**RE: Initial Operating Permit Application
East Mountain Compressor Station
Tyler County, West Virginia
Plant ID No. 095-00080**

Dear Mr. Durham,

Antero Midstream ("Antero") is submitting one (1) original paper copy and two (2) electronic copies of an Initial Operating Permit Application for the existing East Mountain Compressor Station authorized by Permit No. 13-3373A. This operating permit application is being submitted within 12 months of the commencement of the operation of the authorized sources, as required in Permit 13-3373A.

If you have any questions or require further information, please do not hesitate to contact Jena Resnick at (303) 357-7344 or jresnick@anteroresources.com.

Sincerely,

Jena Resnick
Sr. Manager, Environmental & Regulatory Compliance

1.0 Introduction

1.1 Project Overview

Antero Midstream (“Antero”) owns and operates the East Mountain Compressor Station (“the Site”) in Tyler County, West Virginia, authorized under Permit No. R13-3373A. The total site-wide potential to emit (“PTE”) for volatile organic compounds (“VOCs”) and nitrogen oxides (“NOx”) exceeds the 100 ton per year (“tpy”) threshold for major sources; therefore, the site is subject to 45 Code of State Rules (“CSR”) 30, Operating Permits. Antero respectfully submits the enclosed Initial Operating Permit Application for the East Mountain Compressor Station. This operating permit application is being submitted within 12 months of the commencement of the operation of the authorized sources, as required in Permit 13-3373A.

1.2 Site Location

The East Mountain Compressor Station is located seven (7) miles northeast of Pennsboro in Tyler County, West Virginia. Latitude / Longitude: 39.343867° / -80.864170°

1.3 Process Description

Gas from surrounding pipelines enters the facility through receivers and associated slug catcher. From there, the gas is metered and routed through a scrubber and filter separator. Any produced liquids from the scrubber or separator are sent to the 500 barrel (“bbl”) settling tank (Unit ID: T04). Gas from the filter separator is sent to one (1) of 12 2,500 horsepower (“hp”) Caterpillar G3608 lean burn compressor engines (Unit IDs: C-100 through C-1200). The 12 compressor engines are controlled with oxidation catalysts (Control Device IDs: 1C through 12C). Fuel gas for the compressor engines is treated prior to the engines by a fuel conditioning skid with a 0.5 million British Thermal Units per hour (“MMBtu/hr”) heater (Unit ID: FUEL1) to allow more complete combustion. Produced fluids are routed to the settling tank (Unit ID: T04) and compressed gas goes to one (1) of the two (2) triethylene glycol (“TEG”) dehydrators.

The dehydration system for this facility consists of one (1) contact tower that operates with two (2) regenerator and flash tank systems. The TEG dehydrator regenerators (Unit IDs: DEHY1 and DEHY2) contain a flash gas tank and 1.5 MMBtu/hr reboiler. Each dehydrator has a design rate of 225 million standard cubic feet per day (“MMscf/day”). Within each dehydrator unit, vent gas

from the flash gas tank (Unit IDs: DFLSH1 and DFLSH2) is routed to the reboiler (Unit IDs: DREB1 and DREB2) and used as fuel. In the case where the flash tank gas cannot be used by the reboiler due to excess gas or the reboiler being offline, the gas is sent to the Vapor Recovery Units ("VRUs") (Unit IDs: VRU-100 and VRU-200) via the storage tanks (Unit IDs: T01 through T07) and thus controlled by 98%. Emissions from each reboiler are routed to the atmosphere. The dehydrator still vents are controlled by two (2) thermal oxidizers (Unit IDs: TO-1 and TO-2) with at least 98% control efficiency.

Produced fluids from the dehydrators are routed to the settling tank (Unit ID: T04). The dry gas from the dehydration process is either routed to a fuel gas scrubber, metered and routed to the compressors as fuel gas or metered and sent to plant discharge.

All produced fluids enter one (1) 500 bbl settling tank (Unit ID: T04) where the fluids settle out as either condensate or produced water. The produced water goes to three (3) 400 bbl produced water tanks (Unit IDs: T05, T06, and T07) and the condensate goes to three (3) 400 bbl condensate tanks (Unit IDs: T01, T02, and T03). Flashing only occurs at the settling tank as the fluids stabilize in the settling tank before going to the other storage tanks. All seven (7) tanks are connected to a VRU (Unit ID: VRU-100) where tank vapors are collected and recycled back into the gas system right before the initial filter scrubber. A second VRU (Unit ID: VRU-200) is also connected to the tanks as a backup unit. The produced fluids are trucked out via tanker trucks as needed (Unit ID: LDOUT1). Facility production volumes are designed for 300 bbls per day of condensate and 90 bbls per day of produced water.

There are two (2) natural gas engine generators (Unit IDs: GEN1 and GEN2) used at the facility. One (1) 800 kilowatt-electric ("kWe") microturbine generator (Unit ID: GEN1) and one (1) 649 hp PSI Industrial 21.9L certified natural gas generator (Unit ID: GEN2). The Capstone C800 unit (Unit ID: GEN1) is comprised of four (4) 200 kWe units that can be operated individually. The generators supply power to the facility. The generators are permitted at 8,760 hours per year of operation for maximum operational flexibility.

Fugitive emissions from component leaks (Unit ID: FUG) and emissions from pigging venting or blowdown events (Unit ID: VENT1) also occur. There are also insignificant auxiliary storage tanks located at the facility (Unit IDs: TK-100 through TK-105).

2.0 General Forms

The following attachments are included with this application.

1. Checklist for Administrative Completeness
2. Section 1 – General Information
3. Section 2 – Applicable Requirements
4. Section 3 – Facility-Wide Emissions
5. Section 4 – Insignificant Activities
6. Section 5 – Emission Units, Control Devices, and Emission Points
7. Section 6 – Certification of Information

**TITLE V PERMIT APPLICATION CHECKLIST
FOR ADMINISTRATIVE COMPLETENESS**

A complete application is demonstrated when all of the information required below is properly prepared, completed and attached. The items listed below are required information which must be submitted with a Title V permit application. Any submittal will be considered incomplete if the required information is not included.*

<input checked="" type="checkbox"/>	Two signed copies of the application (at least one <u>must</u> contain the original “ <i>Certification</i> ” page signed and dated in blue ink)
<input checked="" type="checkbox"/>	Correct number of copies of the application on separate CDs or diskettes, (i.e. at least one disc per copy)
<input checked="" type="checkbox"/>	*Table of Contents (needs to be included but not for administrative completeness)
<input checked="" type="checkbox"/>	Facility information
<input checked="" type="checkbox"/>	Description of process and products, including NAICS and SIC codes, and including alternative operating scenarios
<input checked="" type="checkbox"/>	Area map showing plant location
<input checked="" type="checkbox"/>	Plot plan showing buildings and process areas
<input checked="" type="checkbox"/>	Process flow diagram(s), showing all emission units, control equipment, emission points, and their relationships
<input checked="" type="checkbox"/>	Identification of all applicable requirements with a description of the compliance status, the methods used for demonstrating compliance, and a Schedule of Compliance Form (ATTACHMENT F) for all requirements for which the source is not in compliance
<input checked="" type="checkbox"/>	Listing of all active permits and consent orders (if applicable)
<input checked="" type="checkbox"/>	Facility-wide emissions summary
<input checked="" type="checkbox"/>	Identification of Insignificant Activities
<input checked="" type="checkbox"/>	ATTACHMENT D - Title V Equipment Table completed for all emission units at the facility except those designated as insignificant activities
<input checked="" type="checkbox"/>	ATTACHMENT E - Emission Unit Form completed for each emission unit listed in the Title V Equipment Table (ATTACHMENT D) and a Schedule of Compliance Form (ATTACHMENT F) for all requirements for which the emission unit is not in compliance
<input checked="" type="checkbox"/>	ATTACHMENT G - Air Pollution Control Device Form completed for each control device listed in the Title V Equipment Table (ATTACHMENT D)
<input type="checkbox"/>	ATTACHMENT H – Compliance Assurance Monitoring (CAM) Plan Form completed for each control device for which the “Is the device subject to CAM?” question is answered “Yes” on the Air Pollution Control Device Form (ATTACHMENT G)
<input checked="" type="checkbox"/>	General Application Forms signed by a Responsible Official
<input type="checkbox"/>	Confidential Information submitted in accordance with 45CSR31

INITIAL/RENEWAL TITLE V PERMIT APPLICATION - GENERAL FORMS

Section 1: General Information

1. Name of Applicant (As registered with the WV Secretary of State's Office): Antero Midstream	2. Facility Name or Location: East Mountain Compressor Station
3. DAQ Plant ID No.: 095-00080	4. Federal Employer ID No. (FEIN): 46-5517375
5. Permit Application Type: <input checked="" type="checkbox"/> Initial Permit When did operations commence? 08/2018 <input type="checkbox"/> Permit Renewal What is the expiration date of the existing permit? N/A <input type="checkbox"/> Update to Initial/Renewal Permit Application	
6. Type of Business Entity: <input checked="" type="checkbox"/> Corporation <input type="checkbox"/> Governmental Agency <input type="checkbox"/> LLC <input type="checkbox"/> Partnership <input type="checkbox"/> Limited Partnership	7. Is the Applicant the: <input type="checkbox"/> Owner <input type="checkbox"/> Operator <input checked="" type="checkbox"/> Both If the Applicant is not both the owner and operator, please provide the name and address of the other party. _____ _____ _____
8. Number of onsite employees: 0	9. Governmental Code: <input checked="" type="checkbox"/> Privately owned and operated; 0 <input type="checkbox"/> County government owned and operated; 3 <input type="checkbox"/> Federally owned and operated; 1 <input type="checkbox"/> Municipality government owned and operated; 4 <input type="checkbox"/> State government owned and operated; 2 <input type="checkbox"/> District government owned and operated; 5
10. Business Confidentiality Claims Does this application include confidential information (per 45CSR31)? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	
If yes, identify each segment of information on each page that is submitted as confidential, and provide justification for each segment claimed confidential, including the criteria under 45CSR§31-4.1, and in accordance with the DAQ's "PRECAUTIONARY NOTICE-CLAIMS OF CONFIDENTIALITY" guidance.	

11. Mailing Address		
Street or P.O. Box: 1615 Wynkoop Street		
City: Denver	State: CO	Zip: 80202
Telephone Number: (720) 357-7310	Fax Number:	

12. Facility Location		
Street: Haymond Ridge Road	City: Pennsboro	County: Tyler
UTM Easting: 511.705 km	UTM Northing: 4354.946 km	Zone: <input checked="" type="checkbox"/> 17 or <input type="checkbox"/> 18
Directions: From Pennsboro, WV, drive on WV-74 N for 5.9 miles. Turn right on to 74/4 and drive for 1.6 miles. Go left at the fork for 74/1 and drive for 0.42 miles. Turn right on 74/1 Haymond Ridge Road. Facility is on the right in 1.1 miles.		
Portable Source? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		
Is facility located within a nonattainment area? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		If yes, for what air pollutants?
Is facility located within 50 miles of another state? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		If yes, name the affected state(s). Ohio and Pennsylvania
Is facility located within 100 km of a Class I Area¹? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		If yes, name the area(s).
If no, do emissions impact a Class I Area¹? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		

¹ Class I areas include Dolly Sods and Otter Creek Wilderness Areas in West Virginia, and Shenandoah National Park and James River Face Wilderness Area in Virginia.

