. For mixtures, if less than 20% w/w of the stream is composed of fluids with vapor pressures greater than 0.04 psi (0.3 Kpa) at 20 °C, then the fluid is defined as a heavy liquid.
- 9. LIST CO, H<sub>2</sub>S, mineral acids, NO, NO<sub>2</sub>, SO<sub>3</sub>, etc. DO NOT LIST CO<sub>2</sub>, H<sub>2</sub>, H<sub>2</sub>O, N<sub>2</sub>, O<sub>2</sub>, and Noble Gases.
- 10. Include all process valves whether in-line or on an open-ended line such as sample, drain and purge valves. Do not include safety-relief valves, or leakless valves such as check, diaphragm, and bellows seal valves.
- 11. Do not include a safety-relief valve if there is a rupture disk in place upstream of the valve, or if the valve vents to a control device.
- 12 Open-ended lines include purge, drain and vent lines. Do not include sampling connections, or lines sealed by plugs, caps, blinds or second valves.
- 13. Do not include closed-purge sampling connections.

## Attachment L EMISSIONS UNIT DATA SHEET STORAGE TANKS

See attached data following this EUDS for all information on the Natural Gas Liquids (NGL), propane, butane, and isobutane storage tanks.

Provide the following information for <u>each</u> new or modified bulk liquid storage tank as shown on the *Equipment List Form* and other parts of this application. A tank is considered modified if the material to be stored in the tank is different from the existing stored liquid.

IF USING US EPA'S TANKS EMISSION ESTIMATION PROGRAM (AVAILABLE AT <u>www.epa.gov/tnn/tanks.html</u>), APPLICANT MAY ATTACH THE SUMMARY SHEETS IN LIEU OF COMPLETING SECTIONS III, IV, & V OF THIS FORM. HOWEVER, SECTIONS I, II, AND VI OF THIS FORM MUST BE COMPLETED. US EPA'S AP-42, SECTION 7.1, "ORGANIC LIQUID STORAGE TANKS," MAY ALSO BE USED TO ESTIMATE VOC AND HAP EMISSIONS (<u>http://www.epa.gov/tnn/chief/</u>).

### I. GENERAL INFORMATION (required)

1.	Bulk Storage Area Name	2.	Tank Name			
3.	Tank Equipment Identification No. (as assigned on <i>Equipment List Form</i> )	4.	Emission Point Identification No. (as assigned on <i>Equipment List Form</i> )			
5.	Date of Commencement of Construction (for existing	tan	ks)			
6.	Type of change 🗌 New Construction 🗌 N	lew	Stored Material Other Tank Modification			
7.	Description of Tank Modification (if applicable)					
7A.	Does the tank have more than one mode of operation (e.g. Is there more than one product stored in the tan		Yes No			
7B.	If YES, explain and identify which mode is covere completed for each mode).	ed b	y this application (Note: A separate form must be			
7C.	7C. Provide any limitations on source operation affecting emissions, any work practice standards (e.g. production variation, etc.):					
	II. TANK INFORM	ΑΤΙ	ON (required)			

8. Design Capacity (specify barrels or gallons). U height.	Jse the internal cross-sectional area multiplied by internal
9A. Tank Internal Diameter (ft)	9B. Tank Internal Height (or Length) (ft)
10A. Maximum Liquid Height (ft)	10B. Average Liquid Height (ft)

11A. Maximum Vapor Space Height (ft)	11B. Average Vapor Space Height (ft)
12. Nominal Capacity (specify barrels or gallons). liquid levels and overflow valve heights.	This is also known as "working volume" and considers design

13A. Maximum annual throughput (gal/yr)	13B. Maximum daily throughput (gal/day)				
14. Number of Turnovers per year (annual net throughput/maximum tank liquid volume)					
15. Maximum tank fill rate (gal/min)					
16. Tank fill method Submerged	Splash Bottom Loading				
17. Complete 17A and 17B for Variable Vapor Space Ta	ank Systems Does Not Apply				
17A. Volume Expansion Capacity of System (gal)	17B. Number of transfers into system per year

Tues. Note: Pres

To be used for affected sources other than asphalt plants, foundries, incinerators, indirect heat exchangers, and quarries.

Identification Number (as assigned on *Equipment List Form*): S011, S054

1. Name or type and model of proposed affected source:
Carbon dioxide will be removed from the ethane product in an amine unit contacting system. Each amine treater unit consists of contactors and regenerators. The total ethane product is contacted with a diglycolamine (DGA) solution in one of the two amine contactors, where the CO2 in the ethane product is removed to less than 500 ppmw. The rich amine from the contactors is regenerated in the Amine Regenerator where heat input is used to drive the CO2 and water overhead and vented to atmosphere. The lean amine from the bottom of the regenerator is then recycled back to the amine contactors. The main emissions from the amine system are CO2 and water.
<ol> <li>On a separate sheet(s), furnish a sketch(es) of this affected source. If a modification is to be made to this source, clearly indicated the change(s). Provide a narrative description of all features of the affected source which may affect the production of air pollutants.</li> </ol>
3. Name(s) and maximum amount of proposed process material(s) charged per hour:
5.40 MMscf/hr ethane product (~81,523 bbl/day) per treater unit
4. Name(s) and maximum amount of proposed material(s) produced per hour:
5.40 MMscf/hr ethane product (~81,523 bbl/day) per treater unit
5. Give chemical reactions, if applicable, that will be involved in the generation of air pollutants:

10. Describe all operating ranges and mainter maintain warranty N/A	nance procedures required by Manufacturer to

To be used for affected sources other than asphalt plants, foundries, incinerators, indirect heat exchangers, and quarries.

