

EARTH BINGO

Recycled Water Bottle Wind Spirals

How To Make a Plastic Bottle
Wind Spiral
Level of Difficulty: Easy

Materials Needed:

- Empty Plastic Water Bottle
- Permanent Magic Markers in assorted colors. (Sharpies work great!)
- Scissors

Instructions:

1. Remove labels from your bottle.
2. Using the permanent markers, color your water bottle(s) entirely. It will look like stained glass.
3. Cut off the very bottom of your bottle, then cut the rest of the bottle into a spiral leaving the shoulder and neck of the bottle intact.
4. Slide the neck of the bottle over a shepherd's hook, tree branch, or stick and watch it bounce and dance in the wind!

Hint: For an even bigger effect, hang multiple bottles together.