14. Facility Description

List all processes, products, NAICS and SIC codes for normal operation, in order of priority. Also list any process, products, NAICS and SIC codes associated with any alternative operating scenarios if different from those listed for normal operation.

Process	Products	NAICS	SIC
Natural Gas Distribution	Compressed and Dehydrated Natural Gas	211130	1311

Provide a general description of operations.

The East Mountain Compressor Station separates, compresses, and dries gas off the inlet pipeline stream. The station includes twelve (12) compressor engines with oxidation catalysts, two (2) generators, two (2) 225 MMscfd dehydrators with two (2) reboilers, three (3) 400-bbl condensate tanks, three (3) 400-bbl produced water tanks, one (1) 500-bbl settling tank, one (1) 0.5 MMBtu/hr fuel conditioning heater, two (2) thermal oxidizers, two (2) VRU units, liquid loadout operations, fugitive component emissions, and auxiliary tanks.

15. Provide an **Area Map** showing plant location as **ATTACHMENT A**.

16. Provide a **Plot Plan(s)**, e.g. scaled map(s) and/or sketch(es) showing the location of the property on which the stationary source(s) is located as **ATTACHMENT B**. For instructions, refer to "Plot Plan – Guidelines."

17. Provide a detailed **Process Flow Diagram(s)** showing each process or emissions unit as **ATTACHMENT C**. Process Flow Diagrams should show all emission units, control equipment, emission points, and their relationships.

19. Non Applicability Determinations

List all requirements which the source has determined not applicable and for which a permit shield is requested. The listing shall also include the rule citation and the reason why the shield applies.

Please reference SUPPLEMENT S1-Regulatory Discussion for details on negative applicability.

Permit Shield

20. Facility-Wide Applicable Requirements

List all facility-wide applicable requirements. For each applicable requirement, include the underlying rule/regulation citation and/or construction permit with the condition number. (Note: Title V permit condition numbers alone are not the underlying applicable requirements).

Permit R13-3373A Requirements:

2.11 Inspection and Entry – allow any authorized representative of the Secretary to: enter the premises at all reasonable times, have access to and copy records, and perform inspections, sampling and monitoring as needed

2.12 Emergency – definition and affirmative defense instructions

3.1.1 Open burning [45CSR§6-3.1.] – open burning of refuse is prohibited except as noted in 45 CSR §6-3.1

3.1.3 Asbestos [40 CFR §61.145(b) and 45 CSR §34] – search and removal requirements

3.1.5 Permanent shutdown [45CSR§13-10.5.] – definition of permanent shutdown source

3.5.4.1 Operating Fee[45CSR§30] – Annual fees are required

3.5.5 Emission Inventory – as requested by the Secretary, emissions inventories shall be required

4.1.2 Minor Source of HAPs – HAP emissions shall be < 10 tpy of any single HAP or < 25 tpy of any combination of HAPs

4.1.3 Operation and Maintenance of Air Pollution Control Equipment [45CSR§13-5.11.] – to the extent practicable, the permittee shall: install, maintain, and operate all pollution control and monitoring equipment in a manner consistent with safety and good air pollution control practices for minimizing emissions, or comply with a more stringent limit.

4.1.5 Emission units and sources at the facility are limited to those identified in Table 1.0 of this permit or any de minimus sources identified under Table 45-13B

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more information.**

Permit Shield

For all facility-wide applicable requirements listed above, provide monitoring/testing / recordkeeping / reporting which shall be used to demonstrate compliance. If the method is based on a permit or rule, include the condition number and/or citation. (Note: Each requirement listed above must have an associated method of demonstrating compliance. If there is not already a required method in place, then a method must be proposed.)

Permit R13-3373A Requirements:

2.6 Duty to Provide Information – upon request by the Secretary, furnish required documentation

2.7 Duty to Supplement and Correct Information – promptly submit left out supplemental facts or corrected information to the Secretary

2.12.3 Emergency – affirmative defense recordkeeping

2.14 Suspension of Activities – notification shall be submitted within two (2) calendar weeks of passing the sixtieth (60) day of the suspension period

2.18 Startup Notification – shall be submitted within thirty (30) calendar days after startup

3.1.2 Open burning exemptions – notification requirements for exemptions listed in 45 CSR §6-3.1

3.1.3 Asbestos [40 CFR §61.145(b) and 45 CSR §34] – notification shall be submitted ten (10) working days prior to the commencement of any asbestos removal and copies sent to the appropriate agencies

3.1.5 Permanent shutdown [45CSR§13-10.5.] – submit information to the Secretary to contradict permanent shutdown status

3.1.6 Standby Plan for reducing Emissions [45CSR§11-5.2.] – upon request by the Secretary, prepare standby plans for reducing emissions

3.3.1 Stack Testing Requirements [WV Code §22-5-4(a)(14-15) and 45CSR§13] – perform stack tests as required by this section, submit testing protocols to the Secretary at least thirty (30) days prior to any testing, submit notification to the Secretary at least fifteen (15) days prior to any testing, submit stack test results within sixty (60) days of completion

3.4.1 Recordkeeping – Records, including monitoring data, support information (calibration and maintenance records), reports, and notifications shall be kept for five (5) years.

3.5.1 Responsible Official – Submit a certification by the RO for any application form, report, or compliance certification required by this permit

3.5.4.1 Operating Fee[45CSR§30] – Submit certified emissions statement and pay fees in accordance with the submittal requirements of the Division of Air Quality. Maintain receipt records.

3.5.5 Emission Inventory – as requested by the Secretary, submit an emission inventory for the previous year

4.1.1 Record of Monitoring – maintain records of monitoring information according to this section

4.1.4 Record of Malfunctions of Air Pollution Control Equipment – maintain records of the occurrence and duration of any malfunction or operational shutdown during which excess emissions occurred

6.4.5 Maintain records of PTE HAP calculations for the entire affected facility, including compressor engines and ancillary equipment to demonstrate compliance with section 4.1.2

Please Reference WCDEP-DAQ Permit R13-3373A

and SUPPLEMENT S1-Regulatory Discussion for more information.

Are you in compliance with all facility-wide applicable requirements? Yes No

If no, complete the **Schedule of Compliance Form** as **ATTACHMENT F.**

21. Active Permits/Consent Orders

22. Inactive Permits/Obsolete Permit Conditions

Section 3: Facility-Wide Emissions

23. Facility-Wide Emissions Summary [Tons per Year]	
Criteria Pollutants	Potential Emissions (including fugitives)
Carbon Monoxide (CO)	83.91
Nitrogen Oxides (NOx)	100.20
Lead (Pb)	N/A
Particulate Matter (PM_{2.5})¹	10.27
Particulate Matter (PM₁₀)¹	10.27
Total Particulate Matter (TSP)	11.91
Sulfur Dioxide (SO₂)	0.68
Volatile Organic Compounds (VOC)	154.21
Hazardous Air Pollutants ²	Potential Emissions (including fugitives)
Benzene	0.52
Toluene	0.81
Ethylbenzene	0.064
Xylenes	0.24
n-Hexane	1.91
Acetaldehyde	3.90
Acrolein	2.42
Methanol	1.22
Formaldehyde	6.32
Total HAPs	18.17
Regulated Pollutants other than Criteria and HAP	Potential Emissions (including fugitives)
CO_{2e}	166,396

¹PM_{2.5} and PM₁₀ are components of TSP.

²For HAPs that are also considered PM or VOCs, emissions should be included in both the HAPs section and the Criteria Pollutants section.

Section 4: Insignificant Activities**24. Insignificant Activities (Check all that apply)**

- | | |
|-------------------------------------|---|
| <input checked="" type="checkbox"/> | 1. Air compressors and pneumatically operated equipment, including hand tools. |
| <input checked="" type="checkbox"/> | 2. Air contaminant detectors or recorders, combustion controllers or shutoffs. |
| <input checked="" type="checkbox"/> | 3. Any consumer product used in the same manner as in normal consumer use, provided the use results in a duration and frequency of exposure which are not greater than those experienced by consumer, and which may include, but not be limited to, personal use items; janitorial cleaning supplies, office supplies and supplies to maintain copying equipment. |
| <input type="checkbox"/> | 4. Bathroom/toilet vent emissions. |
| <input type="checkbox"/> | 5. Batteries and battery charging stations, except at battery manufacturing plants. |
| <input type="checkbox"/> | 6. Bench-scale laboratory equipment used for physical or chemical analysis, but not lab fume hoods or vents. Many lab fume hoods or vents might qualify for treatment as insignificant (depending on the applicable SIP) or be grouped together for purposes of description. |
| <input type="checkbox"/> | 7. Blacksmith forges. |
| <input type="checkbox"/> | 8. Boiler water treatment operations, not including cooling towers. |
| <input checked="" type="checkbox"/> | 9. Brazing, soldering or welding equipment used as an auxiliary to the principal equipment at the source. |
| <input type="checkbox"/> | 10. CO ₂ lasers, used only on metals and other materials which do not emit HAP in the process. |
| <input checked="" type="checkbox"/> | 11. Combustion emissions from propulsion of mobile sources, except for vessel emissions from Outer Continental Shelf sources. |
| <input type="checkbox"/> | 12. Combustion units designed and used exclusively for comfort heating that use liquid petroleum gas or natural gas as fuel. |
| <input type="checkbox"/> | 13. Comfort air conditioning or ventilation systems not used to remove air contaminants generated by or released from specific units of equipment. |
| <input type="checkbox"/> | 14. Demineralized water tanks and demineralizer vents. |
| <input type="checkbox"/> | 15. Drop hammers or hydraulic presses for forging or metalworking. |
| <input type="checkbox"/> | 16. Electric or steam-heated drying ovens and autoclaves, but not the emissions from the articles or substances being processed in the ovens or autoclaves or the boilers delivering the steam. |
| <input type="checkbox"/> | 17. Emergency (backup) electrical generators at residential locations. |
| <input type="checkbox"/> | 18. Emergency road flares. |
| <input checked="" type="checkbox"/> | 19. Emission units which do not have any applicable requirements and which emit criteria pollutants (CO, NO _x , SO ₂ , VOC and PM) into the atmosphere at a rate of less than 1 pound per hour and less than 10,000 pounds per year aggregate total for each criteria pollutant from all emission units. |

Please specify all emission units for which this exemption applies along with the quantity of criteria pollutants emitted on an hourly and annual basis:

2,000-gallon Compressor Skid Oily Water Tank

4,000-gallon Used oil Tank

1,000-gallon TEG Make-up Tank

2,000-gallon Compressor Coolant Tank

2,000-gallon Engine Lube Oil Tank

2,000-gallon Compressor Lube Oil Tank

Total criteria pollutant emissions for the sources above are < 1 lb/hr and 10,000 lbs/year

24. Insignificant Activities (Check all that apply)

20. Emission units which do not have any applicable requirements and which emit hazardous air pollutants into the atmosphere at a rate of less than 0.1 pounds per hour and less than 1,000 pounds per year aggregate total for all HAPs from all emission sources. This limitation cannot be used for any source which emits dioxin/furans nor for toxic air pollutants as per 45CSR27.