Identification Number (as assigned on Equipment List Form): \$006, \$032

1. Name or type and model of proposed affected source:

A glycol dehydration system is used to dry the incoming gas. EU# S006 consists of two glycol contactors with a single regeneration system, where emissions from the flash tank and still vent are routed to the plant hot oil heater (EU# S001) as fuel. EU# S032 consists of a single contactor and associated regeneration system, where emissions from the BTEX condenser and flash tank can be routed to the plant hot oil heater (EU#: S001) for combustion as fuel or to a dedicated vapor combustor (EU#s V003). BRM is permitting the S032 dehydration unit emissions assuming that all waste gas is routed to the vapor combustor, but would like to keep the flexibility to route the waste gas to the hot oil heater as well.

- On a separate sheet(s), furnish a sketch(es) of this affected source. If a modification is to be made to this source, clearly indicated the change(s). Provide a narrative description of all features of the affected source which may affect the production of air pollutants.
- 3. Name(s) and maximum amount of proposed process material(s) charged per hour:

Natural Gas S006: 19.17 MMscf/hr (460 MMscf/day) S032: 9.58 MMscf/hr (230 MMscf/day)

4. Name(s) and maximum amount of proposed material(s) produced per hour:

Natural Gas S006: 19.17 MMscf/hr (460 MMscf/day) S032: 9.58 MMscf/hr (230 MMscf/day)

5. Give chemical reactions, if applicable, that will be involved in the generation of air pollutants:

# Attachment L EMISSIONS UNIT DATA SHEET BULK LIQUID TRANSFER OPERATIONS

Furnish the following information for each new or modified bulk liquid transfer area or loading rack, as shown on the *Equipment List Form* and other parts of this application. This form is to be used for bulk liquid transfer operations such as to and from drums, marine vessels, rail tank cars, and tank trucks.

Identification Number (as assigned on *Equipment List Form*): S008, S015, S033, S055, L-1

1. Loading Area Name: Product Loading

2. Type of cargo vessels accommodated at this rack or transfer point (check as many as apply):

G Drums	★Marine Vessels	🗙 Rail Tank Cars	🗙 Tank Trucks
---------	-----------------	------------------	---------------

3. Loading Rack or Transfer Point Data:

Number of pumps	TBD
Number of liquids loaded	5 – Propane, Isobutane, Butane & Natural Gas Liquids (NGL), Natural Gasoline, Produced Water/Slop
Maximum number of marine vessels, tank trucks, tank cars, and/or drums loading at one time	TBD

4. Does	ballasting of marine	vessels occur at this loading area?
G Yes	G No	×Does not apply

5. Describe cleaning location, compounds and procedure for cargo vessels using this transfer point:

6. Are cargo vessels pressure tested for leaks at this or any other location? G Yes G No

If YES, describe:

7. Projected Maximum Operating Schedule (for rack or transfer point as a whole):

Maximum	Jan Mar.	Apr June	July - Sept.	Oct Dec.

28. How will steam flow be controlled if	steam injection is	sused?	

#### Characteristics of the Waste Gas Stream to be Burned 29. Quantity Quantity Name Source of Material Grains of H<sub>2</sub>S/100 ft<sup>3</sup> (LB/hr, ft<sup>3</sup>/hr, etc) See Attachment N 30. Estimate total combustible to flare: see Attachment N LB/hr or ACF/hr (Maximum mass flow rate of waste gas) scfm 31. Estimated total flow rate to flare including materials to be burned, carrier gases, auxiliary fuel, etc.: See Attachment N LB/hr or ACF/hr 32. Give composition of carrier gases: See Attachment N 33. Temperature of emission stream: 34. Identify and describe all auxiliary fuels to be burned. °F See attachment N None BTU/scf Heating value of emission stream: BTU/scf BTU/ft<sup>3</sup> BTU/scf Mean molecular weight of emission stream: BTU/scf MW = lb/lb-mole 35. Temperature of flare gas: see attached °F 36. Flare gas flow rate: scf/min 37. Flare gas heat content: see attached BTU/ft<sup>3</sup> 38. Flare gas exit velocity: see attached scf/min 39. Maximum rate during emergency for one major piece of equipment or process unit: see attached scf/min 40. Maximum rate during emergency for one major piece of equipment or process unit: see attached BTU/min 41. Describe any air pollution control device inlet and outlet gas conditioning processes (e.g., gas cooling, gas reheating, gas humidification):

42. Describe the collection material disposal system:

43. Have you included Flare Control Device in the Emissions Points Data Summary Sheet? Yes

Please propose m proposed operatin proposed emission MONITORING: Refer to Attachmen	g parameters. Please propose s limits. t O for a description of all	and Testing eporting in order to demonstrate compliance with the testing in order to demonstrate compliance with the RECORDKEEPING: Refer to Attachment O for a description of all monitoring, testing, recordkeeping, and reporting requirements.

Notes:

1. CO and NO<sub>x</sub> are based upon TNRCC Guidance Document for Flares (dated 10/00) for non-assisted high-BTU flares.

0.001

0.005

2.  $SO_2$  is estimated using a mass balance approach and the actual sulfur content of the gas.

7446-09-5

7. During normal operations, purge gas is recovered by VRU and routed back to inlet. Purge gas combustion only occurs when waste gas is being combusted at the flare (purge gas is not continuous). Hourly rate is based on average use through the year. Purge gas volume is determined by the amount of waste gas routed to flare.

 Hourly emission rates based on flare flows due to quantifiable events. Hourly emissions may be exceeded due to unpredictable events requiring an emergency shutdown (ESD).

