

**STATE OF WEST VIRGINIA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
DIVISION OF WATER and WASTE MANAGEMENT
CHARLESTON, WEST VIRGINIA 25304**

ATTACHMENT "A"

**MATERIALS ALLOWABLE AND PROHIBITED FOR DISPOSAL
IN A (NONCOMMERCIAL) CLASS D SOLID WASTE FACILITY**

Allowable Materials

Asphaltic Substances, including bituminous concrete (black top)*
Blocks, as masonry products *
Bricks, as masonry products *
Brush, encountered during site development within the disposal area
Engineered Wood Products, such as OSB, plywood, particle board produced
as the result of construction, remodeling, repair, renovation, or demolition
Grubbing Waste encountered in site development within the disposal area
Hardened Construction Materials in containers such as: paint, lacquers, cements,
caulking, resins, sealants, or adhesives.
Hardened Concrete*
Lead-Based Paint, allowed only if attached to a painted surface
Metals, including all metal piping, wiring and other metals too small or not practical
to be removed during demolition and remodeling activities.
Other Masonry Materials*
Packaging, such as tape, backing, etc., if physically attached to materials, resulting
from construction, remodeling, renovation, repair and demolition operations
on houses, commercial and industrial buildings.
Plaster, including "dry wall", wallboard, gypsum and similar products not containing
asbestos in a concentration equal to or greater than 1%.
Trees, encountered during site development within the disposal area
Waste, (excess) building and construction materials unless explicitly prohibited*
Wood, including wood panels, hardwood floors, etc., encountered in construction,
remodeling, repair, renovation, or demolition

* Exempt except when mixed with other construction, remodeling, renovation, repair
or demolition debris.

**Note: Materials containing 1% or less asbestos are not subject to regulation
and are allowable.**

Prohibited Materials

Aerosols
Appliances
Asbestos-Containing Waste Materials (ACWM's)
Automobile Shredder Fluff
Ballasts
Batteries
Burnt Debris
Capacitors
Carpet and Other Synthetic Floor Covering
Cement
Computers and Computer Equipment, as E-Wastes
Contaminated Solid Waste
Electrical Wastes, including batteries, mercury-containing switches, transformers
and capacitors, and fluorescent tubes
Free Liquids of any kind, including solvents, lubricating oil, brake fluid,
automotive fluids or fuels, cement slurry, adhesives, caulking, lacquers, paint,
resin containers, and sealants
Household Furnishings or Household Wastes
Industrial Wastes
Lead
Lead Flashing
Liquid Paint, including lead-based paint
Mercury-Containing Switches
Metal Waste, including metal piping, wiring, or similar wastes easily removed
in demolition, or excess materials generated in construction or remodeling
Oil Filters
Pesticides
Pressure-Treated Wood Or Lumber containing creosote or other preservatives
Putrescible Wastes
Railroad Ties
Resin Containers
Sludge Wastes
Waste Tires
White Goods
Yard Wastes, except as encountered in site construction

Note: These list is not final and may be revised based on evidence of groundwater contamination from other materials or other environmental concerns as may be applicable.
