

# IRON AND STEEL FOUNDRIES

**40CFR60**

## **SUBPART ZZZZZ**

### **Implement a Scrap Management Program**

Purchase and use only metal ingots, pig iron, slitter or other materials that DO NOT contain the following post-consumer items: automotive body scrap, engine blocks, oil filters, oily turnings, lead components, plastic containers or free liquids.

- Use a binder formation that DOES NOT contain methanol as a specific ingredient in catalyst formation.
- Recordkeeping — maintain records of metals purchased to show that post-consumer scrap outlined above is not being used. Records must document that no motor vehicle scrap is being used.
- Records of MSDS of binder formulations must be kept.
- Records of annual quantity and composition of HAP-containing binder formulations used.
- Records of melt production for each calendar year.