Waste gas GHG combustion emissions calculated in accordance with 40 CFR 98 Subpart W.

(28.96 lbmolc) (379 schnole) \* (0.5970) = 0.046 lb/scf <sup>b</sup> Hourby VOC emission rates are calculated as follows: (1 eventhr)\* (18.000 scfevent) \* (0.046 lb/scf) \* (1.00% VOC) = 8.21 lb/hr

° Annual VOC emission rates are calculated as follows:

 $(12 \; events/yr) * (18,000 \; sc//event) * (0.046 \; lb/scf) * (1.00\% \; VOC) / (2,000 \; lb/T) = 0.05 \; T/yr$ 

<sup>d</sup> Pig launcher in propute service has its own auto-ignition flate to control emissions during pigging operations. Emission calculations from this flate follow.

<b>PIGGING FLARE POTENTIAL TO EMIT</b>	AIR PERMIT APPLICATION	NATRIUM EXTRACTION AND FRACTIONATION PROCESSING PLANT	<b>BLUE RACER MIDSTREAM, LLC</b>

		Unit ID Point ID Description	Flare (Pigging) <sup>e</sup>			
	Emission Emission	Point ID	P034 Flare (Pig.			
	Emission	Unit ID	S034			

<sup>a</sup> The WG flow rate, heating value, and feed rates taken from calculation of pigging operations potential to emit worksheet.

<sup>b</sup> Emission fractors are from AP-42 Table 1.5-1 (dated 7/08) for propane combustion. Emission fractors were normalized based on liquid propane leating value of 91,500,000 Btu/10<sup>3</sup> gallons. An example calculation for houtly CO emissions for Emission Unit ID S034 follows:
 CO (bhn) = (Flaze Feed Rate, MMBtu/h) \* (Emission Factor, Ib/MMBtu)
 CO (bhn) = ((70.11 MMBtu/h) \* (Emission Factor, Ib/MMBtu)
 CO (bhn) = ((70.11 MMBtu/h) \* (0.0820 Ib/MMBtu)

1.37

227.77

Material Balance

VOC

° An example calculation for annual CO emissions for Emission Unit ID S034 follows:

 $\begin{array}{l} {\sf CO} (Tyy) = \ (Flare Feed Rate, MMBtu/yr) * (Emission Factor, Ib/MMBu) / (2,000 \ Ib/T) \\ {\sf CO} (T/yr) = \ (2.048.54 \ MMBtu/yr) * (0.0820 \ Ib/MMBu) / (2,000 \ Ib/T) \\ \end{array}$ 

T/yr CO 0.08 <sup>4</sup> The flare is smokeless per 40 CFR §60.18 requirements; therefore, PM emissions are negligible. However, PM emissions have been included to be conservative.

° The flare has an auto-ignition system. Therefore, the flare does not require a continuous pilot to operate.

	<sup>b</sup> An hourly VOC emission calculation example for Unit ID S001 follows:	n calculation examp	ple for Unit ID	S001 follows:																		
	VOC (lb/h	r) = (Maximum He	feat Input, MMI	VOC (lb/hr) = (Maximum Heat Input, MMBtu/hr)*(Emission Factor, lb/MMBtu)	Factor, Ib/MMBt	tu)																
	VOC (lb/h	VOC (lb/hr) = $(216.70 \text{ MMBtu/hr})*(0.0017 \text{ lb/MMBtu})$	Btu/hr)*(0.0017	7 lb/MMBtu)																		
	VOC (lb/hr) =	r) = 0.37	lb/hr VOC																			
	° An annual VOC emission calculation example for Unit ID S001 follows:	n calculation examp	ple for Unit ID	S001 follows:																		
	VOC (T/y	r) = (Hourly PTE,	, lb/hr)*(Annual	VOC (T/yr) = (Hourly PTE, lb/hr)*(Annual Operating Hours, hr/yr)/(2,000 lb/T)	hr/yr)/(2,000 lb/	(T)																
	VOC (T/y	VOC (T/yr) = (0.37 lb/hr)*(8,760 hr/yr)/(2,000 lb/T)	(8,760 hr/yr)/(2,	,000 lb/T)																		
	VOC (T/y	VOC(T/yr) =  1.61 T/yr VOC	T/yr VOC	[																		
				1																		

 $SO_{2}\left(lb/lr\right)=(Maximum Heat Input, MMBtu/lr)(Fuel Heating Value, Btu/scf)*(Sulfur Content, ppm)*(1 Ib-mol/379 scf)*(64.06 Ib SO_{2}/lb-mol S)$ 

<sup>e</sup> A material balance approach was used to estimate the SO<sub>2</sub> emission rates using the maximum sulfur concentration in the natural gas.

An example calculation for hourly PTE  $\mathrm{SO}_2$  from Unit ID S001 follows:

 $^{\rm d}$  All PM is assumed to be less than 2.5 microns in diameter per footnote "c" of AP-42 Table 1.4-2.

 $SO_{2}\left(lb/ltr\right)=(216.70\ MMBtu/ltr)(961\ Btu/sct)^{*}(4.0\ lb-mol\ S/MMlb-mol\ gas)^{*}(1\ lb-mol/379\ scf)^{*}(64.06\ lb\ SO2/lb-mol\ S/MMlb-mol\ gas)^{*}(1\ lb-mol/379\ scf)^{*}(64.06\ lb\ SO2/lb-mol\ S/MMlb-mol\ S/MMlb-mol\ gas)^{*}(1\ lb-mol/379\ scf)^{*}(64.06\ lb\ SO2/lb-mol\ S/MMlb-mol\ S/Mmlb-m$ 

 $= 0.15 \quad lb/hr SO_2$

<sup>a</sup> Fugitive Einsison Factors are per EPA document EPA-453/R-95-017; dated November 1995; pp.2-15. The emission factors are for total hydrocarbon. Reduction Credits are per EPA Leak Detection and Repair - A Best Practices Guide, Table 4.1 for refineries with a leak definition of 10,000 ppm, quarterly monitoring.

