

# Compliance Bulletin

## Division of Mining and Reclamation (DMR) – Hydrologic Protection Unit (HPU) will no longer mail paper copies of the Final NPDES permit.

These procedures will reduce efforts and expense for DMR as well as the regulated community and will expedite final permit notification and distribution.

- Final permits will be uploaded as an attachment to the eSS application in the new Facts & Findings Section. This is for all HPU application types including the Individual Water Quality State 401 Certification (NP401).
- Applicants and parties with assigned association to an application, in eSS, will be notified of the final application decision via FINAL ACTION EMAIL NOTIFIER. A link in the email will open the eSS application where you can view and download the final permit from the Facts and Findings Section.
- In Application Extender (AX), a link to the eSS application will direct interested parties to the eSS application where they can view and download the final permit from the Facts & Findings Section.
- The Facts & Finding Section will only be in applications **created on or after May 5, 2025**. Any application created before this date will not have Facts & Finding Section and you will get your Final Permit as before.
