Assistant Director for Permitting WV Department of Environmental Protection Division of Air Quality 601 57th Street, SE Charleston, West Virginia 25304

To Whom It May Concern:

Subject: Wendell H. Stone Company dba Stone & Company, Inc. NSR (45CSR13) Air Permit Application Morgantown Batch Plant, Morgantown, West Virginia CEC Project 144-205.0005

Civil & Environmental Consultants, Inc. (CEC) on behalf of Wendell H. Stone Company dba Stone & Company, Inc. (Stone Concrete) is hereby submitting an application for a New Source Review (NSR) Construction Permit to the West Virginia Department of Environmental Protection (DEP), Division of Air Quality (DAQ), for the Morgantown Batch Plant located in Monongalia County, West Virginia. The Morgantown Batch Plant is a Batch Concrete Manufacturing Plant with a NAICS code of 327320. Stone Concrete is submitting the attached 45 CSR 13 air permit application in accordance with West Virginia air quality regulations. One hard copy and two CD's of the permit application are included with this correspondence.

If you have questions concerning the 45CSR13 air permit application, please contact Mr. Brian Henckel at (724) 836-1400.

Sincerely,

CIVIL & ENVIRONMENTAL CONSULTANTS, INC.

n h. M

Benjamin N. Blasingame, P.E. Project Manager

Kristian A. Mansy

Kristian A. Macoskey, QEP Vice President

Enclosure cc: Mr. Brain Henckel, Stone Concrete

| Submit completed and signed Authority F | Form as Attachment R. | | |

All of the required forms and additional information can be found under the Permitting Section of DAQ's website, or requested by phone.

35A. Certification of Information. To certify this permit application, a Responsible Official (per 45CSR§13-2.22 and 45CSR§30-2.28) or Authorized Representative shall check the appropriate box and sign below.

Certification of Truth, Accuracy, and Completeness

I, the undersigned C Responsible Official / Authorized Representative, hereby certify that all information contained in this application and any supporting documents appended hereto, is true, accurate, and complete based on information and belief after reasonable inquiry I further agree to assume responsibility for the construction, modification and/or relocation and operation of the stationary source described herein in accordance with this application and any amendments thereto, as well as the Department of Environmental Protection, Division of Air Quality permit issued in accordance with this application, along with all applicable rules and regulations of the West Virginia Division of Air Quality and W.Va. Code § 22-5-1 et seq. (State Air Pollution Control Act). If the business or agency changes its Responsible Official or Authorized Representative, the Director of the Division of Air Quality will be notified in writing within 30 days of the official change.

Compliance Certification

Except for requirements identified in the Title V Application for which compliance is not achieved, I, the undersigned hereby certify that, based on information and belief formed after reasonable inquiry, all air contaminant sources identified in this application are in compliance with all applicable requirements.

FOR AGENCY USE ONLY - IF THIS IS A TITLE V SOURCE:

Forward 1 copy of the application to the Title V Permitting Group and:

For Title V Administrative Amendments:

NSR permit writer should notify Title V permit writer of draft permit,

For Title V Minor Modifications:

□ Title V permit writer should send appropriate notification to EPA and affected states within 5 days of receipt,

NSR permit writer should notify Title V permit writer of draft permit.

For Title V Significant Modifications processed in parallel with NSR Permit revision:

- NSR permit writer should notify a Title V permit writer of draft permit,
- Public notice should reference both 45CSR13 and Title V permits,
- EPA has 45 day review period of a draft permit.

All of the required forms and additional information can be found under the Permitting Section of DAQ's website, or requested by phone.

ATTACHMENT A BUSINESS REGISTRATION CERTIFICATION

WEST VIRGINIA STATE TAX DEPARTMENT BUSINESS REGISTRATION CERTIFICATE

ISSUED TO: WENDELL H STONE COMPANY INC DBA STONE AND COMPANY 606 MCCORMICK AVE CONNELLSVILLE, PA 15425-2733

BUSINESS REGISTRATION ACCOUNT NUMBER:

1023-0983

This certificate is issued on:

06/29/2011

This certificate is issued by the West Virginia State Tax Commissioner in accordance with Chapter 11, Article 12, of the West Virginia Code

The person or organization identified on this certificate is registered to conduct business in the State of West Virginia at the location above.

This certificate is not transferrable and must be displayed at the location for which issued. This certificate shall be permanent until cessation of the business for which the certificate of registration was granted or until it is suspended, revoked or cancelled by the Tax Commissioner.

Change in name or change of location shall be considered a cessation of the business and a new certificate shall be required.

TRAVELING/STREET VENDORS: Must carry a copy of this certificate in every vehicle operated by them. CONTRACTORS, DRILLING OPERATORS, TIMBER/LOGGING OPERATIONS: Must have a copy of this certificate displayed at every job site within West Virginia.

ATTACHMENT B MAPS

ATTACHMENT C SCHEDULE

The construction of the batch concrete manufacturing plant at the Wendell H. Stone Company dba Stone & Company, Inc. Morgantown facility, will commence upon approval from the West Virginia Department of Environmental Protection Division of Air Quality.

Construction is expect to take approximately 3 months. Start-up of the facility will commence when installation is completed and all permitting requirements have been completed.

ATTACHMENT D REGULATORY DISCUSSION

REGULATORY DISCUSSION

We have evaluated the applicable and non-applicable regulations pertaining to the proposed construction and operation of the new batch concrete manufacturing plant.

APPLICABLE REGULATIONS

The proposed Batch Concrete Manufacturing Plant is subject to the following applicable rules and regulations:

Federal and State:

45 CSR 7 – To Prevent and Control Air Pollution from Manufacturing Process Operations

45 CSR 13 – Permits for Construction, Modification, Relocation, and Operation of Stationary Source of Air Pollutants

45 CSR 17 – To Prevent and Control Particulate Matter Air Pollution from Materials Handling, Preparation, Storage and Other Sources of Particulate Matter

ATTACHMENT E PLOT PLAN

ATTACHMENT F PROCESS FLOW DIAGRAM

ATTACHMENT G PROCESS DESCRIPTION

PROCESS DESCRIPTION

Wendell H. Stone Company dba Stone & Company, Inc. (Stone) is planning to construct a concrete batch plant in Morgantown, West Virginia. Travel, working, and storage areas will be paved in concrete or asphalt. The facility will produce approximately 50,000 cubic yards of concrete per year (95,000 tons per year).

Sand and aggregate will be delivered to the site via dump trucks, and unloaded into designated stockpile areas (SP-AG and SP-SD). Cement and cement supplement will be delivered to the site via trucks and pneumatically unloaded into a storage silo. To minimize fugitive emissions, the aggregate stockpile and dump truck unloading areas will be sprayed with water on an as-needed basis. The silo will be equipped with a filter vent, which has a control efficiency of 99.9%, also minimizing emissions. The sand and aggregate will be transferred from the stockpiles to a hopper via a front-end loader. From the hopper, the sand and aggregate will be weighed and then conveyed to the volumetric feeder/mixer. The cement and cement supplement are weighed and then also transferred to an enclosed volumetric feeder/mixer. Water will be added to the material and the produced concrete will then loaded into trucks which exit the site via a paved route for offsite delivery. All areas at the site will be paved. The haul roads will be sprayed with water on an as-needed basis to minimize fugitive dust emissions.

Emission sources for the Morgantown Batch Plant include aggregate, sand, and cement transfer activities (MT-AG, MT-SD, and MT-CT), wind erosion from aggregate and sand stockpiles (SP-AG and SP-SD), transfer activities on the site's paved roads (HR-AG, HR-CT, CR-CON, and HR-END), and discharges from the baghouse (MT-CT-C).

There will be no stationary combustion sources. All power will be electric.

A 500-gallon diesel tank will also be located at the site for equipment refueling.

