**RE: Class I Administrative Update
Heizer Compressor Station
Cranberry Pipeline Corporation**

Dear Director Durham:

Cranberry Pipeline Corporation (Cranberry) is pleased to submit this written request for a Class I Administrative Update to the existing Rule 13 permit to construct for the Heizer Compressor Station, located in Poca, Kanawha County, West Virginia. The Heizer Compressor Station currently operates under permit number R13-2694C and R30-07900046-2012. An original hard copy and two electronic copies (CD-ROM) of this written request are included with this submission.

Cranberry was issued permit R13-2694C from the WVDEP Division of Air Quality on April 30, 2013. This permit application was filed to receive the authority to construct a new stationary source, a White Superior 8GTLA Compressor Engine, rated at 1,100 hp. The permitting action also included the removal of the existing Clark HMB-8 compressor engine, rated at 440 hp, and the introduction of synthetic minor run hour and gas throughput limitations. Due to market conditions, Cranberry did not execute the capital expenditure project and therefore the original Clark HMB-8 compressor engine has remained at the station.

Cranberry requests that the WVDEP Division of Air Quality re-issue permit number R13-2694B to accurately reflect the Potential to Emit (PTE) of equipment currently operated on-site. Based upon the equipment permitted in R13-2694B, the synthetic minor considerations filed for in the April 2013 updated are no longer appropriate. As

Cabot Oil & Gas Corporation

discussed between Beverly McKeone (WVDAQ) and Grant Morgan (ERM) on September 23, 2015, this permitting action would qualify as a Class I Administrative Update because the requested permitting change has been to public comment, in the form of R13-2694B. Additionally, dynamic permitting considerations, including remote status and source aggregation, have been evaluated and determined to remain consistent with conditions outline in R13-2694B.

If you have any questions about the information submitted or if you would like to discuss this project, please do not hesitate to contact me at (304) 347-1642.

Sincerely,

Brody Webster
Manager, Safety and Environment