1174.88

46.97

0.67

70.21

16.03

TOTAL:

<sup>5</sup> Hourly VOC emissions are calculated as follows:

 $(3,000\ components)\ *\ (0.0045\ kg/hr-component)\ *\ (1\ lb/0.454\ kg)\ *\ (100\%\ VOC)\ *\ (100\%\ -\ 70\%\ reduction\ credit)\ =\ 1.7857\ lb/hr$ 

Annual VOC emission rates are calculated as follows:

 $(1.7857 \ lb/hr) * (8,760 \ hr/yr) / (2,000 \ lb/T) = 7.8215 \ T/yr$ 

d Leakless pumps are not included in the pump count.

Sampling connections are included in this category, because all sampling utilizes inline analyzers (i.e., closed loop sampling), such that additional emissions per sample do not occur.

<sup>c</sup> Closed vert system gas and light liquid components are vented to the Flare S004A. Therefore, any leaks are routed to flare, and not to atmosphere as fugitive emissions (i.e., 100% control is taken). The Flare PTE calculation includes these potential leaks.

<sup>a</sup> An example calculation for propane follows:

Propane (lb/hr) = (PTE Total VOC, lb/hr) \* (% Propane in VOC)

Propane (lb/hr) = (3.0638 lb/hr Total VOC) \* (52.34% Propane in VOC)

Propane (lb/hr) = 1.6035 lb/hr Propane

                  <sup>a</sup> An example calculation of the emission rate to flare for methane follows:

Methane (lb/hr) = (Uncontrolled VOC to Flare, lb/hr) / (% VOC in Stream) \* (% Methane in Stream)

Methane (lb/hr) = (0.8844 lb/hr VOC) / (20% VOC) \* (65.91% Methane)

Methane (lb/hr) = 2.9148 lb/hr Methane

<sup>b</sup> An example calculation of the emission rate to flare for VOC constituents follows:

Propane (lb/hr) = (Uncontrolled VOC to Flare, lb/hr) \* (% Propane in VOC)

Propane (lb/hr) = (0.8844 lb/hr VOC) \* (52.34% Propane)

Propane (lb/hr) = 0.4629 lb/hr Propane

									TOTAL:	7.92	34.70	0.34	23.17	579.60

<sup>b</sup> Hourly VOC emissions are calculated as follows:

(2,546 components) \* (0.0045 kg/hr-component) \* (1 lb/0.454 kg) \* (100% VOC) \* (100% - 96% reduction credit) = 0.2021 lb/hr

<sup>c</sup> Annual VOC emission rates are calculated as follows:

 $(0.2021 \ lb/hr) * (8,760 \ hr/yr) / (2,000 \ lb/T) = 0.8851 \ T/yr$ 

<sup>d</sup> Leakless pumps are not included in the pump count.

<sup>c</sup> Sampling connections are included in this category, because all sampling utilizes inline analyzers (i.e., closed loop sampling), such that additional emissions per sample do not occur.

f Closed vent system gas and light liquid components are vented to the Flare S004A. Therefore, any leaks are routed to flare, and not to atmosphere as fugitive emissions (i.e., 100% control is taken). The Flare PTE calculation includes these potential leaks.

<sup>a</sup> Please refer to the calculation sheet "Fug Area 2 Closed Vent System Equipment Leaks to Flare."

<sup>b</sup> Please refer to the calculation sheet "Fug Area 1 Closed Vent System Equipment Leaks to Flare."

<sup>c</sup> To account for the Closed Vent System on fugitive area 3, and proposed fugitive areas 4, 5, 6, and 7, the uncontrolled emissions from Area 1 have been multiplied by 5 to account for the additional cryo plants.

<sup>d</sup> An example calculation for Potential to Emit Ethane follows:

Ethane PTE (lb/hr) = (Uncontrolled PRV Equipment Leaks, lb/hr) \* (1 - Flare DRE, wt%)

Ethane PTE (lb/hr) = (0.1728 lb/hr) \* (1 - 99%)

Ethane PTE (lb/hr) = 0.0017

<sup>a</sup> Fugitive Emission Factors are per EPA document EPA-453/R-95-017; dated November 1995; pp.2-15. The emission factors are for total hydrocarbon. Reduction Credits are per EPA Leak Detection and Repair - A Best Practices Guide, Table 4.1 for refineries with a leak definition of 500 ppm.

<sup>b</sup> Hourly VOC emission rates are calculated as follows:

(1,605 components) \* (0.0045 kg/hr-component) \* (1 lb/0.454 kg) \* (20% VOC) \* (100% - 96% reduction credit) = 0.1274 lb/hr

° Annual VOC emission rates are calculated as follows:

(1,605 components) \* (0.0045 kg/hr-component) \* (1 lb/0.454 kg) \* (8,760 hr/yr) \* (20% VOC) \* (100% - 96% reduction credit) / (2,000 lb/T) = 0.5579 T/yr

<sup>a</sup> Fugivire Emission Factors are per EPA document EPA-453/R-95-017; dated November 1995; pp.2-15. The emission factors are for total hydrocarbon. Reduction Credits are per EPA Leak Detection and Repair - A Best Practices Guide, Table 4.1 for refineries with a leak definition of 500 ppm.

