

Internship with WVDEP – Office of Environmental Remediation

Support small communities!
Protect public health!
Safeguard WV's environment!

WVDEP's Office of Environmental Remediation consists of the following programs:

Voluntary Remediation Program
Brownfields Assistance Program
Superfund Program

The Office of Environmental Remediation's (OER) goal is to aid local governments, nonprofits, developers, and landowners in the redevelopment of properties with perceived or confirmed environmental contamination. The OER seeks to protect human health and the environment by managing the assessment and cleanup of these properties.

What we do:

- Community Outreach
- Site Assessments
- Development of Remediation Plans
- Oversight of Remediation Work
- Long-term Institutional Control Oversight
- And much more!

OER interns will have the opportunity to participate in both office work and fieldwork duties. Working closely with environmental professionals, interns will have the opportunity to visit active sites, develop connections with our partners throughout the state, and learn the ins and outs of environmental remediation. Help us turn eyesores into assets and support West Virginians in recreating their communities!

Interns may work out of the WVDEP Fairmont Office located at 1000 Technology Drive in Fairmont, WV. Statewide travel and a driver's license are required for the internship.

Ready to learn a lot and have fun this summer? For more information, contact Erin Brittain at Erin.R.Brittain@wv.gov.