Please specify all emission units for which this exemption applies along with the quantity of hazardous air pollutants emitted on an hourly and annual basis:

2,000-gallon Compressor Skid Oily Water Tank
4,000-gallon Used oil Tank
1,000-gallon TEG Make-up Tank
2,000-gallon Compressor Coolant Tank
2,000-gallon Engine Lube Oil Tank
2,000-gallon Compressor Lube Oil Tank

Total HAP emissions for the sources above are < 0.1 lb/hr and 1,000 lbs/year

- | | |
|-------------------------------------|---|
| <input type="checkbox"/> | 21. Environmental chambers not using hazardous air pollutant (HAP) gases. |
| <input type="checkbox"/> | 22. Equipment on the premises of industrial and manufacturing operations used solely for the purpose of preparing food for human consumption. |
| <input type="checkbox"/> | 23. Equipment used exclusively to slaughter animals, but not including other equipment at slaughterhouses, such as rendering cookers, boilers, heating plants, incinerators, and electrical power generating equipment. |
| <input checked="" type="checkbox"/> | 24. Equipment used for quality control/assurance or inspection purposes, including sampling equipment used to withdraw materials for analysis. |
| <input type="checkbox"/> | 25. Equipment used for surface coating, painting, dipping or spray operations, except those that will emit VOC or HAP. |
| <input checked="" type="checkbox"/> | 26. Fire suppression systems. |
| <input type="checkbox"/> | 27. Firefighting equipment and the equipment used to train firefighters. |
| <input type="checkbox"/> | 28. Flares used solely to indicate danger to the public. |
| <input type="checkbox"/> | 29. Fugitive emission related to movement of passenger vehicle provided the emissions are not counted for applicability purposes and any required fugitive dust control plan or its equivalent is submitted. |
| <input type="checkbox"/> | 30. Hand-held applicator equipment for hot melt adhesives with no VOC in the adhesive formulation. |
| <input checked="" type="checkbox"/> | 31. Hand-held equipment for buffing, polishing, cutting, drilling, sawing, grinding, turning or machining wood, metal or plastic. |
| <input type="checkbox"/> | 32. Humidity chambers. |
| <input type="checkbox"/> | 33. Hydraulic and hydrostatic testing equipment. |
| <input type="checkbox"/> | 34. Indoor or outdoor kerosene heaters. |
| <input checked="" type="checkbox"/> | 35. Internal combustion engines used for landscaping purposes. |
| <input type="checkbox"/> | 36. Laser trimmers using dust collection to prevent fugitive emissions. |
| <input type="checkbox"/> | 37. Laundry activities, except for dry-cleaning and steam boilers. |
| <input type="checkbox"/> | 38. Natural gas pressure regulator vents, excluding venting at oil and gas production facilities. |
| <input type="checkbox"/> | 39. Oxygen scavenging (de-aeration) of water. |
| <input type="checkbox"/> | 40. Ozone generators. |

24. Insignificant Activities (Check all that apply)

<input checked="" type="checkbox"/>	41. Plant maintenance and upkeep activities (e.g., grounds-keeping, general repairs, cleaning, painting, welding, plumbing, re-tarring roofs, installing insulation, and paving parking lots) provided these activities are not conducted as part of a manufacturing process, are not related to the source's primary business activity, and not otherwise triggering a permit modification. (Cleaning and painting activities qualify if they are not subject to VOC or HAP control requirements. Asphalt batch plant owners/operators must still get a permit if otherwise requested.)
<input type="checkbox"/>	42. Portable electrical generators that can be moved by hand from one location to another. "Moved by Hand" means that it can be moved without the assistance of any motorized or non-motorized vehicle, conveyance, or device.
<input type="checkbox"/>	43. Process water filtration systems and demineralizers.
<input type="checkbox"/>	44. Repair or maintenance shop activities not related to the source's primary business activity, not including emissions from surface coating or de-greasing (solvent metal cleaning) activities, and not otherwise triggering a permit modification.
<input checked="" type="checkbox"/>	45. Repairs or maintenance where no structural repairs are made and where no new air pollutant emitting facilities are installed or modified.
<input type="checkbox"/>	46. Routing calibration and maintenance of laboratory equipment or other analytical instruments.
<input type="checkbox"/>	47. Salt baths using nonvolatile salts that do not result in emissions of any regulated air pollutants. Shock chambers.
<input type="checkbox"/>	48. Shock chambers.
<input type="checkbox"/>	49. Solar simulators.
<input type="checkbox"/>	50. Space heaters operating by direct heat transfer.
<input type="checkbox"/>	51. Steam cleaning operations.
<input type="checkbox"/>	52. Steam leaks.
<input type="checkbox"/>	53. Steam sterilizers.
<input checked="" type="checkbox"/>	54. Steam vents and safety relief valves.
<input type="checkbox"/>	55. Storage tanks, reservoirs, and pumping and handling equipment of any size containing soaps, vegetable oil, grease, animal fat, and nonvolatile aqueous salt solutions, provided appropriate lids and covers are utilized.
<input type="checkbox"/>	56. Storage tanks, vessels, and containers holding or storing liquid substances that will not emit any VOC or HAP. Exemptions for storage tanks containing petroleum liquids or other volatile organic liquids should be based on size limits such as storage tank capacity and vapor pressure of liquids stored and are not appropriate for this list.
<input type="checkbox"/>	57. Such other sources or activities as the Director may determine.
<input checked="" type="checkbox"/>	58. Tobacco smoking rooms and areas.
<input type="checkbox"/>	59. Vents from continuous emissions monitors and other analyzers.

Section 5: Emission Units, Control Devices, and Emission Points

25. Equipment Table
Fill out the Title V Equipment Table and provide it as ATTACHMENT D .
26. Emission Units
For each emission unit listed in the Title V Equipment Table , fill out and provide an Emission Unit Form as ATTACHMENT E .
For each emission unit not in compliance with an applicable requirement, fill out a Schedule of Compliance Form as ATTACHMENT F .
27. Control Devices
For each control device listed in the Title V Equipment Table , fill out and provide an Air Pollution Control Device Form as ATTACHMENT G .
For any control device that is required on an emission unit in order to meet a standard or limitation for which the potential pre-control device emissions of an applicable regulated air pollutant is greater than or equal to the Title V Major Source Threshold Level, refer to the Compliance Assurance Monitoring (CAM) Form(s) for CAM applicability. Fill out and provide these forms, if applicable, for each Pollutant Specific Emission Unit (PSEU) as ATTACHMENT H .

Section 6: Certification of Information**28. Certification of Truth, Accuracy and Completeness and Certification of Compliance**

Note: This Certification must be signed by a responsible official. The original, signed in blue ink, must be submitted with the application. Applications without an original signed certification will be considered as incomplete.

a. Certification of Truth, Accuracy and Completeness

I certify that I am a responsible official (as defined at 45CSR§30-2.38) and am accordingly authorized to make this submission on behalf of the owners or operators of the source described in this document and its attachments. I certify under penalty of law that I have personally examined and am familiar with the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine and/or imprisonment.

b. Compliance Certification

Except for requirements identified in the Title V Application for which compliance is not achieved, I, the undersigned hereby certify that, based on information and belief formed after reasonable inquiry, all air contaminant sources identified in this application are in compliance with all applicable requirements.

Responsible official (type or print)

Name: Robert Kreek

Title: VP Midstream

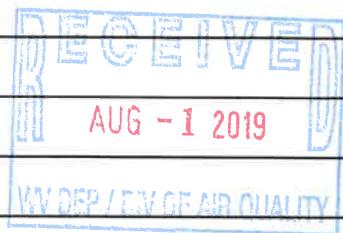

Responsible official's signature:Signature: 

Signature Date: 07/30/2019

(Must be signed and dated in blue ink)

Note: Please check all applicable attachments included with this permit application:

[a] Working, breathing, and flashing losses are routed to Vapor Recovery Units for recirculation back into the process.

[b] 300 bbl/day Condensate and 90 bbl/day Produced Water

ATTACHMENT E

Emission Unit Forms

- 2,500 hp Caterpillar G3608 LB Compressor Engines (C-100 through C-1200)
- 800 kWe Capstone C800 Standard (GEN1)
- 649 hp NG PSI Generators (GEN2)
- Dehydrator Still Vents (DEHY1, DEHY2)
- Dehydrator Flash Tanks (DFLSH1, DFLSH2)
- Dehydrator Reboiler (DREB1, DREB2)
- Condensate Storage Tanks (T01, T02, T03)
- Condensate/Produced Water Settling Tank (T04)
- Produced Water Storage Tanks (T05, T06, T07)
- Fuel Conditioning Heater (FUEL1)
- Liquid Loadout (LDOUT1)
- Venting Episodes (VENT1)
- Fugitives (FUG)

ATTACHMENT E - Emission Unit Form

Emission Unit Description-			
Compressor Engines C-100 through C-1200 (each)			
Emission unit ID number: C-100 through C-1200 (each)	Emission unit name: Compressor Engine #1 through #12 (each)	List any control devices associated with this emission unit: Oxidation Catalyst (1C through 12C, each)	
Provide a description of the emission unit (type, method of operation, design parameters, etc.): Four Stroke, Lean Burn Natural Gas-Fired Compressor Engine with Oxidation Catalyst			
Manufacturer: Caterpillar	Model number: G3608LB	Serial number: N/A	
Construction date: After 7/1/2007	Installation date: 2018	Modification date(s): N/A	
Design Capacity (examples: furnaces - tons/hr, tanks - gallons): 2,500 hp @ 1,000 rpm			
Maximum Hourly Throughput: N/A	Maximum Annual Throughput: N/A	Maximum Operating Schedule: 8,760 hr/yr	
Fuel Usage Data (fill out all applicable fields)			
Does this emission unit combust fuel? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If yes, is it? <input type="checkbox"/> Indirect Fired <input checked="" type="checkbox"/> Direct Fired		
Maximum design heat input and/or maximum horsepower rating: 2,500 hp	Type and Btu/hr rating of burners: N/A		
List the primary fuel type(s) and if applicable, the secondary fuel type(s). For each fuel type listed, provide the maximum hourly and annual fuel usage for each.			
Raw Natural Gas 16,500 scf/hr 144.54 MMscf/yr			
Describe each fuel expected to be used during the term of the permit.			
Fuel Type	Max. Sulfur Content	Max. Ash Content	BTU Value
Natural Gas	<0.01%	negligible	1,241 Btu/scf

*Phase 1 installation date includes Compressor Engines #1 through #8.

*Phase 2 installation date includes Compressor Engines #9 through #12.

CO ₂ e ⁴	2,811	12,311

List the method(s) used to calculate the potential emissions (include dates of any stack tests conducted, versions of software used, source and dates of emission factors, etc.).

