Fact Sheet

C. I. McKown & Son, Inc. / Class 2 UIC Permit Number 2D08701106004

Purpose of Fact Sheet

The purpose of this fact sheet is to briefly describe the principal facts and considerations that went into preparation of the draft permit as required in 47 CSR 13-13.31.

Facility Description

C. I. McKown & Son, Inc. operates a Non-Commercial Class 2 Underground Injection Control (UIC) facility in Smithfield District, Roane County, West Virginia that is permitted to inject Class 2 compliant fluid associated with oil and natural gas production.

Public Participation

Per 47 CSR 13-13.24.b.1 the public has thirty (30) days to review and comment on Class 2 UIC draft permits. As part of the draft permit, a public notice is developed by WVDEP, and the permittee is responsible for a Class I legal advertisement.

The public comment period for the above named UIC permit will begin on April 27, 2023, and end on May 27, 2023. All written comments on the draft permit can be mailed to:

West Virginia Department of Environmental Protection
Office of Oil and Gas
Attn: UIC Program
601 57th Street SE
Charleston, WV 25304

Comments may also be faxed to (304) 926-0452, Attn: UIC Program, or e-mailed to DEPOOOGEP@wv.gov with “UIC Comments” in the subject line. Please include an email or street address for reply.

Promoting a healthy environment.
WVDEP will review and consider all comments filed within the public comment period. A response to all significant comments will be made by WVDEP. Subsequent to review and consideration of comments, a final decision to reissue or deny the permit application will be made.

**Summary of Permit Conditions**

The permit is developed to help ensure and protect human health and the environment.

The permit authorizes injection of Class 2 compliant oil and gas waste liquids into the Big Injun Sandstone at a depth of 1,997 feet to 2,035 feet. The well is known as Perot Lot 1, Well 2 (API 4708701106).

The Class 2 UIC wells have a calculated maximum injection pressure below the formation parting pressure to ensure the injection zone and the confining layer(s) are not fractured. The maximum permitted wellhead injection pressure is 601 psi.

The facility is permitted as a Non-Commercial operation and can only accept Class 2 compliant fluids sourced from oil and gas wells and associated facilities owned by the Permittee.

The Class 2 UIC wells shall be constructed, monitored, operated, and tested to help ensure protection of Underground Sources of Drinking Water (USDWs).

The Class 2 UIC wells have surface casing with cement circulated to surface. In addition, the wells have long string casing with cement above the injection formation.

The Class 2 UIC wells shall be tested for integrity at the casing-tubing-packer at least once every five (5) years.

The Class 2 UIC wells shall have piping, connecting any pumps and the well, pressured tested at least once every five (5) years.

The Class 2 UIC wells shall be monitored daily for injection pressures, rates, and volumes. The injection reporting results shall be submitted to WVDEP.

The Class 2 injected fluid shall be sampled and analyzed at least once a year. The injectate reporting results shall be submitted to WVDEP.

**Area of Review**

Every five (5) years the permittee is required to investigate and document all active, abandoned, and plugged wells within a ¼ mile fixed radius of the injection well, which could be potential conduits for injection fluids.

At least every five (5) years the permittee shall sample all domestic water wells (sources) within the area of review.
**Duration of Permit**

Permits for Class 2 UIC wells are valid for a period of five (5) years. Note: The permittee can apply to renew a UIC permit, no later than one hundred and eighty (180) days prior to the expiration date.