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

L

Special remarks on fire hazards

6. Accidental release measures

Do not use water jet.

| Environmental precautions | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
|--|--|
| Personal protection in case of a large spill | Chemical splash goggles. Chemical-resistant protective suit. Boots. Chemical-resistant gloves. Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product. Suggested protective clothing might not be adequate. Consult a specialist before handling this product. CAUTION: The protection provided by air-purifying respirators is limited. Use a positive pressure air-supplied respirator if there is any potential for an uncontrolled release, if exposure levels are not known, or if concentrations exceed the protection limits of air-purifying respirator. |
| Methods for cleaning up | |
| Large spill | Stop leak if without risk. Eliminate all ignition sources. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. |
| Small spill | Stop leak if without risk. Eliminate all ignition sources. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. |

7. Handling and storage

| Handling | Do not ingest. Never siphon by mouth. If ingested, do not induce vomiting. Put on appropri personal protective equipment (see section 8). Workers should wash hands and face bef eating, drinking and smoking. Do not get in eyes or on skin or clothing. Do not breathe vapor mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. St and use away from heat, sparks, open flame or any other ignition source. Use explosion-pr electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. To precautionary measures against electrostatic discharges. To avoid fire or explosion, dissip static electricity during transfer by grounding and bonding containers and equipment bef transferring material. | ate ore or or or oof ake ate ore |
|--------------------|---|--|
| Storage | Store in accordance with local regulations. Store in a segregated and approved area. Store and from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (section 10). Eliminate all ignition sources. Separate from oxidizing materials. Keep contain tightly closed and sealed until ready for use. Containers that have been opened must be careful resealed and kept upright to prevent leakage. Do not store in unlabeled containers. It appropriate containment to avoid environmental contamination. | vay see iner fully Jse |

TWA: 10 ppm 8 hour(s). Issued/Revised: 6/1993

While specific OELs for certain components may be shown in this section, other components may be present in any mist, vapor or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Some states may enforce more stringent exposure limits.

| ⊶ontrol Measures | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or othe engineering controls to keep worker exposure to airborne contaminants below any recommende or statutory limits. The engineering controls also need to keep gas, vapor or dust concentration below any lower explosive limits. Use explosion-proof ventilation equipment. | | | | | |
|---------------------|--|--|--|--|--|--|
| Hygiene measures | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. | | | | | |
| Personal protection | | | | | | |
| Eyes | Avoid contact with eyes. Safety glasses with side shields. | | | | | |
| Skin and body | Avoid contact with skin and clothing. Wear suitable protective clothing. | | | | | |
| Respiratory | Use only with adequate ventilation. Do not breathe vapor or mist. If ventilation is inadequate, use a NIOSH-certified respirator with an organic vapor cartridge and P95 particulate filter. | | | | | |
| £ | CAUTION: The protection provided by air-purifying respirators is limited. Use a positive pressure air-supplied respirator if there is any potential for an uncontrolled release, if exposure levels are not known, or if concentrations exceed the protection limits of air-purifying respirator. | | | | | |
| Hands | Wear gloves that cannot be penetrated by chemicals or oil. | | | | | |
| х Т | The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions. | | | | | |
| 15 S | Consult your supervisor or Standard Operating Procedure (S.O.P) for special handling instructions. | | | | | |

Hazardous polymerization Under normal conditions of storage and use, hazardous polymerization will not occur.

1. Toxicological information

Acute toxicity

| <u>Classification</u> | | | |
|-----------------------------------|---------|----------|------|
| Product/ingredient name | IARC | NTP | OSHA |
| Naphthalene fuel, diesel no. 2 | 2B 3 | Possible | |

IARC :

2B - Possible carcinogen to human.

3 - Not classifiable as a human carcinogen.

NTP :

Possible - Reasonably anticipated to be human carcinogens.

Other Toxicity Data

Aspiration of this product into the lungs can cause chemical pneumonia and can be fatal. Aspiration into the lungs can occur while vomiting after ingestion of this product. Do not siphon by mouth.

Middle distillate: From skin-painting studies of petroleum distillates of similar composition and distillate range, it has been shown that these types of materials often possess weak carcinogenic activity in laboratory animals. In these tests, the material is painted on the shaved backs of mice twice a week for their lifetime. The material is not washed off between applications. Therefore, there may be a potential risk of skin cancer from prolonged or repeated skin contact with this product in the absence of good personal hygiene. This particular product has not been tested for carcinogenic activity, but we have chosen to be cautious in light of the findings with other distillate streams.

Occasional skin contact with this product is not expected to have serious effects, but good personal hygiene should be practiced and repeated skin contact avoided. This product can also be expected to produce skin irritation upon prolonged or repeated skin contact. Personal hygiene measures taken to prevent skin irritation are expected to be adequate to prevent risk of skin cancer.

Diesel exhaust particulates have been classified by the National Toxicological Program (NTP) to be a reasonably anticipated human carcinogen. Exposure should be minimized to reduce potential risk.

Naphthalene has been reported to cause developmental toxicity in mice after oral exposure to relatively high dose levels, but developmental toxicity was not observed in NTP (National Toxicology Program) sponsored studies in rats and rabbits. Ingestion or inhalation of naphthalene can result in hemolysis and other blood abnormalities, and individuals (and infants) deficient in glucose-6-phosphate dehydrogenase may be especially susceptible to these effects. Inhalation of naphthalene may cause headache and nausea. Airborne exposure can result in eye irritation. Naphthalene exposure has been associated with cataracts in animals and humans.

Other information

Potential chronic health effects

Carcinogenicity

Contains material which may cause cancer, based on animal data. Risk of cancer depends on duration and level of exposure.

ţ

13. Disposal considerations

.vaste information

The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

NOTE: The generator of waste has the responsibility for proper waste identification (based on characteristic(s) or listing), transportation and disposal

| | If breathing is difficult, trained personnel should give oxygen. If not breathing, give artificial respiration. Get medical attention. |
|--------------------|--|
| Skin contact | In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention immediately if irritation develops and persists. |
| Eye contact | If easy to do, remove contact lens, if worn. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention. |
| Ingestion | If swallowed, contact a poison control center or physician immediately. Do NOT induce vomiting unless directed to do so by medical personnel Never give anything by mouth to an unconscious person. |
| Notes to physician | |
| Treatment | No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |

5. Fire-fighting measures

| Fire fighting | |
|--|---|
| Suitable extinguishing media | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. |
| Unsuitable extinguishing media | none |
| Further information | Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk without suitable training. |
| Protective equipment and precaut | tions for firefighters |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self- contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

6. Accidental release measures

| Personal precautions | Use personal protective equipment. Ensure adequate ventilation. Evacuate personnel to safe areas. No action shall be taken involving any personal risk without suitable training. Avoid breathing dust/ fume/ gas/ mist/ vapors/ spray. |
|----------------------|--|
| | 2/6 |

| | Material can create slippery conditions. |
|---|--|
| Environmental precautions | Local authorities should be advised if significant spillages cannot be contained. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
| Methods for containment and cleaning up | Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13). Large spills should be collected mechanically (remove by pumping) for disposal. |

7. Handling and storage

| Handling | For personal protection see section 8. Avoid inhalation, ingestion and contact with skin and eyes. Smoking, eating and drinking should be prohibited in the application area. |
|----------|---|
| Storage | Keep containers tightly closed in a dry, cool and well-ventilated place. Keep in properly labeled containers. To maintain product quality, do not store in heat or direct sunlight. Store in accordance with local regulations. |

8. Exposure controls/personal protection

Exposure limit(s)

Contains no substances with occupational exposure limit values.