1. Values from Manufacturer specification sheet
2. AP-42, Chapter 3.2, Table 3.2-2
3. 40 CFR Part 98, Subpart C, Table C-2
4. 40 CFR Part 98, Subpart A, Table A-1, effective January 2014

Applicable Requirements	C-100 through C-1200 (each)
List all applicable requirements for this emission unit. For each applicable requirement, include the underlying rule/regulation citation and/or construction permit with the condition number. (Note: Title V permit condition numbers alone are not the underlying applicable requirements). If an emission limit is calculated based on the type of source and design capacity or if a standard is based on a design parameter, this information should also be included.	
<u>Permit R13-3373A Requirements:</u>	
<p>5.1.1 Maximum hourly and annual emission limits. Please reference Emissions Data above for exact limits.</p> <p>5.1.4 Emissions limits in section 5.1.1 apply at all times except during periods of MSS that are < 30 minutes per occurrence. Operate engines in a manner consistent with good air pollution control practices, including periods of MSS. Comply with Subpart JJJJ and ZZZZ.</p> <p>5.1.4.a-b (duplicate) The compressor engines shall be equipped with oxidation catalysts and fitted with a closed-loop automatic air/fuel ratio feedback controller to ensure a lean-rich mixture. A high temperature alarm shall also be installed that shuts off the engine before deactivation of the catalyst occurs.</p> <p>5.1.4.c (duplicate) A written operation and maintenance ("O&M") plan is required.</p> <p>5.1.4.d (duplicate) No person shall knowingly: remove, bypass, defeat or render inoperative any air pollution control device subject to the requirements of this permit.</p> <p>10.1 The units must meet applicable requirements in NSPS JJJJ</p> <p>10.2 Maximum emission standards for NSPS JJJJ</p> <p>10.4.4 Propane fuel can be used in emergency operations up to 100 hours per year</p>	

11.1 The units must meet requirements in NSPS Subpart OOOOa for reciprocating compressors

13.1 The units must meet the requirements of MACT ZZZZ by meeting the requirements of NSPS JJJJ

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

X Permit Shield

For all applicable requirements listed above, provide monitoring/testing/recordkeeping/reporting which shall be used to demonstrate compliance. If the method is based on a permit or rule, include the condition number or citation. (Note: Each requirement listed above must have an associated method of demonstrating compliance. If there is not already a required method in place, then a method must be proposed.)

Permit R13-3373A Requirements:

5.1.4.c (duplicate) Conduct periodic and annual maintenance according to the written O&M Plan

5.2.1 Maintain proper operation of the automatic air/fuel ratio controller or automatic feedback controller and follow O&M recommendation of the catalyst element manufacturer

5.3.1 Follow testing requirements as outlined in Section 3.3, 10.5, 11.2, and 11.3 of the permit.

5.4.1. Maintain maintenance records for the catalytic reduction device to demonstrate compliance with 5.1.4 of the permit.

5.4.1 (duplicate) Follow facility-wide reporting requirements as outlined in Section 3.5 and reporting requirements of sections 10.6 and 11.4.

Section 11: NSPS JJJJ

10.4.1.b.2. Keep a maintenance plan and records of conducted maintenance, conduct an initial performance test and conduct subsequent performance testing every 8,760 hours or 3 years, whichever comes first.

10.4.4 Maintain records of propane fuel use. If > 100 hours per year conduct a performance test to demonstrate compliance

10.4.6 Maintain and operate the AFR controller appropriately in order to ensure proper operation of the engine and control device to minimize emissions at all times.

10.5.1 Performance tests must be conducted in accordance with 40 CFR §60.4244

10.6.1.a. Maintain records of: notifications, maintenance, and documentation the engine meets the emission standards

10.6.1.c. Submit initial notification in accordance with 40 CFR §60.4245(a)

10.6.1.d. Submit performance tests within sixty (60) days per 40 CFR §60.4245(d)

Section 12: NSPS OOOOa

11.1.1.a Replace rod packing on or before the compressor has operated for 26,000 hours or 36 months

11.1.1.b Demonstrate initial compliance with standards that apply to reciprocating compressor affected facilities as required by §60.5410a(c)

11.1.1.c Demonstrate continuous compliance with standards that apply to reciprocating compressor affected facilities as required by §60.5410a(c)

11.1.1.d Perform reporting as required by §60.5420a(b)(1) and (4) and the recordkeeping as required by §60.5420a(c)(3), (6) through (9), and (17), as applicable.

11.1, 11.2 & 11.3 Continuously monitor the hours of operation or number of months since last rod packing replacement

11.1, 11.2, 11.3, & 11.4 Submit Initial and Annual Reports in accordance with 40 CFR §60.5420a(b)(1), (4), and (9)

11.1, 11.2, 11.3, & 11.4 Maintain records of hours of operation or number of months since last rod packing replacement, date and time of rod packing replacement, and any deviations

11.4.1 No requirements according to 40 CFR §60.5420a(a)(1)

11.4.2 Submit performance test reports as specified in paragraph (b)(9) of 40 CFR §60.5420a

11.4.3 Maintain reporting and recordkeeping as required by 40 CFR §60.5420a(b)(1) and (4) and §60.5420a(c)(3), (6)-(9), and (17), as applicable, to demonstrate compliance with 12.1.1.d

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

Are you in compliance with all applicable requirements for this emission unit? X Yes No

If no, complete the Schedule of Compliance Form as ATTACHMENT F.

ATTACHMENT E - Emission Unit Form

Emission Unit Description-			
Generator GEN1			
Emission unit ID number: GEN1	Emission unit name: Capstone Microturbine Generator	List any control devices associated with this emission unit: None	
Provide a description of the emission unit (type, method of operation, design parameters, etc.): Natural Gas-Fired Generator Engine			
Manufacturer: Capstone	Model number: C800 Standard	Serial number: N/A	
Construction date: TBD	Installation date: 2018	Modification date(s): N/A	
Design Capacity (examples: furnaces - tons/hr, tanks - gallons): 800 kWe			
Maximum Hourly Throughput: N/A	Maximum Annual Throughput: N/A	Maximum Operating Schedule: 8,760 hr/yr	
Fuel Usage Data (fill out all applicable fields)			
Does this emission unit combust fuel? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		If yes, is it? <input type="checkbox"/> Indirect Fired <input checked="" type="checkbox"/> Direct Fired	
Maximum design heat input and/or maximum horsepower rating: 800 kWe		Type and Btu/hr rating of burners: N/A	
List the primary fuel type(s) and if applicable, the secondary fuel type(s). For each fuel type listed, provide the maximum hourly and annual fuel usage for each.			
Raw Natural Gas 6,695 scf/hr 58.65 MMscf/yr			
Describe each fuel expected to be used during the term of the permit.			
Fuel Type	Max. Sulfur Content	Max. Ash Content	BTU Value
Natural Gas	<0.01%	negligible	1,241 Btu/scf

Applicable Requirements

GEN1

List all applicable requirements for this emission unit. For each applicable requirement, include the underlying rule/regulation citation and/or construction permit with the condition number. (Note: Title V permit condition numbers alone are not the underlying applicable requirements). If an emission limit is calculated based on the type of source and design capacity or if a standard is based on a design parameter, this information should also be included.

Permit R13-3373A Requirements:

5.1.2 Maximum hourly and annual emission limits. Please reference Emissions Data above for exact limits.

5.1.4 Emission limits shall apply at all times except during periods of start-up and shut-down provided that the duration of these periods does not exceed 30 minutes.

Please Reference WCDEP-DAQ Permit R13-3373A

and SUPPLEMENT S1-Regulatory Discussion for more details.

X Permit Shield

For all applicable requirements listed above, provide monitoring/testing/recordkeeping/reporting which shall be used to demonstrate compliance. If the method is based on a permit or rule, include the condition number or citation. (Note: Each requirement listed above must have an associated method of demonstrating compliance. If there is not already a required method in place, then a method must be proposed.)

Permit R13-3373A Requirements:

5.3 Follow facility wide testing requirements as outlined in Section 3.3.

5.5 Follow facility-wide reporting requirements as outlined in Section 3.5.

Please Reference WCDEP-DAQ Permit R13-3373A

and SUPPLEMENT S1-Regulatory Discussion

Are you in compliance with all applicable requirements for this emission unit? X Yes No

If no, complete the Schedule of Compliance Form as ATTACHMENT F.

ATTACHMENT E - Emission Unit Form

Emission Unit Description-			
Generator GEN2			
Emission unit ID number: GEN2	Emission unit name: Natural Gas PSI Generator	List any control devices associated with this emission unit: None	
Provide a description of the emission unit (type, method of operation, design parameters, etc.): Natural Gas-Fired Generator Engine			
Manufacturer: PSI	Model number: Industrial 21.9L	Serial number: N/A	
Construction date: Post – July 1, 2007	Installation date: 2018	Modification date(s): N/A	
Design Capacity (examples: furnaces - tons/hr, tanks - gallons): 649 hp @1,800 rpm			
Maximum Hourly Throughput: N/A	Maximum Annual Throughput: N/A	Maximum Operating Schedule: 8,760 hr/yr	
Fuel Usage Data (fill out all applicable fields)			
Does this emission unit combust fuel? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		If yes, is it? <input type="checkbox"/> Indirect Fired <input checked="" type="checkbox"/> Direct Fired	
Maximum design heat input and/or maximum horsepower rating: 649 bhp		Type and Btu/hr rating of burners: N/A	
List the primary fuel type(s) and if applicable, the secondary fuel type(s). For each fuel type listed, provide the maximum hourly and annual fuel usage for each.			
Raw Natural Gas 4,490 scf/hr 39.33 MMscf/yr			
Describe each fuel expected to be used during the term of the permit.			
Fuel Type	Max. Sulfur Content	Max. Ash Content	BTU Value
Natural Gas	<0.01%	negligible	1,241 Btu/scf

If there is not already a required method in place, then a method must be proposed.)</p> <p><u>Permit R13-3373A Requirements:</u></p> <p>7.2.1 At such reasonable times as the Secretary may designate, conduct Method 9 emission observations to demonstrate compliance with section 7.1.2</p> <p>7.3.1 Conduct Method 9 tests or utilize measurements from continuous opacity monitoring systems approved by the Director to demonstrate compliance with section 7.1.2 [45CSR§2-3.2.]</p> <p>7.4.1 Maintain records of all monitoring data required by permit condition 7.2.1.</p> <p>7.5.1 If deviations from the allowable visible emission requirements are discovered during observations using Method 9 or 22, report to the Director within ten (10) calendar days of the occurrence</p> <p style="text-align: center;">Please Reference WCDEP-DAQ Permit R13-3373A and SUPPLEMENT S1-Regulatory Discussion for more details.</p>	
<p>Are you in compliance with all applicable requirements for this emission unit? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If no, complete the Schedule of Compliance Form as ATTACHMENT F.</p>	

ATTACHMENT E - Emission Unit Form

Emission Unit Description-			
Condensate Tanks T01, T02, T03			
Emission unit ID number: T01, T02, T03 (each)	Emission unit name: Condensate Tanks (each)	List any control devices associated with this emission unit: VRU (14C/15C)	
Provide a description of the emission unit (type, method of operation, design parameters, etc.): Atmospheric Condensate Storage Tanks that are controlled with a VRU and recycled back into the process			
Manufacturer: TBD	Model number: TBD	Serial number: N/A	
Construction date: TBD	Installation date: 2018	Modification date(s): N/A	
Design Capacity (examples: furnaces - tons/hr, tanks - gallons): 400 barrels, each			
Maximum Hourly Throughput: N/A	Maximum Annual Throughput: 1,533,000 gal/yr (each)	Maximum Operating Schedule: 8,760 hr/yr	
Fuel Usage Data (fill out all applicable fields)			
Does this emission unit combust fuel? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		If yes, is it? <input type="checkbox"/> Indirect Fired <input type="checkbox"/> Direct Fired	
Maximum design heat input and/or maximum horsepower rating: N/A		Type and Btu/hr rating of burners: N/A	
List the primary fuel type(s) and if applicable, the secondary fuel type(s). For each fuel type listed, provide the maximum hourly and annual fuel usage for each. N/A			
Describe each fuel expected to be used during the term of the permit.			
Fuel Type	Max. Sulfur Content	Max. Ash Content	BTU Value
N/A			

Emissions Data		T01, T02, T03 (each)	
Criteria Pollutants	Potential Emissions		
	PPH	TPY	
Carbon Monoxide (CO)	N/A	N/A	
Nitrogen Oxides (NO _x)	N/A	N/A	
Lead (Pb)	N/A	N/A	
Particulate Matter (PM _{2.5} /PM ₁₀)	N/A	N/A	
Total Particulate Matter (TSP)	N/A	N/A	
Sulfur Dioxide (SO ₂)	N/A	N/A	
Volatile Organic Compounds (VOC) ¹	0.026	0.12	
Hazardous Air Pollutants	Potential Emissions		
	PPH	TPY	
Benzene ¹	< 0.01	< 0.01	
Toluene ¹	< 0.01	< 0.01	
Ethylbenzene ¹	< 0.01	< 0.01	
Xylene ¹	< 0.01	< 0.01

Regulated Pollutants other than Criteria and HAP	Potential Emissions		
	PPH	TPY	
CH ₄ ¹	N/A	< 0.01	
CO ₂ e ²	N/A	0.065	

List the method(s) used to calculate the potential emissions (include dates of any stack tests conducted, versions of software used, source and dates of emission factors, etc.).

