

WV WATER FESTIVAL CURRICULUM

The WV Water Festival Curriculum was developed by two environmental educational programs, New River Gorge National Park and Preserve and West Virginia Project WET. The curriculum includes seven water focused lesson plans, each complete with an instructional video lead by water education professionals, pre/post assessment online quizzes, supplemental YouTube videos, standard correlations, resources pages, in person and virtual extensions, a featured book in reading corner, and more! The curriculum is targeted towards fifth graders and is housed in Schoology.

The curriculum was developed to prepare students for an outdoor educational experience at a water festival, with e-learning in mind. It is designed to teach students about water resources, both locally and around the world. It also allows students to develop an understanding of the importance of water, how it is used, managed, and moves through our natural systems.