* <u>Basis</u>

| ACGIH. Threshold Limit Values (TLV) OSHA P0. Table Z-1, Limit for Air Contaminat (1989 Vacated Values) OSHA P1. Permissible Exposure Limits (PEL), Table Z-1, Limit for Air Contaminant OSHA P2. Permissible Exposure Limits (PEL), Table Z-2 OSHA Z3. Table Z-3, Mineral Dust | | |
|--|--|--|
| Engineering measures | Use of adequate ventilation should be sufficient to control worker exposure to airborne contaminants. If the use of this product generates dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits. | |
| Personal protective equipment | | |
| Eye protection | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary. | |
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. | |
| Skin and body protection | Choose body protection according to the amount and concentration of the dangerous substance at the work place. | |

Material Safety Data Sheet

| Respiratory protection | Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapor/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used. |
|------------------------|---|
| Hygiene measures | Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and immediately after handling the product. Remove contaminated clothing and protective equipment before entering eating areas. |

Caution: HMIS[®] ratings and NFPA ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS[®] and NFPA ratings are not required on MSDSs under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS[®] and NFPA ratings are to be used with a fully implemented HMIS[®] and NFPA program. HMIS[®] is a registered mark of the National Paint & Coatings Association (NPCA). NFPA or the National Fire Protection Association is a private non-profit organization and an authoritative source of technical background, data, and consumer advice on fire protection, problems and prevention. Please note HMIS[®] attempts to convey full health warning information to all employees while NFPA is meant primarily for fire fighters and other emergency responders.

Notes to Reader

The information contained in this Material Safety Data Sheet applies only to the actual Sika Corporation ("Sika") product identified and described herein. This information is not intended to address, nor does it address the use or application of the identified Sika product in combination with any other material, product or process. All of the information set forth herein is based on technical data regarding the identified product that Sika believes to be reliable as of the date hereof. Prior to each use of any Sika product, the user must always read and follow the warnings and instructions on the product's current Technical Data Sheet, product label and Material Safety Data Sheet for each Sika product, which are available at web site and/or telephone number listed in Section 1 of this MSDS.

SIKA MAKES NO WARRANTIES EXPRESS OR IMPLIED AND ASSUMES NO LIABILITY ARISING FROM THIS INFORMATION OR ITS USE. SIKA SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES AND SHALL NOT BE RESPONSIBLE FOR THE USE OF THIS PRODUCT IN A MANNER TO INFRINGE ON ANY PATENT OR ANY OTHER INTELLECTUAL PROPERTY RIGHTS HELD BY OTHERS.

All sales of Sika products are subject to its current terms and conditions of sale available at www.sikausa.com or 201-933-8800.

Personal protective equipment

Material Safety Data Sheet

| Eye protection | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary. |
|--------------------------|---|
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. |
| Skin and body protection | Choose body protection according to the amount and concentration of the dangerous substance at the work place. |
| Respiratory protection | Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapor/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used. |
| Hygiene measures | Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and immediately after handling the product. Remove contaminated clothing and protective equipment before entering eating areas. |

Caution: HMIS[®] ratings and NFPA ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS[®] and NFPA ratings are not required on MSDSs under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS[®] and NFPA ratings are to be used with a fully implemented HMIS[®] and NFPA program. HMIS[®] is a registered mark of the National Paint & Coatings Association (NPCA). NFPA or the National Fire Protection Association is a private non-profit organization and an authoritative source of technical background, data, and consumer advice on fire protection, problems and prevention. Please note HMIS[®] attempts to convey full health warning information to all employees while NFPA is meant primarily for fire fighters and other emergency responders.

Notes to Reader

The information contained in this Material Safety Data Sheet applies only to the actual Sika Corporation ("Sika") product identified and described herein. This information is not intended to address, nor does it address the use or application of the identified Sika product in combination with any other material, product or process. All of the information set forth herein is based on technical data regarding the identified product that Sika believes to be reliable as of the date hereof. Prior to each use of any Sika product, the user must always read and follow the warnings and instructions on the product's current Technical Data Sheet, product label and Material Safety Data Sheet for each Sika product, which are available at web site and/or telephone number listed in Section 1 of this MSDS.

SIKA MAKES NO WARRANTIES EXPRESS OR IMPLIED AND ASSUMES NO LIABILITY ARISING FROM THIS INFORMATION OR ITS USE. SIKA SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES AND SHALL NOT BE RESPONSIBLE FOR THE USE OF THIS PRODUCT IN A MANNER TO INFRINGE ON ANY PATENT OR ANY OTHER INTELLECTUAL PROPERTY RIGHTS HELD BY OTHERS.

Print Date 06/06/2012

All sales of Sika products are subject to its current terms and conditions of sale available at www.sikausa.com or 201-933-8800.

1. Product and company identification

2. Hazards identification

This material is hazardous under the criteria of the Federal OSHA Hazard Communication Standard 29CFR 1910.1200.

| Potential Health Effects | |
|--------------------------|--|
| Inhalation | May cause respiratory tract irritation. |
| Skin | Causes skin irritation. |
| Eyes | Causes eye irritation. |
| Ingestion | Harmful if swallowed. |
| Warning | Contains material that may cause target organ damage. Possible cancer hazard. Contains material which may cause cancer based on animal data. |

See Section 11 for more detailed information on health effects and symptoms.

3. Composition/information on ingredients

| Component | CAS Number |
|--------------------|------------|
| sodium nitrate | 7631-99-4 |
| Triethanolamine | 102-71-6 |
| 2,2-iminodiethanol | 111-42-2 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Print Date 03/29/2012

4. First aid measures

| First aid procedures | |
|----------------------|---|
| Inhalation | If inhaled, remove to fresh air. If breathing is difficult, trained personnel should give oxygen. If not breathing, give artificial respiration. Get medical attention. |
| Skin contact | In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Get medical attention immediately if irritation develops and persists. |
| Eye contact | If easy to do, remove contact lens, if worn. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention. |
| Ingestion | If swallowed, contact a poison control center or physician immediately. Do NOT induce vomiting unless directed to do so by medical personnel Never give anything by mouth to an unconscious person. Get medical attention immediately. |
| Notes to physician | |
| Treatment | No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |

5. Fire-fighting measures

Fire fighting

| Suitable extinguishing media | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. |
|--------------------------------|---|
| Unsuitable extinguishing media | none |
| Further information | Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk without suitable training. |

Protective equipment and precautions for firefighters

| Special protective equipment for | Fire-fighters should wear appropriate protective equipment and self- |
|----------------------------------|--|
| fire-fighters | contained breathing apparatus (SCBA) with a full face-piece |
| | operated in positive pressure mode. |

6. Accidental release measures

| Personal precautions | Use personal protective equipment. Ensure adequate ventilation. Evacuate personnel to safe areas. No action shall be taken involving any personal risk without suitable training. Keep people away from and upwind of spill/leak. Avoid breathing dust/ fume/ gas/ mist/ vapors/ spray. Material can create slippery conditions. |
|---|---|
| Environmental precautions | Local authorities should be advised if significant spillages cannot be contained. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
| Methods for containment and cleaning up | Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13). Large spills should be collected mechanically (remove by pumping) for disposal. Flush spill area with water spray. Do not flush to sewer. Dispose in corrosive resistant polyethylene container with a resistant inliner. |

7. Handling and storage

| Handling | For personal protection see section 8. Avoid inhalation, ingestion and contact with skin and eyes. Smoking, eating and drinking should be prohibited in the application area. |
|----------|---|
| Storage | Keep containers tightly closed in a dry, cool and well-ventilated place. Keep in properly labeled containers. To maintain product quality, do not store in heat or direct sunlight. Store in accordance with local regulations. Separate from reducing agents and combustible materials. Storage away from incompatible materials (see section 10). |

8. Exposure controls/personal protection

2. Hazards identification

OSHA/HCS status : T

: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

Potential acute health effects

| Inhalation | : Irritating to respiratory system. |
|------------|-------------------------------------|
| Ingestion | : Harmful if swallowed. |
| Skin | : Irritating to skin. |
| Eyes | : Irritating to eyes. |

Potential chronic health effects

: Fritating to eyes. Irritating to respiratory system. Irritating to skin.