1. Promax 4.0 Software Model Output
2. 40 CFR Part 98, Subpart A, Table A-1, effective January 2014

Applicable Requirements	T01, T02, T03 (each)
<p>List all applicable requirements for this emission unit. For each applicable requirement, include the underlying rule/regulation citation and/or <u>construction permit</u> with the condition number. (Note: <i>Title V permit condition numbers alone are not the underlying applicable requirements</i>). If an emission limit is calculated based on the type of source and design capacity or if a standard is based on a design parameter, this information should also be included.</p>	
<p><u>Permit R13-3373A Requirements:</u></p>	
<p>8.1.1 Route all VOC and HAP emissions from the tanks (Unit IDs: T01-T03) to a VRU System with at least 98% efficiency</p>	
<p>8.1.2 Install, maintain, and operate the VRUs and associated monitoring equipment in a manner consistent with safety and good air pollution control practices or more stringent limits [45CSR§13-5.11.]</p>	
<p>8.1.3 Maximum annual throughput limits from the tanks (Unit IDs: T01-T03). Please reference data above for exact limits.</p>	
<p>8.1.5 Additional VRU Requirements – three (3) of the four (4) options must be utilized: install run status sensing equipment, install an automatic by-pass recycle system, install blanket gas with automatic throttling, and/or a install a compressor with a variable drive</p>	
<p>8.1.6 The VRUs shall be designed and operated in accordance with this section [45CSR§13-5.11]</p>	
<p>8.1.7 The closed vent system shall be designed and operated in accordance with this section [45CSR§13-5.11]</p>	
<p style="text-align: center;">Please Reference WCDEP-DAQ Permit R13-3373A and SUPPLEMENT S1-Regulatory Discussion for more details.</p>	
<p><u>X</u> Permit Shield</p>	
<p>For all applicable requirements listed above, provide monitoring/testing/recordkeeping/reporting which shall be used to demonstrate compliance. If the method is based on a permit or rule, include the condition number or citation. (Note: Each requirement listed above must have an associated method of demonstrating compliance. If there is not already a required method in place, then a method must be proposed.)</p>	
<p><u>Permit R13-3373A Requirements:</u></p>	
<p>8.2.1 Monitor throughput to the storage vessels (Unit IDs: T01-T03) on a monthly basis</p>	
<p>8.2.2 Monitor the VRUs in accordance with the plans and specifications and manufacturer's recommendations to demonstrate compliance with section 8.1.1</p>	
<p>8.2.3a Conduct Initial AVO within 180 days of start-up, repair leaks as soon as practicable, grease requirements, delay of repair requirements</p>	
<p>8.2.3b&c Conduct Annual AVO inspections (with visual bypass inspection) within 365 calendar days from date of previous inspection, repair leaks as soon as practicable, grease requirements, delay of repair requirements</p>	
<p>8.2.3d&e Maintain a written plan for unsafe or difficult to inspect requirements that determines frequency of inspections[45CSR§13-5.11]</p>	
<p>8.3.1. Maintain all records required by section 8.3 for five (5) years.</p>	
<p>8.3.2 Maintain records of VRU equipment inspections and/or preventative maintenance procedures.</p>	
<p>8.3.3 Maintain records according to this section of any malfunction or operational shutdown of the VRU during which excess emissions occur.</p>	
<p>8.3.4 Maintain records of the aggregate throughput for the storage tanks on a monthly and 12-month rolling total for a period of five (5) years to demonstrate compliance with 8.1.3 and 8.1.4</p>	
<p>8.3.5 Maintain a copy of all design records of the process, maintenance records of equipment and any downtime hours associated with the VRUs.</p>	
<p>8.3.6 Maintain records of the additional monitoring required in section 8.1.5 to demonstrate compliance with the 98% control efficiency in section 8.1.1</p>	
<p>8.3.7 Maintain initial compliance records, annual visual inspections, bypass inspections or each time the key is checked out or each time the alarm is sounded, each occurrence that the control device was bypassed, and unsafe or difficult to inspect designations to demonstrate compliance with the closed vent system monitoring requirements. [45CSR§13-5.11]</p>	

8.4.1 At the Director's request, report deviations when the control device was operated outside of the parameters defined in the monitoring plan

8.4.2 Notify the director if VRU downtime in excess of 2% based on the 12-month rolling total within ten (10) calendar days.

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

Are you in compliance with all applicable requirements for this emission unit? X Yes No

If no, complete the **Schedule of Compliance Form** as ATTACHMENT F.

ATTACHMENT E - Emission Unit Form

Emission Unit Description-			
Condensate/Produced Water Settling Tank T04			
Emission unit ID number: T04	Emission unit name: Condensate/Produced Water Settling Tank	List any control devices associated with this emission unit: VRU (14C/15C)	
<p>Provide a description of the emission unit (type, method of operation, design parameters, etc.): All produced fluids enter the settling tank where the fluids settle out as either condensate or produced water. The tank is controlled with a VRU and recycled back into the process. Flash emissions occur in this tank and condensate and produced water are separated and routed to their respective storage tanks.</p>			
Manufacturer: TBD	Model number: TBD	Serial number: N/A	
Construction date: TBD	Installation date: 2018	Modification date(s): N/A	
<p>Design Capacity (examples: furnaces - tons/hr, tanks - gallons): 500 barrels</p>

List the method(s) used to calculate the potential emissions (include dates of any stack tests conducted, versions of software used, source and dates of emission factors, etc.).

1. Promax 4.0 Software Model Output
2. 40 CFR Part 98, Subpart A, Table A-1, effective January 2014

List all applicable requirements for this emission unit. For each applicable requirement, include the underlying rule/regulation citation and/or construction permit with the condition number. (Note: *Title V permit condition numbers alone are not the underlying applicable requirements*). If an emission limit is calculated based on the type of source and design capacity or if a standard is based on a design parameter, this information should also be included.

Permit R13-3373A Requirements:

- 8.1.1** Route all VOC and HAP emissions from the tank (Unit IDs: T04) to a VRU System with at least 98% efficiency
- 8.1.2** Install, maintain, and operate the VRUs and associated monitoring equipment in a manner consistent with safety and good air pollution control practices or more stringent limits [45CSR§13-5.11.]
- 8.1.3** Maximum annual throughput limits from the tank (Unit IDs: T04). Please reference data above for exact limits.
- 8.1.4** Maximum annual emission limits from the tank (Unit IDs: T04). Please reference data above for exact limits.
- 8.1.5 Additional VRU Requirements** – three (3) of the four (4) options must be utilized: install run status sensing equipment, install an automatic by-pass recycle system, install blanket gas with automatic throttling, and/or a install a compressor with a variable drive
- 8.1.6** The VRUs shall be designed and operated in accordance with this section [45CSR§13-5.11]
- 8.1.7** The closed vent system shall be designed and operated in accordance with this section [45CSR§13-5.11]

Please Reference WCDEP-DAQ Permit R13-3373A

and SUPPLEMENT S1-Regulatory Discussion for more details.

Permit Shield

For all applicable requirements listed above, provide monitoring/testing/recordkeeping/reporting which shall be used to demonstrate compliance. If the method is based on a permit or rule, include the condition number or citation. (Note: Each requirement listed above must have an associated method of demonstrating compliance. If there is not already a required method in place, then a method must be proposed.)

Permit R13-3373A Requirements:

- 8.2.1** Monitor throughput to the storage vessels (Unit IDs: T04) on a monthly basis
- 8.2.2** Monitor the VRUs in accordance with the plans and specifications and manufacturer's recommendations to demonstrate compliance with section 8.1.1
- 8.2.3a** Conduct Initial AVO within 180 days of start-up, repair leaks as soon as practicable, grease requirements, delay of repair requirements
- 8.2.3b&c** Conduct Annual AVO inspections (with visual bypass inspection) within 365 calendar days from date of previous inspection, repair leaks as soon as practicable, grease requirements, delay of repair requirements
- 8.2.3d&e** Maintain a written plan for unsafe or difficult to inspect requirements that determines frequency of inspections[45CSR§13-5.11]
- 8.3.1.** Maintain all records required by section 8.3 for five (5) years.
- 8.3.2** Maintain records of VRU equipment inspections and/or preventative maintenance procedures.
- 8.3.3** Maintain records according to this section of any malfunction or operational shutdown of the VRU during which excess emissions occur.
- 8.3.4** Maintain records of the aggregate throughput for the storage tanks on a monthly and 12-month rolling total for a period of five (5) years to demonstrate compliance with 8.1.3 and 8.1.4
- 8.3.5** Maintain a copy of all design records of the process, maintenance records of equipment and any downtime hours associated with the VRUs.
- 8.3.6** Maintain records of the additional monitoring required in section 8.1.5 to demonstrate compliance with the 98% control efficiency in section 8.1.1
- 8.3.7** Maintain initial compliance records, annual visual inspections, bypass inspections or each time the key is checked out or each time the alarm is sounded, each occurrence that the control device was bypassed, and unsafe or difficult to inspect designations to demonstrate compliance with the closed vent system monitoring requirements.

[45CSR§13-5.11]

8.4.1 At the Director's request, report deviations when the control device was operated outside of the parameters defined in the monitoring plan

8.4.2 Notify the director if VRU downtime in excess of 2% based on the 12-month rolling total within ten (10) calendar days.

Applicable Requirements**FUEL1**

List all applicable requirements for this emission unit. For each applicable requirement, include the underlying rule/regulation citation and/or construction permit with the condition number. (Note: *Title V permit condition numbers alone are not the underlying applicable requirements*). If an emission limit is calculated based on the type of source and design capacity or if a standard is based on a design parameter, this information should also be included.

Permit R13-3373A Requirements:

7.1.1 Maximum design heat input

7.1.2 No person shall cause, suffer, allow, or permit emission of smoke/PM greater than ten (10) percent opacity passed on a six-minute block average [45CSR§2-3.1.]

