Re: WV Permit No. WV0116815
Oil & Gas CSW General Permit
Administrative Extension

Dear Permittee,

In accordance with WV Code 22-11, this letter serves as an extension of the WV Water Pollution Control Permit No. WV00116815 until the 23rd. day of April 2023. By this time, the reissuance of the WV General Permit for Stormwater Associated with Oil and Gas Related Construction Activities should be completed, and a new permit reissued.

This action is necessary to maintain permit status while the reissuance of said permit is being completed. If the general permit is not reissued prior to the expiration date, these registrations will be administratively continued in accordance with 47 CSR 10 and remain in force and effect. If the General Permit is reissued, DWWM will identify reasonable time for the applicant to seek continued permit coverage under the reissued General Permit.

If the grading phase of construction surpasses 1 year, projects may retain permit coverage of registrations by submission of a modification, providing a notarized/signed statement for billing so it can be sent out to public notice.

Please be advised that the terms and conditions of the existing permit shall remain applicable and in effect throughout the permit extension period.

Sincerely,

Katheryn Emery, P.E.
Director