See toxicological information (section 11)

3. Composition/information on ingredients

<u>Name</u>

calcium chloride

Chronic effects

CAS number%10043-52-410 - 30

There are no ingredients or additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

| 4. First aid measures | | |
|-----------------------------|--|--|
| Notes to physician | : No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. | |
| 5. Fire-fighting | neasures | |
| Flammability of the product | : In a fire or if heated, a pressure increase will occur and the container may burst. | |
| Extinguishing media | | |
| Suitable | : Use an extinguishing agent suitable for the surrounding fire. | |
| Not suitable | : None known. | |

Plastocrete 161 HE

5. Fire-fighting measures

| Special exposure hazards | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
|--|---|---|
| Hazardous combustion products | : | Decomposition products may include the following materials: halogenated compounds metal oxide/oxides |
| Special protective equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

6. Accidental release measures

| Personal precautions | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8). |
|---------------------------|---|---|
| Environmental precautions | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| Large spill | - | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. |
| Small spill | : | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |
| 7. Handling and storage | | |

Handling

: Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Expose controls/personal protection

Consult local authorities for acceptable exposure limits.

| Engineering measures | : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. |
|----------------------|---|
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Personal protection | |
| Respiratory | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
| Hands | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. |
| Eyes | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. |
| Skin | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| | |

9. Physical and chemical properties

Color Odor

: Brown.

: Aromatic.

10. Stability and reactivity

| Stability | : | The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur. |
|----------------------------------|---|---|
| Conditions to avoid | : | No specific data. |
| Materials to avoid | : | No specific data. |
| Hazardous decomposition products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

11. Toxicological information

Acute toxicity

Conclusion/Summary : Not available.

12. Ecological information

Environmental effects : No known significant effects or critical hazards.

8. May 2008

13. Disposal considerations

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Indicates information that has changed from previously issued version.

Notice to reader

The information contained in this Material Safety Data Sheet applies only to the actual Sika Corporation ("Sika") product identified and described herein. This information is not intended to address, nor does it address the use or application of the identified Sika product in combination with any other material, product or process. All of the information set forth herein is based on technical data regarding the identified product that Sika believes to be reliable as of the date hereof. Prior to each use of any Sika product, the user must always read and follow the warnings and instructions on the product's current Technical Data Sheet, product label and Material Safety Data Sheet for each Sika product, which are available at web site and/or telephone number listed in Section 1 of this MSDS.

SIKA MAKES NO WARRANTIES EXPRESS OR IMPLIED AND ASSUMES NO LIABILITY ARISING FROM THIS INFORMATION OR ITS USE. SIKA SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES AND SHALL NOT BE RESPONSIBLE FOR THE USE OF THIS PRODUCT IN A MANNER TO INFRINGE ON ANY PATENT OR ANY OTHER INTELLECTUAL PROPERTY RIGHTS HELD BY OTHERS.

All sales of Sika products are subject to its current terms and conditions of sale available at www.sikacorp.com or 201-933-8800.

1. Product and company identification

| Product name | SikaSet® R.H.E. |
|--|---|
| Supplier | Sika Corporation Polito Avenue 201 |
| Telephone Telefax Emergency telephone | Lyndhurst, NJ 07071 (201) 933-8800 (201) 804-1076 CHEMTREC: 800-424-9300 |
| e-mail address of person responsible for this SDS | INTERNATIONAL: 703-527-3887 ehs@sika-corp.com |
| Manufacturer | Sika Corporation, Operations 201 Polito Avenue Lyndhurst, NJ 07071 www.sikausa.com |
| Telephone | (201) 933 - 8800 |
| Chemical family | Aqueous solution |

2. Hazards identification

This material is hazardous under the criteria of the Federal OSHA Hazard Communication Standard 29CFR 1910.1200.

| Potential Health Effects | |
|--------------------------|--|
| Inhalation | May cause respiratory tract irritation. |
| Skin | May cause allergic skin reaction. |
| Eyes | May cause eye irritation. |
| Ingestion | May cause gastrointestinal disturbance. |
| Warning | Possible cancer hazard. Contains material which may cause cancer based on animal data. |

See Section 11 for more detailed information on health effects and symptoms.

3. Composition/information on ingredients

| <u>Component</u> | CAS Number |
|------------------------------|------------|
| Calcium Nitrate Tetrahydrate | 13477-34-4 |
| Salts of thiocyanic acid | 540-72-7 |
| Methenamine | 100-97-0 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First aid measures

| First aid procedures | |
|----------------------|---|
| Inhalation | If inhaled, remove to fresh air. If breathing is difficult, trained personnel should give oxygen. If not breathing, give artificial respiration. Get medical attention. |
| Skin contact | In case of contact, immediately flush skin with soap and plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Get medical attention immediately if symptoms occur. |
| Eye contact | If easy to do, remove contact lens, if worn. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention. |
| Ingestion | If swallowed, contact a poison control center or physician immediately. Do NOT induce vomiting unless directed to do so by medical personnel Never give anything by mouth to an unconscious person. |
| Notes to physician | |
| Treatment | No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. |

5. Fire-fighting measures

Fire fighting

| Suitable extinguishing media | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. |
|--------------------------------|---|
| Unsuitable extinguishing media | none |
| Further information | Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk without suitable training. |

Protective equipment and precautions for firefighters

| Special protective equipment for | Fire-fighters should wear appropriate protective equipment and self- |
|----------------------------------|--|
| fire-fighters | contained breathing apparatus (SCBA) with a full face-piece |
| | operated in positive pressure mode. |

6. Accidental release measures

| Personal precautions | Use personal protective equipment. Ensure adequate ventilation. Evacuate personnel to safe areas. No action shall be taken involving any personal risk without suitable training. Avoid breathing dust/ fume/ gas/ mist/ vapors/ spray. Material can create slippery conditions. |
|---|--|
| Environmental precautions | Local authorities should be advised if significant spillages cannot be contained. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |
| Methods for containment and cleaning up | Contain spillage, soak up with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and transfer to a container for disposal according to local / national regulations (see section 13). Large spills should be collected mechanically (remove by pumping) for disposal. |
| 7. Handling and storage | |

| Handling | For personal protection see section 8. Avoid inhalation, ingestion and contact with skin and eyes. Smoking, eating and drinking should be prohibited in the application area. |
|----------|---|
| Storage | Keep containers tightly closed in a dry, cool and well-ventilated place. Keep in properly labeled containers. To maintain product quality, do not store in heat or direct sunlight. Store in accordance with local regulations. |

8. Exposure controls/personal protection

Exposure limit(s)

Contains no substances with occupational exposure limit values.