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

X Permit Shield

For all applicable requirements listed above, provide monitoring/testing/recordkeeping/reporting which shall be used to demonstrate compliance. If the method is based on a permit or rule, include the condition number or citation. (Note: Each requirement listed above must have an associated method of demonstrating compliance. If there is not already a required method in place, then a method must be proposed.)

Permit R13-3373A Requirements:

7.2.1 At such reasonable times as the Secretary may designate, conduct Method 9 emission observations to demonstrate compliance with section 7.1.2

7.3.1 Conduct Method 9 tests or utilize measurements from continuous opacity monitoring systems approved by the director to demonstrate compliance with section 7.1.2 [45CSR§2-3.2.]

7.4.1 Maintain records of all monitoring data required by permit condition 7.2.1.

7.5.1 If deviations from the allowable visible emission requirements are discovered during observations using Method 9 or 22, report to the Director within ten (10) calendar days of the occurrence

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

Are you in compliance with all applicable requirements for this emission unit? X Yes No

If no, complete the **Schedule of Compliance Form** as ATTACHMENT F.

ATTACHMENT E - Emission Unit Form

Emission Unit Description-			
Liquid Loadout LDOUT1			
Emission unit ID number: LDOUT1	Emission unit name: Production Liquids Truck Loadout	List any control devices associated with this emission unit: None	
Provide a description of the emission unit (type, method of operation, design parameters, etc.): Loadout of condensate and produced water from storage tanks			
Manufacturer: N/A	Model number: N/A	Serial number: N/A	
Construction date: TBD	Installation date: 2018	Modification date(s): N/A	
Design Capacity (examples: furnaces - tons/hr, tanks - gallons): 4,599,000 gal/yr of condensate and 1,379,700 gal/yr of produced water			
Maximum Hourly Throughput: 682.5 gal/hour	Maximum Annual Throughput: 5,978,700 gal/yr	Maximum Operating Schedule: 8,760 hr/yr	
Fuel Usage Data (fill out all applicable fields)			
Does this emission unit combust fuel? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		If yes, is it? <input type="checkbox"/> Indirect Fired <input type="checkbox"/> Direct Fired	
Maximum design heat input and/or maximum horsepower rating: N/A		Type and Btu/hr rating of burners: N/A	
List the primary fuel type(s) and if applicable, the secondary fuel type(s). For each fuel type listed, provide the maximum hourly and annual fuel usage for each. N/A			
Describe each fuel expected to be used during the term of the permit.

<p>Are you in compliance with all applicable requirements for this emission unit? <u><input checked="" type="checkbox"/> Yes</u> <u><input type="checkbox"/> No</u></p>	
<p>If no, complete the Schedule of Compliance Form as ATTACHMENT F.</p>	

ATTACHMENT F

Schedule of Compliance Form

ATTACHMENT F - Schedule of Compliance Form

Complete this section if you indicated noncompliance with any of the applicable requirements identified in the permit application. For each emission unit which is not in compliance, identify the applicable requirement, the reason(s) for noncompliance, a description of how the source will achieve compliance, and a detailed schedule of compliance. If there is a consent order that applies to this requirement, attach a copy to this form.

1. Applicable Requirement

Unit(s):	Applicable Requirement:
----------	-------------------------

2. Reason for Noncompliance:

3. How will Compliance be Achieved?

4. Consent Order Number (if applicable):

5. Schedule of Compliance. Provide a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance, including a date for final compliance.

Remedial Measure or Action	Date to be Achieved

6. Submittal of Progress Reports.

Content of Progress Report:	Report starting date: MM/DD/YYYY Submittal frequency:
-----------------------------	--

ATTACHMENT G

Air Pollution Control Device Forms

- Oxidation Catalysts for Caterpillar Engines (1C through 12C)
- Thermal Oxidizers (16C, 17C)
- Dehydrator Reboilers (16E, 19E)
- VRUs (14C, 15C)

ATTACHMENT G - Air Pollution Control Device Form

Control device ID number: Oxidation Catalysts: 1C through 12C	List all emission units associated with this control device. Compressor Engine #1 through #12: C-100 though C-1200 (1E through 12E)	
Manufacturer: TBD	Model number: TBD	Installation date: 2018

Type of Air Pollution Control Device:		
<input type="checkbox"/> Baghouse/Fabric Filter	<input type="checkbox"/> Venturi Scrubber	<input type="checkbox"/> Multicloner
<input type="checkbox"/> Carbon Bed Adsorber	<input type="checkbox"/> Packed Tower Scrubber	<input type="checkbox"/> Single Cyclone
<input type="checkbox"/> Carbon Drum(s)	<input type="checkbox"/> Other Wet Scrubber	<input type="checkbox"/> Cyclone Bank
<input type="checkbox"/> Catalytic Incinerator	<input type="checkbox"/> Condenser	<input type="checkbox"/> Settling Chamber
<input type="checkbox"/> Thermal Incinerator	<input type="checkbox"/> Flare	<input checked="" type="checkbox"/> Other: Oxidation Catalyst
<input type="checkbox"/> Wet Plate Electrostatic Precipitator	<input type="checkbox"/> Dry Plate Electrostatic Precipitator	

List the pollutants for which this device is intended to control and the capture and control efficiencies.		
Pollutant	Capture Efficiency	Control Efficiency
CO	N/A	94%
VOC	N/A	49%
HCHO	N/A	88%

Explain the characteristic design parameters of this control device (flow rates, pressure drops, number of bags, size, temperatures, etc.).

Permit R13-3373A Requirements:

5.1.4.a-b (duplicate) The compressor engines shall be equipped with oxidation catalysts and fitted with a closed-loop automatic air/fuel ratio feedback controller to ensure a lean-rich mixture. A high temperature alarm shall also be installed that shuts off the engine before deactivation of the catalyst occurs.

5.1.4.c (duplicate) A written operation and maintenance (“O&M”) plan is required.

5.1.4.d (duplicate) No person shall knowingly: remove, bypass, defeat or render inoperative any air pollution control device subject to the requirements of this permit.

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

Is this device subject to the CAM requirements of 40 C.F.R. 64? Yes X No

If Yes, **Complete ATTACHMENT H**

If No, **Provide justification.**

Unit does not meet the definition of a large Pollutant-Specific Emissions Unit (PSEU): a PSEU with potential post-control device emissions of an applicable regulated air pollutant that are equal to or greater than Major Source Threshold Levels. Therefore, CAM does not need to be addressed in the CAM Plan Submittal according to the initial application Basis of CAM Submittal instructions in Attachment H.

Describe the parameters monitored and/or methods used to indicate performance of this control device.

Permit R13-3373A Requirements:

5.1.4.b (duplicate) Monitor the inlet catalyst temperature in accordance with manufacturer's specifications. If the engine shuts off due to high temperature, check for thermal deactivation of the catalyst before normal operations resume.

5.2.1 Maintain proper operation of the automatic air/fuel ratio controller or automatic feedback controller and follow O&M recommendation of the catalyst element manufacturer

5.4.1 Maintain maintenance records for the catalytic reduction device to demonstrate compliance with 5.1.4 of the permit.

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

ATTACHMENT G - Air Pollution Control Device Form

Control device ID number: Thermal Oxidizers: TO-1 (16C) and TO-2 (17C)	List all emission units associated with this control device. TEG Dehydrator Still Vents: DEHY1 and DEHY2	
Manufacturer: TBD	Model number: TBD	Installation date: 2018

Type of Air Pollution Control Device:

| <input type="checkbox"/> Wet Plate Electrostatic Precipitator | | <input type="checkbox"/> Dry Plate Electrostatic Precipitator |

List the pollutants for which this device is intended to control and the capture and control efficiencies.

Pollutant	Capture Efficiency	Control Efficiency
VOC	N/A	98%
HAPs	N/A	98%

Explain the characteristic design parameters of this control device (flow rates, pressure drops, number of bags, size, temperatures, etc.).

Permit R13-3373A Requirements:

6.1.3 The thermal oxidizers shall be designed and operated in accordance with this section – vapors that are being controlled by the thermal oxidizer shall be routed to them at all times, operate according to manufacturer's specifications for residence time and minimum combustion chamber temperature, operate at all times when emissions are vented to them, no visible emissions (except for periods not to exceed 5 minutes during any 2 consecutive hours), flame shall be present at all times.

6.1.4 Thermal oxidizer maximum hourly and annual emission limits.

6.2.1 The pilot flame shall be continuously monitored using a thermocouple or equivalent device and shall be equipped with an alarm or remote alarm when the pilot is out

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

Is this device subject to the CAM requirements of 40 C.F.R. 64? Yes No Deferred

If Yes, **Complete ATTACHMENT H**

If No, **Provide justification.**

Unit does not meet the definition of a large Pollutant-Specific Emissions Unit (PSEU): a PSEU with potential post-control device emissions of an applicable regulated air pollutant that are equal to or greater than Major Source Threshold Levels. Therefore, CAM does not need to be addressed in the CAM Plan Submittal according to the initial application Basis of CAM Submittal instructions in Attachment H.

Describe the parameters monitored and/or methods used to indicate performance of this control device.

Permit R13-3373A Requirements:

6.1.3 (e) To ensure compliance with permit condition 6.1.3 (d), monitor in accordance with section 6.2.1

6.1.3 (g) Monitor the thermal oxidizer(s) to ensure that they are operated and maintained in conformance with their designs.

6.2.1 Monitor the presence or absence of the pilot flame, using a thermocouple or equivalent device, to show compliance with section 6.1.3.b

6.3.1 & 6.4.4 Conduct Method 22 test for at least two hours within one (1) year of initial startup to demonstrate compliance with section 6.1.3f. Maintain records of opacity tests.

6.4.1 Maintain records of the times and duration of all periods which the pilot flame was absent to demonstrate compliance with section 6.1.3b and 6.2.1

6.4.3 Document and maintain records required by sections 6.2 (monitoring) and 6.3 (testing)

6.4.2 Maintain records of testing conducted in accordance with 6.3.2 to demonstrate compliance with section 6.1.3 and 6.3.2

6.4.8 Maintain all records required by section 6.4 for a period of five (5) years

6.5.1 If required by the Director to comply with section 6.3.3, submit a testing protocol at least thirty (30) days prior to any testing, submit notification at least fifteen (15) days prior to any testing, submit test results within sixty (60) days of completion, including supporting calculations and testing data

6.5.2 If deviations from the allowable visible emission requirements are discovered during observations using Method 9 or 22, report to the Director within ten (10) calendar days of the occurrence

6.5.3 If deviations from the flare design and operation criteria in section 6.1.3 occur, report to the Director within ten (10) calendar days of such deviation

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

ATTACHMENT G - Air Pollution Control Device Form

Control device ID number: TEG Dehydrator Unit Reboilers: DREB1 (16E) and DREB2 (19E)	List all emission units associated with this control device. TEG Dehydrator Flash Tanks: DFLSH1 and DFSLH2

Pollutant	Capture Efficiency	Control Efficiency
VOC	N/A	98%
HAPs	N/A	98%

Explain the characteristic design parameters of this control device (flow rates, pressure drops, number of bags, size, temperatures, etc.).

Permit R13-3373A Requirements:

6.1.2 Design and operation guidance for recycled reboilers- vapors/overheads from the flash tanks shall be routed through a closed vent system to the reboiler at all times, the reboiler shall only be fired with vapors from the flash tank and natural gas as supplemental fuel, vapors/overheads may only be introduced into the flame zone of the reboiler, and during downtime the gas shall be sent to the vapor recovery units.

