### Title V Program Applicability Basis

This facility has the potential to emit 26,336 tons per year of SO\(_2\), 8,237 tons per year of NO\(_x\), 306 tons per year of PM\(_{10}\), 209 tons per year of CO, and 2,545 tons per year of HAPS. Due to this facility's potential to emit over 100 tons per year of criteria pollutant, over 10 tons per year of a single HAP, and over 25 tons per year of aggregate HAPs, Allegheny Energy Supply Company, LLC’s Willow Island Power Station is required to have an operating permit pursuant to Title V of the Federal Clean Air Act as amended and 45CSR30.

### Legal and Factual Basis for Permit Conditions

The State and Federally-enforceable conditions of the Title V Operating Permits are based upon the requirements of the State of West Virginia Operating Permit Rule 45CSR30 for the purposes of Title V of the Federal Clean Air Act and the underlying applicable requirements in other state and federal rules.

Conditions from this facility's Rule 13 permit(s) governing construction-related specifications and timing requirements will not be included in the Title V Operating Permit but will remain independently enforceable under the applicable Rule 13 permit(s). All other conditions from this facility's Rule 13 permit(s) governing the source's operation and compliance have been incorporated into this Title V permit in accordance with the "General Requirement Comparison Table," which may be downloaded from DAQ's website.

Determinations and Justifications

- This is a renewal of the Title V permit which was issued on October 17, 2013 and modified on August 23, 2016 and August 27, 2018. Substantial changes to the most recent version of the Title V Permit consist of the following:

1) Title V Boilerplate changes

- Conditions 3.5.3., 3.5.5. and 3.5.6. - These conditions were revised to require electronic submittal of the Title V compliance certifications (annual and semi-annual), self-monitoring reports (MACT, GACT, NSPS, etc.), stack tests and protocols to the WV DAQ.

2) Condition 3.1.9. - This condition contained the requirements of 45CSR39 (CAIR NOx Annual Trading Program). Since CAIR has been replaced with the Cross-State Air Pollution Rule (CSAPR) trading program, the CAIR requirements have been removed from the permit. This condition now contains requirements for the “Cross-State Air Pollution Rule (CSAPR) Trading Program” of 40 CFR §97.406. The requirements of CSAPR have been added in Appendix A of the permit.

3) Condition 3.1.10. - This condition contained requirements of 45CSR40 (CAIR NOx Ozone Season Trading Program). Since CAIR has been replaced with the Cross-State Air Pollution Rule (CSAPR) trading program, the CAIR requirements have been removed from the permit. This condition now contains requirements for the “Cross-State Air Pollution Rule (CSAPR)Trading Program” of 40 CFR §97.806. The requirements of the Transport Rule have been added in Appendix A of the permit.

4) Condition 3.1.11. - This condition contained requirements of 45CSR41 (CAIR SO2 Trading Program). Since CAIR has been replaced with the Cross-State Air Pollution Rule (CSAPR) trading program, the CAIR requirements have been removed from the permit. This condition now contains requirements for the “Cross-State Air Pollution Rule (CSAPR) Trading Program” of 40 CFR §97.606. The requirements of the Transport Rule have been added in Appendix A of the permit.

5) Section 4.0.

- Condition 4.1.13.a. – “(Acid Rain Permit is included in Appendix D)” has been added to this condition and the Acid Rain Permit has been added in Appendix D.

- Condition 4.1.23. – Units W1 and W2 have not operated since 2012. Therefore, the requirements of 40 CFR 63 Subpart UUUUU (MATS) have not been added to the permit. The placeholder language of this condition has been retained and the following paragraph has been added.

  “Units W1 and W2 have not operated since 2012. In the event of a re-start of any of these units, including any modification to the type of fuel combusted, each affected source must be in compliance with all applicable state and federal rules and permitting requirements, including those of 40 CFR 63, Subpart UUUU.”

- Condition 4.1.24. – The auxiliary boilers have not been operated since 2012. Therefore, the requirements of 40 CFR 63 Subpart DDDDD (MACT) have not been added to the permit. The
placeholder language of this condition has been retained and the following paragraph has been added.

“Auxiliary boilers Aux Blr W3A and Aux Blr W3B have not operated since 2012. In the event of a re-start of any of these units, including any modification to the type of fuel combusted, each affected source must be in compliance with all applicable state and federal rules and permitting requirements, including those of 40 CFR 63, Subpart DDDDD.”

6) APPENDIX A – The CAIR requirements have been replaced with the Cross-State Air Pollution Rule Requirements.

7) APPENDIX B – The contact information for the Rule 2 Monitoring Plan has been updated at the request of Allegheny Energy Supply Company through comments submitted on the Pre-Draft/Proposed Permit. Language pertaining to this change has been added to the first page of the plan. The 45CSR2 Monitoring Plan has not been revised and therefore no other changes were made to the plan.

8) APPENDIX D – This appendix which contains the Acid Rain Permit, has been added to the renewal permit.