* <u>Basis</u>

ACGIH. Threshold Limit Values (TLV) OSHA P0. Table Z-1, Limit for Air Contaminat (1989 Vacated Values) OSHA P1. Permissible Exposure Limits (PEL), Table Z-1, Limit for Air Contaminant OSHA P2. Permissible Exposure Limits (PEL), Table Z-2 OSHA Z3. Table Z-3, Mineral Dust

Engineering measures

Use of adequate ventilation should be sufficient to control worker exposure to airborne contaminants. If the use of this product generates dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Personal protective equipment

Eye protection Safety eyewear complying with an approved standard should be

| | used when a risk assessment indicates this is necessary. |
|--------------------------|---|
| Hand protection | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. |
| Skin and body protection | Choose body protection according to the amount and concentration of the dangerous substance at the work place. |
| Respiratory protection | Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapor/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used. |
| Hygiene measures | Avoid contact with skin, eyes and clothing. Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and immediately after handling the product. Remove contaminated clothing and protective equipment before entering eating areas. Wash thoroughly after handling. |

9. Physical and chemical properties

| Appearance | |
|----------------|------------|
| Physical state | liquid |
| Color | dark brown |
| Safety data | |
| рН | 7.5 |
| Density | 14 alom? |

10. Stability and reactivity

| Stability | Stable under normal conditions. |
|----------------------------------|--|
| Conditions to avoid | not applicable |
| Materials to avoid | not applicable |
| Hazardous decomposition products | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

11. Toxicological information

| Chronic Exposure | Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
|------------------|---|
| | |

| Carcinogenicity | | |
|-----------------------------|--|--|
| IARC | Group 2A: Probably carcinogenic to humans Calcium Nitrate Tetrahydrate 13477-34-4 | |
| OSHA | not applicable | |
| NTP | not applicable | |
| ACGIH | not applicable | |
| | | |
| 12. Ecological Information | | |
| Other information | Do not empty into drains; dispose of this material and its container in a safe way. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. | |
| 13. Disposal considerations | | |
| Waste disposal methods | Disposal of this product, solutions and any by-products should at all | |

| | times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. |
|-----------|--|
| Packaging | Empty containers should be taken to an approved waste handling site for recycling or disposal. |

14. Transport information

2. Composition/information on ingredients

Name

Sodium salt of organic acid mixture

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

3. Hazards identification

| OSHA/HCS status | : | This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). |
|--------------------------------|---|---|
| Potential acute health effects | | |
| Inhalation | 1 | Slightly irritating to the respiratory system. |
| Ingestion | : | No known significant effects or critical hazards. |
| Skin | 1 | Slightly irritating to the skin. May cause sensitization by skin contact. |
| Eyes | 1 | Irritating to eyes. |
| | | |

See toxicological information (section 11)

4. First aid measures

| Eye contact | : Check for and remove any contact lenses. Get medical attention. Immediately flush eyes with plenty of water for at least 15 minutes. |
|--------------|---|
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. |
| Inhalation | : Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. Maintain an open airway. |

4. First aid measures

Ingestion

: Wash out mouth with water. Move exposed person to fresh air. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person.

: No specific treatment. Treat symptomatically. Contact poison treatment specialist

Notes to physician

immediately if large quantities have been ingested or inhaled.

5. Fire-fighting measures

| Flammability of the product | In a fire or if heated, a pressure increase will occur and the container may burst. |
|--|---|
| Extinguishing media | |
| Suitable | Use an extinguishing agent suitable for the surrounding fire. |
| Not suitable | None known. |
| Special exposure hazards | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Hazardous combustion products | Decomposition products may include the following materials: carbon dioxide carbon monoxide metal oxide/oxides |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

6. Accidental release measures

| Personal precautions | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8). |
|---------------------------|---|---|
| Environmental precautions | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| Large spill | : | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. |
| Small spill | : | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |

7. Handling and storage

| Handling | : Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Persons with a history of skin sensitization problems should not be employed in any |
|----------|--|
| | process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in |

7. Handling and storage

Storage

use. Empty containers retain product residue and can be hazardous. Do not reuse container.

: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Consult local authorities for acceptable exposure limits.

| Engineering measures | : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. |
|----------------------|---|
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Personal protection | |
| Respiratory | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
| Hands | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. |
| Eyes | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. |
| Skin | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |

9. Physical and chemical properties

| Flash point | : Closed cup: 104.4°C (219.9°F) |
|-------------|---------------------------------|
| Color | : Brown. |
| Odor | : Pungent. |
| рН | : 6.5 |
| Density | : ~1.185 g/cm ³ |
| | |

10. Stability and reactivity

| Stability | : | The product is stable. |
|----------------------------------|---|--|
| Conditions to avoid | 1 | No specific data. |
| Materials to avoid | 1 | No specific data. |
| Hazardous decomposition products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
| Hazardous polymerization | : | Under normal conditions of storage and use, hazardous polymerization will not occur. |

9. February 2010

11. Toxicological information

Potential chronic health effects

Chronic effects

: Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Acute toxicity

Conclusion/Summary

12. Ecological information

: Not available.

Environmental effects

: No known significant effects or critical hazards.

13. Disposal considerations

```
Waste disposal
```

: The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

14. Transport information

Notice to reader

The information contained in this Material Safety Data Sheet applies only to the actual Sika Corporation ("Sika") product identified and described herein. This information is not intended to address, nor does it address the use or application of the identified Sika product in combination with any other material, product or process. All of the information set forth herein is based on technical data regarding the identified product that Sika believes to be reliable as of the date hereof. Prior to each use of any Sika product, the user must always read and follow the warnings and instructions on the product's current Technical Data Sheet, product label and Material Safety Data Sheet for each Sika product, which are available at web site and/or telephone number listed in Section 1 of this MSDS.

SIKA MAKES NO WARRANTIES EXPRESS OR IMPLIED AND ASSUMES NO LIABILITY ARISING FROM THIS INFORMATION OR ITS USE. SIKA SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES AND SHALL NOT BE RESPONSIBLE FOR THE USE OF THIS PRODUCT IN A MANNER TO INFRINGE ON ANY PATENT OR ANY OTHER INTELLECTUAL PROPERTY RIGHTS HELD BY OTHERS.

All sales of Sika products are subject to its current terms and conditions of sale available at www.sikacorp.com or 201-933-8800.

SikaViscocrete 1000

1. Product and company identification

| Product name Supplier | SikaViscocrete 1000 Sika Corporation, Construction 201 Polito Avenue Lyndhurst, NJ 07071 www.sikaconstruction.com |
|--------------------------|--|
| Telephone no. | : (201) 933 - 8800 |
| Fax no. | : (201) 804 - 1076 |
| In case of emergency | : CHEMTREC: 800-424-9300 INTERNATIONAL: 703-527-3887 |
| Manufacturer | : Sika Corporation, Operations 201 Polito Avenue Lyndhurst, NJ 07071 www.sikacorp.com |
| Telephone no. | : (201) 933 - 8800 |
| Validation date | : 2. August 2010. |
| Print date | : 2. August 2010. |
| Product type | : Liquid. |

2. Composition/information on ingredients

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

3. Hazards identification

| OSHA/HCS status | : | While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product. |
|--------------------------------|---|--|
| Potential acute health effects | 5 | |
| Inhalation | 1 | May be harmful if inhaled. |
| Ingestion | 1 | May be harmful if swallowed. |
| Skin | 1 | May cause sensitization by skin contact. |

Eyes

: May cause eye irritation.

See toxicological information (section 11)

4. First aid measures

| Eye contact | : | Check for and remove any contact lenses. Get medical attention if irritation occurs. Immediately flush eyes with plenty of water for at least 15 minutes. |
|--------------|---|---|
| Skin contact | : | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. |
| Inhalation | : | Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. Maintain an open airway. |

4. First aid measures

| In | g | e | S | ti | 0 | n |
|----|---|---|---|----|---|---|
| | | | | | | |

: Wash out mouth with water. Move exposed person to fresh air. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person.