7.1.1 Maximum design heat input of reboilers. Please reference data above for exact limits.

7.1.2 No person shall cause, suffer, allow, or permit emission of smoke/PM greater than ten (10) percent opacity passed on a six minute block average [45CSR§2-3.1.]

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

Is this device subject to the CAM requirements of 40 C.F.R. 64? Yes No X Deferred

If Yes, Complete ATTACHMENT H

If No, Provide justification.

Unit does not meet the definition of a large Pollutant-Specific Emissions Unit (PSEU): a PSEU with potential post-control device emissions of an applicable regulated air pollutant that are equal to or greater than Major Source Threshold Levels. Therefore, CAM does not need to be addressed in the CAM Plan Submittal according to the initial application Basis of CAM Submittal instructions in Attachment H.

Describe the parameters monitored and/or methods used to indicate performance of this control device.

Permit R13-3373A Requirements:

7.2.1 At such reasonable times as the Secretary may designate, conduct Method 9 emission observations to demonstrate compliance with section 7.1.2

7.3.1 Conduct Method 9 tests or utilize measurements from continuous opacity monitoring systems approved by the Director to demonstrate compliance with section 7.1.2 [45CSR§2-3.2.]

7.4.1 Maintain records of all monitoring data required by permit condition 7.2.1.

7.5.1 If deviations from the allowable visible emission requirements are discovered during observations using Method 9 or 22, report to the Director within ten (10) calendar days of the occurrence

**Please Reference WCDEP-DAQ Permit R13-3373A
and SUPPLEMENT S1-Regulatory Discussion for more details.**

ATTACHMENT G - Air Pollution Control Device Form

Control device ID number: Vapor Recovery Units: VRU-100 (14C), VRU-200 (15C)	List all emission units associated with this control device. Hydrocarbon/Produced Water Tanks: T01 through T07 TEG Dehydrator Flash Tanks: DFLSH1 and DFLSH2	
Manufacturer: TBD	Model number: TBD	Installation date: 2018

Type of Air Pollution Control Device:		
<input type="checkbox"/> Baghouse/Fabric Filter	<input type="checkbox"/> Venturi Scrubber	<input type="checkbox"/> Multicloner
<input type="checkbox"/> Carbon Bed Adsorber	<input type="checkbox"/> Packed Tower Scrubber	<input type="checkbox"/> Single Cyclone
<input type="checkbox"/> Carbon Drum(s)	<input type="checkbox"/> Other Wet Scrubber	<input type="checkbox"/> Cyclone Bank
<input type="checkbox"/> Catalytic Incinerator	<input type="checkbox"/> Condenser	<input type="checkbox"/> Settling Chamber
<input type="checkbox"/> Thermal Incinerator	<input type="checkbox"/> Flare	<input checked="" type="checkbox"/> Other: Vapor Recovery (VRU)
<input type="checkbox"/> Wet Plate Electrostatic Precipitator		<input type="checkbox"/> Dry Plate Electrostatic Precipitator

List the pollutants for which this device is intended to control and the capture and control efficiencies.		
Pollutant	Capture Efficiency	Control Efficiency
VOC	98%	N/A
HAPs	98%	N/A

Explain the characteristic design parameters of this control device (flow rates, pressure drops, number of bags, size, temperatures, etc.).

VRU-100 is the primary VRU to collect storage tank vapors and VRU-200 is the backup VRU in times when the primary VRU is undergoing maintenance or shutdown. During reboiler downtime, flash tank gas will be sent to the VRU.

Permit R13-3373A Requirements:

8.1.1 Route all VOC and HAP emissions from the tanks (Unit IDs: T01-T07) to a VRU System with at least 98% efficiency

8.1.2 Install, maintain, and operate the VRUs and associated monitoring equipment in a manner consistent with safety and good air pollution control practices or more stringent limits [45CSR§13-5.11.]

8.1.5 Additional VRU Requirements – three (3) of the four (4) options must be utilized: install run status sensing equipment, install an automatic by-pass recycle system, install blanket gas with automatic throttling, and/or a install a compressor with a variable drive

8.1.6 The VRUs shall be designed and operated in accordance with this section [45CSR§13-5.11]

8.1.7 The closed vent system shall be designed and operated in accordance with this section [45CSR§13-5.11]

Is this device subject to the CAM requirements of 40 C.F.R. 64? Yes X No closed loop system, however claiming 98% efficiency.

If Yes, **Complete ATTACHMENT H**

If No, **Provide justification.**

Unit does not meet the definition of a large Pollutant-Specific Emissions Unit (PSEU): a PSEU with potential post-control device emissions of an applicable regulated air pollutant that are equal to or greater than Major Source Threshold Levels. Therefore, CAM does not need to be addressed in the CAM Plan Submittal according to the initial application Basis of CAM Submittal instructions in Attachment H.

Describe the parameters monitored and/or methods used to indicate performance of this control device.

Permit R13-3373A Requirements:

8.2.2 Monitor the VRUs in accordance with the plans and specifications and manufacturer's recommendations to demonstrate compliance with section 8.1.1

8.3.1. Maintain all records required by section 8.3.

8.3.2 Maintain records of VRU equipment inspections and/or preventative maintenance procedures.

8.3.3 Maintain records according to this section of any malfunction or operational shutdown of the VRU during which excess emissions occur.

8.3.5 Maintain a copy of all design records of the process, maintenance records of equipment and any downtime hours associated with the VRUs.

8.3.6 Maintain records of the additional monitoring required in section 8.1.5 to demonstrate compliance with the 98% control efficiency in section 8.1.1

8.3.7 Maintain initial compliance records, annual visual inspections, bypass inspections or each time the key is checked out or each time the alarm is sounded, each occurrence that the control device was bypassed, and unsafe or difficult to inspect designations to demonstrate compliance with the closed vent system monitoring requirements. [45CSR§13-5.11]

8.4.1 At the Director's request, report deviations when the control device was operated outside of the parameters defined in the monitoring plan

8.4.2 Notify the director if VRU downtime in excess of 2% based on the 12-month rolling total within ten (10) calendar days

Please Reference WCDEP-DAQ Permit R13-3373A
and **SUPPLEMENT S1-Regulatory Discussion for more details**

ATTACHMENT H

Compliance Assurance Monitoring Form

ATTACHMENT H - Compliance Assurance Monitoring (CAM) Plan Form

For definitions and information about the CAM rule, please refer to 40 CFR Part 64. Additional information (including guidance documents) may also be found at <http://www.epa.gov/ttn/emc/cam.html>

CAM APPLICABILITY DETERMINATION

- 1) Does the facility have a PSEU (Pollutant-Specific Emissions Unit considered separately with respect to EACH regulated air pollutant) that is subject to CAM (40 CFR Part 64), which must be addressed in this CAM plan submittal? To determine applicability, a PSEU must meet all of the following criteria (*If No, then the remainder of this form need not be completed*):
- The PSEU is located at a major source that is required to obtain a Title V permit;
 - The PSEU is subject to an emission limitation or standard for the applicable regulated air pollutant that is NOT exempt;
- LIST OF EXEMPT EMISSION LIMITATIONS OR STANDARDS:**
- NSPS (40 CFR Part 60) or NESHAP (40 CFR Parts 61 and 63) proposed after 11/15/1990.
 - Stratospheric Ozone Protection Requirements.
 - Acid Rain Program Requirements.
 - Emission Limitations or Standards for which a WVDEP Division of Air Quality Title V permit specifies a continuous compliance determination method, as defined in 40 CFR §64.1.
 - An emission cap that meets the requirements specified in 40 CFR §70.4(b)(12).
- The PSEU uses an add-on control device (as defined in 40 CFR §64.1) to achieve compliance with an emission limitation or standard;
 - The PSEU has potential pre-control device emissions of the applicable regulated air pollutant that are equal to or greater than the Title V Major Source Threshold Levels; AND
 - The PSEU is NOT an exempt backup utility power emissions unit that is municipally-owned.

BASIS OF CAM SUBMITTAL

- 2) Mark the appropriate box below as to why this CAM plan is being submitted as part of an application for a Title V permit:
- RENEWAL APPLICATION.** ALL PSEUs for which a CAM plan has NOT yet been approved need to be addressed in this CAM plan submittal.
- INITIAL APPLICATION** (submitted after 4/20/98). ONLY large PSEUs (i. e., PSEUs with potential post-control device emissions of an applicable regulated air pollutant that are equal to or greater than Major Source Threshold Levels) need to be addressed in this CAM plan submittal.
- SIGNIFICANT MODIFICATION TO LARGE PSEUs.** ONLY large PSEUs being modified after 4/20/98 need to be addressed in this cam plan submittal. For large PSEUs with an approved CAM plan, Only address the appropriate monitoring requirements affected by the significant modification.

4.0 Supplements

The following supplemental documents are included with this renewal.

1. Supplement S1 – Regulatory Discussion
2. Supplement S2 – Facility-wide Emissions Summary

SUPPLEMENT S1

Regulatory Discussion

Federal Regulations and Applicability Discussion

This section presents a review of the potentially applicable federal regulations:

- Title 40 CFR Part 60 – New Source Performance Standards ("NSPS")
- Title 40 CFR Part 61 – National Emission Standards for Hazardous Air Pollutants ("NESHAP")
- Title 40 CFR Part 63 – NESHAPs for Source Categories (aka "MACT")

Sub-part	Title 40 CFR Part 60, Standards of Performance for:	Rule Applicability Review	
A	General Provisions:	Y	This site is subject to a NSPS and is, therefore, subject to the general provisions of this subpart.
Db	Industrial-Commercial-Institutional Steam Generating Units	N	This site does not operate a steam generating unit > 100 MMBtu/hr; therefore, this subpart does not apply.
Dc	Small Industrial-Commercial-Institutional Steam Generating Units	N	This site does not operate a steam generating unit > 10 MMBtu/hr but < 100 MMBtu/hr; therefore, this subpart does not apply.
K	Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After 6/11/1973, and Prior to 5/19/1978	N	The storage tank(s) at the site did not commence construction, reconstruction, or modification after June 11, 1973 and prior to May 19, 1978; therefore, this subpart does not apply.
Ka	Storage Vessels for Petroleum Liquids for Which Construction, Reconstruction, or Modification Commenced After 5/18/1978 and Prior to 7/23/1984	N	The storage tank(s) at the site did not commence construction, reconstruction, or modification after May 18, 1978 and prior to July 23, 1984; therefore, this subpart does not apply.
Kb	Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After 7/23/1984	N	The storage tank(s) at the site commenced construction after July 23, 1984; however, each tank has a storage capacity less than 1,589.874 m ³ and is used for petroleum or condensate stored prior to custody transfer; therefore, per §60.110b(d)(4) this subpart does not apply.
GG	Stationary Gas Turbines	N	Since the microturbine generators at the site will have a heat input rating less than 10 million Btu per hour, Subpart GG does not apply.
KKK	Equipment Leaks of VOC From Onshore Natural Gas Processing Plants for Which Construction, Reconstruction, or Modification Commenced After 1/20/1984, and on or Before 8/23/2011	N	This site does not meet the definition of natural gas processing plant as defined in 40 CFR §60.631; therefore, this subpart does not apply.
LLL	SO ₂ Emissions From Onshore Natural Gas Processing for Which Construction, Reconstruction, or Modification Commenced after 1/20/1984, and on or before 8/23/2011	N	This site does not meet the definition of natural gas processing plant as defined in 40 CFR §60.631 and did not commence construction, reconstruction, or modification after January 20, 1984 and prior to August 23, 2011; therefore, this subpart does not apply.
III	Stationary Compression Ignition Internal Combustion Engine.	N	This site does not operate an affected facility under this subpart; therefore, this subpart does not apply.