<sup>b</sup> Hourly VOC emission rates are calculated as follows:

(1,605 components) \* (0.0045 kg/hr-component) \* (1 lb 0.454 kg) \* (20% VOC) \* (100% - 96% reduction credit) = 0.1274 lb/hr

° Annual VOC emission rates are calculated as follows:

(1,605 components) \* (0.0045 kg/hr-component) \* (1 lb/0.454 kg) \* (8,760 hr/yr) \* (20% VOC) \* (100% - 96% reduction credit) / (2,000 lb/T) = 0.5579 T/yr

Notes:

1. A 10% safety factor has been added to all emissions to account for variability in gas composition. Although the still vent will employ a BTEX condenser, no control from the condenser has been taken into account for this PTE.

2. Dehydration unit S006 emissions from the BTEX condenser and flash tank are routed to the hot oil heater (unit ID S001) for combustion as fuel.
3. Dehydration unit S032 emissions from the BTEX condenser and flash tank can be routed to the plant hot oil heater (Unit ID S001) for combustion as fuel. Given the size of the heater, the waste gas contribution to the total fuel gas consumed by the heater is minimal. As a result, when waste gas is routed to the hot oil heater as fuel, emissions from the dehydration unit are considered negligible.

4. Alternatively, the dehydration unit S032 emissions can be routed to a vapor combustor with a destruction efficiency of 98%. Blue Racer Midstream is permitting the dehydration unit emissions assuming that all waste gas is routed to a vapor combustor, but would like to keep the flexibility to route the waste gas to the hot oil heater as well.

5. Emission rates from dehydration unit S032 are based on the most conservative emission rates among the GlyCalc results using gas analyses from 2014 and 2017.

calculation for hourly CO emissions for Unit ID V003 follows:

CO (lb/hr) = (Fuel Flow Rate, sof)tn) \* (Fuel Heating Value, Buv/scf) \* (MM/10<sup>6</sup>) \* (Emission Factor, lb/MMBtu) CO (lb/hr) = (30.00 sof/hr) \* (1,065 Buv/scf) \* (MM/10<sup>6</sup>) \* (0.2755 lb/MMBtu)

lb/hr CO 0.01 SO<sub>2</sub> emission rates are estimated using a mass balance approach and the maximum sulfur content of the gas. An example calculation for hourly SO<sub>2</sub> emissions for Unit ID V003 follows: SO<sub>2</sub> (lb/ltr) = (Fuel Flow Rate, set/ltn) \* (MM/10<sup>6</sup>) \* (Sulfur Content, sef SMMset/gas) \* (1 lb-mol/379 sef) \* (32.06 lb S/lb-mol) \* (64.06 lb SO2/32.06 lb S) SO<sub>2</sub> (lb/ltr) = (30.00 set/ltn) \* (MM/10<sup>6</sup>6) \* (4.0 sefSMMset/gas) \* (1 lb-mol/379 sef) \* (32.06 lb S/lb-mol) \* (64.06 lb SO2/32.06 lb S)

0.00002 lb/hr SO<sub>2</sub>

Emission Factors for PM, VOC, and HAPs based upon AP-42 Table 1.4-2 and Table 1.4-3 (dated 7/98). An example calculation for hourly VOC emissions for Unit ID V003 follows: VOC (lb/hr) = (Fuel Flow Rate, scf/hr) \* (MM/10<sup>6</sup>) \* (Emission Factor, lb/MMscf)

VOC (lb/hr) =  $(30.00 \text{ scf/hr}) * (MM/10^{6}) * (5.5 \text{ lb/MMscf})$ 

lb/hr VOC 0.0002 Ш

CO (T/yr) = (Hourly Emissions, lb/hr) \* (Annual Operating Hours, hr/yr) \* (1 T/2,000 lb) <sup>b</sup> An example calculation for annual CO emissions for Unit ID V003 follows:

 $CO (T/yr) = \begin{array}{c} (0.01 \text{ lb/hr}) * (8,760 \text{ hr/yr}) * (1 T/2,000 \text{ lb}) \\ = 0.04 T/yr CO \end{array}$

VAPOR COMBUSTOR WASTE GAS COMBUSTION POTENTIAL TO EMIT

AIR PERMIT APPLICATION

The waste gas flow rate and feed rates for the vapor combustor were taken from the Vapor Combustor Feed Rate from Dehydration Unit Emissions worksheet.

<sup>b</sup> Emission Factors for CO and NO<sub>X</sub> are based upon the Draft TNRCC Guidance Document for Flares and Vapor Oxidizers (dated 10/00) for non-assisted high-Btu flares. An example calculation for hourly CO emissions for Unit ID V003 follows:

CO (lb/hr) = (WG Feed Rate, MMBtu/hr) \* (Emission Factor, lb/MMBtu)

CO (lb/hr) = (5.56 MMBtu/hr) \* (0.2755 lb/MMBtu)

 $= \boxed{1.53 \quad \text{lb/hr CO}}$ 

SO<sub>2</sub> emission rates are estimated using a mass balance approach and the maximum sulfur content of the gas. An example calculation for hourly SO<sub>2</sub> emissions for Unit ID V003 follows:  $SO_{2}(lb/lr) = (Fuel Flow Rate, scf/lr) * (MM/10^{6}) * (Sulfur Content, scf S/MMscf gas) * (11b-mol/379 scf) * (32.06 lb S/lb-mol) * (64.06 lb S/S02/32.06 lb S/lb-mol/379 scf) * (32.06 lb S/lb-mol) * (64.06 lb S/lb-mol) * (64.06 lb S/lb-mol/379 scf) * (32.06 lb S/lb-mol) * (64.06 lb S/lb-mol/379 scf) * (32.06 lb S/lb-mol/379 scf)$ 