Notes to physician

: No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

5. Fire-fighting measures

| Flammability of the product | : In a fire or if heated, a pressure increase will occur and the container may burst. |
|--|---|
| Extinguishing media | |
| Suitable | : Use an extinguishing agent suitable for the surrounding fire. |
| Not suitable | : None known. |
| Special exposure hazards | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Hazardous combustion products | : Decomposition products may include the following materials: carbon dioxide carbon monoxide |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

6. Accidental release measures

| Personal precautions | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8). |
|---------------------------|---|---|
| Environmental precautions | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| Large spill | : | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. |
| Small spill | : | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |

7. Handling and storage

| Handling | : Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Keep in the original container or an approved |
|----------|--|
| | alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |

7. Handling and storage

Storage

: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Consult local authorities for acceptable exposure limits.

| Engineering measures | : No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits. |
|----------------------|---|
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Personal protection | |
| Respiratory | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
| Hands | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. |
| Eyes | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. |
| Skin | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |

9. Physical and chemical properties

| Flash point | : Closed cup: Not applicable. |
|-------------|-------------------------------|
| Color | : Brown. |
| Odor | : Characteristic. |
| рН | : 3.5 to 5.5 |
| Density | : ~1.062 g/cm ³ |
| | |

10. Stability and reactivity

| Stability | : | The product is stable. |
|----------------------------------|---|--|
| Conditions to avoid | : | No specific data. |
| Materials to avoid | : | No specific data. |
| Hazardous decomposition products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
| Hazardous polymerization | : | Under normal conditions of storage and use, hazardous polymerization will not occur. |

11. Toxicological information

Potential chronic health effects

Chronic effects

: Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

- Acute toxicity
- Conclusion/Summary : Not available.

12. Ecological information

Environmental effects

: No known significant effects or critical hazards.

13. Disposal considerations

```
Waste disposal
```

: The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

2. Composition/information on ingredients

Name

Sodium salt of an organic acid

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

3. Hazards identification

| OSHA/HCS status | : | This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). |
|--------------------------------|----|---|
| Potential acute health effects | | |
| Inhalation | 1 | May be irritating to the respiratory system. |
| Ingestion | : | May be harmful if swallowed. |
| Skin | 1 | May cause skin irritation. |
| Eyes | 1 | May cause eye irritation. |
| See toxicological information | (s | ection 11) |

See toxicological information (section 11

4. First aid measures

| Eye contact | : Check for and remove any contact lenses. Get medical attention. Chemical burns must be treated promptly by a physician. Immediately flush eyes with plenty of water for at least 15 minutes. |
|--------------|---|
| Skin contact | Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. |
| Inhalation | : Move exposed person to fresh air. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. Maintain an open airway. |

<mark>%</mark> 7 - 13

CAS number

Mixture

4. First aid measures

Ingestion

: Wash out mouth with water. Move exposed person to fresh air. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person.

: No specific treatment. Treat symptomatically. Contact poison treatment specialist

Notes to physician

immediately if large quantities have been ingested or inhaled.

5. Fire-fighting measures

| Flammability of the product | 1 | In a fire or if heated, a pressure increase will occur and the container may burst. |
|--|---|---|
| Extinguishing media | | |
| Suitable | 1 | Use an extinguishing agent suitable for the surrounding fire. |
| Not suitable | 1 | None known. |
| Special exposure hazards | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Hazardous combustion products | : | Decomposition products may include the following materials: carbon dioxide carbon monoxide phosphorus oxides metal oxide/oxides |
| Special protective equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

6. Accidental release measures

| Personal precautions | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8). |
|---------------------------|---|---|
| Environmental precautions | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| Large spill | : | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. |
| Small spill | : | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |

7. Handling and storage

| Η | aı | ٦C | lli | n | g |
|---|----|----|-----|---|---|
| | | | | | |
| | | | | | |
| | | | | | |

: Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage

: Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Consult local authorities for acceptable exposure limits.

| Engineering measures | : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vap or mist, use process enclosures, local exhaust ventilation or other engineering contro to keep worker exposure to airborne contaminants below any recommended or statu- limits. | oor ds tory | | |
|----------------------|---|-------------------|--|--|
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriet techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety show are close to the workstation location. | riate vers | | |
| Personal protection | | | | |
| Respiratory | Be a properly fitted, air-purifying or air-fed respirator complying with an approved andard if a risk assessment indicates this is necessary. Respirator selection must be used on known or anticipated exposure levels, the hazards of the product and the saf prking limits of the selected respirator. | | | |
| Hands | : Chemical-resistant, impervious gloves complying with an approved standard should the worn at all times when handling chemical products if a risk assessment indicates this necessary. | oe ⊨is | | |
| Eyes | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. | | | |
| Skin | : Personal protective equipment for the body should be selected based on the task bei performed and the risks involved and should be approved by a specialist before hand this product. | ing Iling | | |
| | | | | |

9. Physical and chemical properties

| Color | : 🗭reen. |
|---------|----------------------------|
| Odor | : Odorless. |
| рН | : 8.5 |
| Density | : ~1.152 g/cm ³ |

10. Stability and reactivity

| Stability | : The product is stable. |
|----------------------------------|--|
| Conditions to avoid | : No specific data. |
| Materials to avoid | : No specific data. |
| Hazardous decomposition products | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
| Hazardous polymerization | : Under normal conditions of storage and use, hazardous polymerization will not occur. |

11. Toxicological information

Potential chronic health effects

Chronic effects Acute toxicity : Contains material that may cause target organ damage, based on animal data.

Conclusion/Summary : Not available.

12. Ecological information

Environmental effects : No known significant effects or critical hazards.

13. Disposal considerations

- Waste disposal
- : The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Notice to reader

The information contained in this Material Safety Data Sheet applies only to the actual Sika Corporation ("Sika") product identified and described herein. This information is not intended to address, nor does it address the use or application of the identified Sika product in combination with any other material, product or process. All of the information set forth herein is based on technical data regarding the identified product that Sika believes to be reliable as of the date hereof. Prior to each use of any Sika product, the user must always read and follow the warnings and instructions on the product's current Technical Data Sheet, product label and Material Safety Data Sheet for each Sika product, which are available at web site and/or telephone number listed in Section 1 of this MSDS.

SIKA MAKES NO WARRANTIES EXPRESS OR IMPLIED AND ASSUMES NO LIABILITY ARISING FROM THIS INFORMATION OR ITS USE. SIKA SHALL NOT BE LIABLE UNDER ANY LEGAL THEORY FOR SPECIAL OR CONSEQUENTIAL DAMAGES AND SHALL NOT BE RESPONSIBLE FOR THE USE OF THIS PRODUCT IN A MANNER TO INFRINGE ON ANY PATENT OR ANY OTHER INTELLECTUAL PROPERTY RIGHTS HELD BY OTHERS.

All sales of Sika products are subject to its current terms and conditions of sale available at www.sikacorp.com or 201-933-8800.

Sika Stabilizer 4R

Product and company identification

| Product name | : | Síka Stabilizer 4R |
|----------------------|---|--|
| Supplier | : | Sika Corporation, Operations 201 Polito Avenue Lyndhurst, NJ 07071 www.sikacorp.com |
| Telephone no. | ; | (201) 933 - 8800 |
| Fax no. | : | (201) 804 - 1076 |
| In case of emergency | : | CHEMTREC: 800-424-9300 INTERNATIONAL: 703-527-3887 |
| Manufacturer | : | Sika Coporation, Operations 201 Polito Avenue Lyndhurst, NJ 07071 www.sikacorp.com |
| Telephone no. | : | (201) 903 - 8800 |
| Validation date | : | 15. May 2008. |
| Print date | : | 15. May 2008. |
| Product type | : | Liquid. |

Hazards identification 2

OSHA/HCS status

Inhalation

: While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this MSDS contains valuable information critical to the safe handling and proper use of the product. This MSDS should be retained and available for employees and other users of this product.

Potential acute health effects

: No known significant effects or critical hazards.

- Ingestion : No known significant effects or critical hazards. Skin
 - : No known significant effects or critical hazards.
- **Eyes** : No known significant effects or critical hazards.

See toxicological information (section 11)

3 Composition/information on ingredients

Name

propylene glycol

CAS number <u>%</u> 3 - 7 57-55-6

There are no ingredients or additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

First aid measures 4.