Federal Regulations and Applicability Discussion

Sub-part	Title 40 CFR Part 60, Standards of Performance for:	Rule Applicability Review
JJJJ	Stationary Compression Ignition Internal Combustion Engine.	<p>Y The stationary spark-ignited internal combustion engines at the site (Unit IDs: C-100 through C-1200 and GEN2) are non-emergency, ≥ 500 hp and were manufactured on or after July 1, 2007; therefore, are subject to this subpart per 60.4230(a)(4)(i). Antero will maintain compliance with the applicable testing, reporting, monitoring, and recordkeeping requirements of this subpart.</p>
KKKK	Stationary Combustion Turbines	<p>N Since the microturbine generators at the site will have a heat input rating less than 10 million Btu per hour, this subpart does not apply.</p>
OOOO	Crude Oil and Natural Gas Production, Transmission and Distribution for which Construction, Modification, or Reconstruction Commenced after August 23, 2011, and on or before September 18, 2015	<p>N This site was constructed after September 18, 2015 and does not operate an affected facility under this subpart; therefore, this subpart does not apply.</p>
OOO0a	Crude Oil and Natural Gas Facilities for which Construction, Modification, or Reconstruction Commenced after September 18, 2015	<p>The site will potentially operate affected facilities, commencing construction, modification, or reconstruction after September 18, 2015; therefore, there are potential requirements under this subpart (per §60.5365a) for the following facilities covered by this subpart:</p> <ul style="list-style-type: none"> • <u>Well affected facility</u>: A well affected facility is a single well that is hydraulically fractured or refractured. This site does not include any well affected facilities. There are no further requirements. • <u>Reciprocating compressors</u>: The on-site reciprocating compressors are an affected facility in compliance with the applicable requirements of this subpart. • <u>Pneumatic controller</u>: All on-site pneumatic controllers are continuous bleed electric or powered by compressed air, not natural gas-driven powered by pressurized natural gas; therefore, they are not affected facilities. • <u>Storage vessel with PTE > 6 tpy VOC</u>: Each storage tank at this site has PTE VOC emissions < 6 tpy as determined in accordance with this rule; therefore, there are no further requirements. • <u>Pneumatic pump</u>: A pneumatic pump affected facility is only located at a natural gas processing plant or well site. The pneumatic pumps are located at a compressor station; therefore, they are not affected facilities. • <u>The collection of fugitive emissions components at a compressor station is an affected facility</u>: This site is a compressor station (as defined in this rule); therefore, is an affected facility in compliance with the applicable requirements of this subpart.

Federal Regulations and Applicability Discussion

Sub-part	Title 40 CFR Part 61, NESHAP	Rule Applicability Review	
A	General Provisions	N	The site handles oil/condensate that may contain benzene, which is a regulated HAP under Part 61. Based on the evaluation of the potentially applicable subparts, there are no applicable requirements under 40 CFR Part 61.
V	National Emission Standards for Equipment Leaks (Fugitive Emission Sources)	N	No sources at this site are intended to operate in volatile hazardous air pollutant service as defined in §61.241 of this subpart; therefore, this subpart does not apply.
Sub-part	Title 40 CFR Part 63, NESHAP for Source Categories	Rule Applicability Review	
A	General Provisions	Y	This site is subject to a MACT standard and is, therefore, subject to the general provisions of this subpart.
H	National Emission Standards for Organic Hazardous Air Pollutants for Equipment Leaks	N	There are no facilities in organic HAP service (with at least 5% HAPs) at this site; therefore, this subpart does not apply.
HH	National Emission Standards for Hazardous Air Pollutants From Oil and Natural Gas Production Facilities	Y	This site is an area source of HAPs and operates a TEG dehydration unit, which is an affected source. The unit is exempt from the requirements of §63.764(d) for area source of HAPs per: <ul style="list-style-type: none"> • §63.764(e)(ii) – Actual annual average emissions of benzene from the glycol dehydration process vent to atmosphere are < 1.0 tpy. Records will be maintained according to §63.764(d)(1).
VV	National Emission Standards for Oil-Water Separators and Organic-Water Separators	N	This site does not operate an affected facility under this subpart; therefore, this subpart does not apply.
HHH	National Emission Standards for Hazardous Air Pollutants From Natural Gas Transmission and Storage Facilities	N	This site is not a major source of HAPs and is not part of the natural gas transmission and storage phase; therefore, this subpart does not apply.
YYYY	National Emission Standards for Hazardous Air Pollutants for Stationary Combustion Turbines	N	The site is not a major source of HAP emissions, therefore, this subpart does not apply.
EEEE	National Emission Standards for Hazardous Air Pollutants: Organic Liquids Distribution (Non-Gasoline)	N	This site is not a major source of HAPs; therefore, this subpart does not apply.
ZZZZ	National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines	Y	The engines (Unit IDs: C-100 through C-1200 and GEN2) are new stationary RICE located at an area source of HAPs and are an affected source. Per §63.6590(c)(1), the engines meet the requirements of this part by meeting the requirements of NSPS JJJJ.
DDDDD	National Emission Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers and Process Heaters	N	This site is not a major source of HAPs; therefore, this subpart does not apply.

State Regulations and Applicability and Discussion

Series	Title 45 Code of State Federal Rules for:	Rule Applicability Review	
2	To Prevent and Control Particulate Air Pollution from Combustion of Fuel in Indirect Heat Exchangers	N	<p>\$45-2-3.1 & 3.2 No person shall cause, suffer, allow, or permit emission of smoke and/or particulate matter into the open air from any fuel burning unit which is darker in shade or appearance than ten (10) percent opacity based on a six minute block average. Compliance shall be determined using Method 9.</p> <p>\$45-2-11.1 Exemption All fuel burning units having a heat input under ten (10) MMBTU/hr will be exempt from sections 4, 5, 6, 8 and 9. However, failure to attain acceptable air quality in parts of some urban areas may require the mandatory control of these sources at a later date.</p>
6	Control of Air Pollution from Combustion of Refuse	N/A	\$45-6-3.1 The open burning of refuse will not occur.
10	Prevent and Control Air Pollution from the Emission of Sulfur Oxides	N	\$45-10-10.1 Exemption Any fuel burning units having a design heat input under ten (10) MMBtu/hr will be exempt from section 3 and sections 6 through 8. However, failure to attain acceptable air quality in parts of some urban areas may require the mandatory control of these sources at a later date.
11	Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After 7/23/1984	Y	\$45-11-5.2 Any person responsible for the operation of a source of air pollutants not set forth under Section 5.1. of this Regulation shall, when requested by the Commission, prepare standby plans for reducing the emissions of air pollutants in accordance with the objectives set forth in Table I, II, and III of this Regulation.
13	Permits for Construction, Modification, Relocation and Operation of Stationary Sources of Air Pollutants, Notification Requirements, Administrative Updates, Temporary Permits, General Permits, Permission to Commence Construction, and Procedures for Evaluation	Y	The site has obtained a construction permit and will meet the requirements in this section.
14	Permits for Construction and Major Modification of Major Stationary Sources for the Prevention of Significant Deterioration (PSD) of Air Quality	N	\$45-14 establishes a preconstruction permit program for the PSD Program under the Clean Air Act. According to Section 2.43 of this rule, a Major Stationary Source is defined as any of the twenty six named sources listed in 2.43a which emits or has the potential to emit 100 tons per year or more of any regulated pollutant. Although the East Mountain Compressor Station will have the potential to emit over 100 tons per year of VOCs, it is not one of the twenty six named stationary sources and thus not defined a Major Stationary Source under the PSD Program by Section 2.43a. Additionally, Section 2.43b of this rule defines a Major Stationary Source as any stationary source which emits or has the potential to emit, 250 tons per year or more of any regulated pollutant. The East Mountain Compressor Station does not have the potential to emit 250 tons per year or more of any regulated pollutant, thus is not a Major Stationary Source under the PSD Program and 45CSR14 does not apply.
16	Standards of Performance for New Stationary Sources Pursuant to 40 CFR, Part 60	Y	The site will meet the applicable NSPS requirements as adopted by West Virginia Department of Environmental Protection.
19	Permits for Construction and Major Modification of Major Stationary Sources of Air Pollution Which Cause or Contribute to Nonattainment	N	The site is not a major source or modification for the purposes of 45 CSR 19.

State Regulations and Applicability and Discussion

Series	Title 45 Code of State Federal Rules for:	Rule Applicability Review	
20	Good Engineering Practice as Applicable to Stack Heights	Y	Antero will not seek credit greater than GEP in any future required dispersion modeling.
21	Regulation of Volatile Organic Compounds (VOC)	N	This rule does not apply because the subject facility is not located in Putnam County, Kanawha County, Cabell County, Wayne County, or Wood County.
22	Air Quality Management Fee Program	Y	Antero paid the appropriate fee with the initial construction permit application.
27	To Prevent and Control the Emissions of Toxic Air Pollutants	N	§45-27-2.4 Exemption The definition of Chemical Processing Unit states : it does not include equipment used in the production and distribution of petroleum products providing that such equipment does not produce or contact materials containing more than 5% benzene by weight.
28	Air Pollution Emissions Banking and Trading	N	This rule does not apply. Antero does not choose to participate in the voluntarily statewide air pollutant emissions trading program.
29	Emission Statements for VOC and NO _x	N	§45-29-1 Exemption This rule does not apply because subject facility is not located in Putnam, Kanawha, Cabell, Wayne, Wood, or Greenbrier Counties
30	Requirements for Operating Permits	Y	This rule establishes an air permitting program that is consistent with Title V of the Clean Air Act. According to Section 3.1.a.1, any major source as defined by the rule, shall not operate except in compliance with a permit issued under this rule on or after the effective date of the operating permit program. Section 2.26.b defines a major source as any stationary source that directly emits or has the potential to emit 100 tons per year or more of any pollutant subject to regulation. However, because a compressor station is not one of the 44 named sources under 2.26.b, fugitives do not need to be included when determining the 100 ton per year threshold. Potential emissions of VOCs and NO _x from the East Mountain Compressor Station will be over 100 tons per year not including fugitive emissions, so the East Mountain Compressor Station is a major source as defined by this rule and applicable to 45CSR30. The East Mountain Compressor Station is applying for a permit under this rule within 12 months of the commencement of operation.
34	Emission Standards for Hazardous Air Pollutants for Source Categories Pursuant to 40 CFR, Part 63	Y	The site will meet the applicable MACT requirements as adopted by West Virginia Department of Environmental Protection.
38	Provisions for Determination of Compliance with Air Quality Management Rules	N	§45-38-3 Exemption There are no rules enforceable by the Director that have undefined compliance determination procedures or such compliance determination procedures have not been authorized and adopted by West Virginia Department of Environmental Protection.

SUPPLEMENT S2

Facility-wide Emissions Summary

Emissions Summary Total

Company:	Antero Midstream
Facility Name:	East Mountain Compressor Station
Facility Location:	Tyler County, West Virginia