= 0.002 lb/hr SO<sub>2</sub>

Emission Factors for PM and HAPs based upon AP-42 Table 1.4-2 and Table 1.4-3 (dated 7/98). An example calculation for hourly PM emissions for Unit ID V003 follows:

PM (lb/hr) = (Fuel Flow Rate, scf/hr) \* (MM/10<sup>6</sup>) \* (Emission Factor, lb/MMscf)

 $PM (lb/hr) = (3,416.91 \text{ scf/hr}) * (MM/10^{\circ}6) * (7.6 lb/MMscf)$ 

= 0.03 lb/hr VOC

° An example calculation for annual CO emissions for Unit ID V003 follows:

CO (T/yr) = (WG Feed Rate, MMBtu/yr) \* (Emission Factor, lb/MMBtu) \* (1 T/2,000 lb)

 $CO (Tyr) = \frac{(48,671.82 \text{ MMBtu/yr}) * (0.2755 \text{ lb/MMBtu}) * (1 \text{ T/2},000 \text{ lb})}{= \frac{6.70 \text{ T/w.CO}}{7.000 \text{ tb}}}$ 

6.70 T/yr CO

<sup>1</sup> Hearing values taken from Perry's Chemical Engineers' Handbook, Table 3-207 (pg. 3-155).
<sup>2</sup> Emissions from dehydration unit still vent and flash tank taken from GlyCale simulation report.
<sup>3</sup> Taimissions from dehydration unit still vent and flash tank taken from GlyCale simulation report.
<sup>4</sup> Vlana incomprise include a 10% increase to account for potential fluctuations in gas composition.
<sup>4</sup> Anametrize fact area calculation for Methane follows:
A nametrize fact area calculation for Methane follows:
(79-4631 lbhr) / (16.043 lb/lbmod) \* (10.73 psia-dS10-mol-deg R) \* (520 deg R) / (14.65 psia) = 1,886.4507 sefthr

### GRI-GLYCalc VERSION 4.0 - AGGREGATE CALCULATIONS REPORT

Case Name: Natrium Plant Dehydration Unit File Name: Y:\Projects\Blue Racer\_646\Natrium\646-35 Permit Revision 2017\Calculations\Natrium Dehy S032 Ca Date: December 11, 2017

\_\_\_\_\_

DESCRIPTION:

Description: 230 MMscf/day glycol dehydration. Emissions are 98% controlled.

Annual Hours of Operation: 8760.0 hours/yr

EMISSIONS REPORTS:

## Flash Tank (to Flare):

Gas Flow:	525.7792	scf/hr		525.7792	scf/hr
Heating Value:	1,761.18	Btu/scf		1,761.18	Btu/scf
Feed Rate:	0.9260	MMBtu/hr		0.9260	MMBtu/hr
Operating Hours:	8,760	hr/yr		8,760	hr/yr
VOC emissions:	0.4815	lb/hr		0.4815	lb/hr
HAP emissions:	0.0019	lb/hr	Γ	0.0019	lb/hr

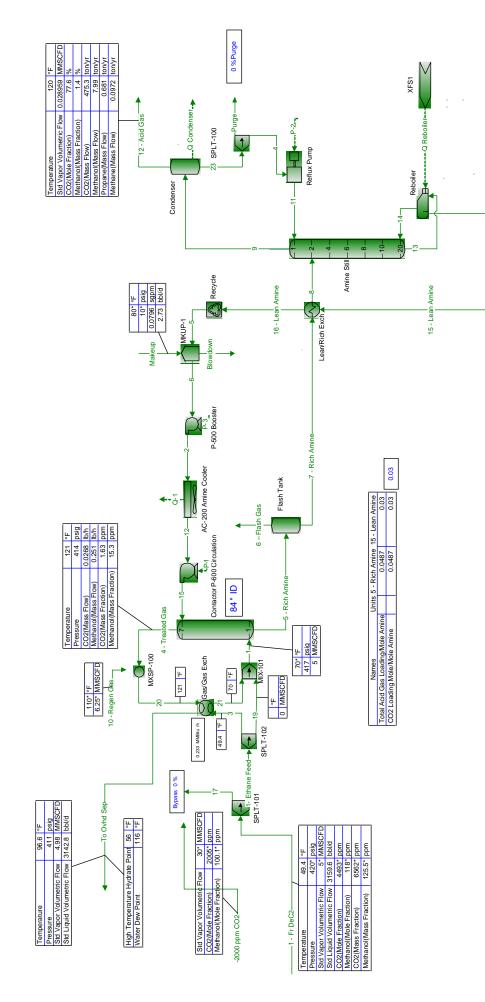

Amine unit vent emissions taken from Promax simulation reports.

Values are full plant operation, with an inlet treating capacity of 81,523 bbl/day (equivalent to 129 MMscfd) per unit.