Notes to physician

: No specific treatment. Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

5. Fire-fighting measures

| Flammability of the product | 1 | In a fire or if heated, a pressure increase will occur and the container may burst. |
|---|---|---|
| Extinguishing media | | |
| Suitable | : | Use an extinguishing agent suitable for the surrounding fire. |
| Not suitable | 1 | None known. |
| Special exposure hazards | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Hazardous combustion products | : | Decomposition products may include the following materials: carbon oxides |
| Special protective equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

6. Accidental release measures

| | Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. |
|---------------------------|---|
| | Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8). |
| Environmental precautions | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). |
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. |
| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |
| 7. Handling and | storage |

Handling
 Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Expose controls/personal protection

| - | |
|----------------------|---|
| Product name | Exposure limits |
| propylene glycol | AIHA WEEL (United States, 1/2007). TWA: 10 mg/m³ 8 hour(s). |
| Engineering measures | : No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits. |
| Hygiene measures | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Personal protection | |
| Respiratory | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
| Hands | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. |
| Eyes | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. |
| Skin | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |

9. Physical and chemical properties

| Flash point | : Closed cup: Not applicable. |
|-------------|--|
| Color | : Blue. |
| Odor | : Odorless. |
| рН | : 9.4 |
| Solubility | Easily soluble in the following materials: cold water. |

10. Stability and reactivity

| Stability | : | The product is stable. Under normal conditions of storage and use, hazardous polymerization will not occur. |
|----------------------------------|---|---|
| Conditions to avoid | : | No specific data. |
| Materials to avoid | : | No specific data. |
| Hazardous decomposition products | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

11. Toxicological information

Acute toxicity

Conclusion/Summary : Not available.

15. May 2008

12. Ecological information

Environmental effects

: No known significant effects or critical hazards.

13. Disposal considerations

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

Silica Fume from the production of silicon metal and ferro silicon metal produces trace amounts of crystalline silica. Manufacturer can provide a detailed elemental analysis including other trace elements. The (wt%) values will change if silica fume is from ferro silicon production.

Sikacrete 950-DP

3. Hazards Identification

Eye Hazards

May cause eye irritation.

Skin Hazards

Prolonged skin exposure may cause irritation, drying, or abrasions when wet.

Ingestion Hazards

May be harmful if swallowed.

Inhalation Hazards

Breathing dust may cause nose, throat or lung irritation. Respirable crystalline silica can cause silicosis, a fibrosis (scarring) of the lungs. Silicosis may be progressive.

4. First Aid Measures

Eye

In case of contact, hold eyelids apart and immediately flush eyes with plenty of tepid water for at least 15 minutes. Get medical attention immediately if irritation develops and persists.

<u>Skin</u>

In case of contact, immediately flush skin with soap and plenty of tepid water for at least 15 minutes. Get medical attention immediately if irritation (redness, rash, blistering) develops and persists. Wash clothing before reuse.

Ingestion

If swallowed, do not induce vomiting unless directed to do so by medical personnel.

Inhalation

If inhaled, remove to fresh air. If not breathing, give artificial respiration. Obtain medical attention if irritation develops and persists.

5. Fire Fighting Measures

Flash Point: N/A °F Autoignition Point: N/AV °F Flammability Class: NCMB Lower Explosive Limit: N/AV Upper Explosive Limit: N/AV

Fire And Explosion Hazards

None Known.

Extinguishing Media

Use the appropriate extinguishing media for the surrounding fire. Use water to cool fire-exposed containers.

Fire Fighting Instructions

In the event of a fire, firefighters should wear full protective clothing and NIOSH-approved self-contained breathing apparatus with a full facepiece operated in the pressure demand or other positive pressure mode.

6. Accidental Release Measures

Avoid release to the environment. Using appropriate personal protective equipment (PPE), shovel material into waste containers taking care to minimize dust. Dampen if necessary to control dust. Vacuum clean dust with equipment fitted with High Efficiency Particulate Air (HEPA) filters.

7. Handling And Storage

Handling And Storage Precautions

Keep out of reach of children. Store in a cool, dry, well ventilated area. Keep containers tightly closed. Store away from Hydofluoric Acid and Fluorides, silica will become soluble. Avoid handling procedures that generate airborne

MATERIAL SAFETY DATA SHEET

Sikacrete 950-DP

7. Handling And Storage - Continued

Handling And Storage Precautions - Continued

dust.

Work/Hygienic Practices

Use good personal hygiene. Wash thoroughly with soap and water after handling.

8. Exposure Controls/Personal Protection

Engineering Controls

Use of a system of local and/or general exhaust is recommended to keep employee below applicable exposure limits. Refer to the current edition of "Industrial Ventilation: A Manual of Recommended Practice" published by the American Conference of Governmental Industrial Hygienists for information on the design, installation, use, and maintenance of exhaust systems.

Eye/Face Protection

Safety glasses with side shields or goggles.

Skin Protection

Chemical-resistant gloves. Lab coat or other work clothing to prevent skin exposure (Long sleeve shirt and long pants). Launder before reuse.

Respiratory Protection

A respirator protection program that meets 29 CFR 1910.134 requirement must be followed whenever workplace conditions warrant a respirator's use. In areas where the Permissible Exposure Limits are exceeded, use a properly fitted NIOSH-approved respirator.

Ingredient(s) - Exposure Limits

SILICA, AMORPHOUS ACGIH TLV-TWA 10 mg/m3 OSHA PEL-TWA 20 mppcf OSHA PEL-TWA 80 / %SiO2 mg/m3 SILICA, QUARTZ ACGIH TLV-TWA 0.05 mg/m3 OSHA PEL-TWA 30/%SiO2+2 mg/m3 OSHA PEL-TWA 10/%SiO2+2 mg/m3 OSHA PEL-TWA 250/%SiO+5 mppcf

9. Physical And Chemical Properties

Appearance

Light to Dark Gray Powder

<u>Odor</u>

No Odor

Chemical Type: Mixture Physical State: Solid Melting Point: 2250 °F 1300 °C Boiling Point: N/AV °F Specific Gravity: 2.2 - 2.5 Percent Volatiles: N/AV Packing Density: 4.68 lbs/gal Vapor Pressure: N/AV Vapor Density: N/AV pH Factor: N/AP Solubility: Insoluble in Water

MATERIAL SAFETY DATA SHEET

Sikacrete 950-DP

10. Stability And Reactivity

Stability: Stable

Hazardous Polymerization: Will Not Occur

Conditions To Avoid (Stability)

Hydrofluoric Acid

Hazardous Decomposition Products

Heating silica fume at temperatures above 930F for prolonged time periods will convert amorphous silica to the crystalline phases Cristobalite and Tridymite that may cause silicosis. Increased temperatures will increase the formation rate of these phases.

13. Disposal Considerations

Dispose in accordance with applicable federal, state and local government regulations. Waste generators must determine whether a discarded material is classified as a hazardous waste. USEPA guidelines for the classification determination are listed in 40 CFR Parts 261.3. Additionally, waste generators must consult state and local hazardous waste regulations to ensure complete and accurate classification.

The EMISSION POINTS DATA SUMMARY SHEET provides a summation of emissions by emission unit. Note that uncaptured process emission unit emissions are not typically considered to be fugitive and must be accounted for on the appropriate EMISSIONS UNIT DATA SHEET and on the EMISSION POINTS DATA SUMMARY SHEET. Please note that total emissions from the source are equal to all vented emissions, all fugitive emissions, plus all other emissions (e.g. uncaptured emissions). Please complete the FUGITIVE EMISSIONS DATA SUMMARY SHEET for fugitive emission activities.

¹ Please add descriptors such as upward vertical stack, downward vertical stack, horizontal stack, relief vent, rain cap, etc.

² Indicate by "C" if venting is continuous. Otherwise, specify the average short-term venting rate with units, for intermittent venting (ie., 15 min/hr). Indicate as many rates as needed to clarify frequency of venting (e.g., 5 min/day, 2 days/wk).

