## Division of Mining and Reclamation DMR Submission Date Change

west virginia department of environmental protection

- Currently National Pollution Discharge Elimination System (NPDES) permits require that Discharge Monitoring Reports, (DMRs) be filed on or before the 20<sup>th</sup> day of the month following the end of the monitoring period specified in the permit.
- As of April 1, 2018, the Department of Environmental Protection, Division of Mining and Reclamation (DEP DMR), will now require filing of DMRs for NPDES permits on or before the 25<sup>th</sup> day of the month following the end of the monitoring period. NPDES permits issued, modified, or reissued after that date will reflect this change.
- The DMR system has been adjusted so that DMRs filed on or before the 25<sup>th</sup> day of the month following the end of the monitoring period, specified in the permit, are not deemed to be late.
- Permits need not be modified to take advantage of this change in the reporting deadline. However, any permittee who wishes to make the change formally in its permit may apply to the DEP DMR/HPU for a minor modification.

If you have any questions, please contact Mary McDonald at (304) 926-0499 extension 1527.