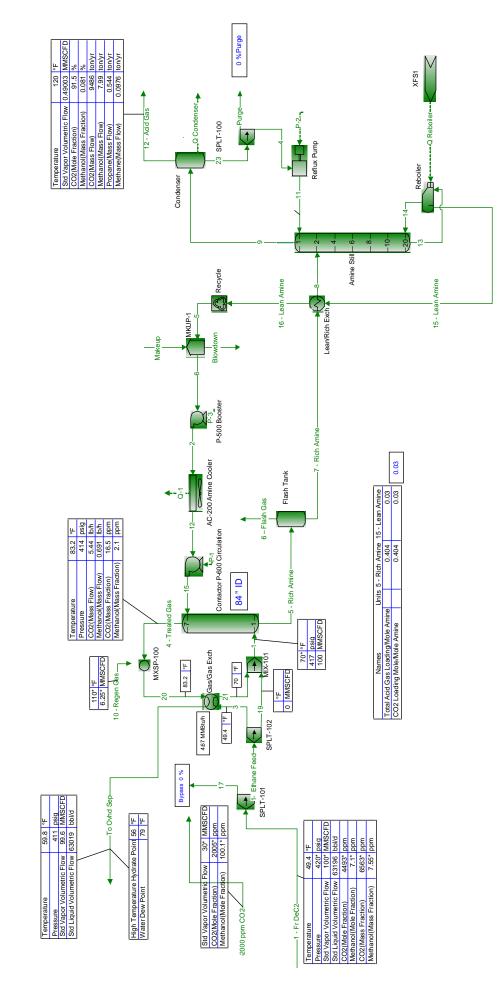

The amine unit at the Plant consists of two contactors with a single amine regenerator. The rich amine from both contactors is routed to the amine regenerator to remove  $CO_2$  from the amine solution prior to being reused in the process.

Still vent emissions from unit S011 are vented to atmosphere. Still vent emissions from unit ID S054 are captured by a vapor recovery unit (VRU) and routed to the residue gas discharge line. During VRU downtime, emissions from the amine unit will vent to atmosphere. VRU downtime is not expected to exceed 5% of the total annual runtime.

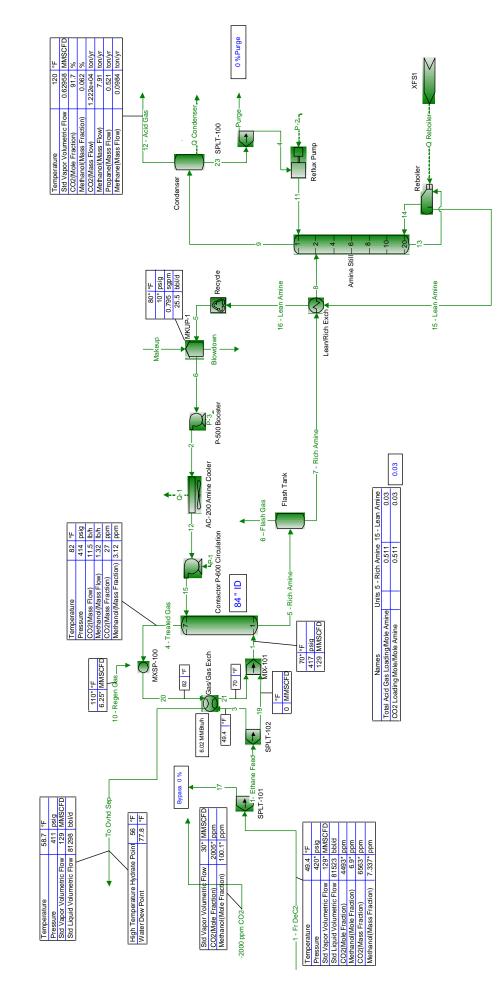

Flash tank emissions are routed to the ground flare for combustion.

<sup>a</sup> This emission unit consists of one or more reciprocating engines with a total horsepower not to exceed 16,000 hp. The Emission Factors for CO, NO<sub>X</sub>, and VOC are based on NSPS JJJJ emission limitations for new emergency engines. An example calculation for hourly CO emissions for Emission Unit ID S057 follows:

CO (lb/hr) = (Rated Horsepower, hp)\*(Emission Factor, g/hp-hr)\*(1 lb/453.59 g)

 $CO (lb/hr) = (16,000 hp)^{*}(4.00 g/hp-hr)^{*}(1 lb/453.59 g)$ 

= 141.10 1b/hr CO

The PM/PM<sub>10</sub>/PM<sub>13</sub>, and HAP Emission Factors are from AP-42 Table 3.2-2 for Four-Stroke Lean Burn Engines (dated 7/00). An example calculation for hourly PM/PM<sub>125</sub> emissions for Emission Unit ID S057 follows:

 $PM/PM_{10}PM_{12}, (lb/hr) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(Rated Horsepower, hp)*(1 MMBu/l0^{\circ}6 Btu)*(Emission Factor, lb/MMBu) = (Fuel Consumption, Btu/hp-hr)*(1 Horsepower, hp)*(1 Horse$ 

 $PM/PM_{10}/PM_{2.5}\,(lb/hr)=\,(8,000\,\,Bu/hp-hr)*(16,000\,\,hp)*(1\,\,MMBtu/10^{+}6\,\,Btu)*(0.0099871\,\,lb/MMBtu)$ 

= 1.28 lb/hr PM

A material balance approach was used to estimate the SO<sub>2</sub> emission rates using the maximum sulfur concentration in the natural gas. An example calculation for hourly SO<sub>2</sub> emissions for Emission Unit ID S057 follows:

SO<sub>2</sub> (lb/hr) = (Fuel Consumption, Btu/hp-ln/\*(Rated Horsepower, hp)\*(Fuel Heating Value, scf gas/fuel Btu)\*(Sulfur Content, scf Sr10'6 scf gas/f(11b-mol/379 scf)\*(32.06 lb S/lb-mol)\*(64.06 lb SO<sub>2</sub>/32.06 lb S)