³ List all regulated air pollutants. Speciate VOCs, including all HAPs. Follow chemical name with Chemical Abstracts Service (CAS) number. **LIST** Acids, CO, CS₂, VOCs, H₂S, Inorganics, Lead, Organics, O₃, NO, NO₂, SO₂, SO₃, all applicable Greenhouse Gases (including CO₂ and methane), etc. **DO NOT LIST** H₂O, N₂O, O₂, and Noble Gases.

Give maximum potential emission rate with no control equipment operating. If emissions occur for less than 1 hr, then record emissions per batch in minutes (e.g. 5 lb VOC/20 minute batch).

⁵ Give maximum potential emission rate with proposed control equipment operating. If emissions occur for less than 1 hr, then record emissions per batch in minutes (e.g. 5 lb VOC/20 minute batch).

Indicate method used to determine emission rate as follows: MB = material balance; ST = stack test (give date of test); EE = engineering estimate; O = other (specify).

⁷ Provide for all pollutant emissions. Typically, the units of parts per million by volume (ppmv) are used. If the emission is a mineral acid (sulfuric, nitric, hydrochloric or phosphoric) use units of milligram per dry cubic meter (mg/m³) at standard conditions (68 °F and 29.92 inches Hg) (see 45CSR7). If the pollutant is SO₂, use units of ppmv (See 45CSR10).

ATTACHMENT K FUGITIVE EMISSIONS SUMMARY SHEET

Attachment K

FUGITIVE EMISSIONS DATA SUMMARY SHEET

The FUGITIVE EMISSIONS SUMMARY SHEET provides a summation of fugitive emissions. Fugitive emissions are those emissions which could not reasonably pass through a stack, chimney, vent or other functionally equivalent opening. Note that uncaptured process emissions are not typically considered to be fugitive, and must be accounted for on the appropriate EMISSIONS UNIT DATA SHEET and on the EMISSION POINTS DATA SUMMARY SHEET.

Please note that total emissions from the source are equal to all vented emissions, all fugitive emissions, plus all other emissions (e.g. uncaptured emissions).

| | APPLICATION FORMS CHECKLIST - FUGITIVE EMISSIONS |
|--------------|---|
| 1.) | Nill there be haul road activities? |

| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |

1. Enter the appropriate Source Identification Number for each storage tank located at the concrete batch plant.

Storage tanks should be designated T-1, T-2, T-3, etc.

2.Enter storage tank content (#2 fuel oil, asphaltic cement, water, etc.)

3.Enter storage tank length in feet.

4.Enter storage tank diameter in feet.

5. Enter storage tank volume in gallons. Storage tank volume may be calculated using the following mathematical relationship: (length of tank) X (area conversion) X (tank diameter)² X (liquid volume conversion) or, $(L_{tank} ft) X (3.14/4) X (d^2_{tank} ft^2) X (7.48 gallons/ft^3)$

6. Enter storage tank throughput in gallons per year.

Enter storage tank unoughput in gallons per year.
 Enter storage tank orientation using the following codes:

VERT Vertical Tank HORZ Horizontal Tank

8. Enter storage tank average liquid height in feet.

9. Storage tank emissions may be calculated using TANKS emission calculation program.

1. Enter the appropriate Air Pollution Control Device Identification Number for each fabric filter baghouse, filter vent or discharge sock. The devices should be designated APCD-1, APCD-2, APCD-3, etc.

2. Enter method used to clean bags: shaker, pulse jet, reverse jet or other.

3. Complete more than one CBP Air Pollution Control Device Data Sheet if necessary.

4. Enter the fractional efficiency of the fabric filter baghouse.

DUST COLLECTION JET PULSE SYSTEMS

ENVIRONMENTAL INNOVATION...Since 1956 the Vince Hagan Company has been dedicated to innovation in keeping the environment safe and clean. Innovation that has led to the patented design of a horizontal mixer used in hazardous sludge remediation, reclaimers used to keep concrete job sites clean, and dust control systems for every application which are keeping the air we all breathe a whole lot cleaner.

WWW.VINCEHAGAN.COM

"A dust control solution for any concrete batch plant from the inventor of the mobile concrete plant."

Free Standing Jet Pulse Dust Collector

Let the Vince Hagan Company solve your concrete batch plant dust control problems with a free-standing, in-truss, or portable collector. Hagan can take any existing plant, stationary or portable, and retro-fit a dust collection system. Then let an optional fully automatic dust reclaim system pay for your collector by recycling the dust into the fly ash.

In-Truss Jet Pulse Dust Collector

DUST CONTROL

- 1 FREE STANDING JET PULSE DUST COLLECTOR
- 2 DUCTWORK
- 3 DUST RETURN LINE

EXISTING PLANT

- A CEMENT SILO
- B WEIGH BATCHER
- C DUST SHROUD TRUCK FEED POINT

Jet-Pulse Technology... "How it works" continuous cleaning without operator assistance is Jet-Pulse technology.

- A. Dust laden air enters the collector through the bottom of the housing section.
- B. Dust particles are collected on the outside surface of the bags.
- C. Filtered air goes to the clean air chamber and is then exhausted through the outlet.
- D. Periodic pulsing by compressed air removes the accumulated dust from the bags.
- E. Dust falls into a receptacle.
- F. Cleaning frequency and duration are adjustable by solid state timers.

The technology behind the Hagan Jet-Pulse Dust Collection System is that each row of filter bags is equipped with a solid state sequential timer that energizes a solenoid pilot valve, thus triggering the momentary pulse of compressed air through a blow pipe and down into a row of filter bags. This translates to faster and more objective means of controlling dust at your concrete plant.

As the Jet-Pulse Collection system cleans the enviroronment, it also keeps itself clean and makes it easy for anyone to change our heavy duty, snap-in filter bags.

If something doesn't cut your bottom line, it gets cut! The Vince Hagan Company understands this. That's why efficiency of the Jet-Pulse Dust Collection system is important. Our dust control system not only keeps the neighborhood clean and happy, but it also provides the option of recycling the collected dust.

MONITORING/RECORDKEEPING/REPORTING AND TESTING PLANS

Monitoring/Recordkeeping/ Reporting/Testing Plans

Monitoring

Wendell H. Stone Company dba Stone & Company, Inc. (Stone) will monitor hours of operation, raw material (cement) throughput, and pressure drop of the filter vent.

Recordkeeping

Stone will retain records certified by a company official for five (5) years, two (2) years on site, at such time that the West Virginia Department of Protection Division of Air Quality may request said records.

Reporting

Stone will comply with the reporting requirements detailed in the operating permit.

Testing

Testing is not anticipated to be required.

ATTACHMENT P PUBLIC NOTICE

Public Notice

The following Notice of Application will be published in The Dominion Post as required by 45 CSR 13. The legal advertisement affidavit will be forwarded to WVDEP upon receipt.

Notice is given that Wendell H. Stone Company dba Stone & Company, Inc. has applied to the West Virginia Department of Environmental Protection, Division of Air Quality, for a Construction Permit for a Concrete Batch Plant located on 1702 Smithtown Road, in Monongalia County, West Virginia. The site coordinates are: 39.558575°N and 79.989972°W.

The applicant estimates the change in potential to discharge the following Regulated Air Pollutants will be: PM 37.96 tons per year and PM10 2.22 tons per year.

Startup of operations is planned to begin on or about the 1st day of May, 2017. Written comments will be received by the West Virginia Department of Environmental Protection, Division of Air Quality, 601 57th Street, SE, Charleston, WV 25304, for at least 30 calendar days from the date of publication of this notice.

Any questions regarding this permit application should be directed to the DAQ at (304) 926-0499, extension 1250, during normal business hours. Dated this the 27th day of February, 2017.

By: Wendell H. Stone Company dba Stone & Company, Inc. Greg Reshenberg General Manager 1718 Roseytown Road Greensburg, PA 15601