 $SO_2(lb/hr) = (8,000 Bu/hp-hr)^*(16,000 hp)^*(1 scf gas/l065 Bu)^*(4 scf S/10^{-6} scf gas)^*(1 lb-mol/379 scf)^*(32.06 lb S/lb-mol)^*(64.06 lb SO232.06 lb S)^{-6}(1 b)^{-6}(1 b)^{-6}($ 

 $= 0.08 \qquad \text{lb/hr SO}_2$ 

 $^b$  An example calculation for annual CO emissions for Emission Unit ID S057 follows: CO (T/yr) = (Hourly PTE, lb/hr)\*(Annual Operating Hours, hr/yr)\*(1 T/2,000 lb)

 $CO (T/yr) = (141.10 \ 1b/hr)*(0,100 \ hr/yr)*(1 \ T/2,000 \ 1b)$ 

= 7.05 T/yr CO

## COMBUSTION SOURCES POTENTIAL TO EMIT GREENHOUSE GASES

## NATRIUM EXTRACTION AND FRACTIONATION PROCESSING PLANT BLUE RACER MIDSTREAM, LLC AIR PERMIT APPLICATION

 $CO_2$ ,  $CH_4$ , or  $N_2O = Fuel * HHV * EF (Eq. C-1, \$98.33(a)(1)(i) and C-8, \$98.33(c)(1))$ 

Where:

CO<sub>2</sub>, CH<sub>4</sub>, or N<sub>2</sub>O = annual emissions from combustion, kg

$$\label{eq:relation} \begin{split} Fuel = volume of fuel combusted, scfyr\\ HHV = high heat value of fuel, MMBtu/scf\\ EF = emission factors from Tables C-1 and C-2 of 40 CFR 98, Subpart C are as follows: \end{split}$$

53.06 kg/MMBtu 0.001 kg/MMBtu 0.0001 kg/MMBtu Natural Gas  $CO_2 = CH_4 = N_2O =$ 

<u>Propane</u> 62.87 kg/MMBtu 0.001 kg/MMBtu 0.0001 kg/MMBtu

<sup>a</sup> The unit design rating in MMBu/hr was substituted for Fuel and HHV in Equation C-1 and a conversion from metric tons to short tons was applied, as shown in the following example calculation for Emissions Unit ID S012: CO<sub>2</sub>(short T/yr) = (0.001 metric T/kg) \* (Fuel Usage, MMBu/yr) \* (CO<sub>2</sub> EF, kg/MMBu) \* (2,204.6 lb/metric T) / (2,000 lb/short T) =

<sup>b</sup> An example calculation for CO<sub>2</sub>e using Eq. A-1 and global warming potential factors found in Table A-1 follows:  $CO_2e$  (short T/yr) = (CO<sub>2</sub> Emissions, short T/yr) + 25 \* (CH<sub>4</sub> Emissions, short T/yr) + 298 \* (N<sub>2</sub>O Emissions, short T/yr) = (CO<sub>2</sub>e (short T/yr) = (CO<sub>2</sub> Emissions, short T/yr) = (CO<sub>2</sub>e (short T/yr) = (CO<sub>2</sub> Emissions, short T/yr) = (CO<sub>2</sub>e (short T/yr) = (CO<sub>2</sub>e (short T/yr)) = (CO<sub>2</sub>e (short T/yr) = (CO<sub>2</sub>e (short T/yr)) = (CO<sub>2</sub>e (short T/yr) = (CO<sub>2</sub>e (short T/yr)) = (CO<sub>2</sub>e (s

<sup>e</sup> An example calculation for GHG Mass in short T/yr for Emission Unit ID S012 follows: GHG Mass (short T/yr) = (CO<sub>2</sub> Emissions, short T/yr) + (CH<sub>4</sub> Emissions, short T/yr) = = = 4,969.95 short T/yr

short T/yr

## **ATTACHMENT P: PUBLIC NOTICE**

## **RULE 13 AIR PERMIT APPLICATION**

## NATRIUM EXTRACTION AND FRACTIONATION PROCESSING PLANT

## **Notice of Application**

Notice is given that Blue Racer Midstream, LLC has applied to the West Virginia Department of Environmental Protection, Division of Air Quality, for a Rule 13 Air Permit for a Modification to the Natrium Natural Gas Extraction and Processing Plant located on 14786 Energy Road, near Proctor, in Marshall County, West Virginia. The latitude and longitude coordinates are: 39° 45' 34.9" N; 80° 51' 42.2" W.

Blue Racer Midstream, LLC estimates the modification will result in the following increases of potential emissions of Regulated Air Pollutant discharges to the atmosphere:

Regulated Air Pollutant	Emissions (T/yr)
Oxides of Nitrogen (NO <sub>X</sub> ):	109.71
Carbon Monoxide (CO):	101.40
Volatile Organic Compounds (VOC):	313.64
Particulate Matter (PM):	38.47
PM with an aerodynamic diameter of less than or equal to 10 microns (PM <sub>10</sub> )	17.45
PM with an aerodynamic diameter of less than or equal to 2.5 microns (PM <sub>2.5</sub> )	10.58
Sulfur Dioxide (SO <sub>2</sub> ):	0.86
Greenhouse Gases (CO <sub>2</sub> e):	147,338

The addition of emission sources and operations are planned to begin on or about the 1st day of November, 2018. Written comments will be received by the West Virginia Department of Environmental Protection, Division of Air Quality, 601 57th Street, SE, Charleston, WV 25304, for at least 30 calendar days from the date of publication of this notice.

Any questions regarding this permit application should be directed to the DAQ at (304) 926-0499, extension 1250, during normal business hours.

Dated this the (Day) day of (Month), (Year).

Richard Moncrief President and COO 5949 Sherry Lane, Suite 1300 Dallas, Texas 75225
